ADDRESS: Comments should be addressed to Dr. Daniel B. Dunham, Deputy Commissioner, Bureau of Occupational and Adult Education, Office of Education, 400 Maryland Avenue, SW., Wahington, D.C. 20202.

FOR INFORMATION CONTACT: Sharon Berard, Planning Office, (202) 245-8176.

SUPPLEMENTARY INFORMATION: The Bureau of Occupational and Adult Education (BOAE) is in the process of developing and implementing a long-range master plan based upon the mission of the Bureau. This master plan identifies eight specific priorities for increased Federal involvement in vocational education programs. It is the development of strategies to impact on these priorities that BOAE and the Coordinating Committee for Research in Vocational Education are seeking field input. Suggested ideas are requested for applied research, demonstration, curriculum development, and personnel development projects, as well as for general leadership activities for BOAE and the member agencies of the Coordinating Committee, which are the Office of Career Education and the Bureau of Occupational and Adult Education of the U.S. Office of Education, the Fund for the Improvement of Postsecondary Education, and the National Institute of Education. Please reference the eight priority areas for any comment, issue, need or suggested area of study.

Priorities

1. *The Education-Work Connection.*—Vocational education must increase its efforts to serve as deliverer of education for work. The transition from education to work is interwoven with critical State and national initiatives for reducing youth employment, for job placement, and most importantly, for job development. A major emphasis must be the elimination of the barriers between school and work and the establishment of linkages among vocational education, CETA prime sponsors, and other Federal and State education programs.

2. *Urban/Rural Youth Programs.*—Unemployment rates for youth are extremely high, even at a time when the total unemployment rate has dropped. Recognizing that urban and rural areas do not have identical problems, youth in these areas share the common problem of high unemployment. Since the unemployment rate for youth who have completed vocational education is generally lower than for those who have not, approaches and strategies must be developed to increase the participation rates of both urban and rural youth in vocational education programs.

3. *Program Availability and Accessibility-Emphasis: Adults.*—Currently, there are barriers existing which limit the accessibility to vocational education for those who need or desire it—barriers in terms of facilities, equipment, out-reach, and support services. For example, programs are often restricted to the schoolhouse when many could be successfuly operated at the workplace. In addition, alternatives must be increased for eccouraging adults to participate in upgrading and retraining courses. Federal, State, and local barriers limiting access to programs must be identified and eliminated.

4. *Planning, Accountability and Data.*—Planning, accountability, and data systems must be improved, expanded, and extended to all aspects of the vocational education enterprise. Improvements in this area have occurred and are continuing through the efforts of the National Occupational Information Coordinating Committee (NOICC) and the planned implementation of the Vocational Education Data System (VEDS). However, these efforts must be

expanded. Good data, good planning, and good evaluation are necessary for managing resources and producing better results.

5. *Guidance for Vocations.*—The capacity in vocational education for providing vocational development guidance and counseling programs and services must be enlarged. Having good up-to-date information about careers and occupations is essential to achieving responsiveness in the guidance system. Young people and adults must be assessed to determine individual interest, aptitude, and ability, and occupational choices should be based upon real work knowledge. Support must be provided to enable change in careers at all stages of life.

6. *Vocational Equity.*—This is a time of transition in the roles of both men and women. Issues surface daily surrounding problems of displaced homemakers and of men and women desiring to enter non-traditional occupations. Sex role biases and stereotypes must be removed if vocational education is to be responsive to the desires and needs of all individuals. Pub. L. 94–482 lays the groundwork for the vocational education effort to achieve equity, but it is just a beginning. Other issues which need emphasis include age, race, and national origin, while at the same time, greater effort must be given to identifying and removing all forms of bias, stereotyping, and discrimination.

7. *Special Needs: The Handicapped and Disadvantaged.*—Meeting the special needs of those persons who cannot succeed in a regular program of vocational education without special assistance continues to be a pressing priority for the Federal effort. A better job must be done of identifying those with special needs and then meeting those needs. The Education of all Handicapped Children Act furthers this effort for the handicapped, but the needs of the disadvantaged, including the incarcerated have yet to be addressed adequately.

8. *Basic Skills.*—The separatist concept of the "academic" versus the "vocational" delivery system within our public school setting is no longer useful. Basic educational skills are essential to all persons, and vocational education must complement basic skills/remedial programs if persons are to succeed in vocational education programs. Improving the proficiency in reading, writing, and speaking of persons with limited English-speaking ability is an essential aspect of basic skills development. Both academic and vocational programs should complement and further one another in producing persons who are prepared to function responsibly in a working world.

Invitation to Comment. Persons or organizations wishing to provide comments and suggestions on these eight priorities are invited to send the comments and suggestions in the form of letters, briefs, or memoranda to the Office of Education at the address indicated above. Proposals should not be submitted. If proposals are submitted, they will be returned to the sender without review.

In order to be assured of full consideration, comments must be received on or before the date the comment period ends.

(Catalog of Federal Domestic Assistance Nos. Vocational and Adult Education—13.400, 13.493, 13.494, 13.495, 13.498, 13.499, 13.500, 13.503, 13.558, 13.578, 13.585, 13.587, 13.588)

Dated: June 6, 1979.

Ernest L. Boyer,

U.S. Commissioner of Education.

BILLING CODE 4110-02-M

Desegregation of Public Education; Closing Date for Transmittal of Applications for Fiscal Year 1979; Desegregation Assistance Centers

Applications are invited to provide sex desegregation assistance in the service area covering the following States: North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Kentucky, and Tennessee.

Authority for this program is contained in section 403 of Title IV of the Civil Rights Act of 1964, as amended (45 U.S.C. 2000c et seq.).

Public agencies (other than State education agencies or school boards) and private, nonprofit organizations are eligible for an award under this program.

The purpose of the award is to provide technical assistance (including training) in the preparation, adoption, and implementation of plans for sex desegregation. This includes assistance in solving educational problems resulting from that desegregation.

The Commissioner of Education is authorized under 45 CFR 180.36(b) to approve the continuation of existing Sex Desegregation Assistance Center awards if the Centers meet the criteria in that section. The Commissioner has used this authority to continue the awards of nine of the ten existing Centers for a period of one year. This notice covers only the one remaining service area, described above.

Closing Date for Transmittal of Applications: Applications for an award must be mailed or hand delivered by July 27, 1979.

Applications Delivered by Mail: An application sent by mail must be addressed to the U.S. Office of Education, Application Control Center, Attention: 13.405D, Desegregation Assistance Centers, Washington, D.C. 20202.

The Commissioner of Education prefers a legible U.S. Postal Service dated postmark or a legible mail receipt with the date of mailing stamped by the U.S. Postal Service as proof of mailing.

Note:—The U.S. Postal Service does not uniformly provide a dated postmark. Applicants should check with their local post office before relying on this method.

Applicants are encouraged to use registered or at least first-class mail.

Each late applicant will be notified that its application will not be considered in the current competition.

Applications Delivered by Hand: An application that is hand delivered must be taken to the U.S. Office of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets S.W., Washington, D.C. The Application Control Center will accept hand-delivered applications between 8 a.m. and 4 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays and Federal holidays.

Applications that are hand delivered will not be accepted after 4 p.m. on the closing date.

Available Funds: A total of approximately $3,350,000 is available for all ten Desegregation assistance centers in fiscal year 1979. At present Center awards range in amount from $240,557 to $350,799.

This estimate does not bind the U.S. Office of Education except as may be required by the applicable statute and regulations.

Application Forms: Application forms and program information may be obtained by writing to the Divisions of Technical Assistance, Equal Educational Opportunity Programs, U.S. Office of Education, 400 Maryland Avenue S.W., Washington D.C. 20202.

An application must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package.

Project Period: The new award made under this notice will be for a project beginning no earlier than July 1, 1979, and ending no later than September 30, 1980, but in no case for more than 12 months.

Applicable Regulations: The award made under this notice will be subject to: (a) the Office of Education general provisions regulations (45 CFR Parts 100 and 100a), except to the extent that those regulations are inconsistent with 45 CFR Part 180, and (b) regulations relating to programs under Title IV of the Civil Rights Act of 1964 (45 CFR Part 180).

Further Information: For further information contact Ms. Delia Alpert, Acting Director, Division of Technical Assistance, EEOP, U.S. Office of Education (Room 2181–J, FOB–6) 400 Maryland Avenue S.W., Washington, D.C. 20202. Telephone: (202) 245–8840.

(42 U.S.C. 2000c–2000–5)

BILLING CODE 4110-02-M

Office of Human Development Services

[Program Announcement No. 13612-792]

Administration for Native Americans; Training and Technical Assistance Program

AGENCY: Administration for Native Americans.

SUBJECT: Announcement of availability of grant funds for the Traing and Technical Assistance Program.

SUMMARY: The Administration for Native Americans (ANA) announces that applications are being accepted for training and technical assistance (T & TA) program grants under section 804 of the Native Americans Program Act of 1974, Pub. L. 93–644 as amended, by Pub. L. 95–568. Regulations covering this program are published in the Code of Federal Regulations in 45 CFR 1336.

DATES: Closing dates for the receipt of applications are scheduled on a staggered basis, according to grantees' program year end (PYE). The purpose for multiple closing is to enable grantees with differing PYE's to compete for funds under this program announcement and to ensure grantees' adherence to the requirement that the proposed specialized Training and Technical Assistance projects will be integrated with the regular ANA grant applications.

Closing dates follow:

1. November 15, 1979 for PYE 10/1—December 31, 1979.
2. February 15, 1980 for PYE 1/1—March 31, 1980.
3. May 15, 1980 for PYE 4/1—June 30, 1980.
4. August 15, 1980 for PYE 7/1—September 30, 1980.

Program Purpose

The purpose of the ANA supported technical assistance is to strengthen grantees' capabilities in the areas of planning, management, administration, and service delivery. The assistance also focuses on enabling grantees to identify barriers to community organization and to resource mobilization, and to subsequently develop strategies to overcome these barriers.

ANA supported training assists grantees to develop or improve the leadership capabilities of their governing bodies and their community members. These leadership and management capabilities provide the organizational stability necessary for grantees to accomplish socio-economnic growth.

Program Goal and Objectives

The goal of the program under this announcement is to provide grantees selected through a competitive process the opportunity to directly purchase specialized training and/or technical assistance which will result in the achievement of a quantifiable objective. The proposed project must be integrated with and complementary to the grantees' proposed regular ANA grant application and must support successful, measureable achievement of the goals and objectives stated in the grant renewal proposals. Applicants should address needs which are not otherwise addressed through training and technical assistance provided under ANA contract.

Proposed training and technical assistance projects must be clearly correlated with the grantees' organizational goals and objectives. Applicants must define, in quantifiable terms, the manner in which the proposed training and technical assistance will impact on achievement of their goals and objectives.

Proposed projects may address one or more of the activities listed below or other activities within the scope of the applicants' renewal application under social and/or economic development;

1. To assist applicants to influence Federal, State, and local decision-making processes which affect or have the potential to affect the Native American community.

This activity would be designed to:

(a) Achieve Federal recognition where necessary;

(b) Identify individuals and agencies at Federal, State, and local levels which have primary control over allocation of services and resources;

(c) Increase Native American participation on boards, commissions and/or committees involved in the planning processes of civic, political, social and economic agencies or organizations.

2. To assist applicants to promote changes in the method of providing local service delivery to make it more responsive to the Native American population's needs and environment.

This activity would be designed to:

(a) Increase coordination of the various social and economic efforts of public and private agencies responsible for providing services to Native Americans.

This may include initiating requests for joint funding, joint monitoring, etc.

(b) Improve knowledge of and sensitivity to Native American cultural factors on the part of Federal, State and local officials and service providers.

3. To assist applicants to mobilize Native and non-Native American resources of volunteer time and monetary donations.

This activity would be designed to: (a) Increase the amount of free assistance given directly to grantee clientele from community lawyers, doctors, dentists, etc.;

(b) Increase the amount of free time contributed to grantee organizations from carpenters, painters, plumbers, van drivers, etc.;

(c) Increase the commitment of free or reduced rate courses for Board, staff or clientele training given by a local educational institution;

(d) Increase contributions to the unrestricted fund as well as contributions of food, clothing, items for basic house repairs, etc.

Training and technical assistance may be directed to leadership development in decision-making skills, public administration, negotiation skills, fundraising techniques, public speaking and public relations, etc.

Note.—Applications for consultant services for proposal writing will not be considered for funding.

In addition, costs will not be allowed for the hiring of staff, nor for any overhead or indirect costs.

Applicants are required to include as part of the application, a one (1) page executive summary highlighting the problem areas to be addressed, proposed objectives, summary of

proposed activities, anticipated accomplishments, and overall cost data.

Applications must include a section on how the grantee intends to monitor and evaluate the implementation and progress of the proposed training and technical assistance project. Costs required for such monitoring should be specified as should the time periods during which monitoring will occur.

Recipients of grants under this Program Announcement will be required to comply with DHEW financial reporting and program progress reporting regulations published in 45 CFR 74. The information contained in these quarterly reports should clearly identify cost and effectiveness of this project.

The new project funds are intended to supplement and not replace other ANA training and technical assistance resources available to the grantees. Applicants are required to identify in the application all available training and technical assistance resources, including those from ANA and other federal, state, community and private sources. All applicants must include in their proposals, plans specifying the utilization and coordination of these resources and detailing ways in which the grantee organizations will insure training and technical assistance project linkages. In addition, assurance must be provided that the proposed project will not duplicate training and technical assistance services supported by another federal, state, or local agency.

Applications shall include written statements that contracts awarded under grant will specifically state the terms and conditions, work to be performed, time frames for consultant contracts.

Budget Period

These one-time grants will be for a period of twelve months, and consistent with the grantees' regular ANA budget period.

Eligible Applicants

Only organizations which are current ANA grant recipients are eligible to apply for funding under this Program Announcement. ANA grantees funded for research projects are not eligible.

Available Funds

The Administration for Native Americans expects to award approximately $145,000 in fiscal year 1980 for new projects under this training and technical assistance program. It is expected that between ten (10) and fifteen (15) grants will be awarded pursuant to this announcement. Up to four (4) grants are expected to be awarded during each quarter of the federal government fiscal year.

Grantee Share of Project

Grantees will provide 20% of the approved cost of the project. Grantees' contributions may be in cash or in kind, fairly evaluated, including, but not limited to, plant, equipment, and services. The contribution must be project related and must be allowable under the Department's applicable regulations in 45 CFR Part 74, Subparts Q and G.

Under certain circumstances, some or all of the non-Federal share of the project may be waived by ANA. Further explanation is contained in section 1336.52 of ANA's Regulations which will be provided in the Application Kit.

The Application Process

Availability of application forms. In order to be considered for grants under the Training and Technical Assistance Program, an application must be submitted on the forms supplied in the manner prescribed by ANA. An application kit containing the necessary forms may be obtained from:

Administration for Native Americans, Room 357–G, Hubert H. Humphrey Bldg., 200 Independence Ave. S.W., Washington, D.C. 20201. Attention: 13612–792 (202–426–3940). Attention: Ms. Janice Phalen.

For clarification or further explanation of the program announcement, call Ms. Geraldine Farrell (202–426–4055).

Application submission. One signed original and six copies of the grant application, including all attachments, must be submitted to the address specified in the application kit.

The application shall be executed by an individual authorized to act for the applicant agency and to assume for the agency the obligations imposed by the terms and conditions of the grant award, including Native American Programs Rules and Regulations.

A–95 notification process. In compliance with the Department of Health, Education and Welfare's implementation of the Office of Management and Budget Circular No. A–95 Revised (interim procedures at 41 FR 3160, July 29, 1976), applicants, with the exception of Federally recognized tribes, who request grant support must, prior to submission of an application, notify both the State and Areawide Clearinghouses of the intent to apply for Federal assistance. Some State and Areawide Clearinghouses provide their own forms for the notification of intent and others use the facesheet (Form 424) of the application form. Applicants should contact the appropriate Clearinghouses (listed at 42 FR 2210, January 10, 1977) for information on how they can meet the A–95 requirements.

Prospective grantees should contact their local and state A–95 Clearinghouses *immediately* to initiate pre-notification procedures. So doing will greatly reduce the time required to comply with OMB circular A–95.

Application consideration. The Commissioner for the Administration for Native Americans (in conjunction with the Regional Administrator for urban grantees) determines the final action to be taken with respect to each grant application for this program. Applications which do not conform to this announcement or are not complete will not be accepted for review and applicants will be notified in writing accordingly. Applications which are complete and conform to the requirements of this program announcement are subjected to a competitive review and evaluation by qualified persons independent of the Administration for Native Americans. The results of the review assist the Commissioner (and Regional Administrator where appropriate) in the consideration of competing applications. The Commissioner's consideration also takes into account the comments of the A–95 Clearinghouse, the ANA staff, and other interested parties.

After the Commissioner (and Regional Administrator where appropriate) has reached a decision either to disapprove or to fund a competing grant application, unsuccessful applicants are notified of the decision in writing. Successful applicants are notified through the issuance of a Notice of Grant Awarded.

The Commissioner (or Regional Administrator) makes grants awards consistent with the purpose of the Act, the regulations, and the program announcement within the limits of funds available. The official grant award document is the Notice of Grant Awarded (NGA). The NGA sets forth in writing to the grantee the amount of funds granted, the purpose of the grant, the terms and conditions of the grant award, the effective date of the award, the budget period for which support is given and the amount of grantee participation. The NGA also specifies the total project period for which support is contemplated.

Criteria for Review and Evaluation of Applications

Competing grant applications will be reviewed and evaluated against the following criteria:

1. Program Design (0–50 points). The quality of the program design as indicated by such factors as:

(a) Well defined problems to be addressed and demonstrated need for proposed project (10 points).

(b) Integration of proposed project with the applicants' regular ANA project goals and objectives (15 points).

(c) Specified steps for coordination of all ANA and non-ANA supported training and technical assistance resources (15 points).

(d) Plan for project implementation is adequate for successful task accomplishment and productive results (5 points).

(e) Proposed objectives are sharply defined, clearly stated, capable of being attained, and capable of being measured (5 points).

(f) The projected activity plan or milestones clearly outline the necessary steps to be taken in order to achieve the objectives (5 points).

(g) The proposed activities, if well executed, will achieve the project objectives (5 points).

2. Evaluation Design (0–15 points). The evaluation design details how progress toward meeting the proposed objectives will be measured.

3. Management and Organizational Capability (0–15 points). The soundness of the organizational capability as evidenced by such factors as: (a) The grantee's general administration and management capability (5 points). (b) The adequacy of facilities and other resources (5 points). (c) Demonstrated implementation of like projects as exemplified by achievement of objectives, adherence to grant conditions, and the governing body's assumption of responsibility (5 points).

4. Provision for the implementation of Indian Preference (0–10 points).

5. Budget (0–10 points). The budget is given in detail with justifications and explanations; estimated costs are commensurate with the level of effort needed to accomplish project objectives, and the reasonableness of project costs in relation to anticipated results.

Closing Date for Receipt of Applications

The closing dates for receipt of applications under this program announcement are:

1. November 15, 1979 for PYE 10/1—December 31, 1979.
2. February 15, 1980 for PYE 1/1—March 31, 1980.
3. May 15, 1980 for PYE 4/1—June 30, 1980.
4. August 15, 190 for PYE 7/1—September 30, 1980.

Hand delivered applications are accepted during normal working hours of 9 a.m. to 5 p.m. An application will be considered to have arrived by the closing date if: (a) the application is at the HDS Receiving Office on or before the closing date, or (b) the application is postmarked on or before the closing date as evidenced by the U.S. Postal Service postmark on the wrapper or envelope or by an original receipt from the U.S. Postal Service.

Late applications are not accepted, and applicants are notified accordingly.

BILLING CODE 4110-92-M

Administration on Aging Education and Training Programs

AGENCY: Office of Human Development Services, DHEW.

SUBJECT: Announcement of availability of *AoA Education and Training Program Plans and Guidelines, FY 1979.*

SCOPE: *AoA Education and Training Program Plans and Guidelines, FY 1979* contains information describing most career education and training activities administered by the Administration on Aging (AoA) authorized under title IV, parts A and E of the Older Americans Act of 1965, as amended (43 U.S.C. 3131d *et seq.* and 3036) for Fiscal Years 1979, 1980 and 1981. It describes all program competitions planned for this period by AoA's Office of Education and Training (OET), and proposed plans for DHEW regional decentralization of the administration of selected education and training activities currently monitored in Washington, D.C. Activities which are proposed for support by contract include: development of a national manpower policy for personnel in the field of aging, in-service curricula development, conference and technical assistance activities, and recruitment of minorities for career preparation and training in gerontology. Six (6) sets of guidelines for grant, and/or cooperative agreement competitions scheduled for Fiscal Year 1979 and early Fiscal Year 1980 comprise the main body of this document. Each of the competitions described (Gerontology Career Preparation Program, Geriatric Fellowship Program, Minority Research Associate Program, National Continuing Education Program, and the Long Term Care Gerontology and Aging Policy Study Centers) is announced separately in this issue of the Federal Register.

AVAILABILITY: Copies of *AoA Education and Training Program Plans and Guidelines, FY 1979,* will be sent to all present and former grantees and contractors, major educational institutions, and other non-profit organizations that have been identified or requested placement on a mailing list. Additional copies may be obtained by writing:

Office of Education and Training, AoA/OHDS/DHEW, Room 4280, HEW North Bldg., 300 Independence Avenue SW., Washington, D.C. 20201. Telephone: (202) 472–4683.

Dated: June 5, 1979.

Robert Benedict,

Commissioner on Aging.

Approved: June 7, 1979.

Arabella Martinez,

Assistant Secretary for Human Development Services.

BILLING CODE 4110-92-M

[Program Announcement No. 13637-791]

Gerontology Career Preparation Program

AGENCY: Office of Human Development Services, DHEW.

SUBJECT: Announcement of Competition for Grants for Gerontology Career Preparation Projects.

SUMMARY: The Administration on Aging (AoA) announces that applications are being accepted under title IV, part A, of the Older Americans Act of 1965, as amended (42 U.S.C., sec. 3031 *et seq.*) for career preparation grants in the field of aging.

DATE: Closing date for receipt of applications is August 13, 1979.

Scope of This Announcement

This program announcement is one of six (6) published in this issue of the Federal Register for grant and/or cooperative agreement competitions under title IV, parts A and E, of the Older Americans Act. Information describing these activities and other programs of the Office of Education and Training, Administration on Aging, is contained in *AoA Education and Training Program Plans and Guidelines, FY 1979.* Guidelines for the Gerontology Career Preparation Program are

included in a separate section of this document.

Program Purpose

The purpose of the Gerontology Career Preparation Program is to train persons for entry or re-entry into occupations which serve or benefit older Americans.

Program Goal and Objectives

Grants under this program are awarded to post-secondary educational institutions and to other public and private nonprofit institutions to establish or strengthen their capability to develop innovative programs of career preparation in the field of aging. For more than a decade, this grant program has assisted academic institutions to initiate and develop educational programs in gerontology by providing financial assistance for student incentive stipends, faculty salaries, and other costs related to program development and quality improvement. The relative maturity of these programs, combined with the new AoA program mandates in the 1978 Older Americans Act Amendments, have resulted in new or modified program objectives for Fiscal Year 1979 awards under this announcement. Support will be given for projects that provide career training for specific professions and occupations in areas, including, but not limited to, the following:

- Policy formulation, planning, and management, at Federal, State and Area levels in agencies or systems administered under, or directly related to the purposes of the Older Americans Act;
- Supervision of, or practice in, case management or services management at the system or service provider level in programs administered under, or directly related to the purposes of the Older Americans Act;
- Administration of, or practice in, the provision of health services, including mental health services, legal services, services delivered in community focal points such as multi-service senior centers, employment services including guidance and counseling services, services delivered in congregate housing, home care services, day care services, protective services, or transportation services funded through programs administered under, or directly related to the purposes of, the Older Americans Act;
- Administration of, or practice in, the provision of services to special populations such as older members of minority groups, the rural elderly, the inner cities elderly, or the developmentally disabled elderly funded through programs administered under, or directly related to the purposes of, the Older Americans Act.

Building the capacity of institutions of higher education to provide specialized career training in aging necessarily involves a carefully planned and integrated set of project activities.

Examples of the type of project activities which might be incorporated into a title IV–A Gerontology Career Preparation Program application are given below:

- Developing innovative gerontology curricula and instructional materials;
- Providing financial assistance to students for specific purposes, namely, the establishment of new careers responsive to Older Americans Act program priorities or a concerted attempt to recruit and train minority (Black, Hispanic, Asian and Pacific Islanders or Native Americans) in aging;
- Providing increased student opportunities for combining work and/or practical experience with study;
- Supporting field instructors to supervise field practicums;
- Providing student placement services for jobs serving the elderly;
- Developing effective methods of linking research training, and service in the field of aging;
- Using sophisticated information systems to stimulate the transfer of information and knowledge into the curricula of postsecondary educational institutions;
- Providing continuing education opportunities to upgrade the skills of persons now in priority careers linked to Older American Act programs; and
- Providing consultation to agencies that work with older people.

Both in recognition of the different gerontological program strengths among various types of potential applicants, and to promote equity in the competition for title IV–A support, AoA is establishing four (4) categories of applications:

(1) University-wide Projects
(2) Graduate and Professional School Projects
(3) Two and Four Year Undergraduate Projects
(4) Consortia Projects

Eligible Applicants

Any public or private post-secondary educational institution may apply for a grant under this announcement. A public or private non-profit agency, organization or institution may apply for a grant under the "Consortia" category, provided it is affiliated or has a letter of agreement with a post-secondary institution.

Available Funds

The Administration on Aging expects to award a maximum of seventy (70) new multiple project year grant awards in this program for Fiscal Year 1979. Anticipated funding and the number and range of awards for each of the four (4) program categories are:

University Wide

$3.0 million—18 to 24 awards of $130 to $150 thousand each.

Graduate and Professional School

$1.5 million—10 to 14 awards of $110 to $130 thousand each.

Two and Four Year Undergraduates

$2.0 million—20 to 24 awards of $80 to $100 thousand each.

Consortia

$1.5 million—7 to 9 awards of $180 to $200 thousand each. Awards will be made for project periods of nine (9) months to three (3) years depending upon application requests and/or AoA approval of project duration. The initial budget period will be for nine (9) months. Non-competing continuation funding beyond the initial nine (9) month budget period depends on satisfactory performance and availability of funds.

Grantee Share of the Project

Grantees are expected to provide five (5) percent of the total allowable project costs. The grantee share may be cash or in-kind, and must be allowable under the Department's applicable regulations published in 45 CFR Part 74, Subparts G and Q (see 43 FR 34076, August 2, 1978).

Indirect Cost Limitation

Indirect costs for the conduct of training by educational institutions may not exceed eight (8) percent of allowable direct costs.

The Application Process

Availability of Forms

Applicaiton for a Gerontology Career Preparation Program grant must be submitted on Standard Form 424, Application for Federal Assistance, and other forms provided for this purpose. Application kits and appropriate instructions are included in *AoA Education and Training Program Plans and Guidelines, FY 1979.*

Copies may be obtained by writing to: Office of Education and Training, Administration on Aging, Room 4228, DHEW North Building, 330 Independence Avenue, SW.,

Washington, D.C. 20201, telephone: (202) 472-4663.

Application Submission

One (1) signed orginial and four (4) copies of the grant application, including all attachments, must be prepared. The original and two (2) copies must be submitted to the address indicated in the application instructions. One (1) copy is to be submitted to the appropriate State Agency on Aging and one (1) copy is to be submitted to the Director of the DHEW Regional Office of Aging. Addresses for State Agencies on Aging and DHEW Regional Offices of Aging are included in the application instructions.

A-95 Notification Process

Not applicable.

Application Consideration

The Commissioner on Aging will make the final decision on each grant application under this announcement. Applications which are complete and conform to the requirements of the program guidelines will be subjected to a competitive review and evaluation by persons outside the Administration on Aging. The results of the peer review will assist the Associate Commissioner for Education and Training in considering competing applications and making recommendations for funding to the Commissioner on Aging. The Associate Commissioner will take into account comments of the State Agency on Aging and the DHEW Regional Office of Aging. Unsuccessful applicants will be notified in writing. Successful applicants will be notified through the issuance of a Notice of Grant Awarded. This notice sets forth the amount of funds granted, the terms and conditions of the grant, the budget period for which support is given, the total grantee share expected, and the total period for which project support is intended.

Criteria for Review and Evaluation of Applications

Competing grant applications will be reviewed and evaluated using the following criteria:

1. The degree to which the applicant demonstrates an understanding of the intent of AoA's Gerontology Career Preparation Program in providing personnel to carry out priority Older Americans program responsibilities. (20 points)

2. The responsiveness of the proposed project goals and activities to the objectives of the Gerontology Career Preparation Program. (40 points)

3. Capability and qualifications of the applicant institution and key staff to carry out the proposed project. (40 points)

4. Specificity of the implementation plan and its appropriateness for achieving project objectives, including the means the applicant will employ to place graduates in career positions in the field of aging. (40 points)

5. Adequacy of the applicant's plan for attracting to the program minority students and faculty (Black, Hispanic, Asian or Pacific Islander, or Native American), and for developing appropriate course content and practicum experience concerning the special needs of minority elderly. (30 points)

6. Commitment of the applicant institution to carry out the proposed project and the degree to which similar activities are likely to be carried out beyond the period of AoA support. (20 points)

7. Appropriateness and justification of the budget presentation with respect to its reasonableness in supporting the activities proposed in the application. (20 points)

Closing Dates for Receipt of Applications

The closing date for receipt of applications under this announcement is August 13, 1979. Applications may be mailed or hand delivered. Hand delivered applications will be accepted daily (except Saturdays, Sundays and Federal holidays) from 9:00 a.m. to 5:30 p.m., through August 13, 1979. Mailed applications received after the closing date will be accepted only if they show a U.S. Postal Service postmark or a U.S. Postal Service mail receipt of no later than August 13, 1979.

[Program Announcement No. 13637-792]

Geriatric Fellowship Program

AGENCY: Office of Human Development Services, DHEW.

SUBJECT: Announcement of the Competition for Grants for Geriatric Fellowship Projects.

SUMMARY: The Administration on Aging (AoA) announces that applications are being accepted under title IV, part A, of the Older Americans Act of 1965, as amended (42 U.S.C., sec. 3031 *et seq.*), for fellowship grants to develop medical school faculty in gerontology.

DATES: Closing date for receipt of applications is August 13, 1979.

Scope of this Program Announcement

This program announcement is one of six (6) published in this issue of the **Federal Register** for grant and/or cooperative agreement competitions under title IV, parts A and E, of the Older Americans Act. Information describing these activities and other programs of the Office of Education and Training, Administration on Aging, is contained in *AoA Education and Training Program Plans and Guidelines, FY 1979.* Guidelines for the Geriatric Fellowship Program are included in a separate section of this document.

Program Purpose

The purpose of the Geriatric Fellowship Program is to develop medical school faculty who will be trained and given experience in geriatric medicine to serve as educators and leaders in the training of current and future physicians and other health care providers.

Program Goal and Objectives

Grants will be awarded to medical schools to support three (3) year fellowships to physicians who are entering their third or fourth year of resident training in internal medicine, family practice and/or psychiatry. Fellows will complete a one (1) year residency with special geriatric focus and then serve a two (2) year faculty appointment for full time geriatric teaching and clinical responsiblities. Each grant award will support three (3) fellows whose three (3) year fellowships are scheduled to start and continue in a sequence covering the six (6) year project period. At the completion of the three (3) year fellowship, each physician will:

- Be knowledgeable about the organization and delivery of health services to older persons at the community level, and the public policy issues affecting the availability and acceptability of such services;
- Possess the appropriate knowledge and skills necessary to meet the diagnostic, therapeutic, and care management problems confronting patients in later years;
- Recognize the special physical, psychological and social needs of older

persons and design treatment accordingly;

• Have had an extensive experience in working with older persons in a variety of settings including ambulatory and institutional care (acute and chronic) as well as community based care and facilities (such as home care, day care and outreach programs); and

• Possess the necessary knowledge, skills and experience to approach, on a multidisciplinary basis, the mobilization of appropriate medical, social and related professional and program resources required to meet the short and long term needs of the older patient.

Eligible Applicants

Any institution with accredited programs of graduate medical education and residencies in internal medicine, family practice and/or psychiatry may apply for financial assistance under this announcement. Grants will not be awarded to individuals.

Available Funds

The Administration on Aging expects to make five (5) new multiple project year awards totalling $200,000 in Fiscal Year 1979. Each award will be approximately $40,000 for the first budget period of nine (9) months. Depending upon project performance of the grantee and availability of appropriations, non-competing continuation funding for the second and subsequent twelve (12) month budget periods is anticipated as follows:

	Total dollars	Average award
Fiscal year:		
1980	$275,000	$55,000
1981	450,000	90,000
1982	575,000	115,000
1983	450,000	90,000
1984	225,000	45,000

Recipient Share of the Project

Cost sharing is considered to be an important means of demonstrating an applicant's commitment to the objectives of this program. Grantee must provide at least one-half of the faculty salary of fellows in the third year of each fellowship. The grantee share may be cash or in-kind, and must be allowable under the Department's applicable regulations published in 45 CFR Part 74, Subparts G and Q (see 43 FR 34076, August 2, 1978).

Indirect Cost Limitation

Indirect costs for the conduct of training by educational institutions may not exceed eight (8) percent of allowable direct costs.

The Application Process

Availability of Forms

Application for a grant under the Geriatric Fellowship Program must be submitted on Standard Form 424, Application for Federal Assistance, and other forms provided for this purpose. Application kits and appropriate instructions are included in *AoA Education and Training Program Plans and Guidelines, FY 1979.*

Copies may be obtained by writing to: Office of Education and Training, Administration on Aging, Room 4286, DHEW North Building, 330 Independence Avenue, S.W., Washington, D.C. 20201, telephone: (202) 472-4883.

Application Submission

One (1) signed original and four (4) copies of the grant application, including all attachments, must be prepared. The original and two (2) copies must be submitted to the address indicated in the application instructions. One (1) copy is to be submitted to the appropriate State Agency on Aging and one (1) copy is to be submitted to the Director of the DHEW Regional Office of Aging. Addresses for State Agencies on Aging and DHEW Regional Offices of Aging are included in the application instructions.

A-95 Notification Process

Not applicable.

Application Consideration

The Commissioner on Aging will make the final decision on each grant application under this announcement. Applications which are complete and conform to the requirements of the program guidelines will be subjected to a competitive review and evaluation by qualified persons outside the Administration on Aging. The results of the peer review will assist the Associate Commissioner for Education and Training in considering competing applications and making recommendations for funding to the Commissioner on Aging. The Associate Commissioner will take into account comments of the State Agency on Aging and the DHEW Regional Office of Aging and priorities described under "Special Considerations for Funding." Unsuccessful applicants will be notified in writing. Successful applicants will be notified through the issuance of a Notice of Grant Awarded. This notice sets forth the amount of funds granted, the terms and conditions of the grant, the budget period for which support is given, the total grantee share expected, and the total period for which project support is intended.

Special Considerations for Funding

Special consideration will be given to applications which propose recruitment of minority (Black, Hispanic, Native American, and Asian or Pacific Islanders) candidates for fellowships under this program.

Criteria for Review and Evaluation of Applications

Competing grant applications will be reviewed and evaluated, using the following criteria:

1. The degree to which the background statement reflects the applicant's understanding of the intent of the Geriatric Fellowship Program, including, clarity of the statement, understanding of the health and related service needs of older people, and recognition of the need to address these problems along a continuum of care. (10 points)

2. The degree to which the project goals and objectives reflect the intent of the Geriatric Fellowship Program, including objectives which are realistic, relevant and obtainable. (15 points)

3 Specificity and appropriateness of the resources to be used in conducting this program, including behavioral education objectives, curriculum plan, multidisciplinary faculty, clinical resources, educational resources and the evaluation plan. (25 points)

4. Specificity of the implementation plan and its appropriateness to ensuring the accomplishment of project objectives, including plan for recruitment and selection of fellows and the arrangements within the medical specialties and health and allied health professions for achieving a multidisciplinary focus and interdisciplinary involvement. (25 points)

5. Commitment of the applicant institution to carry out proposed activities of the project and the degree to which similar activities will be continued beyond the period of AoA support. (15 points)

6. Appropriateness and justification of the budget presentation with respect to its reasonableness in supporting the activities proposed in the application. (10 points)

Closing Dates for Receipt of Applications

The closing date for receipt of applications under this announcement is August 13, 1979. Applications may be mailed or hand delivered. Hand delivered applications will be accepted

daily (except Saturdays, Sundays, and Federal holidays) from 9 a.m. to 5:30 p.m., through August 13, 1979. Mailed applications received after the closing date will be accepted only if they show a U.S. Postal Service postmark or a U.S. Postal Service mail receipt of no later than August 13, 1979.

[Program Announcement No. 13637-793]

Minority Research Associate Program

AGENCY: Office of Human Development Services, DHEW.

SUBJECT: Announcement of Competition for Grant Funds for Minority Research Associate Projects.

SUMMARY: The Administration on Aging (AoA) announces that applications are being accepted under title IV, part A, of the Older Americans Act of 1965, as amended, (42 U.S.C., sec. 3031 *et seq.*) for Fiscal Year 1980 grants strengthening the interest, participation and productivity of minority research associates in the field of aging.

DATES: Closing date for receipt of applications is September 20, 1979.

Scope of This Announcement

This program announcement is one of two new special activities under title IV, part A, of the Older Americans Act, which addresses the special education and training needs of minority group individuals with careers in the field of aging. The other activity, the Minority Recruitment Program, will be supported through award of contracts under the Small Business Administration's title 8(a) Minority Business Firm Program. Five (5) other grant program announcements for education and training activities under title IV, parts A and E, are announced separately in this issue of the Federal Register. Information describing these and other programs of the Office of Education and Training, Administration on Aging, are contained in *AoA Education and Training Program Plans and Guidelines, FY 1979.* Guidelines for the Minority Research Associate Program are included in a separate section of this document.

Program Purpose

The purpose of the Minority Research Associate Program is to provide opportunities for strengthening the interest, participation and productivity of minority (Black, Hispanic, Asian and Pacific Islander or Native American) scholars in performing research in the field of aging, particularly studies related to service provision and delivery to minority elderly.

Program Goal and Objectives

The goal of the Minority Research Associate Program is to enhance participation in aging research by experienced minority social scientists whose expertise could well be used in the field of aging. By encouraging increased efforts to expand the base of knowledge concerning minority aging, the Program will contribute to advances in public policies and programs on behalf of minority elderly. This goal is to be achieved through AoA support of projects designed to accomplished all of the following:

- Effectively recruit qualified minority social scientists from private research organizations, social service agencies and post-secondary educational institutions, particularly institutions with large minority enrollments;
- Provide extensive opportunities for education and research in gerontology;
- Foster research activity focused on improvement of services or service delivery, changes in Federal programs, or new policy recommendations benefiting minority elderly; and
- Recognize and be responsive to the cultural variations and different needs of minority elderly.

Eligible Applicants

Any public or private non-profit agency or organization may apply for grant support under this announcement. Grants will not be awarded to individuals.

Available Funds

The Administration on Aging expects to award $480,000 for this program in Fiscal Year 1980. Approximately eight (8) new two-year grants will be made with awards averaging $45,000 to $75,000 each per year. In Fiscal Year 1981, subject to availability of adequate funds, AoA intends to fund an additional seven (7) Minority Research Associate projects.

Recipient Share of the Project

Cost sharing is considered to be an important means of demonstrating an applicant's commitment to the objectives of this program. Grantees are expected to provide five (5) percent of the total allowable project costs. The grantee share may be cash or in-kind, and must be allowable under the Department's applicable regulations published in 45 CFR Part 74, Subparts G and Q (see 43 FR 34076, August 2, 1978).

Indirect Cost Limitation

Indirect costs for the conduct of training by educational institutions may not exceed eight (8) percent of allowable direct costs.

The Application Process

Availability of Forms

Application for a grant under the Minority Research Associate Program must be submitted on Standard Form 424, Application for Federal Assistance, and other forms provided for this purpose. Application kits and appropriate instructions are included in *AoA Education and Training Program Plans and Guidelines, FY 1979.*

Copies may be obtained by writing to: Office of Education and Training, Administration on Aging, Room 4286, DHEW North Building, 330 Independence Avenue, SW., Washington, D.C. 20201. Telephone: (202) 472-4883.

Application Submission

One (1) signed original and four (4) copies of the grant application, including all attachments, must be prepared. The original and two (2) copies must be submitted to the address indicated in the application instructions. One (1) copy is to be submitted to the appropriate State Agency on Aging and one (1) copy is to be submitted to the Director of the DHEW Regional Office of Aging. Addresses for State Agencies on Aging and DHEW Regional Offices of Aging are included in the application instructions.

A-95 Notification Process

Not applicable.

Application Consideration

The Commissioner on Aging will make the final decision on each grant application under this announcement. Applications which are complete and conform to the requirements of the program guidelines will be subjected to a competitive review and evaluation by qualified persons outside the Administration on Aging. The results of

the peer review will assist the Associate Commissioner for Education and Training in considering competing applications and making recommendations for funding to the Commissioner on Aging. The Associate Commissioner will take into account comments of the State Agency on Aging and the DHEW Regional Office of Aging and priorities described under "Special Considerations for Funding." Unsuccessful applicants will be notified in writing. Successful applicants will be notified through the issuance of a Notice of Grant Awarded. This notice sets forth the amount of funds granted, the terms and conditions of the grant, the budget period for which support is given, the total grantee share expected, and the total period for which project support is intended.

Special Considerations for Funding

In making grant awards under this announcement, the Commissioner will take into account the merits of achieving a balanced representation of the research associates among the four minority groups (Asian and Pacific Islanders, Blacks, Hispanics, and Native Americans).

Criteria for Review and Evaluation of Applications

Competing applications will be reviewed and evaluated against the following criteria:

1. Quality of the project design, including compatibility of the project with program objectives, adequacy of the recruitment plan for attracting qualified social scientists, clarity and specificity of project objectives, and feasibility and likely effectiveness of the project design. (30 points)

2. Specificity and appropriateness of anticipated project outcomes, including enhancement of professional capabilities and career opportunities of participating minority social scientists, and the production of research results that will be useful in developing programs responsive to the needs of minority elderly. (30 points)

3. Qualifications of the applicant and the minority research associate candidate(s) with respect to the applicant's commitment to the project, and the potential of the proposed minority research associate(s) for carrying out research in social gerontology. (30 points)

4. Reasonableness and appropriateness of the proposed budget. (10 points)

Closing Dates for Receipt of Applications

The closing date for receipt of applications under this announcement is September 20, 1979. Applications may be mailed or hand delivered. Hand delivered applications will be accepted daily (except Saturdays, Sundays and Federal holidays) from 9:00 a.m. to 5:30 p.m., through September 20, 1979. Mailed applications received after the closing date will be accepted only if they show a U.S. Postal Service postmark or a U.S. Postal Service mail receipt of no later than September 20, 1979.

BILLING CODE 4110-88-M

[Program Announcement No. 13638-791]

Multidisciplinary Centers of Gerontology Program: Long Term Care Gerontology Centers

AGENCY: Office of Human Development Services, DHEW.

SUBJECT: Announcement of Competition for Grants for Long Term Care Gerontology Center Projects.

SUMMARY: The Administration on Aging (AoA) announces that applications are being accepted under title IV, part E, of the Older Americans Act of 1965, as amended (42 U.S.C., sec. 3036), Multidisciplinary Centers of Gerontology Program, for grants to support development of Long Term Care Gerontology Centers.

DATES: Closing date for receipt of applications is August 27, 1979.

Scope of this Announcement

This program announcement is one of two (2) sets of activities under the Multidisciplinary Centers of Gerontology Program announced in this issue of the **Federal Register**. The other is a cooperative agreement competition for development and operation of Aging Policy Study Centers. Four (4) other grant and cooperative agreement competitions under title IV, part A (Career Training), of the Older Americans Act, are also announced in this issue. Information describing these activities and other programs of the Office of Education and Training, Administration on Aging, are contained in *AoA Education and Training Program Plans and Guidelines, FY 1979.* Guidelines for the Long Term Care Gerontology Centers are included in a separate section of this document.

Program Purpose

The purpose of the Long Term Care Gerontology Centers is to give financial assistance to institutions which engage in research and demonstration, education and training, technical assistance, and synthesis and dissemination of knowledge concerning issues, policies and programs affecting long term care of the chronically impaired elderly.

Program Goal and Objectives

The Administration on Aging has established as the goal of the Long Term Care Gerontology Centers the development of regional-level institutions which focus upon the broad issues of providing community-based service systems for chronically impaired older Americans. This goal is to be attained by support of a complex set of projects and activities in long term care of the elderly in collaboration with governmental, voluntary, and other public and private agencies and organizations serving the aged. Individual centers will be supported to pursue this goal by functioning as:

- Effective demonstrations of a full range of integrated health and social services geared specifically to the chronically impaired elderly;
- Ideal sites for training future health and social service professionals as members of multidisciplinary teams;
- Centers of excellence in continuing education for service providers who currently work, or will work, with impaired elderly;
- Research sites uniquely suited to social and health services research, especially policy-oriented research, on the delivery and effectiveness of services to the chronically impaired;
- Authoritative and resourceful providers to consumers and policy makers of up-to-date scientifically-based information concerning health maintenance and health policy issues; and
- Accessible and available providers of technical assistance to service agencies in the governmental and voluntary sectors.

The Administration on Aging intends to achieve the objectives set for the Long Term Care Gerontology Centers by supporting individual centers in two phases. In response to this program

announcement, applications will be considered for award of Phase I grants for a project period of one year. During Phase I, grantees will develop a program and secure necessary relationships with State and Area Agencies on Aging, health and social service providers and medical schools and other academic institutions not directly involved in submitting the application for Phase I support, but within the same DHEW region as the successful applicant. The culmination of Phase I support will be an application for Phase II or full-scale center operation. Phase I centers which successfully compete for Phase II support will conduct programs with the following functional components:

- Clinical services which provide a full spectrum of integrated health and social services to chronically impaired elderly;
- An educational and professional training program in the health and social sciences to develop manpower for meeting the service needs of the chronically impaired elderly;
- A research program addressing policy relevant issues in planning, organizing, administering, financing, and evaluating health and social service systems;
- Public information activities providing effective dissemination of new knowledge regarding chronic illness and impairment in the elderly with emphasis on early evaluation, intervention, techniques of self-care and maintenance of independent functioning; and
- Coordination and technical assistance activities with Area Agencies on Aging in their DHEW region and long term care projects funded under new initiatives of the Older Americans Act.

Eligible Applicants

Any university or public or private, non-profit health and social service organization may apply for financial assistance under this announcement, provided the applicant is affiliated or has a letter of agreement with a medical school to serve as a teaching facility for health and allied health professionals.

Available Funds

The Administration on Aging expects to make sixteen (16) to twenty-four (24) new one (1) year awards for Phase I Long Term Care Gerontology Centers in Fiscal Year 1979. Total funding anticipated for Phase I grants is $1.6 million. Each award is expected to range from $60,000 to $100,000 for the one (1) year project and budget year. Multiple project year awards in the form of cooperative agreements are expected under Phase II of this program. These grants will be competitively awarded in Fiscal year 1980. Each Phase II award is expected to be approximately $250,000 for the first twelve-month budget year, and $400,000 for each subsequent budget year for a total project period of three (3) years. Prior to the completion of the initial Phase II project period, the centers will be afforded the opportunity to compete for an additional two (2) years of title IV, part E, support. Phase II center projects are expected to seek support from other sources to augment funding for core functions in order to fulfill the long term expectations of this program. Sources of anticipated support include other Administration on Aging programs, and other Federal agencies with missions and interests in long term geriatric care, such as the National Institute on Aging, the Vererans Administration, and National Institute of Mental Health.

Recipient Share of the Project

Cost sharing is considered to be an important means of demonstrating an applicant's commitment to the objectives of this program. Grantees are expected to provide five (5) percent of the total allowable project costs. The grantee share may be cash or in-kind, and must be allowable under the Department's applicable regulations published in 45 CFR Part 74, subpart G and Q (see FR 34076, August 2, 1978).

Indirect Cost Limitation

Not applicable.

The Application Process

Availability of Forms

Application for a grant under the Long Term Care Gerontology Centers Program must be submitted on Standard Form 424, Application for Federal Assistance, and other forms provided for this purpose. Application kits and appropriate instructions are included in *AoA Education and Training Program Plans and Guidelines, FY 1979.* Copies may be obtained by writing to:

Office of Education and Training
Administration on Aging, Room 4266,
DHEW North Building, 330
Independence Avenue, SW.,
Washington, D.C. 20201. Telephone:
(202) 472-4683.

Application Submission

One (1) signed original and four (4) copies of the grant application, including all attachments, must be prepared. The original and two (2) copies must be submitted to the address indicated in the application instructions. One (1) copy is to be submitted to the appropriate State Agency on Aging and one (1) copy is to be submitted to the Director of the DHEW Regional Office of Aging. Addresses for State Agencies on Aging and DHEW Regional Offices of Aging are included in the application instructions.

A-95 Notification Process

Applications for Long Term Care Gerontology Centers must follow the provisions of OMB Circular A-95. Applicants for grants must, prior to the submission of an application, notify *both* the State and Areawide A-95 Clearinghouses of their interest to apply for Federal assistance for this program. Applicants should contact the appropriate State Clearinghouse (listed in 42 FR 2210, January 10, 1977), or DHEW Regional Offices of Aging for information on how they can meet the A-95 requirements. Addresses of the DHEW Regional Offices of Aging are included in the application instructions.

Application Consideration

The Commissioner on Aging will make the final decision on each grant application under this announcement. Applications which are complete and conform to the requirements of the program guidelines will be subjected to a competitive review and evaluation by qualified persons outside the Administration on Aging. The results of the peer review will assist the Associate Commissioner for Education and Training in considering competing applications and making recommendations for funding to the Commissioner on Aging. The Associate Commissioner will take into account comments of the State Agency on Aging and the DHEW Regional Office of Aging and priorities described under "Special Considerations for Funding." Unsuccessful applicants will be notified in writing. Successful applicants will be notified through the issuance of a Notice of Grant Awarded. This notice sets forth the amount of funds granted, the terms and conditions of the grant, the budget period for which support is given, the total grantee share expected, and the total period for which project support is intended.

Special Considerations for Funding

Special consideration for funding will be given to applicants that:

- Can document that a high proportion of residents in their service area are aged 75 and over, and/or reside in rural areas, and/or are members of a minority group (Blacks, Hispanics, Asians or Pacific Islanders, and Native Americans)

• Are affiliated with or have working agreements with a variety of service and care facilities for the elderly, including nursing home, day-care centers, senior centers, various health and social service programs as well as specialized housing for the elderly.

Criteria for Review and Evaluation of Applications

Competing grant applications will be reviewed and evaluated against the following criteria:

1. The degree to which the background statement reflects the applicant's understanding of the intent of the Long Term Care Gerontology Center Program. This will include consideration of clarity of the statement and understanding of need. (10 points)

2. The degree to which the project goals and objectives reflect the intent of the Long Term Care Gerontology Center Program. This will include consideration of the responsiveness to the program purposes outlined in Section 2 of the guidelines. (15 points)

3. Specificity and appropriateness of the resources to be used in approaching this project. This will include demonstrated administrative ability, appropriateness of staffing, adequacy of facilities, and past experience of the applicant and its affiliates. (25 points)

4. Specificity of the implementation plan and its appropriateness in ensuring the accomplishment of the developmental objectives. This includes consideration of the thoroughness, completeness, coherence and sophistication of the development grant proposal, including demonstrated awareness of existing models of continuum of services in the delivery of long term care to the chronically impaired (25 points)

5. Demonstrated commitment of the applicant institution to carry out the proposed project and the degree to which similar activities will be carried out beyond the period of AoA support. This includes the likelihood that the development grant, if awarded, will result in a detailed, comprehensive and realistic plan for a full scale Long Term Gerontology Center. (15 points)

6. Appropriateness and justification of the budget as to its reasonableness in supporting the activities proposed for achieving project objectives. (10 points)

Closing Dates for Receipt of Applications

The closing date for receipt of applications under this announcement is August 27, 1979. Applications may be mailed or hand delivered. Hand delivered applications will be accepted daily (except Saturdays, Sundays and Federal holidays) from 9:00 a.m. to 5:30 p.m., through August 27, 1979. Mailed applications received after the closing date will be accepted only if they show a U.S. Postal Service postmark or a U.S. Postal Service mail receipt of no later than August 27, 1979.

[Program Announcement No. 13630-792]

Multidisciplinary Centers of Gerontology Program: Aging Policy Study Centers

AGENCY: Office of Human Development Services, DHEW.

SUBJECT: Announcement of Competition for Cooperative Agreements for Aging Policy Study Center Projects.

SUMMARY: The Administration on Aging (AoA) announces that applications are being accepted under title IV, part E, of the Older Americans Act of 1965, as amended (42 U.S.C., sec. 3036), Multidisciplinary Centers of Gerontology Program, for cooperative agreements to support development of Aging Policy Study Centers.

DATES: Closing date for receipt of applications is September 4, 1979.

Scope of this Announcement

This program announcement is one of two (2) sets of activities under the Multidisciplinary Centers of Gerontology Program announced in this issue of the Federal Register. The other is a grant competition for development and operation of Long Term Care Gerontology Centers. Four (4) other grant and cooperative agreement competitions under title IV, part A (Career Training), of the Older Americans Act, are also announced in this issue. Information describing these activities and other programs of the Office of Education and Training, Administration on Aging, are contained in *AoA Education and Training Program Plans, and Guidelines, FY 1979.* Guidelines for the Aging Policy Study Centers are included in a separate section of this document.

Program Purpose

The Administration on Aging provides financial support under the Multidisciplinary Centers of Gerontology Program for Aging Policy Study Centers to encourage the development of organizational, personnel and other resources for the performance of activities that solve or significantly alleviate, social, economic or health related problems or conditions of impairment affecting older Americans.

Program Goal and Objectives

The Administration on Aging has established the following goals for Aging Policy Study Centers:

• The development of manpower and training resources capable of addressing major problems and issues affecting the planning, administration and delivery of services to the elderly;

• The generation and synthesis of new and existing knowledge from fields and disciplines relevant to the field of aging, and its specific application towards the development and testing of more effective policies affecting the delivery of services to the elderly;

• The development and support of organizational resources which encourage and facilitate interdisciplinary communication and work performance in a problem-focused multifunctional setting.

To achieve these goals, the Administration on Aging has established the following objectives for Aging Policy Study Centers:

• To develop consensus among various constituencies in the field of aging on the scope and nature of subject and problem-focused areas appropriate for consideration by the Aging Policy Study Centers;

• To set long-term goals for projects and activities that address problems affecting the well being of elderly citizens, including the study and assessment of policies and programs at Federal State and local levels of relevant focus;

• To develop and sustain organizational and leadership resources capable of sustaining multidisciplinary and interdisciplinary activities, including identification and support of knowledge building networks involving scholars, experts, practitioners and policy makers;

• To develop formal relationships with schools, departments and colleges in fields and disciplines relevant to

specific aging subject and problem areas for the exchange of faculty, development of educational programs and materials, and sharing of other resources.

The Administration on Aging expects that each Aging Policy Center will have a unique subject or problem area focus of national concern to the elderly. The nature and extent of this focus will affect the types of organizations and individuals who are expected to be involved in order for the center to achieve the program's goals and objectives. For this competition, the Administration on Aging has established nine (9) priority subject areas for Aging Policy Study Center projects. An applicant may select one (1) of these subject areas, or offer an alternative which it believes to be equally important under the legislative mandate of the Older Americans Act. The nine (9) priority areas are:

- Health
- Income Maintenance
- Housing and Living Arrangements
- Employment and Retirement
- Education, Leisure and Continuing Opportunities for Older Persons
- Family and Community Support Systems
- Older Women
- Aging in the Future Society
- Ethics and Values in the Aging Society

Method of Support

Support of all Aging Policy Study Center projects will be awarded in two phases using cooperative agreements. Cooperative agreements are a form of financial assistance, similar to grants, but which differ from grants in that substantial involvement is anticipated between the Administration on Aging and the recipient during performance of project activities. The level and type of involvement in Aging Policy Study Centers by AoA is specified in the application guidelines. In Phase I, centers will receive support for a fifteen (15) month budget and project period. A major activity for the first twelve (12) months will be the development of a long-range plan which addresses priority issues and concerns that emerge from discussions with relevant academic, practitioner and policy making communities. Phase I centers will also engage in activities of shorter term duration consistent with program goals and objectives. Phase II cooperative agreements will be awarded on a non-competitive basis to Phase I centers which successfully complete a formal review process for performance of the long range plan produced during Phase I. Phase II support will sustain core functions of centers and provide some assistance in performance of other project activities. Phase II centers, however, are expected to seek the support of other Administration on Aging programs such as title IV B (Research); other Federal agencies; and State, Area and other governmental agencies; and private, non-profit organizations of relevance to their unique subject area.

Eligible Applicants

Any public or private non-profit agency or organization may apply for support under this announcement.

Available Funds

The Administration on Aging expects to award $1 million for Phase I Aging Policy Study Centers in Fiscal Year 1980. It is anticipated that up to $1.25 million per year will be available for Phase II centers in Fiscal Years 1981, 1982, and 1983. A total of five (5) cooperative agreements will be awarded in December 1979 under this announcement. Each award is expected to be approximately $200,000 with a project period of fifteen (15) months. Support under Phase II cooperative agreements will be approximately $250,000 per year for a project period of thirty-eight (38) months.

Recipient Share of the Project

Cost sharing is considered to be an important means of demonstrating the applicant's commitment to the objectives of this program. Grantees are expected to provide five (5) percent of the total allowable project costs. The grantee share may be cash or in-kind, and must be allowable under the Department's applicable regulations published in 45 CFR Part 74, Subparts G and Q (see 43 FR 34076, August 2, 1978). It should be understood that applicants who hope to successfully apply for Phase II financial assistance should be able to demonstrate a willingness and ability to increase their own participation in support of this project and successfully solicit other sources of financial support related to the center's focus.

Indirect Cost Limitation

Not applicable.

The Application Process

Availability of Forms

Application for a grant under the Aging Policy Study Centers must be submitted on Standard Form 424, Application for Federal Assistance, and other forms provided for this purpose. Application kits and appropriate instructions are included in *AoA Education and Training Program Plans and Guidelines, FY 1979*. Copies may be obtained by writing to:

Office of Education and Training
Administration on Aging, Room 4266,
DHEW North Building, 330
Independence Avenue, SW.,
Washington, D.C. 20201. Telephone:
(202) 472-4683.

Application Submission

One (1) signed original and four (4) copies of the grant application, including all attachements, must be prepared. The original and two (2) copies must be submitted to the address indicated in the application instructions. One (1) copy is to be submitted to the appropriate State Agency on Aging and one (1) copy is to be submitted to the Director of the DHEW Regional Office of Aging. Addresses for State Agencies on Aging and DHEW Regional Offices of Aging are included in the application instructions.

A-95 Notification Process

Not applicable.

Application Consideration

The Commissioner on Aging will make the final decision on each application under this announcement. Applications which are complete and conform to the requirements of the program guidelines will be subjected to a competitive review and evaluation by qualified persons outside the Administration on Aging. Applications will be reviewed in three stages. During the first stage, applications will be sent to qualified experts in the field of aging, and to experts in the subject or problem area selected by the applicant. In the second stage, the results of the first stage will be considered by a review panel selected from participants in the first stage with representation by staff from other Administration on Aging programs, the Office of Human Development Services, and the Office of the Assistant Secretary for Planning and Evaluation in DHEW. The review panel will recommend leading applicants in Administration on Aging priority and applicant initiated subject areas. Review panel recommendations will be submitted to the Associate Commissioner on Aging for Education and Training. In the third, and final stage of proposal review, site visit teams consisting of AoA staff and participants from earlier stages of review, will visit each applicant recommended by the second stage review panel. The results of the peer review and the recommendations of the review panel

and the site visit team will assist the Associate Commissioner for Education and Training in considering competing applications and making recommendations for funding to the Commissioner on Aging.

The Associate Commissioner will take into account comments of the State Agencies on Aging and the DHEW Regional Offices of Aging. Unsuccessful applicants will be notified in writing. Successful applicants will be invited by letter from the Commissioner on Aging to enter into negotiations with the Administration on Aging and the Office of Human Development Services for award of a Phase I cooperative agreement. The actual award will be made through issuance of a Notice of Grant Awarded from the Office of Human Development Services. This notice sets forth the amount of funds awarded, the terms and conditions of the cooperative agreement, the budget period for which support is given, the total recipient share expected, and the total period for which project support is given.

Criteria for Review and Evaluation of Applications

Competing applications will be reviewed and evaluated against the following criteria:

1. Responsiveness of the applicant to the goals and objectives established by the Administration on Aging for Aging Policy Study Centers, including plans for integrating multidisicplinary and multi-functional activities and strategies for participation of outside interests in center planning amd performance. (40 points)

2. Adequacy of plans for performance of individual tasks, including mission development; short term knowledge building and synthesis activities; education and training program efforts; technical assistance activities; and development of knowledge and communication networks. (60 points)

3. Appropriateness and experience of key staff and consultants. (40) points)

4. Appropriateness and justification of the budget presentation with respect to its reasonableness in supporting the activities proposed in the application. (30 points)

5. Appropriateness of experience of the applicant institution and adequacy of its resources and facilities. (30) points.)

Closing Dates for Receipt of Applications

The closing date for receipt of applications under this announcement is September 4, 1979. Applications may be mailed or hand delivered. Hand delivered applications will be accepted daily (except Saturdays, Sundays and Federal holidays) from 8:00 a.m. to 5:30 p.m., through September 4, 1979. Mailed applications received after the closing date will be accepted only if they show a U.S. Postal Service postmark or a U.S. Postal Service mail receipt of no later than September 4, 1979.

BILLING CODE 4110-92-M

[Program Announcement No. 13637-794]

National Continuing Education Program

AGENCY: Office of Human Development Services, DHEW.

SUBJECT: Announcement of Competition for Grant or Cooperative Agreements for National Continuing Education projects.

SUMMARY: The Administration on Aging (AoA) announces that applications are being accepted under title IV, part A, of the Older Americans Act of 1965, as amended (42 U.S.C., sec. 3031 *et seq.*) for grant or cooperative agreements meeting the education and training needs of service personnel in the field of aging.

DATES: Closing date for receipt of applications is August 13, 1979.

Scope of this Announcement

This program announcement is one of six (6) published in this issue of the Federal Register for grant and/or cooperative agreement competitions under title IV, parts A and E, of the Older Americans Act. Information describing these activities and other programs of the Office of Education and Training, Administration on Aging, is contained in *AoA Education and Training Program Plans and Guidelines, FY 1979.* Guidelines for the National Continuing Education Program are included in a separate section of this document.

Program Purpose

The purpose of the National Continuing Education Program is to provide financial support for design, development and implementation of training activities meeting the continuing needs of public and private service practitioners and providers in the field of aging.

Program Goal and Objectives

Financial assistance under this program is awarded for projects which prepare continuing educators to design, develop and implement training programs in the field of aging. The program goal is to support projects which use a "train the trainer" approach. Projects are expected to design, develop and evaluate curricula and related activities for the conduct of workshops, institutes or courses for continuing educators. These educators and trainers will, in turn, use knowledge gained from these training programs to design, develop and conduct education and training activities within their own States, localities and regions. The ultimate beneficiaries of this program are administrators, practitioners, and providers of service to older persons in their homes and in such settings as hospitals, nursing homes, long term care facilities, day centers and hospitals, out-patient service departments, and community health and mental health centers. The program goal, and the needs of service practitioners and providers will be met by designing education and training activities meeting these content objectives:

- Identification and understanding of unique service needs of older adults;
- Familiarization and understanding of the functions and services provided to the aging service network, especially State and Area Agencies on Aging;
- Knowledge of and familiarity with the resources available to professionals who develop, implement, manage or provide staff development programs;
- Knowledge and skill development in the teaching modalities most useful for staff development activities used in training service practitioner and provider personnel; and
- Knowledge of continuing education organizations and systems.

The Administration on Aging has the following priorities for the National Continuing Education Program in Fiscal Year 1979:

- Staff development personnel in health, mental health, and long term care facilities (one award)
- Personnel in continuum of care services (two awards)
- Supervisors of home services (one award)

Design and development of curricula and activities that meet the above program objectives and priorities should consider the following strategies for dissemination and implementation:

- AoA's training and technical assistance activities in DHEW Regional Offices of Aging, and
- Placement of project materials in the public domain.

Eligible Applicants

Any public or private non-profit agency, organization or institution may apply for financial support under this announcement.

Available Funds

The Administration on Aging expects to award a maximum of four (4) new awards for this program, totaling $500,000 in Fiscal Year 1979. Each award will be approximately $100,000 to $150,000 for a budget period of twelve months. The project period may not exceed two (2) years.

Recipient Share of the Project

Cost sharing is considered to be an important means of demonstrating an applicant's commitment to the objectives of this program. Recipients are expected to provide five (5) percent of the total allowable project costs. The recipient share may be cash or in kind, and must be allowable under the Department's applicable regulations published under 45 CFR Part 74, Subparts G and Q (see 43 FR 34076, August 2, 1978).

Indirect Cost Limitation

Indirect costs for the conduct of training by educational institutions may not exceed eight (8) percent of allowable direct costs.

Types of Award

Awards will be made under this program by both grant and cooperative agreement. The cooperative agreement instrument will be used in those cases in which the Administration on Aging expects to have considerable involvement with the projects, such as jointly reviewing and approving of activities and products. The involvement shall not include identifying or directing the specific groups to be trained or specific content or curriculum to be developed. However, the Administration on Aging will jointly, with the recipient, approve on a general basis, the approach in carrying out the project.

The Application Process

Availability of Forms

Application for financial assistance under the National Continuing Education Program must be submitted on Standard Form 424, Application for Federal Assistance, and other forms provided for this purpose. Application kits and appropriate instructions are included in *AoA Education and Training Program Plans and Guidelines, FY 1979.*

Copies may be obtained by writing to: Office of Education and Training, Administration on Aging, Room 4266, DHEW North Building, 330 Independence Avenue, S.W., Washington, D.C. 20201, telephone: (202) 472-4683.

Application Submission

One (1) signed original and four (4) copies of the grant application, including all attachments, must be prepared. The original and two (2) copies must be submitted to the address indicated in the application instructions. One (1) copy is to be submitted to the appropriate State Agency on Aging and one (1) is to be submitted to the Director of the DHEW Regional Office of Aging. Adresses for State Agencies on Aging and DHEW Regional Offices of Aging are included in the application instructions.

A-95 Notification Process

Not applicable.

Application Consideration

The Commissioner on Aging will make the final decision on each grant application under this announcement. Applications which are complete and conform to the requirements of the program guidelines will be subjected to a competitive review and evaluation by qualified persons outside the Administration on Aging. The results of the peer review will assist the Associate Commissioner for Education and Training in considering competing applications and making recommendations for funding to the Commissioner on Aging. The Associate Commissioner will take into account comments of the State Agency on Aging and the DHEW Regional Office of Aging and priorities described under "Special Considerations for Funding." Unsuccessful applicants will be notified in writing. Successful applicants will be notified through the issuance of a Notice of Grant Awarded. This notice sets forth the amount of funds granted, the terms and conditions of the grant, the budget period for which support is given, the total grantee share expected, and the total period for which project support is intended.

Special Considerations for Funding

Special consideration will be given to projects which emphasize development of curricula and course content that address the needs and concerns of minority older persons (black, Hispanic, Asian and Pacific Islander, or Native American); those living in rural, isolated areas; low income; and chronically ill or impaired older persons.

Criteria for Review and Evaluation of Applications

Competing applications will be reviewed and evaluated using the following criteria:

1. The significance of the proposed project with respect to the state of the art in continuing education activities in the field of aging, including adequacy in addressing current deficiencies and factors contained in the applicant's approach that clearly indicate the extent of the contribution to be made by funding this project. (25 points)

2. The reasonableness and specificity of the applicants proposal with respect to the program objectives, including their appropriateness for measuring progress and achievement. (20 points)

3. Appropriateness and feasibility of methodology to accomplish proposed objectives, including clarity of descriptions of learning objectives, curriculum content and design, methods, materials and organization of the proposed project. (25 points)

4. Appropriateness of evaluation and dissemination plans which describe the approach to be taken to determine whether or not the project objectives are being met, and to whom and how information concerning training activities will be disseminated. (10 points)

5. The capability and qualifications of the applicant to carry out the proposed project, including experience of the organization, project staff, consultants, and training faculty. (10 points)

6. Appropriateness and justification of budget presentation. (10 points)

Closing Dates for Receipt of Applications

The closing date for receipt of applications under this announcement is August 13, 1979. Applications may be mailed or hand delivered. Hand delivered applications will be accepted daily (except Saturdays, Sundays, and Federal holidays) from 9 a.m. to 5:30 p.m., through August 13, 1979. Mailed applications received after the closing date will be accepted only if they show a U.S. Postal Service postmark or a U.S. Postal Service mail receipt of no later than August 13, 1979.

BILLING CODE 4110-92-M

Social Security Administration

International Agreements; Agreement Between the U.S. and Italy on the Matter of Social Security; Availability of Text of Agreement

The Commissioner of Social Security gives notice that the text of an agreement coordinating the social security systems of the United States and Italy is available to interested parties. This agreement, authorized under section 233 of the Social Security Act, became effective on November 1, 1978. It permits persons who have earned sufficient periods of coverage under the social security systems of both the United Stats and Italy to become entitled to benefits on the basis of their combined (totalized) credits. Under the agreement, each country will pay its pro rata share of the benefit amount based on the proportion of total covered work that was completed in that country. In addition, the agreement eliminates dual coverage and dual taxation of the same work. for example, a United States citizen working in Italy who was covered by and paid taxes to both the United States and Italian social security systems, remains covered under the United States system, is excluded from coverage under the Italian system, and pays taxes only to the United States system.

The agreement has been published in booklet form as part of the *Treaties and Other International Acts Series* (TIAS No. 9058). This publication contains (1) the principal agreement signed on May 23, 1973; (2) an administrative protocol signed on November 22, 1977, clarifying several provisions of the principal agreement and establishing the basic procedure for implementing the principal agreement; (3) statements signed on October 21, 1977 and October 4, 1978, following meetings between representatives of the two countries; and (4) an exchange of notes signed on January 16 and 20, 1978, revising the definition of the United States basic benefit amount. Copies may be purchased for $2.50 from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Also, persons who have questions about the agreement or wish more information about its provisions may write to: Totalization, Post Office Box 17049, Baltimore, Maryland 21235.

Dated: May 24, 1979.

Stanford G. Ross,

Commissioner of Social Security.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Disaster Assistance Administration

FDAA-586-DR; Docket No. NFD-715

Florida; Major Disaster and Related Determinations

AGENCY: Federal Disaster Assistance Administration.

ACTION: Notice.

SUMMARY: This is a Notice of the Presidential declaration of a major disaster for the State of Florida (FDAA-586-DR), dated May 15, 1979, and related determinations.

DATED: May 15, 1979.

FOR FURTHER INFORMATION CONTACT: Sewall H. E. Johnson, Program Support Staff, Federal Disaster Assistance Administration , Department of Housing and Urban Development, Washington, D.C. 20410 (202/634-7825).

NOTICE: Pursuant to the authority vested in the Secretary of Housing and Urban Development by the President under Executive Order 11795 of July 11, 1974, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-74-285; and by virtue of the Act of May 22, 1974, entitled "Disaster Relief Act of 1974" (88 Stat. 143); notice is hereby given that, in a letter of May 15, 1979, to the Secretary, the President declared a major disaster as follows:

I have determined that the damage in certain areas of the State of Florida resulting from severe storms, tornadoes and flooding, beginning on or about May 8, 1979, is of sufficient severity and magnitude to warrant a major-disaster declaration under Public Law 93-288. I therefore declare that such a major disaster exists in the State of florida.

Notice is hereby given that pursuant to the authority vested in the Secretary of Housing and Urban Development under Executive Order 11795, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-74-284, I hereby appoint Mr. Norman Steinlauf of the Federal Disaster Assistance Administration to act as the Federal Coordinating Officer for this declared major disaster.

I do hereby determine the following areas of the State of Florida to have been affected adversely by this declared major disaster.

The following Counties for Individual Assistance only: Hillsborough, Pinellas, Polk, Volusia.

BILLING CODE 4210-22-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Advance Notice of Intent to Call for Expressions of Interest in Coal Leasing

AGENCY: Bureau of Land Management, Interior.

ACTION: Advance Notice of Intent to Call for Expressions of Interest in Coal Leasing.

SUMMARY: On June 4, 1979, the Secretary of the Interior announced the approval of a Federal coal management program. The Department will issue regulations that reflect the Secretary's decision. Supplements to selected management framework plans (MFP) (discussed in 43 FR 57662–57670, 44 FR 21380, and 44 FR 2887) will now be completed in final form, in accordance with the final criteria for assessing lands unsuitable for coal leasing chosen by the Secretary.

The purpose of this advance notice is to give parties who may wish to submit expressions of interest in coal leasing an opportunity to get on mailing lists for information that will help them prepare formal expressions of interest in coal leasing in the areas identified as acceptable for further consideration.

DATES: By July 10, 1979, at the latest, the Department of the Interior will publish, in the **Federal Register**, and in at least one newspaper of general circulation in each affected State, a call for expressions of interest in coal leasing within areas identified as acceptable for further consideration for coal leasing in the final Hanna (Wyoming), Overland (Wyoming), and Williams Fork (Colorado) MFP supplements. Expressions of interest under this call may be submitted until August 24, 1979.

A call for expressions of interest for areas acceptable for further consideration for coal leasing within the area covered by the Northern Alabama land use analysis, and the San Rafael and Wattis MFP areas of Utah, will be published in early August 1979. Expressions of interest for these areas will be received for sixty days thereafter.

ADDRESS: Requests for specific information and maps of areas acceptable for further consideration for coal leasing may be submitted, in advance of formal publication of calls for expressions of interest, to the following State Directors:

Dale Andrus, State Director Colorado, Room 700 Colorado State Bank Building, 1600 Broadway, Denver, Colorado 80202. Telephone (303) 837–4325.

Lowell J. Udy, Director, Eastern States, 7981 Eastern Avenue, Silver Spring, Maryland 20910. Telephone (301) 427–7500.

Paul L. Howard, State Director Utah, University Club Building, 136 South Temple, Salt Lake City, Utah 84111. Telephone (801) 524–5311.

Daniel P. Baker, State Director Wyoming, 2515 Warren Avenue, P.O. Box 1828, Cheyenne, Wyoming 82001. Telephone (307) 778–2220

FOR FURTHER INFORMATION CONTACT: Robert Moore, Director, Office of Coal Management (202) 343–4636.

SUPPLEMENTARY INFORMATION: In order to speed the exchange of necessary information between the Bureau of Land Management and parties interested in leasing coal, the Department of the Interior is inviting interested parties to submit, in writing, prior to formal calls for expressions of interest, requests for maps and other detailed information on areas found acceptable for further consideration for coal leasing in the final MFP supplements. Such requests may be submitted to the BLM State Directors in the affected States, where they will be kept on file until the formal calls for expressions of interest in coal leasing are published. At those times, maps and other pertinent information needed by parties who wish to submit expressions of interest will automatically be sent to those persons who have filed such requests. Failure to submit an advance request will not preclude the acceptance of any expression of interest received by the BLM within the specified period of time.

This invitation facilitates the timely receipt of relevant information by interested parties. Requests for information should indicate the *general* geographical area(s) for which interested parties anticipate submitting expressions of interest, and the name and address of interested parties. The first two calls for expressions of interest will be limited to areas acceptable for further consideration for coal leasing within the area covered by the Northern Alabama land use analysis and the following MFP areas: Williams Fork (Colorado), San Rafael (Utah), Wattis (Utah), Overland (Wyoming), and Hanna (Wyoming).

June 8, 1979.

Arnold E. Petty,

Acting Associate Director, Bureau of Land Management.

[FR Doc. 79-18421 Filed 6-12-79; 8:45 am]

BILLING CODE 4310-84-M

[AA-6962-A through AA-6962-B]

Alaska Native Claims Selection

On May 6 and December 12, 1974, Kake Tribal Corporation, for the Native village of Kake, filed selection applications AA–6962–A and AA–6962–B, respectively, under the provisions of Sec. 16(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 706; 43 U.S.C. 1601, 1615(b) (1976)) (ANCSA), for the surface estate of certain lands in the vicinity of Kake, Alaska.

As to the lands described below, the applications, as amended, are properly filed and meet the requirements of the Alaska Native Claims Settlement Act and of the regulations issued pursuant thereto. These lands do not include any lawful entry perfected under or being maintained in compliance with laws leading to acquisition of title.

In view of the foregoing, the surface estate of the following described lands, selected pursuant to Sec. 16(b) of ANCSA, aggregating 21,712.89 acres, is considered proper for acquisition by Kake Tribal Corporation and is hereby approved for convenance pursuant to Sec. 14(b) of ANCSA.

Lot 2 of U.S. Survey 3852, Alaska, townsite elimination from Tongass National Forest, situate at Kake, Alaska.

Containing 2.23 acres.

Copper River Meridian, Alaska (Surveyed)

T. 55 S., R. 72 E.

Sec. 26;
Sec. 27, Lots 1 to 9, inclusive, SE¼NE¼, S½SW¼, SE¼;
Sec. 29, Lots 1 to 5, inclusive, S½SE¼;

Sec. 31, Lots 1 to 9, inclusive, E½SE¼;
Sec. 32, Lot 1, NE¼, E½NW¼, SW¼NW¼, S½;
Secs. 33, 34, and 35.
Containing 4,424.25 acres.

T. 56 S., R. 72 E.
Secs. 1 to 5, inclusive;
Sec. 6, Lots 1 to 6, inclusive, NE¼NE¼;
Sec. 7, Lots 1 to 8, inclusive, E½SE¼;
Secs. 8 to 16, inclusive;
Sec. 17, Lot 1, N½, N½SW¼, SE¼SW¼, SE¼;
Sec. 18, Lots 1 to 8, inclusive, E½NE¼, NW¼NE¼, NE¼NW¼;
Sec. 20, Lots 1 to 5, inclusive, N½NE¼, SE¼NE¼, NE¼NW¼;
Sec. 21, Lots 1 and 2, N½, NE¼SW¼, SE¼;
Secs. 22 to 26, inclusive;
Sec. 27, Lot 1, N½, E½SW¼, NW¼SW¼, SE¼;
Sec. 28, Lots 1 to 4, inclusive, NE¼NE¼;
Sec. 32, Lots 1 and 2;
Sec. 33, Lots 1 and 2;
Sec. 34, Lots 1 to 4, inclusive, NE¼NE¼;
Sec. 35, Lots 1 to 9, inclusive, N½;
Sec. 36, Lots 1 to 12, inclusive, N½.
Containing 16,654.61 acres.

T. 56 S., R. 73 E.
Sec. 6, Lots 1 to 4, inclusive, E½, E½W½.
Containing 631.80 acres.
Aggregating 21,712.80 acres.

The conveyance issued for the surface estate of the lands described above shall contain the following reservations to the United States:

1. The subsurface estate therein, and all rights, privileges, immunities, and appurtenances, of whatsoever nature, accruing unto said estate pursuant to the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 704; 43 U.S.C. 1601, 1613(f) (1976));

2. Pursuant to Sec. 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 708; 43 U.S.C. 1601, 1616(b) (1976)), the following public easement, referenced by easement identification number (EIN) on the easement maps attached to this document, copies of which will be found in case file AA–6982–EE, is reserved to the United States. All easements are subject to applicable Federal, State, or municipal corporation regulation. The following is a listing of uses allowed for this type of easement. Any uses which are not specifically listed are prohibited.

25 Foot Trail—The uses allowed on a twenty-five (25) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles, and small all-terrain vehicles (less than 3,000 Gross Vehicle Weight (GVW)).

(EIN 6 E) An easement for a proposed access trail twenty-five (25) feet in width from Sec. 27, T. 55 S., R. 72 E., Copper River Meridian, westerly to isolated public lands in Sec. 28, T. 55 S., R. 72 E., Copper River Meridian. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

The grant of the above-described lands shall be subject to:

1. Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under Sec. 6(g) of the Alaska Statehood Act of July 7, 1958 (72 Stat. 339, 341; 48 U.S.C. Ch. 2, Sec. 6(g) (1976))), contract, permit, right-of-way, or easement, and the right of the lessee, contractee, permittee, or grantee to the complete enjoyment of all rights, privileges, and benefits thereby granted to him. Further, pursuant to Sec. 17(b)(2) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688,708; 43 U.S.C. 1601, 1616(b)(1976)), any valid existing right recognized by ANCSA shall continue to have whatever right of access as is now provided for under existing law.

2. The following third-party interests, if valid, created and identified by the U.S. Forest Service, as provided by Sec. 14(g) of ANCSA:

a. A special use permit issued September 9, 1942, to the Town of Kake for watershed purposes covering sixty (60) acres in Sec. 35, T. 56 S., R. 72 E., Copper River Meridian.

b. A special use permit issued June 15, 1970, to the City of Kake for an existing cat road ten (10) feet wide and 3,600 feet long extending from the National Forest boundary to a staging area below the Gunnuk Creek dam, covering 0.68 miles in Sec. 35, T. 56 S., R. 72 E., Copper River Meridian.

c. A special use permit issued June 15, 1970, to the City of Kake for a water transmission line from permittee's dam located on Gunnuk Creek Kupreanof Island, in a southerly direction to the National Forest boundary, and also included are a staging area adjacent to the dam site and a site for a water tank and chlorinator covering 3.3 acres and 3,235 linear feet of pipeline, a 100,000 gallon redwood water tank and a 12 x 16 ft. chlorinator surrounded by a fence, in Sec. 35, T. 56 S., R. 72 E., Copper River Meridian.

3. Requirements of Sec. 22(k) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 715; 43 U.S.C. 1601, 1621(k) (1976)), that, until December 18, 1983, the portion of the above-described lands located within the boundaries of a national forest shall be managed under the principles of sustained yield and under management practices for protection and enhancement of environmental quality no less stringent than such management practices on adjacent national forest lands;

4. Requirements of Sec. 14(c) of the Alaska native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 703; 43 U.S.C. 1601, 1613(c) (1976)), that the grantee hereunder convey those portions, if any, of the lands hereinabove granted, as are prescribed in said section, except as provided by the Act of October 20, 1978 (P.L. 95–487, 92 Stat. 1635);

5. A right-of-way, 20 feet in width, AA–5851, for water pipeline purposes, granted to the City of Kake pursuant to the Act of February 15, 1901 (31 Stat. 790, 43 U.S.C. 959), as to lot 2 of U.S. Survey 3852.

6. Power project 2432, if valid, and the right of the permittee or licensee, if any, to enter upon, occupy and use any or all of the lands within the project in Secs. 34, 35 and 36, T. 56 S., R. 72 E., Copper River Meridian, subject to the conditions and limitations of any permit or license issued under the Federal Water Power Act of June 10, 1920, 41 Stat. 1075, as amended (16 U.S.C. 818).

Kake Tribal Corporation is entitled to conveyance of 23,040 acres of land selected pursuant to Sec. 16(b) of ANCSA. Together with the lands herein approved, the total acreage conveyed or approved for conveyance is 21,712.80 acres. The remaining entitlement of approximately 1,327.11 acres will be conveyed at a later date.

Pursuant to Sec. 14(f) of NACSA, conveyance of the subsurface estate of the lands described above shall be granted to Sealaska Corporation when conveyance is granted to Kake Tribal Corporation for the surface estate, and shall be subject to the same conditions as the surface conveyance.

There are no inland water bodies considered to be navigable within the above described lands.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the Federal Register and once a week, for four (4) consecutive weeks, in the Southeast Alaska Empire (Juneau). Any party claiming a property interest in lands affected by this decision may appeal the decision to the Alaska Native Claims Appeal Board, P.O. Box 2433, Anchorage, Alaska 99510 with a copy served upon both the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513 and the Regional Solicitor, Office of the Solicitor, 510 L Street, Suite 408, Anchorage, Alaska 99501, also:

1. Any party receiving service of this decision shall have 30 days from the receipt of this decision to file an appeal.

2. Any unknown parties, any parties unable to be located after reasonable efforts have been expended to locate, and any parties who failed or refused to

sign the return receipt shall have until July 13, 1979 to file an appeal.

3. Any party known or unknown who may claim a property interest which is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Alaska Native Claims Appeal Board.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeals. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the parties to be served with a copy of the notice of appeal are:

Kake Tribal Corporation, P.O. Box 263, Kake, Alaska 99830.
Sealaska Corporation, One Sealaska Plaza, Suite 400, Juneau, Alaska 99801.

Sue Wolf,
Chief, Branch of Adjudication.

BILLING CODE 4310-84-M

[M 40645]

Montana; Proposed Withdrawal of Lands

June 4, 1979.

On May 18, 1979, the Deputy Assistant Secretary, Land and Water Resources, granted the Bureau of Land Management permission to file an application, Serial No. M 40645, for the withdrawal of the following described lands from location and entry under the general mining laws, 30 U.S.C., Chapter 2, subject to valid exisiting rights:

Principal Meridian, Montana.

T. 8 S., R. 11 W.,
Sec. 5, Lot 8;
Sec. 6, Lots 6, 7, 8, 9, and 11;
Sec. 7, Lots 1, 2, 3, E½ Lot 4, 6, 7, 8, E½ Lot 10, and NE¼NW¼SE¼; and
Sec. 8, Lot 5.

The area described contains 305 acres of public lands in Beaverhead County, Montana.

The applicant desires the withdrawal to protect the lands in the Bannack Historic District to insure the integrity of the District until the Bureau's planning efforts are completed.

On or before July 15, 1979, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, notice is hereby given that an opportunity for a public hearing in connection with the withdrawal is afforded. All interested persons who desire to be heard on the proposed withdrawal must submit a written request for a hearing to the State Director, Bureau of Land Management, at the address shown below by July 15, 1979. Upon determination by the State Director that a public hearing will be held, the time and place will be announced.

The Department of the Interior's regulations provide that the authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demands for the lands and their resources. He will also review the application to insure that the area to be withdrawn is the minimum essential to meet the desired needs and to provide for the maximum utilization of the lands.

The authorized officer will also prepare a report for consideration by the Secretary of the Interior who will determine whether or not the lands will be withdrawn as requested. The determination of the Secretary on the application will be published in the Federal Register. A separate notice will be sent to each interested party of the record.

For a period of 2 years from the date of publication of this notice in the Federal Register, the lands will be segregated from location and entry as specified above unless the application is rejected or the withdrawal is approved prior to that date.

All communications in connection with this withdrawal should be addressed to the Bureau of Land Management, Department of the Interior, Montana State Office, P.O. Box 30157, Billings, Montana 59107.

Roland F. Lee,
Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-84-M

Bureau of Land Management [U-910] 4310-84 Utah, Initial Wilderness Inventory; Public Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The following public meeting will be held to receive comments concerning the Utah BLM State Director's proposals on the initial wilderness inventory of BLM-managed public lands in Utah. A 90-day public comment period began April 4, 1979 and ends July 2, 1979. Notice concerning these proposals was published in the Federal Register March 22, 1979.

Public Meeting—Salt Lake City, June 21, Suite D, Salt Palace, 2 p.m. and 7 p.m.

Written and oral comments will be accepted at the meeting. People wishing to make oral comments at the meeting should contact the BLM state office (801-524-4227) by June 20. Those who cannot attend the meeting may address written comments before July 2 to the State Director, Attention—Wilderness, Bureau of Land Management, University Club Building, 136 East South Temple, Salt Lake City, Utah 84111.

Dated: June 5, 1979.

Gary F. George,
Acting State Director.

BILLING CODE 4310-84-M

Fish and Wildlife Service

Endangered Species Environmental Impact Statement; Scoping Meeting

AGENCY: U.S. Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: Notice is hereby given that a meeting of all affected agencies and interested individuals will be held to help determine and refine the scope of an environmental impact statement for the Endangered Species Program.

Due to coincidence with issuance of the proposed and final new NEPA regulations, drafting of the EIS has reached an advanced stage without a scoping meeting. To comply with the new NEPA regulations which become effective July 30, 1979, and to provide the guidance and perspective of a broad range of affected groups, the Service invites the participation of all individuals who can provide constructive criticism and suggestions.

DATES: Tuesday, Wednesday, and Thursday, July 17, 18, and 19, 1979, at 9:00 a.m. (The scoping meeting will be shortened as progress warrants).

ADDRESS: Room 7000 A and B, Main Interior Building, 19th & C Streets, Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Harold J. O'Connor, Associate Director for Federal Assistance, United States

Department of the Interior, Fish and Wildlife Service, (202) 343–4646.

SUPPLEMENTARY INFORMATION: For the purposes of this impact statement, the action or source of the impacts is the current Endangered Species Program or proposed alternative. The need of or purpose for the action is the perpetuation of species diversity as it serves the interest and welfare of mankind. Among the alternatives to the current program proposed to meet the stated need are (1) a no action or no program alternative (prescribed by the NEPA regulations) and (2) repeal of Section 7 (Interagency Cooperation). Positive effects of the program are predominately ecological. Negative impacts of the action are primarily economic. These effects will fall directly on plants and animals threatened with extinction which are the intended beneficiaries of the action and indirectly on the elements of human society which reap economic, social, and aesthetic benefits.

Impacts also fall on (1) the various trade environments which exploit wild plants and animals, (2) on recreational activities in which plants and animals may be collected, (3) on plant and animal control measures in which target species may become the endangered species or (4) resource development programs which affect plant and animal habitat.

All who wish to attend this meeting are asked to advise Mr. O'Connor at the address or phone number above by July 10, 1979.

This notice of review was prepared by Clifford E. Ruhr, Office of Endangered Species (703/235–1726).

Dated: June 7, 1979.

Lynn A. Greenwalt,

Director, Fish and Wildlife Service.

BILLING CODE 4310-55-M

Geological Survey

Outer Continental Shelf (OCS) Order No. 5, Failure and Inventory Reporting System Requirements

AGENCY: U.S. Geological Survey, Department of the Interior.

ACTION: Solicitation of comments on the content of the U.S. Geological Survey failure reports.

SUMMARY: By Notice in the Federal Register, May 17, 1979, Vol. 44, No. 97, the Geological Survey announced the solicitation of comments on the content of the Failure and Inventory Reporting System reports generated by the U.S. Geological Survey.

This Federal Register Notice failed to specify a commenting period. Therefore, the first paragraph of the stated Notice is amended by adding the following: "The comment period is 45 days. All comments received by July 1, 1979, will be considered."

Our original intent was to allow 30 days for the commenting period. Because of our omission in stating this in the Notice of May 17, 1979, we are extending the commenting period to 45 days to alleviate any inconvenience incurred.

DATES: Comments must be received on or before July 1, 1979.

ADDRESSES: Send comments to: U.S. Geological Survey, National Center, Mail Stop 620, Reston, Virginia 22092.

FOR FURTHER INFORMATION CONTACT: Mr. Richard B. Krahl, U.S. Geological Survey, National Center, Mail Stop 620, Reston, Virginia 22092, (703) 860–7531.

Dated: June 5, 1979.

Henry W. Coulter,

Acting Director.

BILLING CODE 4310-31-M

INTERNATIONAL COMMUNICATION AGENCY

National Environmental Policy Act; Agency Implementing Procedures

June 8, 1979.

AGENCY: International Communication Agency.

ACTION: Proposed Agency internal implementing procedures.

SUMMARY: USICA proposes to adopt internal procedures to implement the National Environmental Policy Act (NEPA) in accordance with the regulations of the Council on Environmental Quality (CEQ) 43 FR 55978, November 29, 1978.

DATE: Comments or suggestions should be submitted in writing on or before July 10, 1979.

ADDRESS: Comments should be addressed to Mr. R. Wallace Stuart, Assistant General Counsel, Office of the General Counsel, International Communication Agency, Washington, D.C. 20547

Pursuant to the provisions of the National Environmental Policy Act of 1969 (Pub. L. 91–190), as amended, the International Communication Agency has revised its internal procedures to implement the provisions therein for environmental review of major agency actions. These implementing procedures are for intra-agency uses and will not therefore be codifed to the Code of Federal Regulations. The implementing procedures follow:

II MOA, Sec. 2000 *et seq.*

2000 Environmental Review of Agency Actions

2000.1 *Background*

(a) The National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) (NEPA) establishes national policies and goals for the protection of the environment. Section 102(2) of the NEPA contains certain procedural requirements directed toward the attainment of such goals. In particular, all Federal agencies are required to give appropriate consideration to the environmental effects of their proposed actions in their decisionmaking and to prepare detailed environmental statements on recommendations or reports on proposals for legislation and other major Federal actions significantly affecting the quality of the human environment.

(b) Executive Order 11991 of May 24, 1977, directed the Council on Environmental Quality (CEQ) to issue regulations to implement the procedural provisions of NEPA. Accordingly, CEQ issued final NEPA regulations (40 CFR Part 1500–1508) on November 29, 1978, which are binding on all Federal agencies as of July 30, 1979. These regulations provide that each Federal agency shall, as necessary, adopt implementing procedures to supplement the regulation. Section 1507.3(b) of the NEPA regulations identifies those sections of the regulations which must be addressed in agency procedures.

2000.2 *Purpose*

This section establishes guidelines and procedures pursuant to the National Environmental Policy Act of 1969 (P.L. 91–190), as amended (NEPA), and regulations promulgated by the Council on Environmental Quality (CEQ), 43 F.R. 55978–56007, November 29, 1978 (40 CFR Parts 1500–1508). The CEQ regulations (40 CFR 1500) are the basic regulations to be followed in all phases of the Agency's NEPA process with respect to decisions concerning proposed Agency projects.

2000.3 *Coverage*

These regulations apply to all major domestic activities of the Agency which may have a significant impact upon the quality of the human environment. These implementing procedures are effective July 30, 1979. For guidance

concerning the consideration of environmental effects of Agency program activities abroad, see Executive Order 12114, January 4, 1979, "Environmental Effects Abroad of Major Federal Action" and Agency Implementing Procedures issued pursuant thereto.

2001 General

The Associate Director for Management, or his designee (MGT), is the responsible officer for assuring compliance with NEPA and the NEPA regulations (40 CFR 1500 *et seq.*). MGT Must be advised by the responsible Agency element, as early in the decisionmaking process as practicable, of any major Agency proposal which may significantly affect the environment, or whose effects on the human environment may be controversial in nature. The Office of the General Counsel (GC) shall advise MGT with respect to, and shall review action, decisions, and documentation required by, the NEPA process.

2002 Applications From private Applicants or Other Non-Federal Entities Which May Involve the Agency.

The International Communication Agency performs no functions which involve the issuance of licenses or permits to applicants from the private sector; therefore, implementing procedures related to those functions as required by 40 CFR § 1507.3(b) are unnecessary.

2003 Responsibilities

a. *Associate Director for Management.*—1. The Associate Director for Management (MGT) is the Agency officer responsible for compliance with NEPA, NEPA Regulations, and these Agency implementing procedures, for Agency activities or projects which may be affected by the NEPA process.

2. The Associate Director for Management may delegate his authority with respect to the Agency's NEPA process.

3. The Associate Director for Management may, as appropriate, require Agency officers and employees to assist in the carrying out of his NEPA process responsibilities.

b. *General Counsel.*—The General Counsel (GC) shall provide necessary advice, assistance, review, and consultation to the Associate Director for Management, or his designee, in implementing the Agency's NEPA process with respect to a proposed project.

2004 Agency Procedures to Determine Whether To Prepare an Environmental Assessment or an Environmental Impact Statement

Few, if any, of the Agency's activites, with the exception of construction or similar activities at domestic VOA relay or transmitter stations, will have any effect on the quality of the human environment. Normally only large scale construction may be expected to involve the NEPA process. The following guidance is provided, however, for those activities which could require environmental review:

a. *Initial determination of need for an environmental assessment.*—In accordance with 40 CFR 1501.3, the Agency element head having responsibility for a proposed Agency project or activity (or private project or activity in which the Agency may have a signficant involvement) which may reasonably be foreseen to have an impact on the quality of the human environment shall, prior to the commitment of significant Agency resources, consult with MGT concerning the need for the preparation of an environmental assessment.

b. *Initial determination of need for an environmental impact statement.*—The Associate Director for Management, or his designee, with respect to any signficant Agency action which may affect the domestic human environment, shall, as early in the decisionmaking process as practicable and with the advice and assistance of GC, determine whether the action is one with respect to which an evnironmental impact statement normally is, or is not, prepared, referring to Section 2005.

2005 Typical Classes of Action for Similar Treatment Under NEPA

Section 1507.3(b)(2) of the regulations requires agencies to establish three typical classes of action for similar treatment under NEPA. These classes of action and specific criteria therefor are set forth in 2005.1, 2005.2, and 2005.3.

2005.1 *Actions Normally Requiring Environmental Impact Statements*

(1) *Agency Actions Which Normally Require An Environmental Impact Statement To Be Prepared.*—a. Construction of signficant proportion, *e.g.*, an entire transmitting or relay station or major subcomponent thereof which requires the acquisition of new real estate, and which has a signficant impact on the environment.

b. Significant use of herbicides or pesticides which has a significant impact on the environment.

c. Major clearing of forrested or wetlands area to accommodate construction which has a signficant impact on the environment.

d. Agency acquisition or disposal of real property by lease, assignment, purchase, or otherwise which has a significant impact on the environment.

e. Major diversion or other interference with natural water courses which has a significant impact on the environment.

f. Major use of any chemical agent which has a significant impact on the environment.

g. Installation of large scale diesel-powered electric generators which has a significant impact on the environment.

(2) *Specific Criteria For Determining Other Classes Of Agency Action Which Normally Do Require Environmental Impact Statements.*—a. Any major activity which will directly affect or alter any part of the environment (including animal and plant life, air, water, land usage, noise levels, or aesthetics) to a significant degree (whether beneficially or adversely).

b. Any major Agency action which may reasonably be foreseen to affect or alter indirectly the physical environment or any aspect thereof, significantly.

c. Issuance of a policy or regulation which may reasonably be foreseen to have a direct or indirect significant effect (in the carrying out thereof) on the human environment (other than purely economic or socioeconomic).

2005.2 *Actions Normally Requiring Environmental Assessment But Not Necessarily Environmental Impact Statements*

(1) *Specific Criteria For Identifying Typical Classes Of Agency Action Which Normally Require An Environmental Assessment But Not Necessarily Environmental Impact Statements.*—The following criteria are to be used by MGT as a guide in making the initial determination whether an environmental assessment is needed:

(i) Activities, such as construction, clearing of forested or wetlands areas, use of herbicides or pesticides, which entail only a moderate degree of Agency resource involvement or affect a relatively limited site, but as to which a direct, significant environmental effect may reasonably be foreseen.

(ii) Installation of electrical transmission lines of a significant physical size, including supporting structures, if accompanied by reasonably foreseeable environmental effects.

(iii) Proposed Agency projects or activities which, although environmental

impact is only remotely probable, are or may be the object of controversy or criticism by special interest groups.

(iv) Major projects or activities with respect to which the environmental effects are virtually unknown, but which could reasonably be suspected of being significant in some respect.

(2) With respect to any proposed projects or activities for which the Agency determines at the outset to prepare an environmental impact statement, no environmental assessment is required.

(3) Major proposals or activities which may significantly affect the quality of the domestic human environment, and which are not covered by § 2005.1 or § 2005.3 or which may be controversial, normally shall have an environmental assessment prepared. Such an assessment will be the basis for a "no significant impact" finding or a decision to prepare an environmental impact statement.

2005.3 *Actions Normally Not Requiring Environmental Assessment or Environmental Impact Statements (Categorical Exclusions)*

(1) Communication between the Agency and private individuals, Government or non-Governmental entities, or other firms or persons in connection with the implementation or planning of Agency programs, domestically or abroad. This class of activity is categorically excluded because it involves primarily interpersonal contact, oral or written, in implementation of plans for conducting programs abroad, exchanges or activities such as exhibits, participation in exhibitions, English teaching, magazine or other periodical distribution or production, and Voice of America operations overseas. Such contact has no significant impact upon the quality of the domestic human environment.

(2) Domestic planning and implementation (including acquisition or procurement) of the following types of specific Agency (overseas) programs:

a. Voice of America operations (broadcasting, operation of transmitter and relay stations, but excluding domestic construction);

b. participation in international fairs, exhibits and expositions;

c. Fulbright exchange programs (educational and cultural) and agency relations with grantees (students, professors, etc.) or such contract firms as assist in the selection, payment and placement of individuals under these programs;

d. English teaching program;

e. film and VTR production, acquisition, and distribution;

f. magazine (or other periodical) production or distribution;

g. cooperation with binational centers (including the making of grants);

h. operations of USICA centers or libraries;

i. international visitors program;

j. international speakers program; and

k. operation of the Wireless File.

The above class of activities is categorically excluded because the planning and implementation of those activities as carried out by USICA involve no significant impact on the quality of the domestic human environment. Such activities consist generally of contracting for exhibits, agency operation of printing facilities, shipment overseas from agency warehouses, program planning and carrying out studio work in connection with Voice of America broadcasts.

The exchange programs involve selection of scholars and cultural exchange materials to implement educational and cultural exchange programs with other countries and may require planning for travel of individuals in those programs. Other activities in connection with the overseas Agency programs include staffing functions at the Agency's offices in Washington. None of the above activities have significant impact on the quality of the human environment, and they are therefore categorically excluded from the need for an environmental review.

(3) Agency operation and maintenance of existing facilities (domestic) at current levels. Such current levels of operation and maintenance of existing facilities without significant change in degree or function do not have a significant impact on the quality of the human environment.

(4) Relocation, or actions forcing the relocation, of personnel and equipment. Such relocations do not constitute a major federal action affecting the quality of the human environment. Moreover, the effect of such relocation on the sending and receiving areas would be one of economic or socioeconomic impact, not warranting the preparation of an environmental impact statement or other review.

(5) Disposal of surplus personal property. This class of activity contemplates the sale or disposal of items of office furniture and equipment, household furniture, radio station equipment and material. Such activities do not significantly affect the quality of the environment.

(6) New and replacement construction on existing installations or locations when new real estate is not required, existing transportation and utilities are not appreciably affected, no significant change in the overall appearance of the installation occurs when viewed from outside the property boundary, and no appreciable increase in noise or air pollution occurs.

(7) MGT shall determine whether an EIS or an environmental assessment is required where:

(i) a proposal for Agency action is not covered by one of the typical classes of action above; or

(ii) for actions which are covered, the presence of extraordinary circumstances indicates that some other level of environmental review may be appropriate.

2006 Agency Decisionmaking Procedures—Environmental Review.

2006.1 *General*

The Agency NEPA process (environmental review, etc.) applies to any proposed major Agency action (including substantial involvement in proposed projects or activities submitted for consideration by private firms or persons or other non-U.S. Governmental entities) which is likely to have a substantial effect on the (domestic) human environment.

For USICA, few, if any, programs or program related activities will have any effect on the quality of the domestic environment. By statute, virtually all Agency programs which could conceivably affect the environment are to be carried out abroad. Such programs are contained within the boundaries of the individual countries in which the Agency conducts its activities with the exception of international radio broadcasts, which do not affect the environment. Normally, only construction or certain activities at domestic VOA relay or transmitter stations may be expected to trigger the Agency's NEPA process.

2006.2 *Procedures*

a. Any Agency officer (project officer) who proposes a major Agency action or project, or who receives a proposal which may substantially involve the Agency in a major private activity or project, shall consider whether the project is likely to have a significant effect (beneficial or adverse) on the quality of the human environment. If the determination is affirmative or questionable, the project officer shall promptly so advise the Associate Director for Management. In making the

initial informal determination above, the project officer may consult with the Office of the General Counsel if there is any reasonable question as to the potential environmental effect of a proposed project. In all cases involving new construction or other significant direct modification of the environment (including animal or plant life, air, water, aesthetics, land or utility usage, or noise level) the project officer shall notify MGT that the project is under consideration and of the nature of any foreseeable environmental effect.

b. The Associate Director for Management, or his designee, with the advice and assistance of GC, shall insure that the Agency's NEPA process is initiated at the earliest practicable time before a final decision is made to recommend the proposed project or activity in question to the Director, USICA, for final approval to carry out the project or activity. Normally, in the case of a major Federal action involving construction within the United States or its territories, the NEPA process should be initiated contemporaneously with a feasibility or similar study, made prior to the commitment of significant Federal resources, but in any event the NEPA process should begin at such time that any alternative proposals resulting from an environmental review may be effectively considered by Agency decisionmakers.

c. *Environmental materials available to decisionmakers.*—(1) The NEPA procedure is designed to provide agency decisionmakers with the analyses resulting from environmental review at a time when such analyses will be most valuable and useful to them in deciding upon proposals for Agency activities and projects. With respect to those activities which require environmental review, an environmental assessment shall have been prepared and made available to the responsible Area Director or Associate Director for consideration as a part of the decision whether such officer should recommend approval of a proposed project or activity to the Director, USICA. In the event that the Associate Director or Area Director is the final deciding officer regarding implementation of a proposed project, that officer shall consider the entire administrative record concerning environmental matters (including the final environmental impact statement (if any) and any necessary supplements) in reaching a decision.

(2) With respect to those proposed projects or activities submitted to the Director, USICA, for approval for implementation, an environmental assessment or, if appropriate, a final and a supplemental environmental impact statement (if any), conforming to NEPA Regulations, shall be forwarded for consideration, if such environmental review documents are required by law or regulations.

d. *Proposals for Legislation.*—(1) *General.* NEPA requires an environmental impact statement on recommendations or reports on proposals for legislation significantly affecting the quality of the human environment.

(2) *Procedure.* As the Agency office responsible for coordinating the Agency's Congessional relations, the Office of Congressional and Public Liaison (CPL) shall, with the advice of GC, assist MGT in carrying out any required NEPA process concerning such proposed legislation.

2006.3 *Administrative Record of Decision*

a. GC shall advise MGT in compiling, and shall review, the administrative record related to proposals involving environmental review. This record shall be considered at appropriate stages of the decisionmaking process by Agency decisionmakers. The administrative record shall be available to the public.

b. The decisionmaker (Director, Associate Director, or Area Director) shall, in cases where environmental review is required, consider only those choices which have been discussed in the administrative environmental record, and which have been made available to the public to the extent required by the NEPA regulations (40 CFR Part 1500).

2007 Public Involvement in Agency Decisionmaking Processes Involving Enivornmental Concerns

a. The Associate Director of Management, or his designee, when involved in the consideration of any proposed Agency action which may significantly affect the environment, with the advice and review of GC, shall follow the requirements of 40 CFR 1506.6, concerning the involvement of the public in the decisionmaking process. MGT shall insure that copies of the administrative record, if any, related to the environmental review associated with Agency projects are available to the Congressional and Public Liaison Office for purposes of (b) below. MGT shall maintain a register of projects involving environmental review and indicating the status of the administrative environmental record of such projects.

b. *Congressional and Public Liaison Office.*—Interested persons may obtain information concerning the status of, and environmental and other documentation involved in, the Agency's decisionmaking process concerning a particular proposal (which is subject to environmental review) by sending a written request for such specifically identified information to the Office of Congressional and Public Liaison, International Communication Agency, Washington, D.C. 20547; Phone (202) 724–0103.

Dated: June 8, 1979.

Charles W. Bray III,

Acting Director, International Communication Agency.

BILLING CODE 8230-01-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-42]

Certain Electric Slow Cookers; Notice of the Commission Procedure on the Presiding Officer's Recommended Determination, Relief, Bonding, and the Public Interest, and of the Schedule for Filing Written Submissions

Recommendation of "violation" issued

In connection with this investigation by the U.S. International Trade Commission under section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), of alleged unfair methods of competition and unfair acts in the importation and sale of certain electric slow cookers in the United States, the presiding officer recommended on May 9, 1979, that the Commission—

(1) Grant the joint motion for summary determination and

(2) Determine that there is a violation of section 337. The presiding officer certified to the Commission for its consideration the evidentiary record, which had been augmented pursuant to the Commission's order to remand of February 9, 1979. Interested persons may obtain copies of the presiding officer's recommended determination of May 9, 1979 (and all other public documents), by contacting the office of the Secretary to the Commission, 701 E Street NW., Washington, D.C. 20436, telephone (202) 523–0161.

Requests for oral argument and oral presentation

At present, no oral argument is planned with respect to the recommended determination of the

presiding officer. Similarly, no oral presentation is planned with respect to the subject matter of § 210.14(a) of the Commission's Rules of Practice and Procedure (19 CFR 210.14(a)) concerning relief, bonding, and the public-interest factors set forth in section 337 (d), (f) and (g)(3) of the Tariff Act of 1930, as amended, which the Commission is to consider in the event it determines that there should be relief. However, the Commission will consider written requests for an oral argument or an oral presentation if they are received by the Secretary to the Commission no later than the close of business (5:15 p.m., e.d.t.), on June 28, 1979.

Written submissions to the Commission

The Commission requests that written submissions of three types be filed no later than the close of business on June 28, 1979:

1. *Briefs on the presiding officer's recommended determination.* Parties to the Commission's investigation, interested agencies, and the Commission investigative staff are encouraged to file briefs concerning exceptions to the presiding officer's recommended determination. Briefs must be served on all parties of record to the Commission's investigation on or before the date they are filed with the Secretary. Statements made in briefs should be supported by references to the record. Persons with the same positions are encouraged to consolidate their briefs, if possible.

2. *Written comments and information concerning relief, bonding, and the public interest.* Parties to the Commission's investigation, interested agencies, public-interest groups, and any other interested members of the public are encouraged to file written comments and information concerning relief, bonding, and the public interest. These submissions should include a proposed remedy, a proposed determination of bonding, and a discussion of the effect of the proposals on the public health and welfare, competitive conditions in the U.S. economy, the production of like or directly competitive articles in the United States, and U.S. consumers. These written submissions will be very useful to the Commission if it determines that there is a violation of section 337 and that relief should be granted.

3. *Requests for oral argument and oral presentation.* Written requests that the Commission hold oral argument and/or oral presentation must be filed with the Secretary to the Commission as described above.

Additional information

The original and 19 true copies of all briefs, written comments, and any written request must be filed with the Secretary to the Commission.

Any person desiring to submit a document (or a portion thereof) to the Commission in confidence must request *in camera* treatment. Such request should be directed to the Chairman of the Commission and must include a full statement of the reasons why the Commission should grant such treatment. The Commission will either accept such submission in confidence or return it. All nonconfidential written submissions will be open to public inspection at the Secretary's Office.

Notice of the Commission's investigation was published in the Federal Register of February 9, 1978 (43 F.R. 5590).

By order of the Commission.

Issued: June 6, 1979.

Kenneth R. Mason,

Secretary.

[FR Doc. 79-18424 Filed 6-12-79; 8:45 am]

BILLING CODE 7020-02-M

[AA1921-204 and AA1921-205]

Kraft Condenser Paper From Finland and France; Investigations and Hearing

The United States International Trade Commission (Commission) received advice from the Department of the Treasury (Treasury) on May 30, 1979, that kraft condenser paper from Finland and France, provided for in items 252.40 and 256.30 of the Tariff Schedules of the United States, is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)). Treasury indicated that, for the purpose of its investigations, kraft condenser paper means capacitor tissue or condenser paper containing 80 percent or more by weight of chemical sulphate or soda wood pulp based on total fiber content. Accordingly, the Commission on June 5, 1979, instituted investigations Nos. AA1921-204 and AA1921-205, under section 201(a) of the act, to determine whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

Hearing. A public hearing in connection with the investigations will be held in Hartford, Conn., on Tuesday, July 24, 1979, at 10:00 a.m., e.d.t. The hearing will be held in Room 509, Internal Revenue Service Building, 450 Main Street, Hartford, Conn. All parties will be given an opportunity to be present, to produce evidence, and to be heard at such hearing. Requests to appear at the public hearing, or to intervene under the provisions of seciton 201(d) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(d)), should be received in writing in the office of the Secretary to the Commission not later than noon Thursday, July 19, 1979.

Written statements. Interested parties may submit statements in writing in lieu of, and in addition to, appearance at the public hearing. A signed original and nineteen true copies of such statements should be submitted. To be assured of their being given due consideration by the Commission, such statements should be received not later than Friday, August 3, 1979.

Issued: June 6, 1979.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

NATIONAL ADVISORY COUNCIL ON ECONOMIC OPPORTUNITY

Meeting; correction

June 7, 1979

This is to advise that there will be a two-day meeting of the National Advisory Council on Economic Opportunity on June 21–22, 1979 NOT June 22–23, 1979 as previously published. All other information remains the same.

Walter B. Quetsch,

Executive Director.

[FR Doc. 79-18441 Filed 6-12-79; 8:45 am]

BILLING CODE 6820-41-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards, Subcommittee on Evaluation of Licensee Event Reports; Meeting

The ACRS Subcommittee on Evaluation of Licensee Event Reports will hold an open meeting on June 28 and 29, 1979, in Room 1046, 1717 H Street, NW., Washington, D.C. 20555 to continue its review of Licensee Event Reports (LERs). Notice of this meeting was published on May 24, 1979 (44 FR 30177).

In accordance with the procedures outlined in the Federal Register on October 4, 1978 (43 FR 45928), oral or

written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The agenda for subject meeting shall be as follows:

Thursday, June 28 and Friday, June 29, 1979 8:30 a.m. until the conclusion of business each day.

The Subcommittee will meet with any of its consultants who may be present, and with representatives of the NRC Staff and their consultants, to continue its review of LERs submitted during the period 1976–1978.

Also, one or more open Executive Sessions will be held to discuss LERs and a planned Subcommittee report to the full Committee.

In addition, the Subcommittee will meet with representatives of several utilities in order to obtain information on the procedures used in filing an LER with the NRC and in following up on the event within the utility organization.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the Designated Federal Employee for this meeting, Dr. Andrew L. Bates (telephone 202/634–3267), between 8:15 a.m. and 5:00 p.m., EDT.

Background information concerning items to be considered at this meeting can be found in documents on file and available for public inspection at the NRC Public Document Room, 1717 H Street, NW., Washington, D.C. 20555.

Dated: June 8, 1979.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590-01-M

[Docket No. 40-8722]

Brush Wellman Inc.; Negative Declaration Regarding Issuance of Source Material License for Operation of Delta Facility in Millard County, Utah

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuing a source material license for a uranium recovery operation from barren beryllium mill waste streams by Brush Wellman Incorporated at their Delta facility in Millard County, Utah.

The Commission's Division of Waste Management has prepared an environmental/safety impact appraisal for the proposed operation. On the basis of this appraisal, the Commission has concluded that an environmental impact statement for this particular action is not warranted for there will be no significant environmental impact attributable to the action. The environmental/safety impact appraisal is available for public inspection and copying at the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C.

Dated at Silver Spring, Maryland, this 6th day of June.

For the Nuclear Regulatory Commission.

Ross A. Scarano,

Section Leader, Uranium Recovery Licensing Branch Division of Waste Management.

BILLING CODE 7590-01-M

[Docket No. PRM–71–5]

Chem-Nuclear Systems, Inc.; Denial of Petition for Rulemaking

The Nuclear Regulatory Commission's regulation, "Packaging of Radioactive Material For Transport and Transportation of Radioactive Material Under Certain Conditions," 10 CFR Part 71, provides a general license in 10 CFR 71.12 to persons holding a general or specific Commission license, to deliver licensed material to a carrier for transport. The licensee must have a quality assurance program whose description has been submitted to and approved by the Commission as satisfying the provisions of 10 CFR 71.51. Further, if delivery is made in a package for which a license, certificate of compliance (Form NRC–618) or other approval has been issued by the NRC or the Atomic Energy Commission, the person using the package must have a copy of the specific license, certificate of compliance, or other approval authorizing use of the package and all documents referred to in the license, certificate, or other approval, as applicable (10 CFR 71.12(b)(1)(i)). Quality assurance requirements specific to the particular package design are specified in the package approval.

The Petition

By letter dated September 24, 1977, Chem-Nuclear Systems, Inc. filed with the Commission a petition for rule making (PRM–71–5) requesting that the Commission exempt the package owner from the requirements in 10 CFR Part 71 that the package owner furnish the named user with the safety analysis report and blueprints of a particular container or package if (1) a user of the NRC approved container or package is named a user; (2) the named user is supplied with a copy of the license or certificate; and, (3) the named user is provided with specific procedures which have been developed by the owner of the container or package and filed with the NRC in accordance with the provisions of 10 CFR Part 71, Appendix E, "Quality Assurance Criteria for Shipping Packaging for Radioactive Material."

Bases for Request

The bases for the request are set out by the petitioner as follows:

a. Chem-Nuclear has been advised by NRC licensing staff that "all documents referred to in the license" would include the safety analysis report and blueprints of the particular container or package.

b. In several cases, some of the information contained in the safety analysis and blueprints is regarded by Chem-Nuclear as proprietary. For competive reasons, Chem-Nuclear wishes to limit the furnishing of this information to instances where such information is necessary and where adequate safeguards can be imposed.

c. In all cases, the license or certificate issued by the NRC clearly

defines the specific conditions for use of a particular container or package. Users of containers or packages have no need for the safety analysis and blueprints. Providing the safety analysis and blueprints to the user can serve no useful purpose, but only create a large amount of additional paperwork for the owner of the container or package and adds to the risk of misuse of proprietary data.

d. The need of the users for safety information can be met thoroughly by the specific procedures developed by the owner of the container or package and filed with the NRC in accordance with the provisions of Appendix E to 10 CFR Part 71.

Request for Comments on Petition

A notice of filing of petition for rule making was published in the Federal Register on October 6, 1977 (42 FR 54475). The comment period expired December 5, 1977. No comments were received in response to the notice.

Previous Action

On August 4, 1977 (42 FR 39364), the Commission amended 10 CFR Part 71 to add new Appendix E and upgraded quality assurance requirements that are the subject of the petitoner's request.

In the preamble to the final rule, the Commission discussed package manufacturers' submission of information on specific aspects of quality assurance:

> The licensee who is an applicant for the package approval provides the descriptions of quality assurance programs governing the manufacturer and use of the package. If the package is approved by the Nuclear Regulatory Commission for use in the transportation of radioactive material, a package approval is issued which incorporates the packages description and identification, its safety evaluation, and a description of the applicant's specific quality assurance provisions for design, fabrication, assembly, testing, use, and maintenance of the package.

Clearly, the requirement in a package approval for a description of the applicant's specific quality assurance provisions is in addition to, and not in substitution for, the package's safety evaluation which is based on the safety analysis report of the package design or application.

Witholding From Public Disclosure

Persons who submit to the Commission information believed to be privileged, confidential, or a trade secret are on notice (10 CFR 2.790) that it is the policy of the Commission to achieve an effective balance between legitimate concerns for protection of competitive positions and the right of the public to be fully apprised as to the basis for and effects of licensing actions, and that it is within the discretion of the Commission to withhold such information from public disclosure.

Under this policy and as a matter of licensing practice, the NRC staff issues package approvals on the basis of safety analysis reports prepared by applicants and refers to applications that contain blueprints. As a consequence, it is the general licensees delivering licensed radioactive material to a carrier for transport under the authority of 10 CFR 71.12(b) who must assure themselves and the NRC that the subject packages are as described in the package approvals. (The NRC must exercise its regulatory authority through its general licensees who use package approvals because the NRC has no general enforcement powers over package manufacturers or package owners unless they possess and use licensed radioactive material. They would, however, be subject to 10 CFR Part 21, "Reporting of Defects and Noncompliance.") An exemption from the requirements of 10 CFR Part 71 for furnishing the safety analysis reports and blueprints as requested by the petitioner could deny general licensees information essential to the safe use of packages to deliver licensed material to carriers for transport. In addition, for the public to be assued that general licensees comply with the terms and conditions of package approvals, the public must be apprised of the information in safety analysis reports and blueprints referred to in package approvals. Therefore, these documents cannot be exempt from public disclosure.

Grounds for Denial

The Commission has given careful consideration to this petition for rule making (PRM-71-5) and has decided to deny the petition on the grounds that: (1) The requirement in a package approval for a description of the applicant's specific quality assurance provisions is in addition to, and not in substitution for, the package's safety evaluation which is based on the safety analysis report of the package design or application; and (2) The right of the public to be full apprised as to the bases (e.g., safety analysis reports and blueprints) for licensing under 10 CFR 71.12(b) outweighs the concern of Chem-Nuclear Systems, Inc. for protection of a competitive position that may be set out in a safety analysis report or blueprint.

A copy of the petition for rule making and the Commission's letter of denial are available for public inspection at the Commission's Public Document Room at 1717 H Street NW., Washington, D.C.

Dated at Bethesda, Maryland this 30th day of May, 1979.

For the Nuclear Regulatory Commission.

BILLING CODE 7590-01-M

[Docket No. 50.263]

Northern States Power Co.; Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 40 to Facility Operating License No. DPR–22, issued to Northern States Power Company, which revised Technical Specifications for operation of the Monticello Nuclear Generating Plant (the facility) located in Wright County, Minnesota. The amendment is effective as of its date of issuance.

The amendment deletes reference to respiratory protection equipment since this item is now covered by 10 CFR 20.103 of Part 20 of the Commission's regulations.

The amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the Commission's letter to Northern States Power Company dated August 12, 1977 and the licensee's letter to the Commission dated September 13, 1977, (2) Amendment No. 40 to License No. DPR–22, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public document room, 1717 H Street, NW., Washington D.C. 20555, and at the Environmental Conservation Library, Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, Minnesota 55401. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 5th day of June 1979.

For the Nuclear Regulatory Commission.

Thomas A. Ippolito,

Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

[FR Doc. 79-18361 Filed 6-12-79; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 27-39]

Nuclear Engineering Co., Inc. (Sheffield, Illinois Low-Level Radioactive Waste Disposal Site); Hearing

The Nuclear Engineering Company, Inc. (NECO), has operated the Sheffield, Illinois low-level radioactive waste disposal site under License No. 13–10042–01 issued by the Nuclear Regulatory Commission. NECO filed a timely application for license renewal in August, 1968, and its license continued in effect pending final Commission action. 10 CFR 2.109. On March 8, 1979, NECO informed the Director, Nuclear Material Safety and Safeguards (NMSS), that it was unilaterally terminating its license for all activities at the Sheffield site.

On March 20, 1979, the Director, NMSS, pursuant to 10 CFR 2.202 of the Commission's regulations, served on NECO an immediately effective Order to Show Cause why it should not resume its obligations and liabilities under the license. The Director based his Order on NECO's obligation to act in a safe and responsible manner with respect to its license for receipt and possession of nuclear materials at the Sheffield site. These obligations include maintenance of site security and trenches in which low-level radioactive material is buried. NECO's abandonment of the site and consequent general failure to hold in force terms and conditions of its license were confirmed by two on-site visits on March 9 and 16 by inspectors from the Commission's Office of Inspection and Enforcement (Region III).

On March 23, 1979, NECO filed Answer of Nuclear Engineering Company Inc. To Order to Show Cause and Demand for Hearing pursuant to 10 CFR 2.202(b). NECO, the NRC Staff, and the State of Illinois agree that resolution of the issues raised by the Order to Show Cause would be most expeditiously and efficiently handled by consolidating consideration of these issues with the Licensing Board proceeding now considering NECO's application to renew its license and its subsequent motion to withdraw that application.

10 CFR 2.202(c) provides that if the answer demands a hearing the Commission will issue an order designating the time and place of hearing. Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and 10 CFR Part 2 of the Commission's regulations, notice is hereby given that a hearing will be held before an Atomic Safety and Licensing Board composed of Andrew C. Goodhope, Esq., Chairman, Dr. Linda W. Little, and Dr. Forest J. Remick.

In addition to the issues now pending before the Atomic Safety and Licensing Board it shall consider and decide:

whether NECO can unilaterally terminate License No. 13–10042–01 for activities at Sheffield without affirmative action by the Commission.

A prehearing conference shall be held by the Atomic Safety and Licensing Board at a date and place to be set by the Board to consider pertinent matters in accordance with the Commission's Rules of Practice. The date and place of the hearing will be set at or after the prehearing conference and will be noticed in the Federal Register.

Pursuant to CFR 2.705, an answer to this Notice may be filed by the Licensee not later than July 3, 1979.

The Commission authorizes an Atomic Safety and Licensing Appeal Board pursuant to 10 CFR 2.785 to exercise the authority to perform the review functions which would otherwise be exercised and performed by the Commission, subject to Commission review, as appropriate, under 10 CFR 2.786. The Appeal Board will be designated pursuant to 10 CFR 2.787 and notice as to membership will be published in the Federal Register.

For the Commission.
Samuel J. Chilk,
Secretary of the Commission.
Dated at Washington, D.C. this 6th day of June, 1979.

BILLING CODE 7590-01-M

[Docket Nos. 50-277 and 50-278]

Philadelphia Electric Co., et al.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 54 and 54 to Facility Operating License Nos. DPR-44 and DPR-56, issued to Philadelphia Electric Company, Public Service Electric and Gas Company, Delmarva Power and Light Company, and Atlantic City Electric Company, which revised Technical Specifications for operation of the Peach Bottom Atomic Power Station, Units Nos. 2 and 3 (the facility) located in York County, Pennsylvania. The amendments are effective as of the date of issuance.

The amendments consist of a revision to the Definitions Section of the Technical Specifications to extend the specified time interval, as it relates to the frequency for performance of surveillance testing, from 12 to 18 months to coincide with the refueling cycle length.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendment dated April 30, 1979, (2) Amendment Nos. 54 and 54 to License Nos. DPR-44 and DPR-56, and (3) the Commission's letter dated June 6, 1979.

All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 6th day of June 1979.
For the Nuclear Regulatory Commission.
Thomas A. Ippolito,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

[Docket Nos. 50-352, 50-353]

Philadelphia Electric Co. (Limerick Generating Station, Units 1 & 2), Request for Action Pursuant to 10 CFR 2.206

Notice is hereby given that by letter dated April 12, 1979, Frank Romano of Ambler, Pennsylvania, requested that the Commission investigate seismic effects of blasting at a quarry located near the site of the Philadelphia Electric Company's Limerick Generating Station, Units 1 & 2.

This letter is being treated as a request for action under 10 CFR 2.206 of the Commission's regulations, and accordingly, action will be taken on the request within a reasonable time. Copies of the request are available for inspection in the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555, and at the local public document room for the Limerick Generating Station, located at the Pottstown Public Library, 500 High Street, Pottstown, Pennsylvania 19464.

Dated at Bethesda, Maryland this 31st day of May 1979.
For the Nuclear Regulatory Commission.
Harold R. Denton,
Director, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

Privacy Act of 1974; New System of Records

AGENCY: U.S. Nuclear Regulatory Commission (NRC).
ACTION: Notice of new system of records.

SUMMARY: The Nuclear Regulatory Commission has established a new system of records identified as Oral History Program, NRC-25. The purpose of the system is to develop a collection of taped interviews with NRC staff members, former agency personnel, and other individuals who have been involved in nuclear regulatory activities. These interviews will be transcribed for use as a resource for the future writing of a history of nuclear regulation. They will provide an important tool for documenting the role of the Nuclear Regulatory Commission, and a valuable resource for present and future researches.

EFFECTIVE DATE: This amendment to the NRC Notices of Systems of Records becomes effective on July 13, 1979.

FOR FURTHER INFORMATION CONTACT: Ms. Betty L. Wagman, Privacy Act Officer, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 492-8133.

SUPPLEMENTARY INFORMATION: The Nuclear Regulatory Commission published a notice of a proposed new system of records in the Federal Register on March 13, 1979 (44 FR 14953). The notice invited comments on the proposed new system of records identified as Oral History Program, NRC-25, by April 12, 1979. No comments were received on the proposed new system of records.

The new system is identified as the NRC Oral History Program. The Historian will conduct interviews, on a voluntary basis, with individuals knowledgeable about various aspects of the history of nuclear regulation. The interviews will be recorded on magnetic tape, then transcribed to typescript for long-term retention and eventual use as background for a written history. The records will be accessible by name of the individuals interviewed.

Notice is hereby given that the Commission has established the new system of records Oral History Program, NRC-25. The text of NRC-25 is identical with the text of the proposed NRC-25 published on March 13, 1979.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and sections 552, 552a, and 553 of Title 5 of the United States Code, the following notice of NRC Systems of Records, Oral History Program, NRC-25, is published as a document subject to publication in the annual compilation of Privacy Act Documents.

EFFECTIVE DATE: This amendment to the NRC Notices of Systems of Records becomes effective on July 13, 1979.

Dated at Bethesda, Maryland this 4th day of June 1979.

For the Nuclear Regulatory Commission.

Lee V. Gossick,

Executive Director for Operation.

NRC–25

SYSTEM NAME:

Oral History Program—NRC

SYSTEM LOCATION:

Office of the Secretary of the Commission, NRC, 1717 H Street, NW, Washington, DC.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NRC employees, former employees, and other individuals who volunteer to be interviewed for purpose of providing information for a history of the nuclear regulatory program.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records consist of interviews on magnetic tape, and transcribed scripts of the interviews.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

a. Energy Reorganization Act of 1974, Title II, Sections 201(a)(1) and 201(a)(2)

b. Section 141b, Atomic Energy Act of 1954, as amended, 42 U.S.C. 2161b.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information in these records may be used:

a. For incorporation in a future publication on the history of the nuclear regulatory program;

b. To provide information to historians and other researchers.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained on magnetic tape and typescripts.

RETRIEVABILITY:

Information is accessed by the name of the interviewee.

SAFEGUARDS:

Maintained in locked file cabinet. Access to and use of these records are limited to those authorized by the Historian or a designee.

RETENTION AND DISPOSAL:

Typescripts are retained indefinitely. Tapes are normally retained until they are transcribed; some may be retained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

NRC Historian Office of the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure."

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure."

RECORD SOURCE CATEGORIES:

Information in this system of records is obtained from interviews granted on a voluntary basis to the Historian and his/her staff.

[FR Doc. 79-18281 Filed 6-12-79; 8:45 am]

BILLING CODE 7590-01-M

Study of Nuclear Power Plant Construction During Adjudication; Meetings

The next meeting of the Nuclear Regulatory Commission's advisory committee on nuclear power plant construction during adjudication will be held at 9:30 a.m. Friday, July 6, 1979, in Room 415, East West Towers, 4350 East West Highway, Bethesda, Maryland. After that meeting, the study group is currently planning as its next session a two day public workshop addressing various aspects of the subject of construction during adjudication. This workshop, and a request for public comment which will soon be published in the Federal Register, are designed to assist the study group by providing it with insight into public views on the subject of its work. At the workshop, three panels composed of private citizens and Commission employees will consider the issues of delaying effectiveness of initial decisions, limiting effectiveness to certain situations, and changing the existing adjudicatory process. Most of the panel members will be selected by the study group itself, but the group is prepared to consider qualified nominations submitted by the public. Any nominations should include sufficient information for the group to decide whether the nominee'e presence on a panel could effectively aid the group's work. Such information would at the minimum include the nominee's prior experience with the nuclear licensing process, other relevant experience and a telephone and a telephone number at which the nominee can be reached. Any nominations must be received by June 25, 1979 to be considered, since the workshop is currently tentatively scheduled for Wednesday and Thursday, July 18 and 19. Further details on the location and scheduling of the workshop meeting will be announced later.

Members of the public are invited to attend the group's meetings and there will be a limited amount of time available during each meeting for members of the public to make oral statements to the study group. Written comments, addressed to the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, will be accepted for one week after each meeting. The Chairman of the study group is empowered to conduct the meeting in a manner that in his judgment, will facilitate the group's work, including, if necessary, continuing or rescheduling meetings to another day.

A file of documents relevant to the group's work, including a complete transcript of each meeting, memoranda exchanged between group members, public comments and other documents, is available for inspection and copying at the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C. 2055. The Secretary of the NRC maintains a mailing list for persons interested in receiving notices of the group's meetings and actions. Anyone wishing to be on that list should write to: Secretary of the Commission, Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

The study group will provide its final report to the Commission by November 1, 1979. For further information on the study group's mission, please call Stephen S. Ostrach, Office of the General Counsel, Nuclear Regulatory Commission, 202/634–3224.

Dated at Washington, D.C., this 8th day of June, 1979.

Gary Milhollin,

Chairman.

BILLING CODE 7590-01-M

[Docket Nos. 50-338SP, 50-339SP]

Virginia Electric & Power Co. (VEPCO); (North Anna Power Station Units 1 and 2); Proposed Amendment to Operating License NPF–4

Reschedule of Hearing

In its Notice of Hearing of May 4, 1979, the Licensing Board scheduled a prehearing conference to begin at 9:30 in the morning, Tuesday, June 26, 1979 at the Council Chambers, City Hall, Charlottesville, Virginia, and a hearing to begin thereafter and continue through the rest of the work week and into the following work week, if necessary.

In its Notice of Hearing, the Licensing Board stated that it would be amenable to a motion to reschedule the hearing at a later date for good cause shown. Subsequently, the NRC Staff moved to reschedule the prehearing conference and hearing to July 9–13, 1979; Citizens Energy Forum (CEF) requested that the hearing be postponed to no earlier than July 24, 1979; and Potomac Alliance urged a schedule that would permit a hearing about the second half of August. Virginia Electric and Power Company (VEPCO), on the other hand, was opposed to any delay in the hearing, but if the Licensing Board decided to reschedule the hearing, VEPCO asked that it be rescheduled to begin no later than July 9.

After giving consideration to the foregoing and the reasons in support thereof and mindful that answers to VEPCO's Motion for Summary Disposition are presently due and that said answers of the NRC Staff and CEF have just been received, the Licensing Board cancels the prehearing conference and hearing scheduled in the Notice of Hearing of May 4, 1979 and reschedules the same as follows:

Prehearing Conference—9:30 a.m., Monday July 9, 1979

Hearing—Immediately following the prehearing conference and continuing through the work week, if necessary

The location of the prehearing conference and hearing shall be the same as scheduled before, namely the Council Chambers, City Hall (2nd floor), 7th and Main Streets, Charlottesville, Virginia.

Any person who wishes to make an oral or written statement in this special proceeding but who has not filed a petition for leave to intervene as heretofore provided for in the notice published by the Commission on May 22, 1978 in the Federal Register, 43 FR 21957, entitled "Proposed Issuance of Amendment to Facility Operating License," may request permission to make a limited appearance pursuant to the provisions of 10 CFR § 2.715 of the Commission's Rules of Practice. Limited appearances will be permitted in this special proceeding at the discretion of the Licensing Board on the predication that VEPCO's pending Motion for Summary Disposition is denied with respect to one or more contentions set out in the Licensing Board's Order Granting Intervention, Providing for a Hearing and Designating Contentions of Intervenors, dated April 21, 1979, as amended.

A person permitted to make a limited appearance does not become a party to this proceeding, but may state his or her position and raise questions which he or she would like to have answered to the extent that the questions are within the scope of the hearing. Limited appearances will be allowed during the above scheduled prehearing conference. Each person making a limited appearance will be limited to ten (10) minutes unless the Licensing Board has occasion to rule otherwise at the prehearing conference.

The parties will be notified by the Licensing Board as soon as practicable of such contentions designated for hearing which have been disposed of as a result of VEPCO's Motion for Summary Disposition, dated May 11, 1979. Any contention so disposed of obviously will not be the subject of any hearing.

Done this 6th day of June, 1979 at Washington, D.C.

Atomic Safety and Licensing Board.

Valentine B. Deale,

Chairman.

BILLING CODE 7590-01-M

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

Intergovernmental Science, Engineering, and Technology Advisory Panel; Meeting

In accordance with the Federal Adivsory Committee Act, Pub. L. 92–463, the Office of Science and Technology Policy announces the following meeting:

Name: Intergovernmental Science, Engineering, and Technology Advisory Panel; Full Panel Meeting.

Date: Wednesday, June 27, 1979, 8:00 p.m.–9:30 p.m.; Thursday, June 28, 1979, 8:30 a.m.–3:00 p.m.

Place: Governor's Inn, Research Triangle Park, North Carolina. Conference Rooms A, B, C, Second Floor.

Type of Meeting: Open.

Contact Person: Mr. Louis Blair, Executive Secretary, ISETAP, Office of Science and Technology Policy, Executive Office of the President, 202/395–4696.

Minutes of the meeting: Executive minutes of the meeting will be available from Mr. Blair's office.

Agenda

Wednesday, June 27

8:00 p.m.–8:05 p.m.: Welcome.

8:05 p.m.–8:25 p.m.: Address—Selected Science & Technology Issues Confronting the Nation and Administration Actions.

8:30 p.m.–9:30 p.m.: Status Reports on ISETAP and its Task Forces.

Thursday, June 28

8:30 a.m.–10:30 a.m.: Functions and Organization of ISETAP and Relationship of ISETAP to OSTP.

10:45 a.m.–12:00 noon: Review of Selected Current Activities and Advice and Direction from Panel.

12:20 p.m.–2:30 p.m.: Prospective Issues and Continuing ISETAP Activities.

2:30 p.m.–3:00 p.m.: Task Force Assignments, Next Meeting, Comments from Public.

William J. Montgomery,

Executive Officer.

BILLING CODE 3170-01-M

Intergovernmental Science, Engineering, and Technology Advisory Panel; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, the Office of Science and Technology Policy announces the following meeting:

Name: Intergovernmental Science, Engineering, and Technology Advisory Panel; Human Resources Task Force.

Date: Wednesday, June 27, 1979, 9:00 a.m.–2:30 p.m.

Place: New Executive Office Building, Room 3104, 726 Jackson Pl. NW., Washington, D.C.

Type of Meeting: Open.

Contact Person: Dr. Michael Gruber, Human Resources Task force, ISETAP—Office of Science and Technology Policy, Executive Office of the President.

Minutes of the meeting: Executive minutes of the meeting will be available from Dr. Gruber's office.

Agenda

10:00 a.m.: Progress report by ISETAP staff on the elderly services research project and presentation of research priorities set by state and local officials.

10:30 a.m.: Presentation of research plans in elderly services research by research managers from selected Federal agencies.

12:30 p.m.: Working Lunch.

1:00 p.m.: discussion of results of American Association for the Advancement of Science/ISETAP Workshop on evaluation of social program impact, health care cost control, health screening, and integrated services.

2:30 p.m.: Adjourn.

June 6, 1979.

William J. Montgomery,

Executive Officer, OSTP.

BILLING CODE 6820-97-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 21084; 70-6290]

General Public Utilities Corp. and Jersey Central Power & Light Co.; Proposed Issuance and Sale of First Mortgage Bonds by Subsidiary and Guaranty by Holding Company; Request for Exemption From Competitive Bidding

June 6, 1979.

In the matter of General Public Utilities Corporation, 260 Cherry Hill Road, Parsippany, New Jersey 07054, Jersey Central Power & Light Company, Madison Avenue at Punch Bowl Road, Morristown, New Jersey 07960.

Notice is hereby given that General Public Utilities Corporation ("GPU"), a registered holding company, and its electric utility subsidiary Jersey Central Power & Light Company ("Jersey Central") have filed with this Commission an application-declaration and amendments thereto pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Sections 6(b) and 12 of the Act and Rules 45 and 50(a)(5) promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the application-declaration, as amended, which is summarized below, for a complete statement of the proposed transaction.

Jersey Central proposes to issue and sell up to $75,000,000 aggregate principal amount of first mortgage bonds ("Bonds"), to be issued under its indenture dated as of March 1, 1946, as heretofore supplemented and amended and as to be further supplemented and amended by a supplemental indenture. None of the Bonds may be redeemed before ten years after date of issuance if such redemption is for the purpose of refunding them through the use, directly or indirectly, of borrowed funds having a lower effective interest cost than the effective interest cost of the Bonds. Other terms of the Bonds will be supplied by amendment. It is proposed that GPU will guarantee the payment of principal and interest of the Bonds.

The net proceeds from the sale of the Bonds will be used to pay ar or before maturity a like amount of short-term bank loans outstanding at the date of sale or to pay construction expenditures or to reimburse Jersey Central's treasury for funds previously expended thereform.

Jersey Central requests an exemption from the competitive bidding requirements of Rule 50 pursuant to Rule 50(a)(5). It refers to the March 28, 1979, nuclear accident at Unit No. 2 of the Three Mile Island nuclear generating station ("TMI-2"), in which unit Jersey Central owns an undivided 25% interest, the remainder being owned by Pennsylvania Electric Company (25%) and Metropolitan Edison Company (50%), associate companies of Jersey Central. Expenditures related to TMI-2 and the purchase of replacement energy will subject the GPU system, including Jersey Central, to a serious cash drain for an indeterminable period. In view of these uncertain and exceptional conditions, Jersey Central believes that competitive bidding for the Bonds is not now feasible.

Jersey Central believes it may be possible to effect a sale of the Bonds through private placement or a negotiated public offering, or both. Jersey Central proposes to explore with a group of prospective underwriters the prospects for such private or public offering and negotiate the terms thereof. It is hereby authorized to do so.

The fees and expenses to be incurred in connection with the proposed transaction will be supplied by amendment. It is stated that the Board of Public Utilities of the State of New Jersey has jurisdiction over the proposed issuance and sale of the Bonds and that no other state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than June 27, 1979, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration, as amended, which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants-declarants at the above-stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date the application-declaration, as amended or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any post-ponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 21085, 70-6303]

General Public Utilities Corp. and Jersey Central Power & Light Co.; Proposed Issuance and Sale of Debentures by Subsidiary and Guaranty by Holding Company; Request for Exemption From Competitive Bidding

June 6, 1979.

In the matter of General Public Utilities Corporation, 260 Cherry Hill Road, Parsippany, New Jersey 07054, Jersey Central Power & Light Company, Madison Avenue at Punch Bowl Road, Morristown, New Jersey 07960.

Notice is hereby given that General Public Utilities Corporation ("GPU"), a registered holding company, and its electric utility subsidiary Jersey Central Power & Light Company ("Jersey Central") have filed with this Commission an application-declaration and amendments thereto pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Sections 6(b) and 12 of the Act and Rules 45 and 50(a)(5) promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the application-declaration, as amended,

which is summarized below, for a complete statement of the proposed transaction.

Jersey Central proposes to issue and sell up to $50,000,000 aggregate principal amount of unsecured debentures ("Debentures"), to be issued under its indenture dated as of October 1, 1963, as heretofore supplemented and amended and as to be further supplemented and amended by a supplemental indenture. None of the Debentures may be redeemed before ten years after date of issuance if such redemption is for the purpose of refunding them through the use, directly or indirectly, of borrowed funds having a lower effective interest cost than the effective interest cost of the Debentures. Other terms of the Debentures will be supplied by amendment. It is proposed that GPU will guarantee the payment of principal and interest of the Debentures.

The net proceeds from the sale of the Debentures will be used to pay at or before maturity a like amount of short-term bank loans outstanding at the date of sale or to pay construction expenditures or to reimburse Jersey Central's treasury for funds previously expended therefrom.

Jersey Central Requests an exemption from the competitive bidding requirements of Rule 50 pursuant to Rule 50(a)(5). It refers to the March 28, 1979, nuclear accident at Unit No. 2 of the Three Mile Island nuclear generating station ("TMI–2"), in which unit Jersey Central owns an undivided 25 percent interest, the remainder being owned by Pennsylvania Electric Company (25%) and Metropolitan Edison Company (50%), associate companies of Jersey Central. Expenditures related to TMI–2 and the purchase of replacement energy will subject the GPU System, including Jersey Central, to a serious cash drain for an indeterminable period. In view of these uncertain and exceptional conditions, Jersey Central believes that competitive bidding for the Debentures is not now feasible.

Jersey Central believes it may be possible to effect a sale of the Debentures through private placement or a negotiated public offering, or both. Jersey Central proposes to explore with a group of prospective underwriters the prospects for such private or public offering and negotiate the terms thereof. It is hereby authorized to do so.

The fees and expenses to be incurred in connection with the proposed transaction will be supplied by amendment. It is stated that the Board of Public Utilities of the State of New Jersey has jurisdiction over the proposed issuance and sale of the Debentures and that no other State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than June 27, 1979, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration, as amended, which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants-declarants at the above-stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date the application-declaration, as amended or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

[Release No. 10719; 812-4226]

Insured Municipals—Income Trust, Filing of Application for an Order Amending a Previous Order Granting Exemption and Permitting an Offer of Exchange

June 6, 1979.

In the matter of Insured Municipals—Income Trust, Investors' Corporate—Income Trust, Investors' Municipal—Yield Trust, Investors' Governmental Securities-Income Trust Van Kampen Sauerman, Inc., Dain, Kalman & Quail, Inc., c/o Van Kampen Sauerman, Inc., 208 South LaSalle Street, Chicago, Illinois 60604.

Notice is hereby given that Insured Municipals-Income Trust (the "Municipal Fund"), Investors' Corporate-Income Trust (the "Corporate Fund"), Investors' Municipal-Yield Trust (the "Municipal Yield Fund") and Investors' Governmental Securities-Income Trust (the "Government Fund"), registered under the Investment Company Act of 1940 (the "Act") as unit investment trusts (collectively referred to herein as the "Funds"), their sponsor, Van Kampen Sauerman, Inc., and a cosponsor of the Corporate Fund, Dain, Kalman & Quail, Inc. (collectively referred to as the "Applicants"), filed an application on April 20, 1979, and amendments thereto on May 8, 1979 and May 14, 1979, requesting an order of the Commission amending in the manner described below an earlier order of the Commission dated November 28, 1978 (Investment Company Act Release No. 10496), which earlier order amended an order of the Commission dated October 17, 1978 (Investment Company Act Release No. 10442), which order amended an order of the Commission dated January 31, 1978 (Investment Company Act Release No. 10109). These orders pursuant to Section 6(c) of the Act exempted from the provisions of Section 22(d) of the Act the offer and sale of units of the Funds pursuant to a conversion option (the "Plan"), and pursuant to Section 11 of the Act permitted the Funds to offer their units at net asset value plus a fixed dollar sales charge pursuant to the Plan. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Under the Plan, as currently administered, a certificateholder in one of the Funds wishing to dispose of his units in a series of that Fund for which a secondary market is being maintained has the option to convert his units into units of another Fund (e.g., Corporate into Municipal, Municipal into Government) of any series for which units are available for sale. The Applicants state that the purpose of the Plan is to provide investors in each of the Funds a convenient and less costly means of transferring interests as their investment requirements change. The Applicants state that the respective sponsors have indicated that they intend to maintain a market for the units of each series of the respective Funds; however there is no obligation to maintain such a market. Consequently, the respective sponsors reserve the right to modify, suspend or terminate the Plan

at any time without further notice to certificateholders.

Under the Plan as originally proposed, the Applicants state that they intended to have each conversion transaction operate in a manner essentially identical to any secondary market transaction. Since Van Kampen Sauerman, Inc. elected to price the securities in the underlying portfolios of each series of each Fund on a weekly basis, it was required to make all purchases in the secondary market at a price based on the offering side evaluation of such portfolio securities. As a result, each conversion transaction was effected at a price based on the offering side evaluation of the portfolio securities of the Funds involved in the transaction. However, Van Kampen Sauerman, Inc. has decided recently to elect to price the portfolio securities of the Municipal Fund, the Government Fund, and the Municipal Yield Fund (the "Daily Valued Funds") on a daily basis and to maintain the secondary market for the units of the Daily Valued Funds at a price based on the bid side evaluation of the underlying portfolio securities for each Fund. In connection therewith, the sales charges relating to such secondary market resales will be revised. The Applicants state that the sales charges that will be added to the price of units in the secondary market of the Municipal Fund, Municipal Yield Fund and the Government Fund will be 5.7%, 6.2% and 4.0%, respectively, of the related public offering prices for such Funds. The sales charges during the initial offering of units of such Funds will be 4.7%, 5.2% and 3.5%, respectively, of the related public offering prices. The Corporate Fund will continue to be valued for both primary and secondary market transactions at a price based on the offering side evaluation of the underlying portfolio securities of that Fund and will continue to charge a 4.5% sales charge for both primary and secondary market transactions. As a result of the foregoing changes, the Applicants propose that the conversion option be amended to permit the purchase of units from certificateholders of the Daily Valued Funds at prices based on the bid side evaluation of the units of such Funds being purchased, and the resale of units upon conversion to such certificateholders at prices based on the bid side evaluation of units in the case of resales of units of the other Daily Valued Funds and at prices based on the offering side evaluation of units in the case of resales of units of the Corporate Fund. In addition, the Applicants propose that the conversion option relating to the Corporate Fund be amended to permit the purchase of units from certificateholders of that Fund at prices based on the offering side evaluation of the units being purchased, and the resale of units upon conversion to such certificateholders at prices based on the bid side evaluation of units of the Daily Valued Funds being sold.

The Applicants state that the Plan will operate essentially in the same manner as in the original application, as amended. In addition to the change in the procedure of evaluating the underlying portfolio securities of the Daily Valued Funds from weekly to daily pricing, the Applicants state that the conversion option will only be available for conversions into secondary market units of the Funds. The original application, as amended, stated that conversions could be made into either primary or secondary market units of the Funds. The Applicants state that restricting the conversion option to conversions into secondary market units of the Funds is appropriate in light of the revisions that have been made in the method of determining the net asset value of the Daily Valued Funds and the varying sales charges between the primary and secondary markets for sale of units of such Funds.

The Applicants state that as a result of the differences in methods of evaluation and sales charges between primary and secondary market transactions in the Daily Valued Funds, a potential for abuse in effecting conversion transactions under the Plan may occur. Currently, each of the units of the Funds may be converted into units of one or more of the other Funds for a special sales charge of $15.00 per unit. It is possible because of the different methods of valuing units (i.e., bid and offering price) and the varying sales charges imposed by the Funds, that there could be created inequities between a person buying units of a Fund directly and another person acquiring units through the Plan. To be specific, a person could acquire units in one Fund, immediately convert such units into another Fund and pay a lower sales charge than would a person acquiring units in the same Fund directly. The Applicants state that under normal circumstances this situation is unlikely to arise since the initial sales charge on the units being converted plus the conversion sales charge usually will exceed the sales charge related to direct purchases of the units being acquired through the Plan. However, given the differences in sales charges between the Funds a spread will occur in most conversions and thus the potential for discrimination exists. The Applicants further state that they believe after a certificateholder has held his Fund units for an adequate period of time the discriminatory nature of his effecting a conversion transaction is not as compelling, and thus argue that the potential abuses outlined above are not material if the converting certificateholder has held his Fund units for at least an eight month period of time. Thus, the Applicants propose that certificateholders who have owned units in the various Funds for a period of eight months or more be allowed to exercise the conversion option and acquire units of one or more of the other Funds at net asset value plus a sales charge of $15.00 per unit. Furthermore, the Applicants state that any certificateholders who wish to convert their units prior to the expiration of the eight month period be allowed to exchange such units at net asset value (bid side evaluation in the case of the Daily Valued Funds and offering side evaluation in the case of the Corporate Fund) plus a sales charge based on the greater of $15.00 per unit or an amount which together with the initial amount paid to acquire the units being converted equals the highest price during the initial public offering of the units of the Fund into which the conversion is being affected. The highest price during the initial public offering of units in each Fund is based on the offering side evaluation of the underlying securities in the portfolios of such Funds (rather than the bid side evaluation thereof) except for bid side evaluations of existing Fund units, if any, deposited in the Daily Valued Funds.

The Applicants state that in the case of certificateholders of the Daily Valued Funds who wish to exercise the conversion option to acquire units of the Corporate Fund, such certificateholders will be selling their units in the Daily Valued Funds at a price based on the bid side evaluation of such units and acquiring units at a price based on the offering side evaluation. The Applicants state that this is neither unfair nor inequitable to any certificateholder since all certificateholders who acquire units of the Corporate Fund in the secondary market will be required to purchase such units at a price based on the offering side evaluation. Furthermore, the Applicants state that participation in the Plan is optional and that no certificateholder is obligated to exercise the conversion option. The Applicants represent that the pricing procedures for the Funds will be clearly stated in all related disclosure documents. Thus, the Applicants state that the proposed changes in the

conversion option will be fair and equitable to all certificateholders. Finally, the Applicants assert that the fundamental purpose underlying the conversion option (providing existing certificateholders an opportunity to reinvest the proceeds from the sale of their Fund units into units of a series of another Fund at a reduced sales charge) will be as sound, justifiable and fair to all certificateholders under the changes that are proposed to be made in the Plan as it was under the Plan, as currently administered.

Section 11(c) of the Act provides, among other things, that exchange offers involving registered unit investment trusts are subject to the provisions of Section 11(a) of the Act irrespective of the basis of exchange. Section 11(a) of the Act provides, in pertinent part, that it shall be unlawful for any registered open-end company or any principal underwriter for such a company to make, or cause to be made, an offer to the holder of a security of such company or any other open-end investment company to exchange his security for a security in the same or another such company on any basis other than the relative net asset values of the respective securities to be exchanged, unless the terms of the offer have first been submitted to and approved by the Commission.

Section 22(d) of the Act provides, in pertinent part, that no registered investment company or principal underwriter thereof shall sell any redeemable security issued by such company to any person except at a current offering price described in the prospectus. The sales charge described in the prospectus of each of the Funds for effecting regular secondary market purchase and sale transactions is greater than the sales charge which will be applicable to transactions under the Plan. Rule 22d-1 under the Act permits certain variations in sales charges, none of which it is alleged will be applicable to transactions under the Plan.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions from any provision of the Act or of any rule or regulation under the Act, if and to the extent such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may not later than June 28, 1979, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C 20549. A copy of such request shall be served personally or by mail upon the Applicants at the address stated above. Proof of such service (by affidavit, or in the case of an attorney-at-law by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the rules and regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons, who request a hearing or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

BILLING CODE 8010-01-M

[Release No. 34-15901; File No. SR-MSRB-79-5]

Municipal Securities Rulemaking Board; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on May 24, 1979, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission the proposed rule change as follows:

Statement of the Terms of Substance of the Proposed Rule Change

The Municipal Securities Rule making Board (the "Board") has filed the following proposed amendment to rule G–12 on uniform practice (hereafter referred to as the "proposed rule change"): Rule G–12.* Uniform Practice.

Italics indicates new language; [brackets] indicate deletions.

(a) through (c) No change.

(d) Comparison and Verification of Confirmations; Unrecognized Transactions.

(i) through (ii) No change.

(iii) In the event a party has sent a confirmation of a transaction but fails to receive a confirmation from the contra party or a notice indicating nonrecognition of the transaction within four business days of the trade date (within six business days of the trade date, in the case of an initial confirmation of a transaction effected on a "when, as, and if issued" basis), the confirming party shall, *not later than the eleventh business day following the trade date,* [promptly] seek to ascertain whether a trade occurred. If, after such verification, such party believes that a trade occurred, it shall immediately notify the non-confirming party by telephone to such effect and send within one business day thereafter, a written notice, return receipt requested, to the non-confirming party, indicating failure to confirm. Promptly following receipt of telephone notice from the confirming party, the non-confirming party shall seek to ascertain whether a trade occurred and the terms of the trade. In the event the non-confirming party determines that a trade occurred, it shall immediately notify the confirming party by telephone to such effect and, within one business day thereafter, send a written confirmation of the transaction to the confirming party. In the event a party cannot confirm the trade, such party shall promptly send a written notice, return receipt requested, to the confirming party, indicating nonrecognition of the transaction.

(iv) through (viii) No change.

(e) through (l) No change.

Statement of Basis and Purpose

The basis and purpose of the foregoing proposed rule change is as follows:

Purpose of Proposed Rule Change

Under rule G–12 as currently in effect, each party to a transaction between municipal securities professionals must send to the other party a confirmation containing certain information. Paragraph (d) of rule G–12 provides that in the event a confirming party does not receive a contra-confirmation of the transaction within the time periods specified by the rule, such party must initiate certain procedures to verify the transaction, including giving telephonic and written notice to the contra party who has failed to confirm. Paragraph (d) also provides that these procedures must be initiated within four business

days of the trade date (within six business days of the trade date in the case of an initial confirmation of a transaction effected on a "when, as, and if issued" basis).

Several members of the industry have indicated to the Board that they have found rule G–12(d) burdensome because of the time periods provided in the rule. Specifically, they assert that the requirement in the rule to initiate verification procedures after four business days often results in their needlessly initiating such procedures when contra-confirmations have in fact been prepared and sent. They attribute this problem in large part to delays in mail service.

As a result of such comments, the Board informally surveyed approximately 30 municipal securities brokers and municipal securities dealers to obtain information concerning their experience with this provision. The results of that survey indicated that certain municipal securities dealers, particularly those located on the West Coast, have encountered difficulty with the four business day requirement in the rule.

In light of the comments and the results of its informal survey, the Board issued in exposure draft form on November 28, 1978, a proposed amendment to rule G–12(d), which provided additional time for initiating the verification procedures. The response to the exposure draft is described under item 5 in this filing.

The Board believes in view of all of the foregoing that rule G–12(d)(iii) should be modified to provide additional time for the initiation of verification procedures. The Board therefore proposes to amend rule G–12(d)(iii) to provide that the verification procedures may be initiated, in the event a contra-confirmation is not received, at any time between the fourth business day and eleventh business day following the trade date. The Board is of the view that the proposed change will alleviate the problems which the industry has experienced with the current requirement, while at the same time assuring that confirmations will continue to be compared and verified on a timely basis.

Basis Under the Act for Proposed Rule Changes

The Board has adopted the proposed rule change pursuant to section 15B(b)(2)(C) of the Securities Exchange Act of 1934, as amended (the "Act"), which requires and empowers the Board to adopt rules:

> Designed * * * to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in * * * facilitating transactions in municipal securities, to remove impediments to and perfect the mechanism of a free and open market in municipal securities, and, in general, to protect investors and the public interest * * *

Comments Received From Members, Participants or Others on Proposed Rule Change

As indicated above, the Board issued for comment on November 28, 1978, a draft amendment to rule G–12(d). The draft amendment provided that the verification procedures could be initiated, in the event a contra-confirmation was not received, at any time between the fourth business day and fifteenth calendar following trade date. The following persons submitted comments in response to the draft amendments:

Bankers Trust Company ("Bankers Trust")
Lebenthal & Co., Inc. ("Lebenthal")
Mercantile Trust Company, N.A. ("Mercantile Trust")
Merrill Lynch, Pierce, Fenner & Smith ("Merrill Lynch")
The Northern Trust Company
Salomon Brothers
Weil Investment Company

All of the commentators, except Merrill Lynch, supported the general intent of the draft amendment. Salomon Brothers and Mercantile Trust expressed unqualified support for the amendment. Lebenthal supported the amendment, but suggested that in order to avoid confusion the time period involved in the provision should be described in terms of "business" days only, rather than in "business" and "calendar" days. The Board adopted this suggestion, providing in the proposed amendment for an outside time limit of 11 business days.

The Northern Trust Company and Weil Investment Company suggested that the outside time limit of fifteen calendar days in the draft amendment was too long. Bankers Trust suggested that the four business day time limit be preserved, but that it should begin on settlement date, rather than trade date.

The Board notes in response to these comments that the proposed rule change only sets an outside limit within which time the verification procedures must be initiated, and would not prohibit a municipal securities broker or municipal securities dealer from initiating the procedures at an earlier time.

Merrill Lynch opposed the draft amendment, stating that "uncompared transactions left unresolved for a longer period of time create greater potential liability for the brokerage community and for the public." As an alternative, Merrill Lynch suggested amending the rule to require that verification procedures be initiated on the fifth business day following trade date, rather than "promptly" after a party fails to receive a contra-confirmation "within four business days of trade date." As reflected in this filing, the Board is of the view that it is appropriate to provide additional time for the initiation of the verification procedures.

Merrill Lynch also objects to the statement in the exposure draft that:

> [i]f a transaction were settled prior to commencement of the verification procedure, the confirming party would not be required to complete the procedure.

The Board is of the view that the confirming party should not be obligated by rule to proceed with the verification procedures, although such party is free to do so if it wishes.

Burden on Competition

The Board is of the opinion that the proposed rule change will not impose any burden on competition.

On or before July 18, 1979, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before July 5, 1979.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

June 6, 1979.

BILLING CODE 8010-01-M

[Release No. 34-15900; File No. SR-MSRB-79-4]

Municipal Securities Rulemaking Board; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on May 24, 1979, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission the proposed rule changes as follows

Statement of the Terms of Substance of the Proposed Rule Changes

The proposed rule changes effect modifications in rule D-11 defining "associated persons" for purposes of the Board's rules, in rule G-13 concerning mis-representations of quotations, and in rule G-19 governing suitability of recommendations and transactions in municipal securities. The text of the proposed rule changes appears below.

Statement of Basis and Purpose

The basis and purpose of the foregoing proposed rule change is as follows:

Purpose of Proposed Rule Changes, Rule D-11

Rule D-11 provides that for purposes of the Board's rules the terms "broker," "dealer," "municipal securities broker," "municipal securities dealer," and "bank dealer" include their respective associated persons. The rule elimiates the need to make specific reference to personnel of securities firms and bank dealers in each Board rule that applies to both the organization and its personnel.

Under the securities laws, the term "associated persons" is subject to varying definitions.*

See e.g., Section 3(a)(18) of the Act, which defines the term "person associated with a broker or dealer" to include those "directly or indirectly controlling, controlled by, or under common control with such broker or dealer."

Similarly, Section 2(a)(32) of the Act includes within the definition of "person associated with a municipal securities dealer" when used with respect to a municipal securities dealer which is a bank or a division or department of a bank, "any person directly or indirectly controlling [the municipal securities dealer's activities with respect to municipal securities] or controlled by the municipal securities dealer in connection with such activities."

In this connection, the Board has stated in notices relating to rule D-11 that:

> [a]lthough the statutory definition of associated persons includes individuals and organizations in a control relationship with the securities professional, the context of the fair practice rules indicates that such rules will ordinarily not apply to persons who are associated with securities firms and bank dealers solely by reason of a control relationship.

The Board is of the view that this point shoud be expressly addressed in rule D-11 to avoid possible confusion. Accordingly, the proposed rule changes amend rule D-11 to clarify that the Board's rules apply to associated persons only to the extent they are engaged in performing municipal securities dealer activities, as defined in the Board's rules.

Rule G-13

Rule G-13 sets forth a number of requirements applicable to quotations relating to municipal securities. Paragraph (b) of the rule addresses the distribution of quotations by a municipal securities dealer on its own behalf or on behalf of another municipal securities professional. Paragraph (d) of the rule addresses the distribution of quotations made by other professionals. Since paragraph (d) complements paragraph (b), the Board believes that is should logically be included as a separate subparagraph of paragraph (b) of rule G-13

Rule G-19

Rule G-19 prohibits a securities professional from recommending transactions in municipal securities to a customer unless the professional makes certain determinations with respect to the suitability of such recommendations. Paragraph (a) of the rule provides in pertinent part:

> Notwithstanding the foregoing, if a broker, dealer or municipal securities dealer determines that a transaction in *specific municipal securities* would not be suitable for a customer and so informs such customer, such broker, dealer or municipal securities dealer may thereafter respond to the customer's request for advice concerning such securities and may execute transactions in such securities at the direction of the customer. [Emphasis added.]

The Board is concerned that the reference to "specific municipal securities" may be misconstrued. The provision is clearly intended to permit a municipal securities professional to give advice and execute transactios in securities which the professional has recommended that a customer not purchase, if the customer is insistent on doing so. The provision, moreover, is also intended to permit a municipal securities professional to make recommendations to a customer who, after being advised that municipal securities in general are not a proper investment for him, insists on purchasing municipal securities. In order to make clear that the provision applies in the latter circumstances, the Board has adopted the proposed amendment to rule G-19.

Basis Under the Act for Proposed Rule Changes

The Board has adopted the proposed rule changes pursuant to Section 15B(b)(2)(C) of the Securities Exchange Act of 1934, as amended (the "Act"), which directs the Board to adopt rules which are

> * * * designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in municipal securities, to remove impediments to and perfect the mechanism of a free and open market in municipal securities, and, in general, to protect investors and the public interest. * * *

Comments Received From Members, Participants or Others on Proposed Rule Changes

The Board neither solicited nor received written comments on the proposed rule changes, which were developed in response to comments made by the staff of the Commission.

Burden on Competition

The Board does not believe that the proposed rule changes will impose any burden on competition. On or before July 18, 1979, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes it reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule changes, or

(B) Institute proceedings to determine whether the proposed rule changes should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and

of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before July 5, 1979.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

Text of Proposed Rule Changes*

Rule D–11—"Associated Persons"

Unless the context otherwise requires or a rule of the Board otherwise specifically provides, the terms "broker," "dealer," "municipal securities broker," "municipal securities dealer," and "bank dealer" shall refer to and include their respective associated persons *to the extent such associated persons are performing municipal securities dealer activities, as defined in Board rules, with or for the broker, dealer, municipal securities broker, municipal securities dealer or bank dealer.* Unless otherwise specified, persons whose functions are solely clerical or ministerial shall not be considered associated persons for purposes of the Board's rules.

Rule G–13

(a) No change.
(b)(i)(ii) and (iii) No change.
(iv) *No municipal securities broker or municipal securities dealer shall knowingly misrepresent a quotation relating to municipal securities made by any other broker, dealer, or municipal securities dealer.*

[(d) *Misrepresentations of Quotations.* No municipal securities broker or municipal securities dealer shall knowingly misrepresent a quotation relating to municipal securities made by any other broker, dealer or municipal securities dealer.]

Rule G–19—Suitability of Recommendations and Transactions

(a) Customer Information. No broker, dealer, or municipal securities dealer shall recommend the purchase, sale, or exchange of a municipal security to a customer unless such broker, dealer, or municipal securities dealer, after reasonable inquiry.

(i) and (ii) No change.

Notwithstanding the foregoing, if a broker, dealer, or municipal securities dealer determines that a transaction *in municipal securities or* in specific municipal securities would not be suitable for a customer and so informs such customer, such broker, dealer, or municipal securities dealer may thereafter respons to the customer's requests for *investment* advice concerning *municipal securities generally or such specific* securities and may execute transactions [in such securities] at the direction of the customer.

(b) and (c) No change.

SMALL BUSINESS ADMINISTRATION

[Proposal No. 06/06–0048]

Capital Corp. of Wyoming, Inc.; Application for a License as a Small Business Investment Company

Notice is hereby given of the filing of an application with the Small Business Administration pursuant to § 107.102 of the SBA Regulations (13 CFR 107.102 (1979)), by the Capital Corporation of Wyoming, Inc., 145 South Durbin Street, P.O. Box 612, Casper, Wyoming 82602 for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958 (the Act), as amended (15 U.S.C. *et seq.).*

The proposed officers, directors and sole shareholder will be:

B. R. Weber, President, 3421 Warren Avenue, Casper, Wyoming 82601.
Larry J. McDonald, Executive Vice President and Director, 4524 South Skyline Road, Alcova Route, Casper, Wyoming 82601.
Robert E. Kemper, Vice President, 1035 Cardiff, Casper, Wyoming 82601.
Hugh L. Binford, Vice President, La Casa Cerro, Sinclair, Wyoming 82334.
D. Thomas Kidd, Secretary-Treasurer, 3321 Carmel Drive, Casper, Wyoming 82601.
Elizabeth Smith, Assistant Secretary, 4440 South Poplar No. 201, Casper, Wyoming 82601.
Bruce G. Beaudoin, Director, 4441 Sunrise Court, Casper, Wyoming 82601.
H. K. Harris, Director, 508 4th Avenue North, Greybull, Wyoming 82426.
Robert G. Kimball, Director, 1801 Brookview Drive, Casper, Wyoming 82601.
Vern Rissler, Director, 2905 Nob Hill Drive, Casper, Wyoming 82601.
Harmon H. Watt, Director, 420 East Park Avenue, Riverton, Wyoming 82501.
Wyoming Industrial Development Corporation, Sole Shareholder 100, 145 South Durbin Street, P.O. Box 612, Casper, Wyoming 82602.

Wyoming Industrial Development Corporation (WIDC) is a private, for profit, company organized for the purpose of creating quality growth and adding industrial diversification to the economy of Wyoming. WIDC has a pool of funds for making loans and investments and also offers promotional capabilities and management consulting services for financial planning and economic feasibility analyses. The University of Wyoming Foundation is the only 10 or more percent stockholder of WIDC.

The Applicant proposes to begin operations with a capitalization of $305,000 and will be a source of equity capital and long term loans for qualified small business concerns. The Applicant intends to render management consulting services to small business concerns.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the new company under their management, including adequate profitability and financial soundness, in accordance with the Act and Regulations.

Notice is further given that any person may, not later than 15 days from the date of publication of this Notice, submit written comments on the proposed SBIC to the Deputy Associate Administrator for Finance and Investment, Small Business Administration, 1441 "L" Street, NW., Washington, D.C. 20416.

A copy of this Notice will be published in a newspaper of general circulation in Casper, Wyoming.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies).

Dated: June 6, 1979.

Peter F. McNeish,
Deputy Associate Administrator for Finance and Investment.

BILLING CODE 8025-01-M

DEPARTMENT OF THE TREASURY

Office of the Secretary

Certain Steel I-Beams From Belgium; Antidumping; Tentative Determination of Sales at Not Less Than Fair Value

AGENCY: U.S. Treasury Department.

ACTION: Tentative Negative Determination.

SUMMARY: This notice is to advise the public that no sales of certain steel I-beams from Belgium to the United States at less than fair value within the meaning of the Antidumping Act, 1921, have been found. Sales at less than fair value generally occur when the price of the merchandise sold for exportation to the United States is less than the price of such or similar merchandise sold in the home market or to third countries. Interested persons are invited to comment on this action not later than July 13, 1979.

EFFECTIVE DATE: June 13, 1979.

FOR FURTHER INFORMATION CONTACT: John R. Kugelman, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-5492).

SUPPLEMENTARY INFORMATION: Information was received on January 2, 1979, from counsel acting on behalf of Connors Steel Company, alleging that certain steel I-beams from Belgium were being sold at less than fair value, thereby causing injury to, or the likelihood of injury to, or the prevention of establishment of, an industry in the United States, within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 *et seq.*) (referred to in this notice as "the Act"). On the basis of this information and subsequent preliminary investigation by the Customs Service, an "Antidumping Proceeding Notice" was published in the Federal Register of February 9, 1979 (44 FR 8408-9).

For purposes of this investigation, the term "certain steel I-beams" means hot-rolled steel I-beams, with symmetrical flanges or with one or more flanges

offset, less than six inches in height and weighing not over 4–½ pounds per linear foot, provided for under item number 609.80 of the Tariff Schedules of the United States Annotated (TSUSA).

Tentative Determination of Sales at Not Less Than Fair Value

On the basis of information developed in the Customs' investigation and for the reasons stated below, pursuant to section 201(b) of the Act (19 U.S.C. 160(b)), I hereby determine that there are no reasonable grounds to believe or suspect that the purchase price of these I-beams from Belgium is less than fair value, and thereby foreign market value, of such or similar merchandise.

Statement of Reasons on Which This Determination is Based

The reasons and bases for the above determination are as follows:

a. *Scope of the Investigation.* It appears that all or virtually all of the subject merchandise imported from Belgium were manufactured by S.A. Cockerill-Ougree-Providence-et-Esperance-Longdoz. Therefore, the investigation was limited to this manufacturer.

b. *Basis of Comparison.* For purposes of considering whether the merchandise in question is being, or is likely to be, sold at less than fair value within the meaning of the Act, the proper basis of comparison appears to be between the purchase price and the home market price of such merchandise. Purchase price, as defined in section 203 of the Act (19 U.S.C. 162), was used since all export sales to the United States of these I-beams from Belgium appear to be made to unrelated purchasers in the United States prior to the dates of exportation. Home market price, as defined in § 153.2, Customs Regulations (19 CFR 153.2), was used since such merchandise appears to have been sold in the home market in sufficient quantities to provide an adequate basis of comparison for fair value purposes. In accordance with § 153.31(b) Customs Regulations (19 CFR 153.31(b)), pricing information was obtained concerning sales of this merchandise to the U.S. involving shipments during the period August 1, 1978 through January 31, 1979, and home market sales occurring at or about the time of sales to the U.S.

c. *Purchase Price.* For the purposes of this tentative determination, since all merchandise was purchased, or agreed to be purchased, prior to the time of exportation by the persons by whom or for whose account it was imported, within the meaning of section 203 of the Act, purchase price has been calculated on the basis of the f.o.b. Antwerp prices to United States purchasers, with a deduction for Belgian inland freight.

d. *Home Market Price.* For the purposes of this tentative determination, the home market price was calculated on the basis of the weighted average delivered prices to both related and unrelated purchasers, with appropriate deductions for Belgian inland freight. Sales to related purchasers were considered to be arm's length transactions since they did not occur at prices less than those applicable to sales to unrelated purchasers. No other adjustments were claimed or allowed.

e. *Results of Fair Value Comparisons.* Using the above criteria, purchase price was found to be not less than the home market price of such merchandise. Comparisons were made on approximately 100 percent of the sales of these I–beams to the United States from Belgium during the period of investigation. In accordance with § 153.40, Customs Regulations (19 CFR 153.40), interested persons may present written views or arguments, or request in writing that the Secretary of the Treasury afford an opportunity to present oral views.

Any request that the Secretary of the Treasury afford an opportunity to present oral views should be addressed to the Commissioner of Customs, 1301 Constitution Avenue, NW., Washington, D.C. 20229, in time to be received by his office not later than June 28, 1979. Such requests must be accompanied by a statement outlining the issues wished to be discussed, which issues may be discussed in greater detail in a written brief.

Any written views or arguments should be addressed in ten copies to the Commissioner of Customs in time to be received in his office no later than July 13, 1979. All persons submitting written views or arguments should avoid repetitious and merely cumulative material. Counsel for the petitioner and respondent are also requested to send to each other all written submissions, including non-confidential summaries or approximated presentations of all confidential information.

This tentative determination and the statement of reasons therefor are published pursuant to § 153.34(a), Customs Regulations (19 CFR 153.34(a)).

Robert H. Mundheim,

General Counsel of the Treasury.

June 7, 1979.

[FR Doc. 79–18417 Filed 6–12–79; 8:45 am]

BILLING CODE 4810-22-M

Elemental Sulphur From Mexico; Tentative Determination To Modify or Revoke Dumping Finding

AGENCY: U.S. Treasury Department.

ACTION: Tentative modification or revocation of finding of dumping.

SUMMARY: This notice is to advise the public that it appears that elemental sulphur from Mexico is no longer being sold to the United States at less than fair value within the meaning of the Antidumping Act, 1921, as amended. Sales at less than fair value generally occur when the price of merchandise sold for exportation to the United States is less than the price of such or similar merchandise sold in the home market or to third countries. In addition, the concerned exporters have given assurances that future sales will not be at less than fair value. If this action is made final, imports of this merchandise from Mexico on or after the effective date of this notice will no longer be liable for special dumping duties under the Antidumping Act, 1921. Interested persons are invited to comment on this action.

EFFECTIVE DATE: June 13, 1979.

FOR FURTHER INFORMATION CONTACT: Richard Rimlinger, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202–566–5492).

SUPPLEMENTARY INFORMATION: A finding of dumping with respect to elemental sulphur from Mexico was published as Treasury Decision 72–179 in the Federal Register of June 28, 1972 (37 FR 12727).

On January 5, 1978, the finding of dumping was modified to exclude elemental sulphur produced and sold by Azufrera Panamericana, S.A. (Azufrera) (43 FR 954).

After due investigation, it has been determined tentatively that elemental sulphur from Mexico is no longer being, nor is likely to be, sold to the United States at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 *et seq.*).

Statement of Reasons on Which This Tenative Determination Is Based

The investigation indicated that all shipments of elemental sulphur from Mexico to the United States since 1974, have been made at not less than fair value. Sulphur produced by three Mexican companies was sold to the United States during that period. Although sulphur produced by Azufrera has already been excluded from the finding, sulphur produced by Petroleas Mexicanos (Pemex) but marketed by Azufrera and that which was both

produced and sold by Compania Exploradora del Istmo, S.A. (CEDI) were not so excluded. Written assurances now have been given by Azufrera and CEDI—the only companies actually engaged in sales to the United States—that future sales of elemental sulphur to the United States marketed by them will not be made at less than fair value.

Accordingly, notice is hereby given that the Department of the Treasury intends to revoke the finding of dumping on elemental sulphur from Mexico.

In accordance with § 153.40, Customs Regulations (19 CFR 153.40), interested persons may present written views or arguments, or request in writing that the Secretary of the Treasury afford an opportunity to present oral views. A copy of all submissions should be delivered to any counsel that has heretofore represented any parties in these proceedings.

Any requests that the Secretary of the Treasury afford an opportunity to present oral views should be addressed to the Commissioner of Customs, 1301 Constitution Avenue, NW, Washington, D.C. 20229, in time to be received by his office not later than June 25, 1979. Such requests must be accompanied by a statement outlining the issues wished to be discussed.

Any written views or arguments should likewise be addressed to the Commissioner of Customs in time to be received by his office not later than July 13, 1979.

This notice is published pursuant to § 153.44(c) of the Customs Regulations (19 CFR 153.44(c)).

Robert H. Mundheim,
General Counsel of the Treasury.
June 7, 1979.

BILLING CODE 4810-22-M

INTERSTATE COMMERCE COMMISSION

[Twenty-Sixth Revised Exemption No. 129]

Atlanta & Saint Andrews Bay Railway Co., et al; Exemption Under Provison of Rule 19 of the Mandatory Car Service Rules Ordered in Ex Parte No. 241

It appearing, That the railroads named herein own numerous forty-foot plain boxcars; that under present conditions, there is virtually no demand for these cars on the lines of the car owners; that return of these cars to the car owners would result in their being stored idle on these lines; that such cars can be used by other carriers for transporting traffic offered for shipments to points remote from the car owners; and that compliance with Car Service Rules 1 and 2 prevents such use of plain boxcars owned by the railroads listed herein, resulting in unnecessary loss of utilization of such cars.

It is ordered, That, pursuant to the authority vested in me my Car Service Rule 19, plain boxcars described in the Official Railway Equipment Register, I.C.C. RER 6410–A, issued by W. J. Trezise, or successive issues thereof, as having mechanical designation "XM," with inside length 44-ft. 6-in. or less, regardless of door width and bearing reporting marks assigned to the railroads named below, shall be exempt from provisions of Car Service Rules 1(a), 2(a), and 2(b).

Atlanta & Saint Andrews Bay Railway Company, Reporting Marks: ASAB
Chicago, West Pullman & Southern Railroad Company, Reporting Marks: CWP
Illinois Terminal Railroad Company, Reporting Marks: ITC
Louisville, New Albany & Corydon Railroad Company, Reporting Marks: LNAC
[1] Missouri-Kansas-Texas Railroad Company, Reporting Marks: MKT-BKTY
• • •

Effective 12:01 a.m., June 1, 1979, and continuing in effect until further order of this Commission.

Issued at Washington, D.C., May 25, 1979.

BILLING CODE 7035-01-M

[Exception No. 3 to Corrected Second Revised Service Order No. 1301]

Chicago, Rock Island and Pacific Railroad Co.

Pursuant to the authority vested in me by section (a)(4) of Corrected Second Revised Service Order No. 1301, the Chicago, Rock Island and Pacific Railroad Company is authorized to use 40-ft., narrow-door plain boxcars owned by Burlington Northern Inc. for loading at stations in the State of Oklahoma, and destined to any station designated by the shipper, regardless of the provisions of Section (a)(3) of Corrected Second Revised Service Order No. 1301 which authorizes these cars to be loaded to any station on the lines of Burlington Nothern Inc.

Effective June 1, 1979.
Expires June 19, 1979.

[1] Addition
• • • Richmond, Fredericksburg and Potomac Railroad Company deleted.

Issued at Washington, D.C., May 31, 1979.

Joel E. Burns,
Director, Bureau of Operations.

BILLING CODE 7035-01-M

[Exemption No. 167]

Chicago, Rock Island and Pacific Railroad Co.; Exemption Under Provision of Rule 19 of the Mandatory Car Service Rules Ordered in Ex Parte No. 241

There has been a substantial increase in the demand for 40-ft., narrow-door plain boxcars for shipments of grain from stations on the Chicago, Rock Island and Pacific Railroad Company (RI) in the State of Oklahoma. There are substantial shortages of these cars on the lines of RI, and RI is unable to furnish shippers 40-ft., narrow-door plain boxcars of suitable ownership to move the present grain harvest.

It is ordered, That pursuant to the authority vested in me by Car Service Rule 19:

The Chicago, Rock Island and Pacific Railroad Company is authorized to accept from shippers, within the State of Oklahoma, 40-ft., narrow-door plain boxcars less than 40-ft., 6-in., in length and bearing mechanical designation "XM" as listed in the Official Railway Equipment Register ICC RER 6410-A, issued by W.J. Trezise, or successive issues thereof, regardless of the provisions of Car Service Rules 1 and 2.

It is further ordered,

This exemption shall not apply to cars of Mexican or Canadian ownership or to cars subject to Interstate Commerce Commission or Association of American Railroads' Orders requiring return of cars to owner.

Effective June 1, 1979.
Expires June 19, 1979.

Issued at Washington, D.C., May 31, 1979.

BILLING CODE 7035-01-M

[Decision No. 37149]

Kansas Intrastate Freight Rates and Charges—1979

Decided: June 4, 1979

By petition filed March 20, 1979, The Atchison, Topeka and Santa Fe Railway (Atchison) operating in intrastate commerce in Kansas, requests that this Commission institute an investigation of its Kansas Intrastate freight rates and

charges, under 49 U.S.C. 11501 and 11502. Atchison seeks an order authorizing it to increase such rates and charges in the same amounts approved for interstate application by this Commission in Ex Parte No. 357. Atchison has stated grounds sufficient to warrant instituting an investigation. Atchison has also requested that certain railroads operating in Kansas be made parties to this proceeding. This request will not be granted.

The Atchison allegation that "the State Corporation Commission of the State of Kansas . . . presumably would deny the application of other Kansas rail carriers" does not establish that this Commission should name as respondents the other railroads operating in Kansas absent a request on their behalf.

The St. Louis-San Francisco Railway Company (Frisco), the Missouri-Kansas-Texas Railroad Company (Missouri) and the Union Pacific Railroad Company (UP), filed letter requests to be joined as respondents in this proceeding as a result of the failure of the State Corporation Commission of the State of Kansas to grant an increase based on the increase authorized by the Commission in Ex Parte 357. These petitions will be granted.

It is ordered: The Atchison petition for investigation and the requests of the Frisco, Missouri and UP are granted. An investigation, under 49 U.S.C. 11501 and 11502, is instituted to determine whether the Kansas intrastate rail freight rates maintained by the Atchison, Frisco, Missouri, and UP in any respect cause any unjust discrimination against or any undue burden on their interstate or foreign commerce operations, or cause undue or unreasonable advantage, perference, or prejudice as between as persons or localities in interstate or foreign commerce, or are otherwise unlawful, by reason of the failure of such rates and charges to include the full increases authorized for interstate application by this Commisison in Ex Parte No. 357. In the investigation we shall also determine if any rates or charges, or maxiumu or minimum charges, or both, should be prescribed to remove any unlawful advantage, preference, discrimination, undue burden, or other violation of law, found to exist.

All persons who wish to participate in this proceeding and to file and receive copies of pleadings shall make known that fact by notifying the Office of Proceedings, Room 5342, Interstate Commerce Commission, Washington, D.C. 20423, on or before 15 days from the Federal Register Publication date. Although individual participation is not precluded, to conserve time and to avoid unnecessary expense, persons having common interests should endeavor to consolidate their presentations to the greatest extent possible. This Commission desires participation of only those who intend to take an active part in this proceeding.

As soon as practicable after the last day for indicating a desire to participate in the proceeding, this Commission will serve a list of names and addresses on all persons upon whom service of all pleadings must be made. Thereafter, this proceeding will be assigned for oral hearing or handling under modified procedure.

A copy of this decision shall be served upon petitioner Atchison, the Frisco, the Missouri, and the UP and copies shall be sent by certified mail to the State Corporation Commission of the State of Kansas and the Governor of Kansas. Further notice of this proceeding shall be given to the public by deposition a copy of this decision in the Office of the Secretary of the Interstate Commerce. Commission at Washington, D.C., and by filing, a copy with the Director, Office of the Federal Register, for publication in the Federal Register.

This is not a major Federal action significantly affecting the quality of the human environment. Furthermore, this decision is not a major regulatory action under the Energy Policy and Conservation Act of 1975.

By the Commission, Alan Fitzwater, Director, Office of Proceedings.

H. G. Homme, Jr.,

Secretary.

BILLING CODE 7035-01-M

[Notice No. 59]

Motor Carrier Temporary Authority Applications

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the Federal Register publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the Federal Register. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

MC 14252 (Sub-36TA), filed January 10, 1979, and published in the Federal Register issue of February 23, 1979, and republish as corrected this issue. Applicant: COMMERCIAL LOVELACE MOTOR FREIGHT, INC., 3400 Refugee Road, Columbus, Ohio 43227. Representative: William C. Buckham, 3400 Refugee Road, Columbus, Ohio 43227. Common carrier-regular route. *General commodities, except those of unusual value, class A or B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment* (1) Between Danville, IL and junction IL Hwy. 1 and U.S. Hwy. 24; from Danville, IL over IL Hwy. 1 to the junction of U.S. Hwy. 24 at or near Wateska, IL and return over the same route. (2) Between the Junction of IL Hwy. 1 and U.S. Hwy. 24, and Gilman, IL from the junction of IL Hwy. 1 and U.S. Hwy. 24 over U.S. Hwy. 24 to Gilman, IL, and return over the same route. (3) Between Gilman, IL and Champaign, IL from Gilman, IL over U.S. Hwy. 45 to Champaign, IL and return over the same route. (4) Between Onarga, IL and the junction of IL Hwy. 54 and U.S. Hwy. 150 from Onargo, IL over IL Hwy. 54 to the junction of IL Hwy. 54 and U.S. Hwy. 150, and return over the same route. (5) Between Junction U.S. Hwys. 24 and IL Hwy. 49, and the junction of IL Hwy. 49 and U.S. Hwy. 150 from the junction of U.S. Hwy. 24, and IL Hwy. 49 at or near Crescent City, IL over IL Hwy. 49 to the junction

of U.S. Hwy. 150 and return over the same route. Service is authorized at all intermediate points on the above described routes and at the off-route point of East Lynn, IL. The purpose of this republication is to completely show the territorial description, as filed. Supporting shipper(s): "There are (14) shippers. Their statements may be examined at the office listed below and Headquarters." Send protests to: Frank L. Calvary, District Supervisor, Interstate Commerce Commission, 220 Federal Building and U.S. Courthouse, 85 Marconi Boulevard, Columbus, Ohio 43215.

MC 109533 (Sub-109TA), filed March 22, 1979, and published in the Federal Register issue of May 1, 1979, and republish as corrected this issue. Applicant: OVERNITE TRANSPORTATION CO., 1000 Semmes Avenue, Richmond, VA 23224. Representative: E. T. Liipfert, 1660 L Street NW., Washington, DC 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting *general commodities (except those of unusual value, classes A & B explosives, household goods as described by the Commission, commodities in bulk and those requiring special equipment*, (1) between Louisville, KY, and Hazel, KY, from Louisville, KY over Interstate Hwy 65 to the junction of United States Western KY Parkway, thence over Western KY Parkway to the junction of U.S. Hwy 62, thence over U.S. Hwy 62 to junction of Purchase Parkway, thence over Purchase Parkway to Benton, KY, thence over U.S. Hwy 641 to Hazel and return over the same route serving all intermediate points; (2) between Madisonville, KY and the junction of U.S. Alternate Hwy 41 and Western KY Parkway over U.S. Alternate Hwy 41 serving all intermediate points; (3) betwen Paducah, KY and Western KY Parkway over U.S. Hwy 62 serving all intermediate points; (4) In connection with routes 1, 2 and 3, serving all points in the counties of Breckenridge, Bullitt, Butler, Caldwell, Calloway, Christian, Crittenden, Daviess, Edmonson, Grayson, Hancock, Hardin, Hart, Henderson, Hopkins, Jefferson, Larue, Livingston, Logan, Lyon, McCracken, McLean, Marshall, Meade, Muhlenberg, Ohio, Todd, Trigg, Union, and Webster Counties as off-route points; (5) In connection with routes 1, 2 and 3, serving the commercial zones of the termini and intermediate points, for 180 days. An underlying ETA seeks 90 days of authority. Suporting Shipper(s): There are 343 supporting shippers to this application. Their statements may be examined at the office listed below and at Headquarters. Send Protests To: Paul D. Collins, DS, ICC, Rm. 10-502 Federal Bldg., 400 North 8th Street, Richmond, VA 23240. The purpose of this republication is to correctly show the complete territorial description which was previously omitted.

MC 109692 (Sub-84TA), filed April 10, 1979. Applicant: GRAIN BELT TRANSPORTATION CO., Route 13, Kansas City, MO 64161. Representative: Warren H. Sapp, P.O. Box 16047, Kansas City, MO 64112. (1) *Iron and steel tanks, and parts, components and accessories therefor* from the Kansas City, MO-KS Commercial Zone to points in AR, IL, IN, KY, LA, MN, ND, OH, SD, TN, and WI; and (2) materials, equipment and supplies used in the manufacture of the commodities named in (1) above from points in AR, IL, IN, KY, LA, MN, ND, OH, SD, TN and WI to the Kansas City, MO-KS Commercial Zone for 180 days. Supporting Shipper(s): Butler Maufacturing Co., 7400 East 13th Street, Kansas City, MO 64126. Send protests to: Vernon V. Coble, DS, ICC, 600 Federal Building, 911 Walnut St., Kansas City, MO 64106.

MC 110683 (Sub-137TA), filed March 20, 1979, and published in the Federal Register issues of April 24, 1979 and May 18, 1979, and republish as corrected this issue. Applicant: SMITH'S TRANSFER CORP., P.O. Box 1000, Staunton, VA 24401. Representative: Francis W. McInerny, 1000 16th Street, NW., Washington, DC 20036. The scope of this application remains as previously published. The purpose of this republication is to show that the applicant intends to tack the authority sought with its existing authority, in addition to correctly show the destination as Barren, KY in lieu Barrne and to correctly show that KY Hwy 611 should read KY Hwy 61.

MC 116323 (Sub-3TA), filed April 27, 1979. Applicant: STEGALL MILLING CO., INC., P.O. Box 607, Marshville, NC 28103. Representative: Archie B. Culbreth, Attorney At Law, Suite 202, 2200 Century Parkway, Atlanta, GA 30345. BILLING CODE 7035-01-M

[Notice No. 91]

Motor Carrier Temporary Authority Applications

June 5, 1979.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

MC 475 (Sub-3TA), filed May 16, 1979. Applicant: WYMORE TRANSFER CO., P.O. Box 448, Oregon City, OR 97045. Representative: David C. White, 2400 S.W. BILLING CODE 7035-01-M

Operating Rights Application(s) Directly Related to Finance Proceedings

The following operating rights application(s) are filed in connection with pending finance applications under section 11343 (formerly section 5(2)) of the Interstate Commerce Act, or seek tacking and/or gateway elimination in connection with transfer applications under Section 10926 (formerly section 212(b)) of the Interstate Commerce Act.

An original and one copy of protests to the granting of the authorities must be filed with the Commission on or before July 13, 1979. Such protests shall comply with Special Rule 247(e) of the Commission's *General Rules of Practice* (49 CFR 1100.247) and include a concise statement of protestant's interest in the proceeding and copies of its conflicting authorities. Verified statements in opposition should not be tendered at this time. A copy of the protest shall be served concurrently upon applicant's representative or applicant if no representative is named.

Each applicant states that approval of its application will not significantly affect the quality of the human environment nor involve a major regulatory action under the Energy Policy and Conservation Act of 1975.

MC 109397 (Sub-454F) (partial correction), filed April 27, 1979. Previously noticed in the Federal Register issue of May 17, 1979. Applicant: TRI-STATE MOTOR TRANSIT CO., P.O. Box 113, Joplin, MO 64801. Portions of the purchased authority was omitted and should be included as follows: 3. *Commodities*, which because of size or weight require special equipment, and related *machinery parts*, and related *contractor's materials* and *supplies* when their transportation is incidental to commodities requiring special equipment, and *self-propelled articles* each weighing 15,000 pounds or more, and *related machinery, equipment, tools, parts*, and *supplies* moving in connection therewith (restricted to self-propelled articles which are transported on trailers), incidental to and used in connection with the construction, repairing, or dismantling of gas, gasoline, and oil pipe lines, between points in CA, on the one hand, and, on the other, points in the United States (except AK and HI). Restriction: Restricted to traffic moving to or from pipe line rights-of-way. 4. *Commodities*, which because of size or weight require special equipment, and related *machinery parts*, and related *contractor's materials* and *supplies* when their transportation is incidental to commodities requiring special equipment, and *self-propelled articles* each weighing 15,000 pounds or more, and related *machinery, equipment, tools, parts*, and *supplies* moving in connection therewith (restricted to self-propelled articles which are transported on trailers), used in, or in connection with, the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum and their products and by-products, between points in AR, CO, IA, KS, LA, MO, NM, OK, TX, WY, WI, ND, SD, MN, IL, IN, OH, PA, NJ, DE, MD, NC, WV, VA, NY, CT, RI, MA, and DC. 7. *Oilfield equipment and supplies, except commodities moving in tank vehicles, new passenger automobiles, and Classes A and B explosives, between points in MO, on the one hand, and, on the other, ports of entry on the Pacific Coast and those on the United States-Canada Boundary line—restricted to traffic moving to or from AK or foreign commerce.* 10. (a) *Commodities*, the transportation of which because of their size or weight requires the use of special equipment or handling, and *parts of commodities*, the transportation of which because of their size or weight requires the use of special equipment or handling, except commodities moving in tank vehicles, new passenger automobiles, and Classes A and B explosives, and (b) *self-propelled articles*, each weighing 15,000 pounds or more, transported on trailers, and related *machinery, tools, parts*, and *supplies* moving in connection therewith, between points in IL, IN, WY, NM, IA, MO, AR, KY, and LA, on the one hand, and, on the other, ports of entry on the Pacific Coast and those on the United States-Canada Boundary line—restricted to traffic moving to or from AK or foreign commerce. 11. (a) *Commodities*, the transportation of which because of their size or weight requires the use of special equipment or handling, and *parts of commodities*, the transportation of which because of the size or weight requires the use of special equipment or handling, except commodities moving in tank vehicles, new passenger automobiles, and Classes A and B explosives, and (b) *self-propelled articles* each weighing 15,000 pounds or more, transported on trailers, and related *machinery, tools, parts*, and *supplies* moving in connection therewith, between points in WI, MN, and ND, on the one hand, and, on the other, ports of entry on the Pacific Coast and those on the United States-Canada Boundary line—restricted to traffic

moving to or from AK or foreign commerce. 18. *Machinery, equipment, materials,* and *supplies* used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines for the transportation of water and sewerage, including the stringing and picking up of pipe—restricted to traffic originating at or destined to pipeline rights-of-way, and except commodities moving in tank vehicles, new passenger automobiles and Classes A and B explosives, between points in AZ, CT, DE, ID, MA, MD, ME, NH, NC, NJ, NV, RI, SC, VT, and DC, on the one hand, and, on the other, ports of entry on the Pacific Coast and those on the United States-Canada Boundry line—restricted to traffic moving to or from AK or foreign commerce. 19. *Earth drilling machinery* and *equipment,* and *machinery, equipment, materials, supplies,* and *pipe* incidental to, used in, or in conneciton with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (b) the completion of holes or wells drilled, (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites and (c) the injection or removal of commodities into or from holes or wells, except commodities moving in tank vehicles, new passenger automobiles, and Classes A and B explosives, between points in WY, NM, NE, IA, MO, AR, LA, KY, NV, and IN, on the one hand, and, on the other, ports of entry on the Pacific Coast and those on the United States-Canada Boundary line—restricted to traffic moving to or from AK or foreign commerce. 21. *Aerospace craft* which because of size or weight require special equipment or handling, and *parts* of aerospace craft which because of size or weight require special equipment or handling, between points in CA, WA, NE, MN, SD, ND, AZ, OR, WY, UT, NM, TX, OK, CO, IA, KS, MO, AR, LA, ID, MT, and NB, on the one hand, and, on the other, points in the United States in and west of MN, IA, MO, AR, and LA. 22.(a) *Antipollution systems,* which because of size or weight special equipment or handling; and (b) *parts* of commodities in (a) above, from points in NJ, to points in LA, CA, WA, OR, ID, and MT. 23. *Lumber* and *wood products,* which because of size or weight require special equipment or handling, and *parts* of lumber and wood products, from points in ID and MT, to points in CO, IA, LA, NM, OK, TX, IL, IN, MI, OH, KY, PA, MA, RI, CT, NY, NJ, DE, MD, WV, VA, NC, and DC.

24.(a) *Aircraft ground support equipment* (except automobiles, trucks and buses as defined in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and 766), which because of size or weight requires the use of special equipment, and (b) *self-propelled aircraft ground support equipment* weighing 15,000 pounds or more, transported on trailers, between points in WA, OR, UT, NV, AZ, and CA, on the one hand, and, on the other, points in the United States (except AK and HI). 29. (1) *Turbines, steam condensers, feed water heaters, weldments* and *heat exchangers,* (2) *parts* of the commodities in (1) above, and (3) *iron* and *steel castings* and *forgings,* restricted in (1) above to the transportation of commodities which because of size or weight require the use of special equipment and in (2) above to the transportation of parts which because of size or weight do not require the use of special equipment in mixed loads with commodities in (1) between points in ND, SD, NM, NY, PA, MD, DC, VA, WV and NC, on the on the one hand, and, on the other, points in and west of MN, IA, MO, AR, and LA. 30. *Iron* and *steel articles,* from points in CA, to points in AL, AK, AZ, CA, FL, GA, ID, OR, SC, TN, UT, CO, AR, IL, IA, KS, KY, LA, MI, NM, NC, OH, OK, PA, TX, VA, WA, WV, WY, WI, and MN. 31. *Pre-finished vinyl* or *paper-covered paneling, gypsum board, hardboard, composition board* and *molding,* which because of size or weight require special equipment, from the plant site of Sioux Veneer Panel Co., at or near Boise, ID, to points in OR and WA. 32. *Steel roofing,* from Phoenix, AZ, and *reinforcing bars,* from Helena, AZ, to points in CA. 33. Such *contractors' equipment, heavy* and *bulky articles, machinery* and *machinery parts,* and *articles requiring specialized handling or rigging,* used in, or in connection with, the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum and their products and by-products, between points in MT, ND, and SD, on the one hand, and, on the other, points in CT, DE, MD, MA, NJ, NY, NC, PA, RI, VA, WV, and DC. 38. *Turbines, steam condensers, feed water heaters, weldments, heat exchangers,* and *iron* and *steel castings* and *forgings,* which because of size or weight require special equipment or handling, between VT, NH, ME, NY, PA, and MD, on the one hand, and, on the other, points in and west of IN, KY, AR, and LA. 39. *Zinc* and *zinc products,* which because of size or weight require the use of special equipment, from points in VA, NC, CT, DE, MD, MA, NJ, NY, PA, RI, WV, and DC, to points in and west of TX, OK, KS, NE, SD, and ND. 40. *Refined copper,* which because of size or weight requires the use of special equipment, from points in VA, NC, CT, DE, MD, MA, NJ, NY, PA, RI, WV, and DC, to points in and west of TX, OK, KS, NE, SD, and ND. 41. *Aluminum* and *aluminum articles,* which because of size or weight require the use of special equipment, from points in VA, NC, CT, DE, MD, MA, NJ, NY, PA, RI, WV, and DC, to points in and west of TX, OK, KS, NE, SD, and ND. 42. (1) *Tractors* with or without *attachments* (except tractors used for pulling highway trailers), *lift trucks, excavators, motor graders, scrapers, engines, generators, generators and engines combined, road rollers, pipe layers, dump trucks,* with or without bodies designed for off-highway use; (2) *parts, attachments* and *accessories* for the commodities described in (1) above; which because of size or weight require the use of special equipment, from the plant sites and facilities of Caterpillar Tractor Co., located in Scott County, IA, to points in VA, NC, CT, DE, MD, MA, NJ, NY, PA, RI, WV, and DC. 46. *Radioactive materials* and *radioactive material handling containers, which* because of size or weight require the use of special equipment or handling, between points in WY, CO, NM, KS, OK, TX, LA, AR, MO, IA, WA, OR, ID, MT, UT, KY, IN, and WI, on the one hand, and, on the other, points in the United States (except AK and HI). 47. *Lumber, particleboard* and *plywood,* which because of size or weight require the use of special equipment, from points in MA, RI, CT, NJ, NY, PA, MD, DE, DC, VA, NC, WV, OH, IN, MI, and IL, to points in and west of TX, OK, KS, NE, SD, and ND. 48. *Pollution control systems, parts,* and *attachments* for pollution control systems, which require special handling or rigging, and *equipment, materials,* and *supplies* used in the installation, operation, and maintenance of pollution control systems, from points in MD, NC, VA, NY, PA, CT, MA, and RI, to point in the United States (except AK, HI, IL, MI, IN, OH, WV, NC, VA, DE, MD, DC, PA, NY, NJ, CT, RI, MA, VT, NH, and ME). 49. *Pollution control systems, parts* and *attachments* for pollution control systems, and *equipment, materials,* and *supplies* used in the installation, operation, and maintenance of pollution control systems, from points in NJ, to points in the United States (except AK, HI, IL, MI, IN, OH, WV, NC, VA, DE, MD, DC, PA, NY, NJ, CT, RI, MA, VT, NH, and ME). 50. *Aluminum products* and *fabricated or structural steel*

requiring specialized handling or rigging, from points in MA, CT, RI, NJ, NY, PA, WV, VA, NC, DC, OH, IN, MI, and IL, to points in the United States (except AK, HI, IL, IN, MI, OH, WV, NC, VA, DE, MD, DC, PA, NY, NJ, CT, RI, MA, VT, NH, and ME). 55. *Metal buildings* and *metal wall sections* requiring special handling (a) from points in MA, CT, RI, NY, NJ, PA, MD, DE, DC, VA, WV, NC, and OH, to points in the United States (except AK and HI), and (b) from points in CA, OR, WA, MT, ID, UT, NM, CO, WY, KS, OK, TX, IA, ND, SD, MN, WI, IL, IN, MO, AR, LA, and KY, to points in MA, RI, CT, NY, NJ, MD, DE, DC, VA, NC, WV, PA, and OH. 56. (a) *Pre-cut buildings* which because of size or weight require special equipment; and (b) *parts, attachments, materials,* and *supplies* for pre-cut buildings, from points LA, TX, OK, AR, NM, MO, KS, CO, UT, WY, IL, IN, WI, KY, OH, ND, SD, MN, WA, ID, MT, OR, CA, NC, VA, WV, DC, MD, DE, PA, NJ, CT, MA, RI, NY, and MI, to points in the United States (except AK and HI). 57. *Iron* or *steel articles* which because of size or weight require special equipment, from points in MA, RI, CT, NY, NJ, PA, MD, DE, DC, WV, VA, and NC, to points in and west of LA, AR, MO, IA, and MN. 58. *Zinc* and zinc products, from points in Montgomery County, TN, to points in the United States in and west of ND, SD, NE, KS, OK, and TX. 59. *Commodities,* the transportation of which because of size or weight requires the use of special equipment, and related *machinery, parts,* and related *contractors' materials* and *supplies* when their transportation is incidental to the transportation by carrier of commodities which by reason of size or weight require the use of special equipment; *self-propelled articles,* each weighing 15,000 pounds or more, and related *machinery, tools, parts,* and *supplies* moving in connection therewith—restricted to commodities which are transported on trailers; 62. (1) *Turbines, steam condensers, feed water heaters, weldments* and *heat exchangers, (2) parts* of the commodities in (1) above, and (3) *iron* and *steel castings* and *forgings,* restricted in (1) above to the transportation of commodities which because of size or weight require the use of special equipment and in (2) above to the transportation of parts which because of size or weight do not require the use of special equipment in mixed loads with commodities in (1) above, between points in ID and MT, on the other hand, and, other other, points in the United States (except AK and HI). 63. *Electric controllers* and *instruments* which because of size or weight require special equipment, from points in CT, MA, NJ, NY, PA, DE, MD, VA, and NC, to points in ID and MT. 64. Asphalt mixing systems which because of size or weight require special equipment, between King County, WA, on the one hand, and, on the other, points in ID and MT. 65. *Electonic equipment, machinery,* and *systems* requiring specialized handling or rigging, between VT, on the other hand, and on the other, points in ID and MT. 66. *Source, special nuclear,* and *by-product materials, radioactive materials,* which because of size or weight require special equipment or handling, and *related reactor experiment equipment, component parts,* and *associated materials,* between points in ID, CA, FL, and NV, on the other hand, and, on the other, points in the United States (except AK and HI).

Note.—This matter is directly related to MC–F–13956F.

By the Commission.

BILLING CODE 7035-01-M

[Permanent Authority Decisions Volume No. 68]

Permanent Authority Applications; Decision-Notice

Decided: May 22, 1979

The following applications are governed by Special Rule 247 of the Commission's *Rules of Practice* (49 CFR 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date notice of the application is published in the **Federal Register.** Failure to file a protest, within 30 days, will be considered as a waiver of opposition to the application. A protest under these rules should comply with Rule 247(e)(3) of the Rules of Practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding, (as specifically noted below), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. A protestant should include a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describe in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named. If the protest includes a request for oral hearing, such request shall meet the requirements of section 247(e)(4) of the special rules and shall include the certification required in that section.

On cases filed on or after March 1, 1979, petitions for intervention either with or without leave are appropriate.

Section 247(f) provides, in part, that an applicant which does not intend timely to prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the Commission will result in its dismissal.

If applicant has introduced rates as an issue it is noted. Upon request an applicant must provide a copy of the tentative rate schedule to any protestant.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication.*

Any authority granted may reflect administratively acceptable restrictive amendments to the service proposed below. Some of the applications may be been modified to conform to the Commission's policy of simplifying grants of operating authority.

We Find:

With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each common carrier applicant has demonstrated that its proposed service is required by the public convenience and necessity, and that each contract carrier applicant qualifies as a contract carrier and its proposed contract carrier service will be consistent with the public interest and the transportation policy 49 U.S.C. 10101. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human envirnment nor a major regulatory

action under the Energy Policy and Conservation Act of 1975.

In those proceedings containing a statement or note that dual operations are or may be involved we find, preliminarily and in the absence of the issue being raised by a protestant, that the proposed dual operations are consistent with the public interest and the transportation policy of 49 U.S.C. 10101 subject to the right of the Commission, which is expressly reserved, to impose such conditions as it finds necessary to insure that applicant's operations shall conform to the provisions of 49 U.S.C. 10930(a) [formerly section 210 of the Interstate Commerce Act.].

In the absence of legally sufficient protests, filed within 30 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, such duplication shall not be construed as confering more than a single operating right.

Applicants must comply with all specific conditions set forth in the grant or grants of authority within 90 days after the service of the notification of the effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

By the Commission, Review Board Number 1, Members Carleton, Joyce and Jones.

H. G. Homme, Jr.,

Secretary.

MC 16903 (Sub-60F), filed December 6, 1978, and previously published in the Federal Register on February 8, 1979, as MC 16903 (Sub-10F). Applicant: MOON FREIGHT LINES, INC., P.O. Box 1275, Bloomington, IN. Representative: Donald W. Smith, P.O. Box 40659, Indianapolis, IN 46240. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *roof insulation*, from the facilities of The Celotex Corporation, at Elizabethtown, KY, to points in MN, WI, IA, IL, MO, AR, LA, MS, AL, GA, FL, SC, NC, TN, KY, VA, WV, IN, MI, OH, PA, DE, MD, NJ, NY, and DC. (Hearing site: Miami, FL, or Washington, DC.)

MC 106373 (Sub-36F), filed February 26, 1979. Applicant: THE SERVICE TRANSPORT COMPANY, A CORPORATION, 114½ East Main Street, Ravenna, OH 44310. Representative: William P. Jackson, Jr., 3426 N. Washington Blvd., P.O. Box 1240, Arlington, VA 22210. To operate as a *common carrier* by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *iron and steel articles*, (1) from the facilities of Gibraltar Steel Corporation, Seneca Steel Corporation, and Beals, McCarthy and Rogers, Inc., at or near Buffalo, NY, and (2) from the facilities of Lake Eastern Steel Products Company and Steel Bar Service, Inc., at or near Niles, OH, to points in MI, IN, IL, and WI. (Hearing site: Akron, OH, or Washington, DC.)

Note.—The purpose of this republication is to correctly identify the Sub-No. as 60F.

MC 117903 (Sub-12F), filed February 7, 1979. Applicant: FRUITBELT TRUCKING INC., 12 Smith Street, St. Catharines, Ontario, Canada. Representative: Robert D. Gunderman, Suite 710 Statler Bldg., Buffalo, NY 14202. To operate as a *common carrier*, by motor vehicle, in foreign commerce only, over irregular routes, transporting (1) *meats, meat products, and meat byproducts, and articles distributed by meat-packing houses*, as described in sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk, in tank vehicles), and (2) *foodstuffs* (except the commodities in (1) above), in mixed loads with the commodities in (1) above, from points in IL, IA, and WI, to ports of entry on the international boundary line between the United States and Canada, restricted to the transportation of traffic originating at the facilities of Oscar Mayer & Co., Inc. (Hearing site: Buffalo, NY.)

BILLING CODE 7035-01-M

[Permanent Authority Decisions Volume No. 69]

Permanent Authority Applications; Decision-Notice

Decided: May 22, 1979.

The following applications, filed on or after March 1, 1979, are governed by Special Rule 247 of the Commission's *Rules of Practice* (49 CFR 1100.247). These rules provide, among other things, that a petition for intervention, either in support of or in opposition to the granting of an application, must be filed with the Commission within 30 days after the the date notice of the application is published in the Federal Register. Protests (such as were allowed to filings prior to March 1, 1979) *will be rejected*. A petition for intervention without leave must comply with Rule 247(k) which requires petitioner to demonstrate that it (1) holds operating authority permitting performance of any of the service which the applicant seeks authority to perform, and has the necessary equipment and facilities for performing that service, and (2) has either performed service within the scope of the application or has solicited business which is controlled by those supporting the application and which would have involved transportation performed within the scope of the application.

Persons unable to intervene under Rule 247(k) may file a petition for leave to intervene under Rule 247(l) setting forth the specific grounds upon which it is made, including a detailed statement of petitioner's interest, the particular facts, matters, and things relied upon, the extent to which petitioner's interest will be represented by other parties, the extent to which petitioner's participation may reasonably be expected to assist in the development of a sound record, and the extent to which participation by the petitioner would broaden the issues or delay the proceeding.

Petitions not in reasonable compliance with the requirements of the rules may be rejected. An original and one copy of the petition to intervene shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named.

Section 247(f) provides, in part, that an applicant which does not intend timely to prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the Commission will result in its dismissal.

If an applicant has introduced rates as an issue it is noted. Upon request, an applicant must provide a copy of the tentative rate schedule to any protestant.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication (June 13, 1979).*

Any authority granted may reflect administratively acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

Findings:

With the exception of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each common carrier

applicant has demonstrated that its proposed service is required by the present and future public convenience and necessity, and that each contract carrier applicant qualifies as a contract carrier and its proposed contract carrier service will be consistent with the public interest and the tranportation policy of 49 U.S.C. § 10101. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where specifically noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In those proceedings containing a statement or note that dual operations are or may be involved we find, preliminarily and in the absence of the issue being raised by a petitioner, that the proposed dual operations are consistent with the public interest and the transportation policy of 49 U.S.C. § 10101 subject to the right of the Commission, which is expressly reserved, to impose such terms, conditions or limitations as it finds necessary to insure that applicant's operations shall conform to the provisions of 49 U.S.C. § 10930(a) [formerly section 210 of the Interstate Commerce Act].

In the absence of legally sufficient petitions for intervention, filed within 30 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of the decision-notice. To the extent that the authority sought below may duplicate an applicant's other authority, such duplication shall be construed as conferring only a single operating right.

Applicants must comply with all specific conditions set forth in the grant or grants of authority within 90 days after the service of the notification of the effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

By the Commission, Review Board Number 1, Members Carleton, Joyce and Jones.

H. G. Homme, Jr.,
Secretary.

MC 4963 (Sub-82F), filed March 12, 1979. Applicant: JONES MOTOR CO., INC., Bridge Street & Schuylkill Road, Spring City, PA 19475. Representative: Roland Rice, Suite 501 Perpetual Bldg., 1111 E Street, NW, Washington, DC 20004. To operate as a *common carrier,* by motor vehicle, in interstate or foreign commerce, transporting *general commodities* (except those of unusual value, classes A and B explosives, commodities in bulk, household goods as defined by the Commission, and those requiring special equipment), serving Glens Falls, Hudson Falls, South Glens Falls, and Fort Edward, NY, as off-route points in connection with carrier's otherwise authorized regular-route operations. (Hearing site: Albany, NY.)

MC 13123 (Sub-97F), filed March 12, 1979. Applicant: WILSON FREIGHT COMPANY, A Corporation, 11353 Reed Hartman Hwy., Cincinnati, OH 45241. Representative: Milton H. Bortz (same address as applicant). To operate as a *common carrier,* by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *refractory products* from the facilities of A. P. Green Refractories Co., at or near Mexico and Fulton, MO, to points in CT, DE, IN, KY, ME, MD, MA, MI, NH, NJ, NY, NC, OH, PA, RI, VA, WI, WV, and DC; and (2) *aluminum products,* from the facilities of Consolidated Aluminum Corporation, at or near Murphysboro, IL, to points in AR, CT, DE, GA, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MO, NH, NJ, NY, NC, OH, OK, PA, RI, TN, TX, VA, WI, WV, and DC. (Hearing site: Cincinnati, OH, or Washington, DC.)

MC 14252 (Sub-55F), filed March 12, 1979. Applicant: COMMERCIAL LOVELACE MOTOR FREIGHT, INC., 3400 Refugee Road, Columbus, OH 43227. Representative: William C. Buckham (same address as applicant). To operate as a *common carrier,* by motor vehicle, in interstate or foreign commerce, over regular routes, transporting *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) between Danville, IL, and junction IL Hwy 1 and U.S. Hwy 24, over IL Hwy 1, serving all intermediate points and the off-route point of East Lynn, IL, (2) between Gilman, IL, and junction IL HWY 1 and U.S. Hwy 24, over U.S. Hwy 24, serving all intermediate points, (3) between Gilman and Champaign, IL, over U.S. Hwy 45, serving all intermediate points, (4) between Onarga, IL, and junction IL Hwy 54 and U.S. Hwy 150, over IL Hwy 54, serving all intermediate points, and (5) between junction U.S. Hwy 24 and IL Hwy 49 and junction IL Hwy 49 and U.S. Hwy 150, over IL Hwy 49, serving all intermediate points. (Hearing site: Columbus, OH.)

MC 16882 (Sub-94F), filed March 12, 1979. Applicant: MURAL TRANSPORT, INC., P.O. Box 1785, North Brunswick, NJ 08902. Representative: W. C. Mitchell, 370 Lexington Avenue, New York, NY 10017. To operate as a *common carrier,* by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *automotive, bus, and truck chairs, seats, stools, fixtures, and steel beds,* from Dubuque, IA, Waxahachie, TX, Lancaster, PA, Riverside, CA, Harrison, AR, Sweetwater and Evensville, TN, and Salt Lake City, UT, to points in the United States (except AK and HI). (Hearing site: Washington, DC.)

MC 40852 (Sub-5F), filed March 5, 1979. Applicant: SEDALIA–MARSHALL–BOONVILLE STAGE LINE, INCORPORATED, 5805 Fleur Drive, Des Moines, IA 50321. Representative: Steven C. Schoenebaum, 1200 Register and Tribune Bldg., Des Moines, IA 50309. To operate as a *common carrier,* by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, motor vehicles, commodities in bulk, and those requiring special equipment), between Miami International Airport, at or near Miami, FL, New Orleans International (or Moissant) Airport, at or near New Orleans, LA, and Houston Intercontinental Airport, at or near Houston, TX, restricted to the transportation of traffic having a prior or subsequent movement by air. (Hearing site: Dallas or Houston, TX.)

MC 47583 (Sub-90F), filed March 12, 1979. Applicant: TOLLIE FREIGHTWAYS, INC., 1020 Sunshine Road, Kansas City, KS 66115. Representative: D. S. Hults, P.O. Box 225, Lawrence, KS 66044. To operate as a *common carrier,* by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *canned and preserved foodstuffs,* from the facilities of Heinz USA, Division of H. J. Heinz Company, at or near Muscatine and Iowa City, IA, to points in TX, restricted to the transportation of traffic originating at the named origins and destined to the indicated destinations. (Hearing site: Kansas City, MO.)

MC 61592 (Sub-435F), filed March 9, 1979. Applicant: JENKINS TRUCK LINE, INC., P.O. Box 697, Jeffersonville, IN

47130. Representative: E. A. DeVine, P.O. Box 737, Moline, IL 61265. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *metal wire and plastic insulated wire*, from Willimantic, CT, Siloam Springs, AR, and Enka, NC, to points in AZ, AR, CA, NM, NV, OR, TX, and WA. (Hearing site: Washington, DC.)

MC 61592 (Sub-436F), filed March 8, 1979. Applicant: JENKINS TRUCK LINE, INC., P.O. Box 697, Jeffersonville, IN 47130. Representative: E. A. DeVine, P.O. Box 737, Moline, IL 61265. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *filters*, and (2) *materials and supplies* used in the manufacture and distribution of filters (except commodities in bulk), between New Albany, IN, on the one hand, and, on the other, points in AL, CA, FL, IL, LA, MA, MN, MO, NY, OH, RI, VA, and WV. (Hearing site: Louisville, KY.)

MC 64932 (Sub-593F), filed March 9, 1979. Applicant: ROGERS CARTAGE CO., a corporation, 10735 South Cicero Avenue, Oak Lawn, IL 60453. Representative: Allan C. Zuckerman, 39 South LaSalle Street, Chicago, IL 60603. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *liquid chemicals*, in bulk, in tank vehicles, from the facilities of Dow Chemical U.S.A., Central Division, at Channahon, IL, to those points in the United States on and east of U.S. Hwy. 85. (Hearing site: Chicago, IL.)

MC 71593 (Sub-22F), filed March 12, 1979. Applicant: FORWARDERS TRANSPORT, INC., 1606 East 2nd Street, Scotch Plains, NJ 07076. Representative: Peter Wolff, P.O. Box 116, Scranton, PA 18504. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment) (1) between New Haven, CT, Chicago, IL, Baltimore, MD, Boston and Springfield, MA, New York, NY, and Philadelphia, PA, on the one hand, and on the other, Minneapolis, MN, and Kansas City, Mo, and (2) between Kansas City and St. Louis, MO, restricted in (1) and (2) above to the transportation of traffic moving on freight forwarder bills of lading as defined in 49 U.S.C. 10102(8) formerly Section 402(a)(5) of the Interstate Commerce Act. (Hearing site: New York, NY, or Washington, DC.)

MC 82492 (Sub-231F), filed March 2, 1979. Applicant: MICHIGAN & NEBRASKA TRANSIT CO., INC., 2109 Olmstead Road, P.O. Box 2853, Kalamazoo, MI 49003. Representative: Dewey R. Marselle (same address as applicant). To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *household products*, from Waxdale, WI, to points in KS, KY, MI, MO, NE, OH, TN, those in PA on and west of U.S. Hwy 219, and those in NY in and west of Broome, Courtland, Onondaga, and Oswego Counties. (Hearing site: Milwaukee, WI, or Chicago, IL.)

MC 98952 (Sub-63F), filed March 8, 1979. Applicant: GENERAL TRANSFER COMPANY, a corporation, 2880 North Woodford Street, Decatur, IL 62526. Representative: Paul E. Steinhour, 918 East Capitol Avenue, Springfield, IL 62701. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *foodstuffs, cleaning compounds, and toilet preparations*, (except commodities in bulk), in vehicles equipped with mechanical refrigeration, from the facilities of Couzens Warehouse & Distributors, Inc., at or near Chicago, IL, to points in IN, KY, MO, and OH, restricted to the transportation of traffic originating at the named origin and destined to the indicated destinations. (Hearing site: Springfield or Chicago, IL.)

MC 98952 (Sub-64F), filed March 12, 1979. Applicant: GENERAL TRANSFER COMPANY, a corporation, 2880 North Woodford Street, Decatur, IL 62526. Representative: Paul E. Steinhour, 918 East Capitol Avenue, Springfield, IL 62701. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *such commodities* as are dealt in or used by food and drug business houses, in vehicles equipped with mechanical refrigeration, (except commodities in bulk), from the facilities of A. E. Staley Manufacturing Company, at or near Chicago, IL, to points in IN, KY, MO, and OH, restricted to the transportation of traffic originating at the named origin and destined to the indicated destinations. (Hearing site: Springfield or Chicago, IL.)

MC 106603 (Sub-197F), filed March 12, 1979. Applicant: DIRECT TRANSIT LINES, INC., 200 Colrain Street, NW, P.O. Box 8099, Grand Rapids, MI 49508. Representative: Martin J. Sunshine Act Meetings

Federal Register
Vol. 44, No. 115
Wednesday, June 13, 1979

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

CONTENTS

	Items
Federal Communications Commission	1, 2, 3
Federal Deposit Insurance Corporation	4
Federal Maritime Commission	5
International Trade Commission	6, 7
Nuclear Regulatory Commission	8, 9
Occupational Safety and Health Review Commission	10
Parole Commission	11

1

FEDERAL COMMUNICATIONS COMMISSION.

TIME AND DATE: (9:30 a.m., Thursday, June 7, 1979.

PLACE: Room 856, 1919 M Street, N.W., Washington, D.C.

STATUS: Open Commission Meeting.

CHANGES IN THE MEETING: The following item has been added and the time of the meeting changed to 11:00 a.m.:

Agenda, Item No., and Subject

Aural—4—Petitions and application by the Trustees of the University of Pennsylvania, Radio Station WXPN (FM) Philadelphia, Pennsylvania (Docket No. 20677).

Additional information concerning this meeting may be obtained from the FCC Public Affairs Office, telephone number (202) 632-7260.

Issued: June 7, 1979.

[S-1168-79 Filed 6-11-79; 9:30 am]

4

FEDERAL DEPOSIT INSURANCE CORPORATION.

Notice of Agency Meeting.

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sushine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at 11:30 a.m. on Thursday, June 7, 1979, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to consider a recommendation regarding the initiation of termination-of-insurance proceedings against an insured bank, in accordance with section 8(a) of the Federal Deposit Insurance Act (12 U.S.C. 1818(a)).

In calling the meeting, the Board determined, on motion of Chairman Irvine H. Sprague, seconded by Director John G. Heimann (Comptroller of the Currency), concurred in by Director William M. Issac (Appointive), that Corporation business required its consideration of the matter on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matter in a meeting open to public observation; and that the matter was eligible for consideration in a closed meeting pursuant to subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(6), (c)(8), and (c)(9)(A)(ii)).

Dated: June 7, 1979.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

5

FEDERAL MARITIME COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: June 8, 1979, 44 FR 33235.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: 10 A.M., June 12, 1979.

CHANGE IN THE MEETING: Addition of the following item to the open session:

9. Proposed new service of Puerto Rico Maritime Shipping Authority in the Puerto Rico/Virgin Islands trades.

[S-1174-79 Filed 6-11-79; 2:23 pm]

BILLING CODE 6730-01-M

6

[USITC SE-79-23E]

INTERNATIONAL TRADE COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 44 FR 32336 (6/5/79).

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 10 a.m., Tuesday, June 12, 1979.

CHANGES IN THE MEETING: In deliberations held June 7, 1979, the Commission, by unanimous consent, voted to change the schedule with respect to item No. 4, as follows:

4. Petitions and complaints, if necessary:
a. Inclined-field acceleration tubes (Docket No. 574)—Briefing [in morning session] and vote [at 2 p.m.].
b. Surveyors reels (Docket No., 575)—Briefing [in morning session] and vote [at 2 p.m.].
c. Coke (Docket No. 554)—Briefing [in morning session] and vote [at 2 p.m.].

Commissioners Alberger, Moore, Bedell, and Stern determined by unanimous consent that Commission business requires the change in the schedule for these agenda items, and affirmed that no earlier announcement of the change to the agenda was possible, and directed the issuance of this notice at the ealiest practicable time. Commissioner Parker was not present for the vote.

Part II

Department of Health, Education, and Welfare

Office of Education

Health Education Program; Proposed Regulations Governing Award of Grants to State and Local Educational Agencies

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Part 161i]

Health Education Program

AGENCY: Office of Education, HEW.

ACTION: Proposed Regulations.

SUMMARY: The Commissioner proposes to amend Title 45 of the Code of Federal Regulations by adding a new Part 161i for the program of Health Education enacted by the Education Amendments of 1978. These proposed regulations govern the award of grants to State and local educational agencies for projects that are designed to establish and support programs of health education in elementary and secondary schools.

DATES: All written comments on the proposed regulations must be received on or before August 13, 1979. Public meetings will be held in each of the ten regions on July 11, 1979. The time for these meetings is—

9:00 a.m.–12:00 Noon
1:00 p.m.–5:00 p.m.
7:00 p.m.–9:00 p.m.

ADDRESSES: Written comments should be addressed to Mr. Simon A. McNeely, U.S. Office of Education, Room 2079, FOB No. 6, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

The locations of the public meetings are—

Region I—Boston: Bunker Hill Community College, Room C 202, Rutherford Avenue, Charlestown, Massachusetts
Region II—New York: Norman Thomas High School, 111 Each 33rd Street, New York City, New York.
Region III—Philadelphia: University City, Holiday Inn, 36th & Chestnut Streets, Philadelphia, Pennsylvania.
Region IV—Atlanta: Suite 2221, 101 Mariette Tower Bldg., Atlanta, Georgia.
Region V—Chicago: Center for Urban Education, 160 West Wendell Street, (1060 North Wells), Chicago, Illinois.
Region VI—Dallas: North Lake Junior College, 2000 Walnut Hill Lane, Irving, Texas.
Region VII—Kansas City: Penn Valley Community Junior College, 3201 Southwest Trafficway, Room CC 503, Kansas City, Missouri.
Region VIII—Denver: George Washington High School, Lunch Room, 655 South Monaco Street, Denver, Colorado.
Region IX—San Francisco: Room 209, Federal Office Bldg., 50 United Nations Plaza, San Francisco, California.
Region X—Seattle: Room RC 1132, North Seattle Community College, 9600 College Way North, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT:
Mr. Simon A. McNeely, (202) 245–8407.

For Information on Regional Hearings Contact:

The appropriate Regional Commissioner for Education Programs listed below:

Region I, Boston, Dr. Thomas J. Burns, (617) 223–7500
Region II, New York, Dr. William D. Green, (212) 264–4370
Region III, Philadelphia, Dr. Albert C. Crambert, (215) 596–1001
Region IV, Atlanta, Dr. William L. Lewis, (404) 221–2063
Region V, Chicago, Ms. Juliette Noone Lester, (312) 353–5215
Region VI, Dallas, Mr. Edward J. Baca, (214) 767–3626
Region VII, Kansas City, Dr. Harold Blackburn, (816) 374–2276
Region VIII, Denver, Dr. John Rumkel, (303) 837–3544
Region IX, San Francisco, Dr. Caroline Gillin, (415) 556–4920
Region X, Seattle, Mr. Allen Apodaca, (206) 442–0460

SUPPLEMENTARY INFORMATION:

A. Background

Health education has long been recognized as an important part of elementary and secondary education. Authorities in the field believe there is reason to be concerned about the extent and quality of health education programs in the schools of America. They are aware that much present-day human suffering, premature death, and economic loss are due to illness and injury that might have been prevented, or at least postponed to later years—and that many people could live more productively—if they had been educated to make better health-related choices in their general way of life.

Recognizing these national problems and realizing the significance to the national well-being of a concerted effort to promote health education and preventive measure, the Secretary of HEW, with the cooperation of the Commissioner of Education and the Assistant Secretary for Health, has established a school health initiative in the Department.

The Secretary has also establish interagency task forces on a number of other health-related initiatives including immunization, smoking and health, nutrition, mental health, child—health services (including school health services), teenage pregnancy and parenting, and prevention and intervention strategies in health promotion. All of these initiatives have implications for the improvement of school health education programs and for the involvement of State education agencies (SEAs) and local educational agencies (LEAs).

The Congress, too, has been aware of the importance of school health programs. In 1970, the Elementary and Secondary Education Act was amended to include sec. 806 of title VIII. This section provided assistance for demonstration programs of health and nutrition services for low-income children. The program was consolidated into Title IV of the Elementary and Secondary Education Act in the Education Amendments of 1974.

In Title III, Part I, of the Education Amendments of 1978, the Congress has initiated a new, direct grant program of school health education. These proposed regulations have been prepared for the administration of that program. The concern and intention of the Congress are reflected in the following statement from the Report of the Senate Committee on Human Resources, to accompany S. 1753, Education Amendments of 1978, Calendar No. 787, Report No. 95–856, May 15, 1978:

> The Committee believes additional emphasis must be placed on preventive health education in our public schools.
>
> Changes in personal lifestyle and a better understanding of good health principles are the key to improvements in the health of individuals and prevention of disease and illness.
>
> It is the committee's hope that the programs under (part I) will encourage a greater interest in providing preventive health education in our elementary and secondary schools.

B. Summary of Major Provisions

These proposed regulations describe the nature of projects to encourage the development and improvement of comprehensive health education programs in elementary and secondary schools. The methods and procedures for applying for grants and the selection criteria for grants are also set forth.

The following statements give the reasoning behind some of the major provisions of these proposed regulations for the purpose of facilitating comments.

Eligible applicants. Grants are restricted by the legislation to State educational agencies (SEAs) and local educational agencies (LEAs).

Program-specific definitions. Because some of the essential terms used in these proposed regulations may have different meanings for individuals, the Commissioner has attempted to define them as they are used in this context.

The term "comprehensive school health education," is described in § 161i.1. This term refers to learning experiences that motivate and educate

each student to protect, maintain, and improve his or her own health and the health of other people. These learning experiences are based on the best available scientific information, cover a broad range of subjects and concepts, and are designed to help students gain the understanding, attitudes, and behavorial skills that are essential to the achievement of health goals for the individual, the family, and the community. Health education experiences are selected, organized, and conducted in accordance with the needs, interests, and maturational levels of the individual students, and with the needs of the community at large.

A comprehensive school health education program is part of a "coordinated school health program." This latter term applies to all of the elements of a school-wide concern to protect and promote the health of students, staff, and others. The term is defined in § 1611.4 to include the following essential components:

(a) Comprehensive school health education;

(b) School health services;

(c) Healthful and safe school environment; and

(d) Guidance toward health careers.

Although all of the components of a school health program are essential and interrelated, funds are only available for the *comprehensive school health education* component. Thus, these regulations attempt to provide guidance for proposals to develop and improve programs of comprehensive school health education that, at the same time, contribute to the enhancement of the school health programs of which they are a part.

The *comprehensiveness* of school health education is emphasized to indicate that the program includes more than single-subject "programs." However, these proposed regulations require all applicants to include in each project plan learning experiences on smoking and health. The proposed regulations also call for the applicant in its comprehensive health education program to give attention to 10 other major national health concerns and to include other subjects, as appropriate.

Health education experts believe that the various subjects can be taught more effectively in a broad and integrated curriculum than in piece-meal fashion. The idea is to treat the various health-related subjects in a conceptual framework that stresses soundly-based decisions, prevention over remediation, and positive health practices in full and effective living.

The word "school" is used in the health education definition to differentiate this program from programs of general health education of the public that are conducted by public health agencies, voluntary health organizations, and others.

The definitions of "coordinated school health program," and "guidance toward health careers" are derived from terminology used in *A Statement of Basic Beliefs—the School Program of Health, Physical Education and Recreation,* published by the Society of State Directors of Health, Physical Education, and Recreation.

The definition of "school health services" is taken, with slight adaptation, from *Combined Glossary—Terms and Definitions from the Handbooks of the State Educational And Report Series,* published by the National Center for Educational Statistics, Department of Health, Education, and Welfare.

The definition of "comprehensive school health education" is derived from *A Statement of Basic Beliefs,* and it incorporates the definition of "health education" given in the *Combined Glossary.*

Project requirements. Sections 1611.20 through 1611.23 describe aspects of an SEA and LEA project that the Commissioner requires. These regulations propose that both the SEA and the LEA develop strategies in the project plan that will contribute to the advancement of the coordinated State or local school health program.

The main difference in the thrust of the requirements for an SEA as compared to an LEA project is that an SEA project must demonstrate effective Statewide leadership and promotion of health education covering several or all of the LEAs of the State. An LEA project must demonstrate effective educational services and materials to motivate and educate students concerning health maintenance and enhancement and the prevention of disease, illness, and injury. An LEA project may involve one or more schools of that district, at the elementary or secondary level, or both levels.

Duration of projects. The proposed regulations provide for the possibility of funding projects of up to five years' duration if that length is necessary to implement and evaluate a comprehensive health education project. However, the Commissioner encourages projects of one to three years' duration.

Initial funding. The proposed regulations do not indicate the size and number of grants or the distribution between SEA and LEA projects. These will, of course, be contingent upon the appropriation in any fiscal year and the scope of proposals.

However, the Commissioner is considering an initial funding procedure that would divide the appropriated funds equally between the two sets of eligible applicants, SEAs and LEAs. The size of a grant to an LEA would be one-half that of a grant to an SEA because the latter agency would be dealing with broader, State-wide problems and program considerations. About twice as many grants would be made to LEAs as to SEAs. The Commissioner invites interested persons to comment on this procedure.

Considering the nature of projects proposed by these regulations and the likelihood that the initial appropriation for health education will be relatively small, the Commissioner is contemplating awarding grants to SEAs averaging about $150,000 and grants to LEAs averaging approximately $75,000. Comments on the practicality of grants of these sizes will also be particularly welcomed.

Limitation on the number of applications. Under these proposed regulations, SEAs and LEAs would be limited to one application in each fiscal year. The purpose is to encourage one well-considered, cohesive project rather than several smaller, separate efforts.

State review of applications. An LEA applicant must provide its SEA the opportunity to review and comment on its application. The Commissioner expects to obtain through this procedure, a better understanding of how the proposed LEA project ties in with other health education activities in the State, particularly those that may be funded under Title IV of the Elementary and Secondary Education Act. SEA comments may also help identify resources that could be helpful to the LEA project and provide other information that would be useful in evaluating LEA proposals and in avoiding duplications.

Open meetings to be held by LEAs. LEAs must provide an opportunity for members of the community to comment on a proposal before submitting an application. This requirement implements Section 1006 of the Elementary and Secondary Act of 1965, as amended.

Selection of projects. Sections 1611.40 through 1611.44 describe the criteria the Commissioner uses to evaluate SEA and LEA applications. These criteria and the relative weightings given them are intended to enable the Commissioner to judge the applications in a uniform and consistent manner. SEA applicants

compete against each other and LEA applicants against other LEA applicants.

Encouragement of SEA and LEA coordination. These proposed regulations would allow the Commissioner the discretion of selecting among SEA and LEA applications those that are cooperatively designed by an SEA and LEA of the same State. The proposed SEA project and the LEA project would have to be jointly planned so that they could be coordinated and would reinforce one another, and both would have to be rated high in their respective categories.

Geographic diversity and variety of settings. The Commissioner proposes to select among relatively equal projects (within 10 points of one another) those that contribute to geographic diversity of projects and projects in a variety of urban, suburban, and rural settings.

Allowable and non-allowable costs. The proposed regulations under §§ 161i.50 and 161i.51 apply to project proposals of both an Sea and an Lea. They allow the use of funds for direct and indirect costs of approved project activities, including funds to be used for released time of teachers to participate in inservice activities if these costs cannot be met in any other feasible way.

The focus of the program for which these regulations are proposed is the health education component rather than the health services component of the school health program. Therefore, these proposed regulations do not allow funds to be used for school health services in the nature of medical, dental, or other services related to the health care of individuals. These services are costly and can be funded through resources other than those under this legislation.

As proposed in these regulations, funds may not be used for the support of physical education programs except for limited activities that directly reinforce health instruction regarding exercise or fitness-related concepts. Nor may funds be used for the support of school sports or competitive athletic programs.

Section 161i.53 *Participation of children in private, nonprofit elementary and secondary schools.* These proposed regulations highlight the overall requirements of Title III, Special Projects, Part A, Sec. 302(b) of the Education Amendments of 1978. Under this title, no grant may be awarded to a State or local educational agency unless the Commissioner determines that in designing the proposal for which application is made, the needs of children in nonprofit private elementary and secondary schools have been taken into account through consultation with private school officials; and, to the maximum extent feasible, and consistent with the number of such children in the area to be served who have the educational needs the proposal is intended to address, those children will be provided an opportunity to participate in the proposed activity on a basis comparable to that provided for public school children.

Relationship to the Education Division's General Administrative Regulations (EDGAR). These proposed regulations do not contain certain types of administrative requirements. Those requirements will be covered in the Education Division's General Administrative Regulations (EDGAR) which will replace the General Provisions for Office of Education Program Regulations and which were published as a notice of proposed rulemaking (NPRM) on May 4, 1979 (44 FR 26308).

Anyone wanting to comment on the EDGAR requirements should do so in response to the EDGAR NPRM, rather than to this NPRM.

The following items applicable to this program are among those covered generally in EDGAR:

How to apply for a grant.

How grants are made.

Certain conditions that must be met by a grantee.

The administrative responsibilities of a grantee.

The procedures the Office of Education uses to obtain compliance.

Invitation to Comment

A public meeting on this Notice of Proposed Rulemaking will be held in each of the ten Federal regions. Since we expect to schedule public meetings for several regulations on the same day, at the same place, we need to get an idea of how many persons are interested in speaking about these regulations. If you are interested in commenting at a public meeting, we encourage you to call the appropriate Regional Commissioner of Education, who will schedule a time for your comments. Persons who do not notify the Regional Commissioner of their intention to comment will be given an opportunity to speak. Those persons making presentations will be called upon according to their prearranged schedule, or if not prearranged, in the order of registration.

We expect that comments on these proposed regulations will be third on the agenda of the public meeting, after the Correction Education regulations.

In addition, interested persons are invited to submit comments and recommendations regarding the proposed regulations. Written comments and recommendations may be sent to the address given at the beginning of this document. All comments received on or before the 60th day after publication of this document will be considered in the development of the final regulations.

All comments submitted in response to this notice will be available for public inspection, both during and after the comment period, in Room 2079, FOB–6, 400 Maryland Avenue SW., Washington, D.C. between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

D. Citations of Authority

These proposed regulations are issued under the authority of Title III, Part I, of the Elementary and Secondary Education Act of 1965, as amended by the Education Amendments of 1978 (Pub. L. 95–561).

As required by Section 431(a) of the General Provisions Act (20 U.S.C. 1232(a)), a citation of statutory authority for each section of the proposed regulations has been placed in parentheses on the line following the text of the section unless all of the sections of a subpart are supported by the same citation. In this case, the citation is given only at the end of the subpart and is meant to relate to each section of that subpart. References to ("Sec. 361 through Sec. 364, 20 U.S.C. 3021–3024") in these citations of authority relate to sections of the Elementary and Secondary Education Act of 1965, as amended by the Education Amendments of 1978.

(Catalog of Federal Domestic Assistance Number: 13;[1] Health Education Program)

Dated: February 13, 1979.

Ernest L. Boyer,

United States Commissioner of Education.

Approved: May 25, 1979.

Joseph A. Califano, Jr.,

Secretary of Health, Education, and Welfare.

It is proposed that Title 45 of the Code of Federal Regulations be amended by adding a new Part, 161i, to read as follows:

PART 161i—HEALTH EDUCATION

Subpart A—General

Sec.

161i.1 The Health Education Program.
161i.2 Eligible applicants.
161i.3 Regulations that apply to Health Education; general definitions.
161i.4 Program-specific definitions.

[1] Not yet assigned.

Subpart B—Projects the Office of Education Assists under the Health Education Program

161i.20 Comprehensive school health education projects.
161i.21 Additional project requirements—general.
161i.22 Additional project requirements—SEAs.
161i.23 Additional project requirements—LEAs.
161i.24 Project duration.

Subpart C—How to Apply for A Grant

161i.30 Procedures for applying.
161i.31 Limitation on the number of applications.
161i.32 State review of applications.
161i.33 Open meetings to be held by LEAs.

Subpart D—How Grants are Made

161i.40 Review, selection, and approval of applications.
161i.41 Criteria for selection of projects.
161i.42 Criteria that apply to applications from both SEAs and LEAs.
161i.43 Additional criteria that apply to applications from SEAs.
161i.44 Additional criteria that apply to applications from LEAs.
161i.45 Encouragement of SEA and LEA coordination.
161i.46 Geographic diversity and variety of settings.

Subpart E—Conditions That Must Be Met By a Grantee

161i.50 Allowable costs.
161i.51 Non-allowable costs.
161i.52 Coordination and non-duplication with other health-education related programs.
161i.53 Participation of children in private, nonprofit elementary and secondary schools.

Appendixes

Appendix A—Examples of Allowable SEA Project Activities
Appendix B—Examples of Allowable LEA Project Activities

Authority: Title III, Part I, of the Elementary and Secondary Education Act of 1965, as amended by the Education Amendments of 1978 (Pub. L. 95-561).

PART 161i—HEALTH EDUCATION

Subpart A—General

§ 161i.1 Health Education Program.

(a) The Commissioner awards project grants to develop or improve and implement comprehensive school health education programs.

(b) A comprehensive school health education program provides learning experiences—based on the best available scientific information—to promote the understanding, attitudes, and behavorial skills and practices that prepare and motivate elementary and secondary school students to—

(1) Prevent illness, disease, and injury; and

(2) Enhance the physical and mental health of themselves, their families, and communities.

(20 U.S.C. 3021–3024)

§ 161i.2 Eligible applicants.

(a) Eligible applicants are State and local educational agencies (SEAs and LEAs).

(b) An SEA competes against other SEA applicants.

(c) An LEA competes against other LEA applicants.

(20 U.S.C. 3021–3024)

§ 161i.3 Regulations that apply to Health Education; general definitions.

(a) *Regulations.* The following regulations apply to the Health Education Program:

(1) The Education Division General Administrative Regulations (EDGAR) in Part 100a (Direct Grant Programs) and part 100c (Definitions).

(2) The regulations in this Part 161i.

(b) *Definitions in EDGAR.* The following terms used in this part are defined in part 100c:

Applicant
Application
Commissioner
Department
Elementary school
Institution of higher education
Local educational agency (LEA)
Nonprofit
Non-public elementary and secondary education
Program
Project
Public agency
Recipient
Secondary school
State
State educational agency (SEA)

(20 U.S.C. 1221c)

§ 161i.4 Program specific definitions.

"Coordinated school health program" means the sum of procedures, services, and learning experiences that protect and promote the physical and mental health of students, school staff, and others. It includes—school health education program;

(1) School health services: medical, dental, mental health, and nursing services provided for students and employees of the educational agency, including examination, referrals, and emergency care;

(2) A healthful and safe school environment; and

(3) Guidance toward health careers: learning experiences and counseling to help students understand professional and paraprofessional health roles and to explore their aptitudes and interests for a career in one of the health professions or occupations.

(20 U.S.C. 3021–3024)

Subpart B—Projects the Office of Education Assists under the Health Education Program

§ 161i.20 Comprehensive school health education projects.

The Commissioner awards grants for comprehensive school health education projects of SEAs and LEAs that—

(a) Contribute to the advancement of a coordinated school health program.

(b) Identify and demonstrate effective methods, materials, practices, organizational patterns, and administrative procedures that develop or strengthen the comprehensive school health education program; and

(c) Develop or strengthen a comprehensive school health curriculum, that—

(1) Includes learning experiences on smoking and health;

(2) Addresses the following major national health concerns by providing learning experiences either in the project or in other aspects of its comprehensive school health education program:

(i) Nutrition and food.
(ii) Values of exercise.
(iii) Weight control and obesity.
(iv) Immunization.
(v) Mental health.
(vi) Medical, dental, and other health care.
(vii) Consumer health interests.
(viii) Environmental conditions affecting health.
(ix) Alcohol and drug abuse.
(x) Safety and accident prevention.

(3) Provides learning experiences also, as appropriate, on—

(i) Community health;
(ii) Dental health and oral hygiene;
(iii) Chronic disease—risk factors and prevention;
(iv) Communicable disease—prevention and control;
(v) Family life education;
(vi) First aid and cardio-pulmonary resuscitation;
(vii) Health careers;
(vii) Personal grooming and body care;
(ix) Physical fitness;
(x) Sleep, rest, and relaxation; and
(xi) Work and recreation;

(4) Selects and organizes these learning experiences in a progressive sequence according to the assessed needs, interests, developmental level, and previous experiences of students.

(20 U.S.C. 3021–3023)

§ 161l.21 Additional project requirements—general.

A comprehensive school health education project must also—

(a) Include a thorough evaluation design to assess student and staff competencies and performance in terms of behavioral skills and practices as well as knowledge;

(b) Assess the adequacy of administrative, teaching, and support personnel for the comprehensive school education program, and provide necessary training opportunities;

(c) Use and coordinate appropriate resources of public and private agencies and organizations concerned with developing, improving, and expanding school health education and other aspects of the program; and

(d) Meet the requirements of Section 302 of the Elementary and Secondary Education Act, as amended, regarding participation of children in private, non-public schools.

(20 U.S.C. 2942; 20 U.S.C. 3021–3023)

§ 161l.22 Additional project requirements—SEAs.

An SEA project must demonstrate leadership activities to improve comprehensive school health education programs in the elementary and secondary schools of several or all of the LEAs in the State. These activities include—

(a) Development and provision of technical assistance and health education materials; and

(b) Identification, validation, and dissemination of successful health education practices and materials.

§ 161l.23 Additional project requirements—LEA's.

(a) An LEA project must provide learning experiences at the elementary or secondary level, or at both levels.

(b) An LEA project must be implemented at one or more schools in the LEA. The Commissioner encourages projects that implement a comprehensive school health education program throughout the LEA.

§ 161l.24 Project duration.

The Commissioner approves projects of up to five years in duration if that length of time is demonstrated to be essential to implementing and evaluating a comprehensive school health education program. The Commissioner encourages projects of one to three years' duration.

(20 U.S.C. 3021–3024)

Subpart C—How to Apply for a Grant

§ 161l.30 Procedures for applying.

In applying for a grant, an SEA or an LEA shall follow the procedures and meet the requirements stated in EDGAR.

§ 161l.31 Limitations on the number of applications.

An SEA or an LEA may submit only one application in a fiscal year for assistance under this part.

§ 161l.32 State review of applications.

(a) The Commissioner does not approve an application from an LEA unless its SEA has had an opportunity to review and comment on the application.

(b) An LEA applicant and its SEA shall follow the State review procedures outlined in EDGAR.

§ 161l.33 Open meetings to be held by LEAs.

Prior to submitting an application, an LEA shall hold an open meeting that complies with the provisions in EDGAR.

(Sec. 20 U.S.C. 3023; 20 U.S.C. 3386)

Subpart D—How Grants Are Made

§ 161l.40 Review, selection, and approval of applications.

The procedures for review, selection, and approval of applications under this part are presented in EDGAR.

§ 161l.41 Criteria for selection of projects.

(a) *How selection criteria are used under this part.* (1) In evaluating an application, the Commissioner uses general selection criteria, as well as the criteria that are specific to the Health Education Program.

(2) The criteria that are used in evaluating applications for grants under this part incorporate the general selection criteria of EDGAR.

(b) *How selection criteria are organized.* (1) The selection criteria are organized in three sections:

(i) The first describes criteria that apply to applications from both SEAs and LEAs.

(ii) The second describes criteria specific to SEA applications.

(iii) The third describes criteria specific to LEA applications.

(2) The criteria are weighted and are based on a total possible score of 100.

§ 161l.42 Criteria that apply to applications from both SEAs and LEAs.

(a) Under the weighting system, the criteria of this section represent a maximum score of 28 points for either an SEA or an LEA application.

(b) The Commissioner reviews an application from an SEA or an LEA for information on the following criteria and gives up to the maximum point values shown:

(1) *Plan of operation (13 points).* (i) How the objectives and activities of the project relate to, and will contribute to, the purpose of this part and to the overall school health program of the SEA or the LEA.

(ii) High quality in the overall design of the proposed project.

(iii) An effective plan of management of the program.

(iv) The way the applicant plans to use its resources and staff to achieve each objective.

(2) *Quality of staff (10 points).* (i) The qualifications—including the professional training, experience, and competency in the field of comprehensive school health education—that are established for the employment of the following staff:

(A) The project director.

(B) Every member of the professional staff.

(C) Each consultant.

(D) Support staff.

(ii) Of the maximum 10 points allotted to this criterion a maximum of four are allotted to the qualifications of the project director, four to the other professionals on the project staff and consultants, and two to the project support staff.

(3) *Budget and cost effectiveness (5 points).* (i) An effective plan of financial management.

(ii) An itemized statement of cost that justifies each line item in the budget.

(iii) A showing that costs are reasonable in relation to the objectives of the project.

§ 161l.43 Additional criteria that apply to applications from SEAs.

(a) Under the weighting system, the criteria of this section represent a maximum score of 72 points. The combined scores of this section and § 161l.42(b) add up to a total possible score of 100.

(b) The Commissioner reviews an application from an SEA for information on the following criteria and gives up to the maximum point values shown:

(1) *Quality and comprehensiveness (14 points).* (i) The extent to which the project is likely to enhance substantially the quality and scope of comprehensive school health education programs in LEAs throughout the State.

(ii) The extent and nature of the component on the effects of smoking.

(iii) The extent to which the project addresses modern-day health problems and issues—such as immunization, obesity and weight control, lack of

exercise, mental health, nutrition, accidents, alcohol and drug abuse, environmental conditions affecting health, consumer health interests, and availability and use of medical, dental, and other health-care services—or, if any of these problems and issues are not included in the proposed project, the way the applicant plans to treat them in other aspects of the comprehensive school health education program.

(iv) The scope of other curriculum offerings to be considered; and

(v) The quality of the project plans to organize instructional materials and implement curriculum improvements.

(2) *Training of school health personnel (14 points).* (i) A plan to assess the adequacy of school health education personnel—in terms of both numbers and competencies—to serve the students in the elementary and secondary schools of the State.

(ii) The quality of preservice and inservice training activities planned to prepare and train the required numbers of school health education specialists, elementary school classroom teachers, health teachers in secondary schools, and other related school personnel.

(iii) Provisions to certify qualified health education personnel and encourage their employment in schools and administrative offices of LEAs.

(3) *Evaluation plan (14 points).* (i) A method to determine the extent to which the project achieves each of its objectives, using quantifiable data insofar as possible.

(ii) How the effectiveness of the project in advancing the State's overall school health program will be evaluated.

(4) *Quality of dissemination and extension of comprehensive school health education programs (10 points).* (i) How the project will help to establish new comprehensive school health education programs in schools of the State.

(ii) The quality of the plan to make information about the project available to interested agencies and institutions and the general public.

(5) *Adequacy and coordination of resources (10 points).* (i) The extent to which the project will seek out, use, and coordinate Federal, State, and other programs and resources that will help improve the quality of the comprehensive school health education program.

(ii) The adequacy of the support staff that the applicant plans to use.

(iii) The adequacy of facilities and the equipment that the applicant plans to use.

(iv) Ways in which the project is designed to promote or strengthen cooperation among State educational, public health, and other agencies and organizations concerned with the improvement of comprehensive school health education programs.

(6) *Promotion of exemplary programs (5 points).* Procedures designed to identify, validate, and promote the adoption of innovative, successful, and exemplary school health education projects, practices, and instructional materials.

(7) *State continuation of the project (5 points).* The likelihood that the State will continue the project after Federal assistance ends as indicated by—

(i) The applicant's staffing and financial commitments; and

(ii) The project design for building State capacity to provide program leadership and, especially, to assist LEAs to carry out comprehensive health education programs.

§ 161i.44 Additional criteria that apply to applications from LEAs.

(a) Under the weighting system, the criteria of this section represent a maximum score of 72 points. The combined maximum scores of this section and § 161i.42(b) equal a total possible score of 100.

(b) The Commissioner reviews an application from an LEA for information on the following criteria and gives up to the maximum point values shown:

(1) *Quality and comprehensiveness (14 points).* (i) Ways the project will assess and address the health needs of individual students and the community.

(ii) The extent and nature of the component on the effects of smoking.

(iii) The extent to which the project addresses modern-day health problems and issues—such as immunization, obesity and weight control, lack of exercise, nutrition, alcohol and drug abuse, mental health, accidents, environmental conditions affecting health, consumer health interests, and availability and use of medical, dental, and other health-care services—or, if any of these problems and issues are not included in the proposed project, the way the applicant plans to treat them in other aspects of the comprehensive school health education program.

(iv) The scope of other curriculum offerings to be included.

(v) How the project is designed to enhance the quality and scope of the comprehensive health education program in one or more schools of the LEA.

(2) *Training of school health personnel (14 points).* (i) A plan to assess the adequacy of school health personnel—both in terms of numbers and competencies—in the administrative offices and in the schools of the LEA.

(ii) The quality of inservice training activities planned to improve the qualifications of health education specialists, elementary school classroom teachers, health teachers in secondary schools, and other school personnel associated with the school or schools involved in the project.

(iii) Plans to foster adequate staffing of comprehensive school health education programs to serve the students in public and private, nonprofit elementary and secondary schools of the area.

(3) *Evaluation plan (14 points).* (i) The thoroughness and quality of procedures incorporated in the project for determining the effects of the health education experiences on the students' understanding, attitudes, and behavioral skills and practices, using quantifiable data insofar as possible.

(ii) A method to determine the extent to which the project achieves its other objectives, using quantifiable data insofar as possible.

(iii) How the LEA plans to evaluate the effectiveness of the project in advancing the LEA's overall school health program.

(4) *Quality of dissemination and extension of comprehensive school health education programs (10 points).* (i) Procedures designed to transfer to schools of the LEA area, that are not included in the project, the benefits and the successful practices and materials to be derived from the project.

(ii) The quality of the plan to make information about the project available to interested agencies and institutions and the general public.

(5) *Adequacy and coordination of resources (10 points).* (i) How the project will seek out, use, and coordinate Federal, State, local, and other programs and resources that will enhance the development or improve the quality of the LEA's comprehensive school health education program.

(ii) The adequacy of the support staff that the applicant plans to use.

(iii) The adequacy of the facilities and equipment that the applicant plans to use.

(iv) How the project will promote and strengthen cooperation among local educational and public health agencies and other agencies, organizations, and institutions concerned with the improvement of health education programs as part of the overall school health programs of the schools of the area.

(6) *Promotion of exemplary programs (5 points).* Plans for cooperation with officials of the SEA for possible validation of the project and for promotion of the adoption of the project's proven practices and materials by other LEAs in the State.

(7) *Local continuation of the project (5 points).* The likelihood that the LEA will continue the project after Federal assistance is ended as indicated by—

(i) The applicant's staffing and financial commitments; and

(ii) The project design for building local capacity to provide leadership and assistance to schools of the area to carry out comprehensive school health education programs.

(20 U.S.C. 3021–3024)

§ 161L45 Encouragement of SEA and LEA coordination.

The Commissioner reserves the discretion to fund an SEA project and a LEA project in the same State where the projects have been jointly planned and complement each other—and are judged of high quality in their respective categories—but where one of the two projects would not otherwise be funded.

(20 U.S.C. 3022)

§ 161L46 Geographic diversity and variety of settings.

The Commissioner selects, among relatively equal projects (within 10 points of one another), those that contribute to geographic diversity of projects and projects in a variety of urban, suburban, and rural settings.

(20 U.S.C. 3021–3024)

Subpart E—Conditions That Must Be Met By A Grantee

§ 161L50 Allowable costs.

In addition to other direct and indirect costs of project activities, a grantee may use funds for released time for teachers to participate in inservice training opportunities if those costs cannot be met in any other feasible way.

§ 161L51 Non-allowable costs.

The following are non-allowable uses of funds from a grant to an SEA or an LEA:

(a) Medical, dental, or other health-care services.

(b) Support for programs of physical education except for limited activities that are directly related to and that reinforce instruction on exercise physiology, fitness, or the values of exercise and weight-control.

(c) Support for school programs of sports and competitive athletics.

(d) Stipends for teachers or others participating in inservice training activities.

(e) Any services or activities related to the project that were supported with funds from any other source during a reasonable period prior to the grant award, as determined by the Commissioner.

§ 161L52 Coordination and non-duplication with other health-education related programs.

(a) An SEA or LEA shall use funds received under this part in coordination with any other health-education related programs that the applicant may be undertaking, and shall not use these funds to duplicate any other program.

(b) Grantees shall also comply with the provisions of EDGAR concerning coordination.

(Sec. 303, 20 U.S.C. 3023)

§ 161L53 Participation of children in private, nonprofit elementary and secondary schools.

An applicant shall meet the requirements for participation of children in private, nonprofit elementary and secondary schools stated in Sec. 302(b) of Part A, Title III, of the Elementary and Secondary Education Act, as amended by the Education Amendments of 1978, and in EDGAR.

(Sec. 20 U.S.C. 2942; 20 U.S.C. 3021–3023)

Appendix A—Examples of Allowable SEA Project Activities

The following are examples of activities for which a grantee may use funds in an SEA project under the Health Education Program:

(a) The assessment of needs and the development or improvement of State curriculum requirements, courses of study, and instructional materials for the comprehensive school health education program.

(b) Special efforts to identify and analyze the educational implications of significant, current, health-related concerns, such as, smoking, alcohol and drug abuse, inadequate exercise, poor nutritional practices, obesity and weight control, inadequate immunization, mental health, accidents, availability and use of medical, dental and other health-care services, environmental conditions that affect health, and consumer health interests; provision of technical assistance and educational materials to LEAs to demonstrate and evaluate effective ways of dealing with these concerns in the context of a comprehensive school health education program.

(c) The study of qualifications required and the establishment of standards for the certification of school-health administrators, consultants or other school health education specialists, teachers—including elementary classroom teachers—and other appropriate instructional staff.

(d) The organization and conduct of inservice workshops and other training experiences, relative to comprehensive school health education programs.

(e) In cooperation with institutions of higher education, the development of procedures for the preservice preparation of health education specialists, elementary classroom teachers, and secondary school health teachers for their respective responsibilities for comprehensive school health education.

(f) The provision of awareness clinics and other participatory opportunities for school administrators, school board members, parents, and other public-minded citizens whose interest and support may help improve the overall school health program and, in particular, the comprehensive school health education component.

(g) The development, improvement, and application of evaluative techniques, data collection, and other aspects of careful and sound evaluation.

(h) The correlation of activities undertaken with grant funds under this part with other appropriate State and Federal programs.

(i) The coordination of SEA efforts with those of State and local public health agencies, medical and dental societies and their auxiliary organizations, and other public, professional private, voluntary, and civic organizations concerned with the improvement of school health education programs.

(j) The establishment, development, and evaluation of pilot programs of comprehensive school health education.

(k) The identification, evaluation, validation, and dissemination of innovative, successful, or exemplary projects, practices, and instructional materials in comprehensive school health education.

Appendix B—Examples of Allowable LEA Project Activities

The following are examples of activities for which a grantee may use funds in an LEA project under the Health Education program:

(a) The review or adaptation and use of State courses of study and instructional guides in health education, and the development or improvement of local curriculum materials.

(b) The development and implementation of innovative and exemplary methodologies, instructional materials, and staffing patterns in the education of elementary and secondary school students relating to health maintenance and enhancement and the prevention of disease, illness, and injury.

(c) The demonstration and evaluation of effective ways of dealing—within the context of a comprehensive school health education program—with significant current, health-related concerns, such as smoking, alcohol and drug abuse, inadequate exercise, poor nutritional practices, obesity and weight-control, immunization, mental health, accidents, availability and use of medical, dental, and other health-care services, environmental conditions that affect health, and consumer health interests.

(d) The organization and conduct of inservice workshops and other training experiences for personnel who serve in the LEA's comprehensive school health education program.

(e) The provision of awareness clinics and other opportunities for administrative staff, members of the local school board, parents, and other public-minded citizens whose interest and support are important to the improvement of the overall school health program and, in particular, the comprehensive school health education component.

(f) The correlation of project activities with other health-related programs and resources available to the LEA.

(g) The identification and involvement—and the coordination of programs and services—of State and local educational and public health agencies, medical and dental societies and their auxilliary organizations, and other public, professional, voluntary, private, and civic agencies and organizations in implementing project objectives.

(h) The identification of practices, products, staff development techniques, and materials which are demonstrated by the project to be successful and—in cooperation with the SEA—their validation and replication.

(i) Participation in local or State-sponsored pilot programs of comprehensive school health education.

Transfer of Food Commodities for Use in Disaster Relief and Economic Development, and Other Assistance; Final Revision in Requirements

DEPARTMENT OF STATE

Agency for International Development

22 CFR Part 211

[A.I.D. Regulation 11]

Transfer of Food Commodities for Use in Disaster Relief and Economic Development, and Other Assistance; Final Revision in Requirements

AGENCY: Agency for International Development (A.I.D.).

ACTION: Final rules.

SUMMARY: These final rules amend A.I.D. Regulation 11 to conform it to amendments made to Title II of the Agricultural Trade Development and Assistance Act of 1954, as amended (Pub. L. 480), by the International Development and Food Assistance Act of 1977 (Pub. L. 95–88) and the Food and Agriculture Act of 1977 (Pub. L. 95–113). In addition, these rules clarify the responsibilities of cooperating sponsors with respect to the conduct of independent cargo surveys in the case of discharge of bulk grain shipments; provide authority to reimburse voluntary agencies for costs of rebagging commodities in foreign countries; make modifications in record-keeping requirements for Title II emergency programs; and make other minor editorial and language changes needed to clarify the Regulation. The text of these final rules, published in the Federal Register as proposed rules on January 4, 1979 (44 FR 1123) remains unchanged except for the withdrawal of the proposed administrative requirements for expanding and detailing the responsibilities of voluntary agencies and their freight forwarders included in the Regulation as § 211.4(b)(3).

EFFECTIVE DATE: June 13, 1979.

FOR FURTHER INFORMATION CONTACT: Ms. Jessie C. Vogler, Office of Food for Peace, Bureau for Private and Development Cooperation, Room 540, P.P. Bldg., Agency for International Development, Department of State, Washington, D.C. 20523.

SUPPLEMENTARY INFORMATION: Under provisions of the Agricultural Trade Development and Assistance Act of 1954, as amended (Pub. L. 480), A.I.D. is authorized to provide agricultural commodities to foreign governments, U.S. and foreign Voluntary Agencies, or intergovernmental organizations to meet famine or other urgent or extraordinary relief requirements, to combat malnutrition, and to promote economic and community development. A.I.D. Regulation 11, 22 CFR Part 211-Transfer of Food Commodities for Use in Disaster Relief and Economic Development, and Other Assistance, contains the regulations prescribing the terms and conditions governing the transfer of U.S. agricultural commodities pursuant to Title II of Pub. L. 480.

The text of the proposed rules of A.I.D. Regulation 11 was published in the Federal Register on pages 1123 through 1134, January 4, 1979. The 30-day comment period was extended to March 5, 1979 in response to a request from the Members of the Material Resources Committee of the American Council of Voluntary Agencies for Foreign Service, Inc., and their freight forwarders to enable them to meet and consider the rules in § 211.4(b)(3) in the Regulation, proposed by the U.S. Department of Agriculture, ASCS/Commodity Credit Corporation. These proposed rules would expand and detail the responsibilities of the voluntary agencies and their freight forwarders with regard to the receipt and handling of Title II commodities at port of export.

Specific Comments

During the comment period, the only comments received on the proposed rules were those from the Material Resources Committee of the American Council of Voluntary Agencies for Foreign Service, Inc., hereafter referred to as the Committee. Their comments, which were limited to the proposed administrative requirements contained in § 211.4(b)(3), set forth reasons why they believe these proposed rules would be either unworkable or too difficult to implement. Further, the Committee requested that a meeting be held with officials of their freight forwarders, the U.S. Department of Agriculture, ASCS/Commodity Credit Corporation and A.I.D., Office of Food for Peace, Bureau for Private and Development Cooperation, for the purpose of resolving the issues and concerns of the Committee and their freight forwarders with respect to the proposed rules in question.

On April 18, 1979, a meeting was held with the appropriate U.S. Government officials, the Committee and their freight forwarders. It was decided at that meeting to withdraw the proposed new rule in its entirety, as set forth in the Regulation, § 211.4(b)(3). With the exception of this deletion, the Regulation remains unchanged as published in the Federal Register, pages 1123–1134, on January 4, 1979.

The revisions listed below update A.I.D. Regulation 11 to reflect amendments to Title II of Pub. L. 480 contained in the International Development and Food Assistance Act of 1977 (Pub. L. 95–88) and the Food and Agriculture Act of 1977 (Pub. L. 95–113) and incorporate other necessary changes. These latter changes include authority to reimburse voluntary agencies for the costs of rebagging Title II commodities in foreign countries in certain circumstances, a new provision regarding responsibilities of cooperating sponsors with respect to the conduct of independent cargo surveys in the case of discharge of bulk grain shipments, modifications in record-keeping requirements for Title II emergency programs; and other minor editorial and language changes needed to clarify the Regulation.

The principal changes in the Regulation are as follows:

1. The statutory excerpts in § 211.1(b), subsections (2) through (7) have been revised to conform them to changes in Pub. L. 480.

2. Section 211.2(c) has been revised to include foreign nonprofit voluntary agencies registered with the Advisory Committee on Voluntary Foreign Aid within the term "cooperating sponsor." Under the 1977 amendments registered foreign Private Voluntary Organizations (PVOs) were made eligible for receipt of Title II commodities when no registered U.S. Private Voluntary Organization is available to provide such assistance. Section 211.2(r) has also been revised to include foreign nonprofit voluntary agencies within the term "voluntary agency."

3. In § 211.2(l), the words "expecting and lactating mothers" has been changed to "women of childbearing age" in order to more clearly reflect the intended beneficiaries of maternal and pre-school feeding programs.

4. Section 211.4(c)(3) has been revised by deleting language relating to general average contributions, which is relocated to § 211.9(h); and adds new provisions authorizing reimbursement of ocean freight charges to inland points of entry in four situations. Regulation 11 and Section 203 of Pub. L. 480 previously authorized reimbursement to points of entry other than ports only in the case of landlocked countries.

5. Section 211.4(e), General Average, has been relocated to § 211.9(h) and § 211.4 (f) and (g) redesignated (e) and (f), respectively.

6. New provisions have been added to § 211.5(a) requiring, as part of cooperating sponsor program descriptions, information from which

determination can be made that Title II programs will not have a disincentive effect on the domestic agricultural production of the recipient country and that adequate storage will exist for Title II commodities in the recipient country. Amendments to Pub. L. 480 now require such determinations to be made before P.L. 480 commodities may be made available.

7. Section 211.5(b) has been revised to include foreign private voluntary organizations in the requirement for a local representative responsible to such organization for the supervision and control of the program within the country of distribution.

8. A new § 211.7(e) has been added which authorizes the reimbursement of the costs (up to $500) of rebagging Title II commodities in a foreign country by cooperating sponsors when necessary to ensure that the commodity arrives at the distribution point in wholesome condition. In order to obtain reimbursement for costs exceeding $500 they must be authorized by the USAID or Diplomatic Post in advance of repackaging unless such prior approval is specifically waived in writing. This new reimbursement authority was added to implement a primary purpose of Title II of Pub. L. 480, i.e., the use of the abundant agricultural productivity of the United States to combat hunger and malnutrition. The failure to repackage commodities held in damaged bags could well result in the loss of such items to the program itself.

9. Section 211.9(c)(1)(ii), relating to ocean carrier loss and damage, has been revised to more clearly state the responsibilities of cooperating sponsors with respect to the conduct of independent cargo surveys in the case of discharge of bulk grain shipments. Section 211.9(c)(1)(iv), which provides for a location for submitting certain reports, has been deleted and § 211.9(c)(1)(v) redesignated § 211.9(c)(1)(iv).

10. Section 211.9(c)(2)(ii)(e) has been modified to raise from $400 to $600 the upper limit of a claim that voluntary agencies may terminate collection activity on without the prior approval of the Commodity Credit Corporation.

11. A new § 211.9(h) has been added consolidating in one place provisions regarding the handling of general average claims. This Section is substantially the same as the present § 211.4(e).

12. A new § 211.10(b)(r) and an additional sentence has been added to § 211.10(c) regarding reporting requirements and auditing for Title II emergency programs in which normal record-keeping requirements cannot be followed because of the emergency nature of the program. The new provision permits the Mission concerned to authorize alternative record-keeping methods if necessary which provide, nevertheless, for the recording of essential information necessary to account for Title II commodities in such situations. Inspections and audits of emergency programs are to take into account the circumstances under which such programs are carried out.

13. Other grammatical or minor conforming revisions have been made to §§ 211.5(c)(2), 211.7(a), 211.7(c), 211.9(c)(1)(iii), 211.9(c)(2)(ii)(a), 211.9(c)(2)(ii)(b) (1) and (2), 211.9(c)(2)(iii), 211.9(g), and 211.10(b)(2).

Because of the substantial revisions, A.I.D. Regulation 11, as revised, is printed below in its entirety. Therefore, 22 CFR Part 211 is revised to read as follows:

PART 211—TRANSFER OF FOOD COMMODITIES FOR USE IN DISASTER RELIEF AND ECONOMIC DEVELOPMENT, AND OTHER ASSISTANCE

Sec.

211.1 General purpose and scope.
211.2 Definitions.
211.3 Cooperating sponsor agreements.
211.4 Availability of commodities.
211.5 Obligations of cooperating sponsors.
211.6 Processing, repackaging, and labeling commodities.
211.7 Arrangements for entry and handling in foreign country.
211.8 Disposition of commodities unfit for authorized use.
211.9 Liability for loss and damage or improper distribution of commodity.
211.10 Records and reporting requirements of cooperating sponsor.
211.11 Termination of program.
211.12 Waiver and amendment authority.

Authority: Secs. 105, 201, 202, 203, and 303, Agricultural Trade Development and Assistance Act of 1954, as amended, 7 U.S.C. 1705, 1721, 1722, 1723, and 1693; 68 Stat. 454, as amended.

§ 211.1 General purpose and scope.

(a) *Terms and conditions.* This Part 211 contains the regulations prescribing the terms and conditions governing the transfer of agricultural commodities to foreign governments, U.S. voluntary agencies, or intergovernmental organizations (except the World Food Program and United Nations Relief and Works Agency) pursuant to Title II, the Agricultural Trade Development and Assistance Act of 1954, as amended (Pub. L. 480, 83rd Congress, as amended).

(b) *Legislation.* The legislation implemented by the regulations in this part is as follows:

(1) Section 2(3) of the Agricultural Trade Development and Assistance Act of 1954, as amended, provides that in furnishing food aid, the President shall:

relate United States food assistance to efforts by aid-receiving countries to increase their own agricultural production, with emphasis on development of small, family farm agriculture, and improve their facilities for transportation, storage, and distribution of food commodities.

(2) Section 201 of the Agricultural Trade Development and Assistance Act of 1954, as amended, provides as follows:

(a) The President is authorized to determine requirements and furnish agricultural commodities on behalf of the people of the United States of America, to meet famine or other urgent or extraordinary relief requirements; to combat malnutrition, especially in children; to promote economic and community development in friendly developing areas, and for needy persons and nonprofit school lunch and preschool feeding programs outside the United States. The Commodity Credit Corporation shall make available to the President such agricultural commodities determined to be available under section 401 as he may request.

(b) The minimum quantity of agricultural commodities distributed under this title—(1) for fiscal years 1978 through 1980 shall be 1,600,000 metric tons, of which not less than 1,300,000 metric tons shall be distributed through nonprofit voluntary agencies and the World Food Program; (2) for fiscal year 1981 shall be 1,650,000 metric tons, of which not less than 1,350,000 metric tons shall be distributed through nonprofit voluntary agencies and the World Food Program; and (3) for fiscal year 1982 and each fiscal year thereafter shall be 1,700,000 metric tons, of which not less than 1,400,000 metric tons shall be distributed through nonprofit voluntary agencies and the World Food Program; unless the President determines and reports to the Congress, together with his reasons, that such quantity cannot be used effectively to carry out the purposes of this title: *Provided*, That such minimum quantity shall not exceed the total quantity of commodities determined to be available for disposition under this Act pursuant to section 401, less the quantity of commodities required to meet famine or other urgent or extraordinary relief requirements.

(3) Section 202 of the Agricultural Trade Development and Assistance Act of 1954, as amended, provides as follows:

(a) The President may furnish commodities for the purposes set forth in section 201 through such friendly governments and such agencies, private or public, including intergovernmental organizations such as the World Food Program and other multilateral

organizations in such manner and upon such terms and conditions as he deems appropriate. The President shall, to the extent practicable, utilize nonprofit voluntary agencies registered with, and approved by, the Advisory Committee on Voluntary Foreign Aid. If no United States nonprofit voluntary agency registered with and approved by the Advisory Committee on Voluntary Foreign Aid is available, the President may utilize a foreign nonprofit voluntary agency which is registered with and approved by the Advisory Committee. Insofar as practicable, all commodities furnished hereunder shall be clearly identified by appropriate markings on each package or container in the language of the locality where they are distributed as being furnished by the people of the United States of America. Except in the case of emergency, the President shall take reasonable precaution to assure that commodities furnished hereunder will not displace or interfere with sales which might otherwise be made.

(b)(1) Assistance to needy persons under this title shall be directed, insofar as practicable, toward community and other self-help activities designed to alleviate the causes of need for such assistance.

(2) In order to assure that food commodities made available under this title are used effectively, indigenous workers shall be employed, to the extent feasible, to provide information on nutrition and conduct food distribution programs in the most remote villages.

(3) In distributing food commodities under this title, priority shall be given, to the extent feasible, to those who are suffering from malnutrition by using means such as (A) giving priority within food programs for preschool children to malnourished children, and (B) giving priority to the poorest regions of countries.

(4) Section 203 of the Agricultural Trade Development and Assistance Act of 1954, as amended, provides as follows:

The Commodity Credit Corporation may, in addition to the cost of acquisition, pay with respect to commodities made available under this title costs for packaging, enrichment, preservation, and fortification, processing, transportation, handling, and other incidental costs up to the time of their delivery free on board vessels in U.S. ports. Ocean freight charges from U.S. ports to designated ports of entry abroad; transportation from United States ports to designated points of entry abroad in the case (1) of landlocked countries, (2) where ports cannot be used effectively because of natural or other disturbances, (3) where carriers to a specific country are unavailable, or (4) where a substantial savings in cost or time can be effected by the utilization of points of entry other than ports; and charges for general average contributions arising out of the ocean transport of commodities transferred pursuant thereto.

(5) Section 204 of the Agricultural Trade Development and Assistance Act of 1954, as amended, provides in part as follows:

Programs of assistance shall not be undertaken under this title during any calendar year which call for an appropriation of more than $750,000,000[45] to reimburse the Commodity Credit Corporation for all costs incurred in connection with such programs (including the Corporation's investment in commodities made available) plus any amount by which programs of assistance undertaken under this title in the preceding calendar year have called or will call for appropriations to reimburse the Commodity Credit Corporation in amounts less than were authorized for such purpose during such preceding year.

In addition to other funds available for such purposes under any other act, funds made available under this title may be used in an amount not exceeding $7,500,000 annually to purchase foreign currencies accruing under title I of this Act in order to meet costs (except the personnel and administrative costs of cooperating sponsors, distributing agencies, and recipient agencies; and the costs of construction or maintenance of any church owned or operated edifice or any other edifices to be used for sectarian purposes) designed to assure that commodities made available under this title are used to carry out effectively the purposes for which such commodities are made available or to promote community and other self-help activities designed to alleviate the causes or the need for such assistance: *Provided, however,* That such funds shall be used only to supplement and not substitute for funds normally available for such purposes from other non-United States Government sources.

(6) Section 206 of the Agricultural Trade Development and Assistance Act of 1954, as amended, provides in part as follows:

Except to meet famine or other urgent or extraordinary relief requirements, no assistance under this title shall be provided under an agreement permitting generation of foreign currency proceeds unless (1) the country receiving the assistance is undertaking self-help measures in accordance with section 109 of this Act, (2) the specific uses to which the foreign currencies are to be put are set forth in a written agreement between the United States and the recipient country, and (3) such agreement provides that the currencies will be used for increasing the effectiveness of the programs of food distribution and increasing the availability of food commodities provided under this title to the neediest individuals in recipient countries. The President shall include information on currencies used in accordance with the section in the reports required under section 408 of this Act and section 657 of the Foreign Assistance Act of 1961.

(7) Section 401 of the Agricultural Trade Development and Assistance Act of 1954, as amended, provides as follows:

(a) After consulting with other agencies of the Government affected and within policies laid down by the President for implementing this Act, and after taking into account productive capacity, domestic requirements, farm and consumer price levels, commercial exports and adequate carryover, the Secretary of Agriculture shall determine the agricultural commodities and quantities thereof available for disposition under this Act, and the commodities and quantities thereof which may be included in the negotiations with each country. No commodity shall be available for disposition under this Act if such disposition would reduce the domestic supply of such commodity below that needed to meet domestic requirements, adequate carryover, and anticipated exports for dollars as determined by the Secretary of Agriculture at the time of exportation of such commodity, unless the Secretary of Agriculture determines that some part of the supply thereof should be used to carry out urgent humanitarian purposes of this Act.

(b) No agricultural commodity may be financed or otherwise made available under the authority of this Act except upon a determination by the Secretary of Agriculture that (1) adequate storage facilities are available in the recipient country at the time of exportation of the commodity to prevent the spoilage or waste of the commodity, and (2) the distribution of the commodity in the recipient country will not result in a substantial disincentive to domestic production in that country.

(8) Section 402 of the Agricultural Trade Development and Assistance Act of 1954, as amended, provides, in part, as follows:

The term "agricultural commodity" as used in this Act shall include any agricultural commodity produced in the United States or product thereof produced in the United States: *Provided, however,* That the term "agricultural commodity" shall not include alcoholic beverages, and for the purposes of title II of this Act, tobacco or products thereof. Subject to the availability of appropriations therefor, any domestically produced fishery product may be made available under this Act.

(9) Section 404 of the Agricultural Trade Development and Assistance Act of 1954, as amended, provides as follows:

The programs of assistance undertaken pursuant to this Act shall be directed toward the attainment of the humanitarian objectives and national interest of the United States.

(10) Section 405 of the Agricultural Trade Development and Assistance Act of 1954, as amended, provides as follows:

The authority and funds provided by this Act shall be utilized in a manner that will assist friendly countries that are determined to help themselves toward a greater degree of self-reliance in providing enough food to meet

the needs of their people and in resolving their problems relative to population growth.

§ 211.2 Definitions.

(a) "AID" means the Agency for International Development or any successor agency, including, when applicable, each USAID. "USAID" means an office of AID located in a foreign country. "AID/W" means the Office of AID located in Washington, D.C.

(b) "CCC" means the Commodity Credit Corporation, a corporate agency and instrumentality of the United States within the U.S. Department of Agriculture.

(c) "Cooperating sponsor" means the foreign government, the U.S. registered nonprofit voluntary agency, the American National Red Cross, or the intergovernmental organization, which enters into an agreement with the U.S. Government for the use of agricultural commodities and/or funds (including local currencies), and which is directly responsible under the agreement for administration and implementation of and reporting on programs involving the use of the commodities and/or funds made available to meet the requirements of eligible recipients. The term also includes foreign nonprofit voluntary agencies registered with the Advisory Committee on Voluntary Foreign Aid entering into such agreements following a determination of unavailability of a U.S. registered nonprofit voluntary agency to provide the assistance.

(d) "Diplomatic Posts" means the offices of the Department of State located in foreign countries, and may include Embassies, Legations, and Consular offices.

(e) "Disaster relief organizations" means organizations which are authorized by AID/W, USAID, or by a Diplomatic Post to assist disaster victims.

(f) "Disaster victims" means persons who, because of flood, drought, fire, earthquake, other natural or manmade disasters, or extraordinary relief requirements, are in need of food, feed, or fiber assistance.

(g) "Duty free" means exempt from all customs duties, duties, tolls, taxes or governmental impositions levied on the act of importation.

(h) "Food for Peace Program Agreement" constitutes the agreement between the cooperating sponsor(s) and the U.S. Government. The Food for Peace Program Agreement may be specific, listing the kinds and quantities of commodities to be supplied, program objectives, criteria for eligibility of recipients, plan for distribution of commodities, and other specific program provisions in addition to the provisions set forth in this part; or it will state that the cooperating sponsor will comply with this part and such other terms and conditions as set forth in other AID programing documents.

(i) "Institutions" means nonpenal, public or nonprofit private establishments that are operated for charitable or welfare purposes where needy persons reside and receive meals, including, but not limited to, homes for the aged, mentally and physically handicapped, refugee camps, and leprosy asylums.

(j) "Intergovernmental organizations" means agencies sponsored and supported by the United Nations organization or by two or more nations, one of which is the United States of America.

(k) "Maternal-child feeding, primary school and other child feeding programs":

(1) Maternal and preschool feeding programs means programs conducted for women of child bearing age, for mothers with preschool children, and for children below the usual enrollment age for the primary grade at public schools.

(2) School feeding programs refers to programs conducted for the benefit of children enrolled in primary schools.

(3) Other child feeding programs refers to programs designed to reach preschool or primary school age, needy children in child care centers, orphanages, institutions, nurseries, kindergartens, and similar activities.

(l) "Nonprofit" means that the residue of income over operating expenses accruing in any activity, project, or program is used solely for the operation of such activity, project, or program.

(m) "Primary School" means a public or nonprofit facility, or an activity within such facility, which has as its primary purpose the education of children at education levels which are generally comparable to those of elementary schools in the United States.

(n) "Recipient agencies" means schools, institutions, welfare agencies, disaster relief organizations, and public or private agencies whose food distribution functions are sponsored by the cooperating sponsor and who receive commodities for distribution to eligible recipients. A cooperating sponsor may be a recipient agency.

(o) "Recipients" means persons who are in need of food assistance because of their economic condition or who are otherwise eligible to receive commodities for their own use in accordance with the terms and conditions of the Food for Peace Program Agreement.

(p) "Refugees" means persons who fled or were forced to leave their country of nationality or residence and are living in a country other than that of which they hold or have held citizenship or in a part of their country of nationality or residence other than that which they normally consider their residence, and become eligible recipients.

(q) "USDA" means the U.S. Department of Agriculture.

(r) "Voluntary Agency" means the American National Red Cross and any U.S. or foreign voluntary nonprofit agency registered with, and approved by, the Advisory Committee on Voluntary Foreign Aid of the Agency for International Development.

(s) "Welfare agencies" means public or nonprofit private agencies that provide care, including food assistance, to needy persons who are not residents of institutions.

§ 211.3 Cooperating sponsor agreements.

(a) *Food for Peace Program Agreement.* The cooperating sponsor shall enter into a written agreement with AID by assigning a Food for Peace Program Agreement which shall incorporate by reference or otherwise the terms and conditions set forth in this part.

(b) *Individual Country Food for Peace Program Agreement.* Voluntary agencies or intergovernmental organizations shall, in addition to the Food for Peace Program Agreement, enter into a separate written Food for Peace Agreement with the foreign government of each cooperating country. This agreement shall incorporate by reference or otherwise the terms and conditions set forth in this part; Provided, however, that where such written agreement is not feasible or practicable, the USAID or Diplomatic Post shall assure AID/W that the program can be effectively operated without such an agreement.

§ 211.4 Availability of Commodities.

(a) *Distribution and use of commodities.* Commodities shall be available for distribution and use in accordance with the provisions of the Food for Peace Program Agreement and this part.

(b) *Transfer of title and delivery.* (1) Unless the Food for Peace Program Agreement provides otherwise, title to the commodity shall pass to the cooperating sponsor at the time and place of delivery f.o.b. or f.a.s. vessels at the U.S. ports except that in the case of

voluntary agencies and intergovernmental organizations, title may pass at the discretion of USDA at other points in the United States.

(2) Voluntary agencies and intergovernmental organizations shall make the necessary arrangements to accept commodities at the points of delivery designated by the USDA.

(c) *Processing, handling, transportation and other costs.* (1) The United States will pay processing, handling, transportation, and other incidental costs incurred in making commodities available to cooperating sponsors free on board (f.o.b.) or free along side (f.a.s.) vessel at U.S. ports, or free at inland destinations in the United States except as otherwise provided in this paragraph (c).

(2) Voluntary agencies and intergovernmental organizations shall reimburse the United States for expenses incurred at their request and for their accommodation which are in excess of those which the United States would have otherwise incurred in making delivery (i) at the lowest combination of inland and ocean transportation costs to the United States as determined by the United States or (ii) in sizes and types of packages announced as available.

(3) All costs and expenses incurred subsequent to the transfer of title in the United States to cooperating sponsors except as otherwise provided herein shall be borne by them. Upon the determination that it is in the interests of the program to do so, the United States may pay or make reimbursement for ocean transportation costs from U.S. ports to the designated ports of entry aboard; or to designated points of entry abroad in the case (i) of landlocked countries, (ii) where ports cannot be used effectively because of natural or other disturbances, (iii) where carriers to a specific country are unavailable, or (iv) where a substantial savings in cost or time can be effected by the utilization of points of entry other than ports.

(d) *Transportation authorization.* A transportation authorization will be issued to cover the ocean freight paid directly by the United States. When CCC contracts for ocean carriage, disbursement to the carriers shall be made by CCC upon presentation of Standard Form 1113 and three copies of 1113A (Public Voucher for Transportation Charges), together with three copies of the related onboard ocean bill of lading, one copy of which must contain the following certification signed by an authorized representative of the steamship company:

I certify that this document is a true and correct copy of the original onboard ocean bill of lading under which the goods herein described were loaded on the above-named vessel and that the original and all other copies thereof have been clearly marked as not to be certified for billing.

.....
(Name of steamship co.)
By
(Authorized representative)

Such vouchers should be submitted to: Director Ocean Transportation Division, Office of the General Sales Manager, U.S. Department of Agriculture, Washington, D.C. 20250. Except for duty, taxes and other costs exempted in § 211.7 (a) and (b) of this part, voluntary agencies booking their own vessels will be reimbursed as provided in AID Regulation 2 (Part 202 of this chapter) for ocean freight authorized by the United States upon presentation to AID/W (or to a U.S. Bank holding an AID Letter of Commitment) of proof of payment to the ocean carrier.

(e) *Shipping instructions*—(1) *Shipments booked by CCC.* Request for shipment of commodities shall originate with the cooperating sponsor and shall be submitted to USAID or Diplomatic Post for clearance and transmittal to AID/W. AID/W shall, through cables, airgrams or letters to USAID or Diplomatic Posts, provide cooperating sponsors (and where applicable voluntary agency headquarters) with names of vessels, expected times of arrival (ETAs), and other pertinent information on shipments booked by CCC. At the time of exportation of commodities, applicable ocean bills of lading shall be sent airmail, or by the fastest means available, by the freight forwarder, representing CCC, to USDA, to USAID or Diplomatic Posts (and where applicable to USAID Controller, voluntary agency headquarters, and voluntary agency field representatives), and to the consignee in sufficient time to advise of the arrival of the shipment.

(2) *Shipments booked by voluntary agency or intergovernmental organization.* Requests for shipment of commodities shall originate with the cooperating sponsor and shall be cleared by the USAID or Diplomatic Post before transmittal to the voluntary agency's or intergovernmental organization's headquarters for concurrence and issuance. USAID or Diplomatic Post shall promptly clear voluntary agency and intergovernmental organization requests for shipment of commodities or, if there is reason for delay or disapproval, advise the cooperating sponsor and AID/W within seven (7) days of receipt of requests for shipment. After the voluntary agency or intergovernmental organization headquarters concurs in the request and issues the order, the original will be sent promptly to USDA with a copy to the USAID or Diplomatic Posts. Headquarters of voluntary agencies and intergovernmental organizations which book their own shipments shall provide their representatives and the USAID or Diplomatic Posts with the names of vessels, expected times of arrival (ETAs) and other pertinent information on shipments booked. At the time of exportation of commodities, applicable ocean bills of lading shall be sent airmail or by the fastest means available by the freight forwarder, representing the voluntary agency or intergovernmental organization, to USDA to the USAID or Diplomatic Post (and where applicable to USAID Controller and voluntary agencies' representatives), and to the consignee in the country of destination in sufficient time to advise of the arrival of the shipment. However, voluntary agencies will also forward cable advice of actual exportation to their program directors in countries within the Caribbean area which are supplied by vessels having a rapid and short run from U.S. port to destination.

(f) *Tolerances.* Delivery by the United States to the cooperating sponsor at point of transfer of title within a tolerance of 5 percent (2 percent in the case of quantities over 10,000 metric tons) plus or minus, of the quantity ordered for shipment shall be regarded as completion of delivery. There shall be no tolerance with respect to the ocean carrier's responsibility to deliver the entire cargo shipped and the United States assumes no obligation for failure by an ocean carrier to complete delivery to port of discharge.

§ 211.5 Obligations of cooperating sponsor.

(a) *Plan of operation.* Each cooperating sponsor shall submit to the USAID or Diplomatic Post for the approval of AID/W, within such times and on the forms prescribed by AID/W, a description of the programs it is sponsoring or proposes to sponsor. This description will provide basic information for preparation and amendment of Food for Peace Program Agreements and Individual Country Food for Peace Program Agreements and will include program purposes and goals, criteria for measuring program effectiveness, and other specific provisions in addition to those set forth in this Part. Further, this description will include information from which it may

be determined that the distribution of commodities in the recipient country will not result in a substantial disincentive to domestic production and that adequate storage facilities are available in the recipient country at the time of exportation of the commodity to prevent the spoilage or waste of the commodity.

(b) *Program supervision.* Cooperating sponsors shall provide adequate supervisory personnel for the efficient operation of the program, including personnel to plan, organize, implement, control, and evaluate programs involving distribution of commodities, and, in accordance with AID guidelines, to make internal reviews, including warehouse inspections, physical inventories, and end-use checks. Maximum use of volunteer personnel shall be encouraged, but U.S. voluntary agencies shall be represented by a U.S. citizen, resident in the country of distribution or other nearby country approved by AID/W, who is appointed by and responsible to the voluntary agency for distribution of commodities in accordance with the provisions of this part. Intergovernmental organizations foreign nonprofit voluntary agencies and the American National Red Cross shall be represented by a person appointed by and responsible to these organizations for the supervision and control of the program in the country of distributions in accordance with the provisions of this part.

(c) *Internal Reviews*—(1) *Voluntary Agencies.* At intervals mutually agreed upon in writing by USAIDs or the Diplomatic Post and the voluntary agency as appropriate for good management, the voluntary agencies shall conduct or arrange to have conducted comprehensive internal reviews or a series of examinations which, when combined, will represent a complete review of the Title II program(s) under their jurisdiction. Copies of reports of these comprehensive examinations shall be submitted to USAIDs or Diplomatic Posts as required in § 211.10(b)(3).

(2) *Other Cooperating Sponsor.* In the case of programs administered by cooperating governments and intergovernmental organizations, responsibility for conducting internal audit examinations shall be determined by AID/W on a case by case basis. For records and reporting requirements for emergency programs see § 211.10(5).

(d) *Commodity requirements.* Each cooperating sponsor shall submit to the USAID or Diplomatic Post, within such times and on the form prescribed by AID/W, estimates of requirements showing the quantities of commodities required for each program proposed. Requirements shall be summarized for all programs in the country on a form prescribed by AID/W.

(e) *Determination of eligibility.* Cooperating sponsors shall be responsible for determining that the recipients and recipient agencies to whom they distribute commodities are eligible in accordance with the terms and conditions of the Food for Peace Program Agreement and this part. Cooperating sponsor shall impose upon recipient agencies responsibility for determining that the recipients to whom they distribute commodities are eligible. Commodities shall be distributed free of charge except as provided in paragraph (i) of this section, or as otherwise authorized by AID/W.

(f) *No discrimination.* Cooperating sponsors shall distribute commodities only to eligible recipient agencies and eligible recipients without regard to nationality, race, color, sex, or religious or political beliefs, and shall impose similar conditions upon distribution by recipient agencies.

(g) *Public recognition.* To the maximum extent practicable, and with the cooperation of the host government, adequate public recognitions shall be given in the press, by radio, and other media that the commodities have been furnished by the people of the United States. At distribution centers the cooperating sponsor shall, to the extent feasible, display banners, posters, or similar media which shall contain information similar to that prescribed for containers in § 211.6(c). Recipients' individual identification cards shall, insofar as practicable be imprinted to contain such information.

(h) *Containers*—(1) *Markings.* Unless otherwise specified in the Food for Peace Program Agreement, when commodities are packaged for shipment from the United States, bags and other containers shall be marked with the CCC contract number or other identification, the AID emblem and the following information stated in English and, as for as practicable, in the language of the country receiving the commodity:

(i) Name of the commodity.

(ii) Furnished by the people of the United States of America.

(iii) Not to be sold or exchanged (where applicable). Emblems or other identification of voluntary agencies and intergovernmental organizations may also be added.

(2) *Disposal of containers.* Cooperating sponsors may dispose of containers, other than containers provided by carriers, in which commodities are received in countries having approved Title II programs, by sale or exchange, or distribute the containers free of charge to eligible food or fiber recipients for their personal use. If the containers are to be used commercially, the cooperating sponsor must arrange for the removal or obliteration of U.S. Government markings from the containers prior to such use.

(i) *Use of funds.* In addition to funds accuring to cooperating sponsors from the sale of containers, funds may also be available from charges made in maternal, preschool, school and other child feeding programs where payment by the recipients will be encouraged on the basis of ability to pay. Funds from these sources shall be used for payment of program costs such as transportation, storage, (including the improvement of storage facilities and the construction of warehouses) handling, insect and rodent control, rebagging of damaged or infested commodities, and other program expenses specifically authorized by AID to carry out the objectives of the program for which the commodities were furnished. Funds may also be used for payment of indigenous and/or third country personnel employed by cooperating sponsors or recipient agencies in support of Title II programs. However, such funds may not be used to purchase land for sectarian purposes, to acquire or construct church buildings, or to make alterations in existing church-owned buildings. Actual out-of-pocket expenses incurred in effecting any sale of containers may be deducted from the sales proceeds.

(j) *No displacement of sales.* Except in the case of emergency or disaster situations, the donation of commodities furnished for these programs shall not result in increased availability for export by the foreign country on the same or like commodities and shall not interfere with or displace sales in the recipient country which might otherwise take place. A country may be exempt from this proviso if circumstances warrant. Missions should seek AID/W guidance on this matter.

(k) *Commodities borrowed or exchanged.* After the date of the program approval by AID/W, but before arrival at the distribution point of the commodities authorized herein, the cooperating sponsor may, with prior approval of the USAID or Diplomatic Post, borrow same or similar commodities from local sources to meet program requirements provided that: (1) Such of the commodities borrowed as are used in accordance with the terms of

the applicable Food for Peace Program Agreement will be replaced with commodities authorized herein on an equivalent value basis at the time and place that the exchange takes place as determined by mutual agreement between the cooperating sponsor and the USAID or Diplomatic Post except, that at the request of the cooperating sponsor the USAID or Diplomatic Post may determine that such replacement may be made on some other justifiable basis; (2) packaged commodities which are borrowed shall be appropriately identified in the language of the country of distribution as having been furnished by the people of the United States; and (3) suitable publicity shall be given to the exchange of commodities as provided in paragraph (g) of this section and containers for borrowed commodities shall be marked to the extent practicable in accordance with § 211.6(c).

(l) *Commodity Transfer.* After the date of program approval by AID/W, but before distribution of the commodities authorized herein by the recipient agency, the USAID or the Diplomatic Post, or the cooperating sponsor with prior approval of the USAID or Diplomatic Post, may transfer commodities between approved Title II programs to meet emergency disaster requirements or to improve efficiency of operation; for example, to meet temporary shortages due to delays in ocean transportation, or to provide for rapid distribution of stocks in danger of deterioration. Transfers may also be made to disaster organizations for use in meeting exceptional circumstances. Commodity transfers shall be made at no cost to the U.S. Government and with the concurrence of the cooperating sponsor or disaster organization concerned. The USAID or the Diplomatic Post may, however, provide funds to pay the costs of transfers to meet extraordinary relief requirements in which case AID/W shall be advised promptly of the details of the transfer. Commodities transferred as described above shall not be replaced by the U.S. Government unless AID/W authorizes such replacement.

(m) *Disposal of excessive stock of commodities.* If commodities are on hand which cannot be utilized in accordance with the applicable Food for Peace Program Agreement, the cooperating sponsor shall promptly advise USAID or the Diplomatic Post of the quantities, location, and condition of such commodities, and, where possible shall propose an alternate use of the excess stocks. USAID or Diplomatic Post shall determine the most appropriate use of the excess stocks, and with prior AID/W concurrence, shall issue instructions for disposition. Transportation costs and other charges attributable to transferring commodities from one program to another within the country shall be the responsibility of the cooperating sponsor, except that in case of disaster or emergency, AID/W may authorize the use of disaster or emergency funds to pay for the costs of such transfers.

§ 211.6 Processing, repackaging, and labeling commodities.

(a) *Commercial processing and repackaging.* Cooperating sponsors may arrange for processing commodities into different end products and for packaging or repackaging commodities prior to distribution. When commercial facilities are used for processing, packaging or repackaging, cooperating sponsors shall enter into written agreements for such services. Except in the case of commodities and/or containers provided to foreign governments for sale under section 206 of the Act, the agreements must have the prior approval of USAID or Diplomatic Post in the country of distribution. Copies of the executed agreements shall be provided to the USAID or Diplomatic Post. Agreements for such services shall provide as a minimum that:

(1) No part of the commodities delivered to the processing, packaging, or repackaging company shall be used to defray processing, packaging, repackaging, or other costs, except as provided in paragraph (a)(2) of this section.

(2) When the milling of grain is authorized in the cooperating country, the United States will not pay any part of the processing costs, directly or indirectly, except that with the prior approval of AID/W, the value of the offal may be used to offset such part of the processing costs as it may cover.

(3) The party providing such services shall:

(i) Fully account to the cooperating sponsor for all commodities delivered to the processor's possession and shall maintain adequate records and submit perodic reports pertaining to the performance fo the agreement;

(ii) Be liable for the value of all commodities not accounted for as provided in § 211.9(g);

(iii) Return or dispose of the containers in which the commodity is received from the cooperating sponsor according to instructions from the cooperating sponsor; and

(iv) Plainly lable cartons, sacks, or other containers containing the end product in accordance with paragraph (c) of this section.

(b) *Use of cooperating sponsor facilities.* When cooperating sponsors utilize their own facilities to process, package, or repackage commodities into different end products, and when such products are distributed for consumption off the premises of the cooperating sponsor, the cooperating sponsor shall plainly lable the containers as provided in paragraph (c) of this section, and banners, posters, or similar media which shall contain information similar to that prescribed in paragraph (c) of this section, shall be displayed at the distribution center. Recipients' individual identification cards shall to the maximum extent practicable be imprinted to contain such information.

(c) *Labeling.* If prior to distribution the cooperating sponsor arranges for packaging or repackaging donated commodities the cartons, sacks, or other containers in which the commodities are packed shall be plainly labeled with the AID emblem, in the language of the country in which the commodities are to be distributed with the following information:

(1) Name of commodity;

(2) Furnished by the people of the United States of America; and

(3) Not to be sold or exchanged (where applicable). Emblems or other identification of voluntary agencies and intergovernmental organizations may also be added.

(d) *Where commodity containers are not used.* When the usual practice in a country is not to enclose the end product in a container, wrapper, sack, etc., the cooperating sponsor shall, to the extent practicable, display banners, posters, or other media, and imprint on individual recipient identification cards information similar to that prescribed in paragraph (c) of this section.

§ 211.7 Arrangements for entry and handling in foreign country.

(a) *Costs at discharge ports.* Except as otherwise agreed upon by AID/W and provided in the applicable shipping contract or in paragraph (d) and (e) of this section, the cooperating sponsor shall be responsible for all costs, other than those assessed by the delivering carrier either in accordance with its applicable tariff for delivery to the discharge port or in accordance with the applicable charter or booking contract. The cooperating sponsor shall be responsible for all costs for (1) distributing the commodity as provided in the Food for Peace Program Agreement to end users, and (2) for

demurage, detention, and overtime, and (3) for obtaining independent discharge survey reports as provided in § 211.9. The cooperating sponsor shall also be responsible for wharfage, taxes, dues, and port charges assessed against the cargo whenever assessed and collected by local authorities from the consignee, and for lighterage (when not a custom of the port), and lightening costs when assessed as a charge separate from the freight rate.

(b) *Duty, taxes, and consular invoices.* Commodities shall be admitted duty free and exempt from all taxes. Consular invoices shall not be required unless specific provision is made in the Food for Peace Program Agreement. If required, they shall be issued without cost to the cooperating sponsor or to the Government of the United States.

(c) *Storage facilities and transportation in foreign countries.* Cooperating sponsors shall make all necessary arrangements for receiving the commodities and assume full responsibility for storage and maintenance of commodities from time of delivery at port of entry abroad or, when authorized, at other designated points of entry abroad agreed upon between the cooperating sponsor and AID. Before recommending approval of a program to AID/W, USAID, or Diplomatic Post shall obtain from the cooperating sponsor, assurance that provision has been made for internal transportation, and for storage and handling which are adequate by local commercial standards. The cooperating sponsor shall be responsible for the maintenance of commodities in such manner as to assure distribution of the commodities in good condition to recipient agencies or eligible recipients.

(d) *Inland transportation in intermediate countries.* In the case of landlocked countries, transportation in the intermediate country to a designated inland point of entry in the recipient country shall be arranged by the cooperating sponsor unless otherwise provided in the Food for Peace Program Agreement or other program document. Voluntary agencies and intergovernmental organizations shall handle claims arising from loss or damage in the intermediate country, in accordance with § 211.9(e). Other cooperating sponsors shall assign any rights that they may have to any claims that arise in the intermediate country to USAID which shall pursue and retain the proceeds of such claims.

(e)(1) *Authorization for Reimbursement of Costs.* If, because of packaging damage, it is determined by a voluntary agency or intergovernmental organization that commodities must be repackaged to ensure that the commodities arrive at the distribution point in a wholesome condition, voluntary agencies and intergovernmental organizations may incur expenses for such repackaging up to $500.00 and such costs will be reimbursed to the voluntary agency or intergovernmental organization by CCC. If costs will exceed $500.00 the authority to repackage and incur the costs must be approved by the USAID or Diplomatic Post in advance of repackaging unless such prior approval is specifically waived in writing by the USAID or Diplomatic Post.

(2) *Method of Reimbursement.* (i) *Repackaging Required Because of Damage Occurring Prior to or During Discharge from the Ocean Carrier.* Costs of such reconstitution or repackaging should be included, as a separate item in claims filed against the ocean carrier (see 211.9(c)). Full reimbursement of such costs up to $500.00 will be made by CCC, Kansas City Commodity Office, upon receipt of invoices or other documents to support such costs. For amounts expended in excess of $500.00, reimbursement will be made upon receipt of supporting invoices or other documents establishing the costs of repackaging and showing the prior approval of the USAID or Diplomatic Post to incur the costs (unless approval waived, see § 211.7(e)(1) of this chapter).

(ii) *Repackaging Required Because of Damage Caused After Discharge of the Cargo from the Ocean Carrier.* Costs of such repackaging will be reimbursed to the agency or organization by CCC (USDA-ASCS Financial Management Division, 14th & Independence Avenue, Washington, D.C. 20250) upon receipt of documentation as set forth in § 211.7(e)(2) of this chapter.

§ 211.8 Disposition of commodities unfit for authorized use.

(a) *Prior to delivery to cooperating sponsor at discharge port or point of entry.* If the commodity is damaged prior to delivery to the cooperating sponsor (other than a voluntary agency or an intergovernmental organization) at discharge port or point of entry overseas, the USAID or Diplomatic Post shall immediately arrange for inspection by a public health official or other competent authority. If the commodity is determined to be unfit for human consumption, the USAID or Diplomatic Post shall dispose of it in accordance with the priority set forth in paragraph (b) of this action. Expenses incidental to the handling and disposition of the damaged commodity shall be paid by USAID or the Dispolmatic Post from the sales proceeds, from CCC Account No. 20 FT 401 or from special Title II, Pub. L. 480 Agricultural Commodity Account. The net proceeds of sales shall be deposited with the U.S. Disbursing Officer American Embassy, for the credit of CCC Account No. 20 FT 401.

(b) *After delivery to cooperating sponsor.* If after arrival in a foreign country it appears that the commodity, or any part thereof, may be unfit for the use authorized in the Food for Peace Program Agreement, the cooperating sponsor shall immediately arrange for inspection of the commodity by a public health official or other competent authority approved by USAID or the Diplomatic Post. If no competent local authority is available, the USAID or Diplomatic Post may determine whether the commodities are unfit for human consumption, and if so may direct disposal in accordance with paragraphs (b) (1) through (4) of this section. The cooperating sponsor shall arrange for the recovery for authorized use of that part designated during the inspection as suitable for program use. If, after inspection, the commodity (or any part thereof) is determined to be unfit for authorized use the cooperating sponsor shall notify USAID or the Diplomatic Post of the circumstances pertaining to the loss or damage as prescribed in § 211.9(f). With the concurrence of USAID or the Diplomatic Post, the commodity determined to be unfit for authorized use shall be disposed of in the following order of priority:

(1) By transfer to an approved Food for Peace Program for use as livestock feed. AID/W shall be advised promptly of any such transfer so that shipments from the United States to the livestock feeding program can be reduced by an equivalent amount:

(2) Sale for the most appropriate use, i.e., animal feed, fertilizer, or industrial use, at the highest obtainable price. When the commodity is sold all U.S. Government markings shall be obliterated:

(3) By donation to a governmental or charitable organization for use as animal feed or for other nonfood use: and

(4) If the commodity is unfit for any use or if dispcsal in accordance with subparagraph (b) (1), (2), or (3) of this section is not possible, the commodity shall be destroyed under the observation of a representative of USAID or Diplomatic Post, if practicable, in such manner as to prevent its use for any purpose. Expenses incidental to the handling and

disposition of the damaged commodity shall be paid by the cooperating sponsor unless it is determined by the USAID or the Diplomatic Post that the damage could not have been prevented by the proper exercise of the cooperating sponsor's responsibility under the terms of the Food for Peace Program Agreement Actual expenses incurred in effecting any sale may be deducted from the sales proceeds and the net proceeds shall be deposited with the U.S. Disbursing Officer, American Embassy, with instructions to credit the deposit to CCC Account No. 20 FT 401. The cooperating sponsor shall promptly furnish USAID or the Diplomatic Post a written report of all circumstances relating to the loss and damage and shall include in this report, or a supplemental report, a certification by a public health official or other competent authority of the exact quantity of the damaged commodity disposed of because it was determined to be unfit for human consumption.

§ 211.9 Liability for loss and damage or improper distribution of commodities.

(a) *Fault cooperating sponsor prior to loading on ocean vessel.* If a voluntary agency or intergovernmental organization books cargo for ocean transportation and is unable to have a vessel at the U.S. port of export for loading in accordance with the agreed shipping schedule, the voluntary agencies and intergovernmental organizations shall immediately notify the USDA. The USDA will determine whether the commodity shall be (1) moved to another available outlet: (2) stored at the port for delivery to the voluntary agencies or intergovernmental organization until a vessel is available for loading: or (3) disposed of as the USDA may deem proper. When additional expenses are incurred by CCC as a result of a failure of the voluntary agency or intergovernmental organization, or their agent; (4) to meet the agreed shipping schedule, or (5) to make necessary arrangements to accept commodities at the points of delivery designated by CCC, and it is determined by CCC that the expenses were incurred because of the fault or negligence of the voluntary agency or intergovernmental organization, or their agents, the voluntary agency or intergovernmental organization shall reimburse CCC for such expenses or take such action as directed by CCC.

(b) *Fault of others prior to loading on ocean vessel.* Upon the happening of any event creating any rights against a warehouseman, carrier, or other person for the loss of or damage to a commodity occurring between the time title is transferred to a voluntary agency or intergovernmental organization and the time the commodity is loaded on board vessel at designated port of export, the voluntary agencies or intergovernmental organizations shall immediately notify CCC and promptly assign to CCC any rights to claims which may accrue to them as a result of such loss or damage and shall promptly forward to CCC all documents pertaining thereto. CCC shall have the right to initiate and prosecute, and retain the proceeds of all claims for such loss or damage.

(c) *Ocean carrier loss and damage—*
(1) *Survey and outturn reports.* (i) Cooperating sponsors shall arrange for an independent cargo surveyor to attend the discharge of the cargo and to count or weigh the cargo and examine its condition, unless USAID or the Diplomatic Post determines that such examination is not feasible, or if CCC has made other provisions for such examinations and reports. The surveyor shall prepare a report of his findings showing the quantity and condition of the commodities discharged. The report shall also show the probable cause of any damage noted, and set forth the time and place when the examination was made. If practicable, the examination of the cargo shall be conducted jointly by the surveyor, the consignee, and the ocean carrier, and the survey report shall be signed by all parties. Customs receipts, port authority reports, shortlanding certificates, cargo boat notes, stevedore's tallies, etc., where applicable, shall be obtained and furnished with the report of the surveyor. The cooperating sponsor shall obtain a certification by public health official or similar competent authority as to (*a*) the condition of the commodity in any case where a damaged commodity appears to be unfit for its intended use; and (*b*) a certificate of disposition in the event the commodity is determined to be unfit for its intended use. Such certificates shall be obtained as soon as possible after discharge of the cargo. In any case where the cooperating sponsor can provide a narrative chronology or other commentary to assist in the adjudication of ocean transportation claims, such information should be forwarded. Cooperating sponsors shall prepare such a statement in any case where the loss is estimated to be in excess of $5,000.00. All documentation shall be in English or supported by an English translation and shall be forwarded as set forth in paragraph (c)(1) (iii) and (iv) of this section. The cooperating sponsor may, at his option, also engage the independent surveyor to supervise clearance and delivery of the cargo from customs or port areas to the cooperating sponsor or its agent and to issue delivery survey reports thereon.

(ii) In the event of cargo loss and damage, the cooperating sponsor shall provide the names and addresses of individuals who were present at the time of discharge and during survey and can verify the quantity lost or damaged. In the case of bulk grain shipments, the cooperating sponsor shall obtain the services of an independent surveyor to (*a*) observe the discharge of the cargo, (*b*) report on discharging techniques and furnish information as to whether cargo was carefully discharged in accordance with the customs of the port, (*c*) estimate the quantity of cargo, if any, lost during discharge through carrier negligence, (*d*) advise quality of sweepings, (*e*) obtain copies of port and/or vessel records, if possible, showing quantity discharged, (*f*) provide immediate notification to cooperating sponsor if additional services are necessary to protect cargo interests or if surveyor has reason to believe that the correct quantity was not discharged. The cooperating sponsor, in the case of damage to bulk grain shipments, shall obtain and provide the same documentation regarding quality of cargo as set forth in § 211.8(a) of this chapter and paragraph (c)(1)(i) of this section. In the case of shipments arriving in container vans, cooperating sponsors shall require the independent surveyor to list the container van numbers and seal numbers shown on the container vans, and indicate whether the seals were intact at the time the container vans were opened, and whether the container vans were in any way damaged.

(iii) Cooperating Sponsors shall send copies of all reports and documents pertaining to the discharge of commodities to USDA.

(iv) CCC will reimburse the voluntary agencies and intergovernmental organizations for the costs incurred by them in obtaining the services of an independent surveyor to conduct examinations of the cargo and render the report set forth above. Reimbursement will be made when the surveyor's invoice or other documents that establish the survey cost are furnished to CCC. However, CCC will not reimburse voluntary agencies or intergovernmental organizations for the costs of only a delivery survey, in the absence of a discharge survey, or for any other survey not taken contemporaneously with the discharge of the vessel, unless such deviation from the documentation requirements of

§ 211.9(c)(1) is justified to the satisfaction of CCC.

(2) *Claims against ocean carriers.* (i) Irrespective of transfer of title to the commodities, CCC shall have the right to initiate and prosecute, and retain the proceeds of, all claims against ocean carriers for cargo loss and damage or cargos for which CCC contracts for ocean transportation.

(ii)*(a)* Unless otherwise provided in the Food for Peace Program Agreement or other program document, voluntary agencies and intergovernmental organizations shall file notice of any cargo loss and damage with the carrier immediately upon discovery of any such loss and damage and shall promptly initiate claims against the ocean carriers for cargo loss and damage, and shall take all necessary action to obtain restitution for losses within any applicable periods of limitations and shall transmit to CCC copies of all such claims. However, the voluntary agencies or intergovernmental organizations need not file a claim when the cargo loss is not in excess of $25, or in any case when the loss is in excess of $25, but not in excess of $100 and it is determined by the voluntary agencies or intergovernmental organizations that the cost of filing and collecting the claim will exceed the amount of the claim. The voluntary agencies and intergovernmental organizations shall transmit to CCC copies of all claims filed with the ocean carriers for cargo loss and damage, as well as information and/or documentation on shipments when no claim is to be filed. When General Average has been declared, no action will be taken by the voluntary agencies of intergovernmental organizations to file or collect claims for loss or damage to commodities. (See paragraph (c)(2)(iii) of this section.)

(b) Determination of value. When payment is made for commodities misused, lost or damaged, the value shall be determined on the basis of the domestic market price at the time and place the misuse, loss or damage occurred, or, in case it is not feasible to obtain or determine such market price, the f.o.b. or f.a.s. commercial export price, of the commodity at the time and place of export, plus ocean freight charges and other costs incurred by the Government of the United States in making delivery to the cooperating sponsor. When the value is determined on a cost basis, the voluntary agencies or intergovernmental organizations may add to the value any provable costs they have incurred prior to delivery by the ocean carrier. In preparing the claim statement, these costs shall be clearly segregated from costs incurred by the Government of the United States. With respect to claims other than ocean carrier loss and/or damage claims, at the request of the cooperating sponsor and/or upon the recommendation of the USAID or diplomatic Post, AID W may determine that such value may be determined on some other justifiable basis. When replacements are made, the value of commodities misused, lost or damaged, shall be their value at the time and place the misuse, loss, or damage occurred and the value of the replacement commodities shall be their value at the time and place replacement is made.

(c) Amounts collected by voluntary agencies and intergovernmental organizations on claims against ocean carriers not in excess of $100 may be retained by the voluntary agencies or intergovernmental organizations.

On claims involving loss or damage having a value in excess of $100 the voluntary agencies or intergovernmental organizations may retain from collections received by them, the larger of *(1)* the amount of $100 plus 10 percent of the difference between $100 and the total amount collected on the claim, up to a maximum of $350, or *(2)* actual administrative expenses incurred in collection the claim; provided retention of such expenses is approved by CCC. Collection costs shall not be deemed to include attorneys fees, fees of collection agencies, and the like. In no event will collection costs in excess of the amount collected on the claim be paid by CCC. The voluntary agencies or intergovernmental organizations may also retain from claim recoveries remaining after allowable deductions for administrative expenses of collection, the amount of any special charges, such as handling, packing, and insurance costs, which the voluntary agency or intergovernmental organization has incurred on the lost or damaged commodity and which are included in the claim and paid by the liable party.

(d) The voluntary agencies and intergovernmental organizations may redetermine claims on the basis of additional documentation or information, not considered when the claims were originally filed when such documentation or information clearly changes the ocean carriers liability. Approval of such changes by CCC is not required regardless of amount. However copies of redetermined claims and supporting documentation or information shall be furnished to CCC.

(e) Voluntary agencies of intergovernmental organizations may negotiate compromise settlements of claims regardless of the amount thereof, except that proposed compromise settlements of claims having a value in excess of $5,000 shall not be accepted until such action has been approved in writing, by CCC. When a claim is compromised, the voluntary agency or intergovernmental organization may retain from the amount collected, the amounts authorized in (c)(2)(ii)(c) of this section and in addition, an amount representing the percentage of the special charges described in (c)(2)(ii)(c) of this section as the compromised amount is to the full amount of the claim. When a claim is not in excess of $300, the voluntary agencies or intergovernmental organizations may terminate collection activity on the claim according to the standards set forth in 4 CFR 104.3 (1972). Approval of such termination by CCC is not required but the voluntary agencies or intergovernmental organizations shall notify CCC when collection activity on a claim is terminated.

(f) All amounts collected in excess of the amounts authorized herein to be retained shall be remitted to CCC. For the purpose of determining the amount to be retained by the voluntary agencies or intergovernmental organizations from the proceeds of claims filed against ocean carriers, the word "claim" shall refer to the loss and damage to commodities which are shipped on the same voyage of the same vessel to the same port destination, irrespective of the kinds of commodities shipped or the number of different bills of lading issued by the carrier. If a voluntary agency or intergovernmental organization is unable to effect collection of a claim or negotiate an acceptable compromise settlement within the applicable period of limitation or any extension thereof granted in writing by the liable party or parties, the rights of the voluntary agencies or intergovernmental organizations to the claim shall be assigned to CCC in sufficient time to permit the filing of legal action prior to the expiration of the period of limitation or any extension thereof. Voluntary agencies or intergovernmental organizations shall promptly assign their claim rights to CCC upon request. In the event CCC effects collection or other settlement of the claim after the rights of the voluntary agency or intergovernmental organization to the claim have been assigned to CCC, CCC shall, except as shown below, pay to the voluntary agency or intergovernmental organization the amount the agency or organization would have been entitled to retain had they collected the same amount. However, the additional 10

percent on amounts collected in excess of $100 will be payable only if CCC determines that reasonable efforts were made to collect the claim prior to the assignment, or if payment is deemed to be commensurate with the extra efforts exerted in further documenting claims. Further, if CCC determines that the documentation requirements of § 211.9(c)(1) have not been fulfilled and the lack of such documentation has not been justified to the satisfaction of CCC, CCC reserves the right to deny payment of all allowances to the voluntary agency.

(g) When voluntary agencies or intergovernmental organizations fail to file claims, or permit claims to become time-barred, or fail to provide for the right of CCC to assert such claims, as provided in this § 211.9 and it is determined by CCC that such failure was due to the fault or negligence of the voluntary agency or intergovernmental organization, the agency or organization shall be liable to the United States for the cost and freight (C&F) value of the commodities lost to the program.

(iii) If a cargo loss has been incurred on a voluntary agency or intergovernmental organization shipment, and general average has been declared, the voluntary agency or intergovernmental organization shall furnish to the Chief Claims and Collections Division, Kansas City ASCS Commodity Office, P.O. Box 8377, Shawnee Mission, Kansas, ZIP 66208, with a duplicate copy to AID/W–PDC/FFP/POD, (a) copies of booking confirmations and the applicable on-board bill(s) of lading, (b) the related outturn or survey report(s), (c) evidence showing the amount of ocean transportation charges paid to the carrier(s), and (d) an assignment to CCC of the cooperating sponsor's rights to the claim(s) for such loss.

(d) *Fault of cooperating sponsor in country of distribution.* If the cooperating sponsor improperly distributes a commodity or knowingly permits it to be used for a purpose not permitted under the Food for Peace Program Agreement or this part, or causes loss or damage to a commodity through any act or omission or fails to provide proper storage, care, and handling, the cooperating sponsor shall pay to the United States the value of the commodities lost, damaged, or misused (or may, with prior USAID approval, replace such commodities with similar commodities of equal value), unless it is determined by AID that such improper distribution or use, or such loss or damage, could not have been prevented by proper exercise of the cooperating sponsor's responsibility under the terms of the agreement. Normal commercial practices in the country of distribution shall be considered in determining that there was a proper exercise of the cooperating sponsor's responsibility. Payment by the cooperating sponsor shall be made in accordance with paragraph (b) of this section.

(e) *Fault of others in country of distribution and in intermediate country.* (1) In addition to survey and/or outturn reports to determine ocean carrier loss and damage, the cooperating sponsor shall, in the case of land-locked countries, arrange for an independent survey at the point of entry into the country and to make a report as set forth in § 211.9(c)(1). CCC will reimburse the cooperating sponsor for the costs of survey as set forth in § 211.9(c)(1)(iv).

(2) Upon the happening of any event creating any rights against a warehouseman, carrier or other person for the loss of, damage to, or misuse of any commodity, the cooperating sponsor shall make every reasonable effort to pursue collection of claims against the liable party or parties for the value of the commodity lost, damaged, or misused and furnish a copy of the claim and related documents to USAID or Diplomatic Post. Cooperating sponsors who fail to file or pursue such claims shall be liable to AID for the value of the commodities lost, damaged, or misused: *Provided, however,* That the cooperating sponsor may elect not to file a claim if the loss is less than $300 and such action is not detrimental to the program. Cooperating sponsors may retain $100 of any amount collected on a claim. In addition, cooperating sponsors may, with the written approval of the USAID or Diplomatic Post, retain special costs such as legal fees that they have incurred in the collection of a claim. Any proposed settlement for less than the full amount of the claim must be approved by the USAID or Diplomatic Post prior to acceptance. When the cooperating sponsor has exhausted all reasonable attempts to collect a claim, it shall request the USAID or Diplomatic Post to provide further instructions.

(f) *Reporting losses to USAID or Diplomatic Post.* The cooperating sponsor shall promptly notify USAID or the Diplomatic Post in writing of the circumstances pertaining to any loss, damage, or misuse occurring within the country of distribution or intermediate country and shall include information as to the name of the responsible party; kind and quantities of commodities; size, and type of containers; the time and place of misuse, loss, or damage; the current location of the commodity; and the Food for Peace Program Agreement number, the CCC contract numbers, if known, or if unknown, other identifying numbers printed on the commodity containers; the action taken by the cooperating sponsor with respect to recovery or disposal; and the estimated value of the commodity. If any of the above information is not available, an explanation of its unavailability shall be made by the cooperating sponsor. Proceeds from sale and the disposition of the proceeds if any, should also be reported.

(g) *Handling claims proceeds.* Claims against ocean carriers shall be collected in U.S. dollars (or in currency in which freight is paid, or a pro rata share of each) and shall be remitted (less amounts authorized to be retained) by voluntary agencies and intergovernmental organizations to CCC. Claims against voluntary agencies and intergovernmental organizations shall be paid to CCC or AID/W in U.S. dollars. Amounts paid by other cooperating sponsors and third parties in the country of distribution shall be deposited with the U.S. Disbursing Officer, American Embassy, preferably, in U.S. dollars with instructions to credit the deposit to CCC Account No. 12X4336, or in local currency at the official exchange rate applicable to dollar imports at the time of deposit with instructions to credit the deposit to Treasury sales account 20FT401.

(h) *General average.* CCC shall (1) be responsible for settling general average and marine salvage claims, (2) retain the authority to make or authorize any disposition of commodities which have not commenced ocean transit or of which the ocean transit is interrupted, and receive and retain any monetary proceeds resulting from such disposition, (3) in the event of a declaration of general average, initiate and prosecute, and retain all proceeds of, cargo loss and damage claims against ocean carriers and (4) receive and retain any allowance in general average. CCC will pay any general average or marine salvage claims determined to be due.

§ 211.10 Records and reporting requirements of cooperating sponsor.

(a) *Records.* Cooperating sponsors shall maintain records and documents in a manner which will accurately reflect all transactions pertaining to the receipt, storage, distribution, sale and inspection of commodities. This shall include a periodic summary report and records of receipt and disbursement of any funds accruing from the operation of the

program. Such records shall be retained for a period of 3 years from the close of the U.S. fiscal year to which they pertain.

(b) *Reports.* Cooperating sponsors shall submit reports to the USAID or Diplomatic Post, at such times and on such forms as prescribed by AID. The following is a list of the principal types of reports that are to be submitted:

(1) Periodic summary reports showing receipt, distribution, and inventory of commodities and proposed schedules of shipments or call forwards.

(2) In the case of Title II sales agreements under section 206 of the Act, the foreign government is directly responsible for reporting on programs involving the use of funds for purposes specified in the agreement.

(3) Reports relating to progress and problems in the implementation and operation of the program, and inspection reports, as may be required from time to time by AID/W, or as may be agreed upon between the USAID or Diplomatic Post and the cooperating sponsor and approved by AID/W.

(4) Reports of all comprehensive internal reviews prepared in accordance with § 211.5(c) shall be submitted to the USAID or Diplomatic Post for review as soon as completed and in sufficient detail to enable the USAID or Diplomatic Post to assess and to make recommendations as to the ability of the cooperating sponsors to effectively plan, manage, control and evaluate the Food for Peace programs under their administration.

(5) Emergency programs. At the time that an emergency program under Pub. L. 480, Title II is initiated, either on a government-to-government basis or through an intergovernmental organization or a voluntary agency, the Mission should (i) make a determination regarding the ability of the cooperating sponsor to perform the record-keeping required by § 211.10, and (ii) in those instances in which those specific record-keeping requirements cannot be followed, due to emergency circumstances, specify exactly which essential information will be recorded in order to account fully for Title II commodities.

(c) *Inspection and audit.* Cooperating sponsors shall cooperate with and give reasonable assistance to U.S. Government representatives to enable them at any reasonable time to examine activities of the cooperating sponsors, processors, or others, pertaining to the receipt, distribution, processing, repackaging, and use of commodities by recipients; to inspect commodities in storage, or the facilities used in the handling or storage of commodities; to inspect and audit records, including financial records and reports pertaining to storage, transportation, processing, repackaging, distribution and use of commodities; the deposit of and use of any Title II generated local currencies; to review the overall effectiveness of the program as it relates to the objectives set forth in the Food for Peace Program Agreement; and to examine or audit the procedure and methods used in carrying out the requirements of this Part. Inspections and audits of Title II emergency programs will take into account the circumstances under which such programs are carried out.

§ 211.11 Termination of program.

All or any part of the assistance provided under the program, including commodities in transit, may be terminated by AID at its discretion if the cooperating sponsor fails to comply with the provisions of the Food for Peace Program Agreement, this part, or if it is determined by AID that the continuation of such assistance is no longer necessary or desirable. Under such circumstances title to commodities which have been transferred to the cooperating sponsor shall at the written request of USAID, the Diplomatic Post, or AID/W, be retransferred to the U.S. Government by the cooperating sponsor. Any excess commodities on hand at the time the program is terminated shall be disposed of in accordance with § 211.5(1). If it is determined that any commodity to be supplied under the Food for Peace Program Agreement is no longer available for Food for Peace Programs, such authorization shall terminate with respect to any commodities which, as of the date of such determination have not been delivered f.o.b. or f.a.s. vessel, provided every effort will be made to give adequate advance notice to protect cooperating sponsors against unnecessarily booking vessels.

§ 211.12 Waiver and amendment authority.

AID may waive, withdraw, or amend, at any time, any or all of the provisions of this Part 211 if such provision is not statutory and if AID determines it is in the best interest of the U.S. Government to do so. Any cooperating sponsor which has failed to comply with the provisions of this part or any instructions or procedures issued in connection herewith, or any agreements entered into pursuant hereto may at the discretion of AID be suspended or disqualified from further participation in any distribution program. Reinstatement may be made at the option of AID. Disqualification shall not prevent AID from taking other action through other available means when considered necessary.

Dated: May 31, 1979.

Robert H. Nooter,
Acting Administrator.

Department of Housing and Urban Development

Federal Disaster Assistance Administration

Floodplain Management

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Disaster Assistance Administration

[24 CFR Part 2205]

[Docket No. R-79-675]

Federal Disaster Assistance; Floodplain Management

AGENCY: Federal Disaster Assistance Administration, Department of Housing and Urban Development.

ACTION: Proposed Rule.

SUMMARY: This rule adds a new subpart to the Federal Disaster Assistance Regulations in order to implement Executive Orders 11988 (Floodplain Management) and 11990 (Protection of Wetlands). Policy and procedures are being established for carrying out disaster assistance in accordance with these Executive Orders.

DATE: Comments due: August 13, 1979.

ADDRESS: Interested parties and government agencies are encouraged to submit written comments to the Rules Docket Clerk, Office of the General Counsel, Room 5218, Department of Housing and Urban Development, 451 Seventh Street, SW, Washington, D.C. 20410.

FOR FURTHER INFORMATION CONTACT: Charles B. Stuart, Office of Public Assistance, Federal Disaster Assistance Administration, Department of Housing and Urban Development, Washington, D.C. 20410, Telephone (202) 634-7635.

SUPPLEMENTARY INFORMATION: On May 24, 1977, Executive Order 11988 was issued for the following purposes: (1) To avoid to the extent possible the long- and short-term adverse impacts associated with the occupancy and modification of floodplains; and (2) to avoid direct or indirect support of floodplain development wherever there is a practicable alternative. This Executive Order applies to Federal agencies engaged in 1) acquiring, managing and disposing of Federal lands and facilities; 2) providing federally undertaken, financed or assisted construction and improvements; and 3) conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating, and licensing activities. The United States Water Resources Council (WRC) published guidelines for implementing E.O. 11988 in the Federal Register on February 10, 1978 at 43 FR 6030. These regulations follow closely the WRC guidelines in setting forth policy and procedures for floodplain management relating to disaster assistance granted under the Disaster Relief Act of 1974, Pub. L. 93-288 referred to as "the Act" in this proposed subpart. The main emphasis of these regulations is on compliance with Executive Order 11988, Floodplain Management. However, in cases where Executive Order 11990—Protection of Wetlands would apply, these regulations also set forth policy and procedures to implement that Executive Order. Further implementation of Executive Order 11990, as appropriate, will be included in revisions to other subparts of these Disaster Assistance Regulations, 24 CFR 2205.

Specific details of procedures will be given in revisions to internal FDAA guidance and handbooks such as the Environmental Review Handbook.

This subpart presents the purpose and objective of the floodplain management regulations, specific responsibilities of individuals and organizations involved with disaster assistance, basic policies of FDAA which will guide an agency's actions, a description of different categories of actions with respect to application of the requirements of the orders, and finally, the step-by-step procedures for carrying out the requirements of the orders.

The decision-making process as described in the WRC guidelines, is applied to selected categories of FDAA actions in different ways. The categories of actions are: 1. Exempt; 2. Inapplicable; and, 3. Applicable. Actions which are exempt from all provisions of the orders are those which are essential to save lives and protect property and public health and safety, performed pursuant to Sections 305 and 306 of Pub. L. 93-288. This exemption is contained in Section 8 of E.O. 11988 and Section 9 of E.O. 11990. However, to the extent practicable, considering the urgency of the situation, such emergency work shall be consistent with the spirit and intent of these two Executive Orders.

Inapplicable actions are those which the Administrator, FDAA, has determined do not require implementation of the full decision-making process as set forth in this subpart. There are two subdivisions under this category. One is those types of actions which typically do not create adverse effects on or incompatible development of floodlplains or wetlands. This determination included an analysis of potential long-and short-term impacts associated with occupancy or modification of floodplains, potential support of floodplain development, potential harm to lives and property or to natural and beneficial floodplain values, and potential cumulative impacts of multiple actions over time. These actions will not require any further implementation of the procedures set forth in this subpart.

The second subdivision consists of those inapplicable actions for which generally no practicable alternative actions or sites are available or identifiable. The determinations by the FDAA Administrator in this regard included consideration of factors such as environment, cost and technology. Therefore, when a Federal official undertakes one of these inapplicable actions, there is no requirement to implement the full eight-step decision-making process in accordance with Sec. 2205.506. Nevertheless, the Administrator has determined that Federal officials acting under these regulations shall take appropriate measures to minimize potential harm to or within the floodplain and to restore and preserve beneficial floodplain values.

There are six categories of inapplicable actions within this subdivision. First, Sec. 416(d) authorizes the Administrator to make grants for the purpose of removing timber from privately-owned lands where that timber has been damaged by a disaster. When this work is performed on an emergency basis, time is of the essence in order to salvage the value of the timber. More importantly, if the damaged timber is located in the floodplain, there is obviously no alternative site or alternative action to accomplish the goal of removing the damaged timber. Therefore, the Administrator has determined that, where the action is designed or modified to minimize the potential risks to and within the floodplain and actions are taken to restore and preserve natural and beneficial values served by floodplains, the full eight-step review is not necessary.

Second, full decision-making procedures are not required in the case of debris removal under Sec. 403 except for non-emergency removal of debris from the floodway. Because the removal of debris caused by a disaster generally has positive impacts on the floodplain and because the debris must be removed from where it lies, the goals of the Executive Order will not be served by the full decision-making process.

Third, Sec. 408 authorizes Federal contributions to states for the purpose of making grants to individuals and

families for specified serious needs and necessary expenses. Among these, medical and dental expenses, replacement of personal property, transportation and funeral expenses bear virtually no relationship to the goals of the Executive Order. Therefore, as to these items, the Administrator has determined that full review procedures are not required. Grants may also be used to repair, replace or rebuild primary residences. Because the maximum Federal contributions to any family or individual under this program is $3,750, FDAA's ability to achieve floodplain management goals is limited. The Federal contribution could pay for most or all of the cost of purchasing a mobile home for permanent housing. For this action, the full decision-making process is applicable. However, if the family decides to buy a new permanent structure other than a mobile home, or if the family decides to replace its previous home, the Administrator assumes that the Federal contribution under the individual and family grant program will be a small part of the total cost of the new residence. If another Federal agency has made available additional funds to assist the family in buying a new residence, that Federal agency should assume the primary role in carrying out Executive Order 11988. If the family has determined that it will make minor repairs to its existing structure, then there is no practicable alternative but for the family to carry out that activity where its house is located, even if that is in the floodplain. Therefore, the Administrator has determined that only in the case of the purchase of a mobile home will the eight-step decision-making process be applied to individual and family grants.

Fourth, Sec. 419 authorizes in-lieu contributions when the total project application by a state or local government is less than $25,000. In enacting this section, Congress intended to simplify the procedures for a majority of applicants. Given the small amount of money in question (typically, one project application under Sec. 419 will be comprised of three or more separate projects which cumulatively amount to less than $25,000), and the legislative preference for flexibility, limited paperwork, and local control of their own projects, the Administrator has determined that the full decision-making process in inapplicable to the project applications under Sec. 419. An exception to this determination is when the Federal funds are used for the construction of new facilities or structures within the floodplain. When this happens, the Administrator assumes that there may be some practicable alternative sites or actions which would better serve the goal of sound floodplain management.

Fifth, FDAA can replace building contents, materials and equipment in conjunction with the repair or restoration of disaster-damaged public facilities. The Administrator assumes that there will be no practicable alternatives to replacing building contents in the repaired or replaced structure. Nevertheless, as with all other items in this subdivision, FDAA will have to take action to minimize the potential flooding risk to these contents and the floodplain.

Finally, Sec. 402 authorizes FDAA to make contributions to repair, replace, reconstruct or rebuild public facilities belonging to state or local governments and certain private, non-profit facilities. The Administrator has determined that the full eight-step decision-making process is not a requirement where public facilities are being repaired except where one of the following conditions is met: (1) the cost of repairs is more than 50 percent of the reconstruction costs of the entire facility and the cost of repairs is more than $25,000; or (2) the facility is located in the floodway or coastal high hazard area; or (3) the facility has been damaged by a prior flooding major disaster. The Administrator assumes that where a building or other facility is less than 50% damaged, it would be unreasonable to require the applicant to abandon the remaining undamaged portions of the facility in order to totally relocate the facility outside the floodplain. In most cases, the difference between the cost of relocating the facility outside the floodplain and the cost of repairing the facility in place will be substantial and will be borne by the applicant. FDAA by Sec. 402(e) of its Act may contribute up to 100% of the net cost of repairing, restoring or reconstructing or replacing any such facility on the basis of the design of such facility as it existed immediately prior to the disaster and in conformity with current applicable codes, specifications and standards.

In those rare cases where a facility is repairable even though it is more than 50% damaged, the alternative limitation in this subsection comes into effect. If the Federal contribution is less than $25,000 the eight-step decision-making process is unnecessary. This limitation is consistent with the fifth inapplicable category, the small project grants. Furthermore, very little construction can be done for $25,000 which would have an impact on the floodplain. This is especially true for locations outside the floodway and for the repair of facilities which have not been damaged by previous flood disaster. Work performed under Sec. 402 may be to repair public utilities, roads, bridges and water control facilities. Such facilities, when damaged, are typically parts of much larger facilities. Further, these facilities are often functionally dependent on the floodplain. Therefore, there are rarely alternatives to doing the repair work on these facilities in the floodplain. Section 402 funds may also be contributed to States and local governments for the purpose of repairing public or private non-profit buildings. Again, even in the context of repairing disaster-damaged buildings, so little can be done with $25,000 that such disaster damage will not present an opportunity to carry out the floodplain management goals of the Executive Order.

The third category of actions, Applicable Actions, includes all of the remaining actions performed under Pub. L. 93-288 unless otherwise determined to be exempt or inapplicable in accordance with this subpart of the regulations. These actions will require implementation of the procedures as set forth in § 2205.506 of this subpart.

The application of the Executive Order to disaster temporary housing (Sec. 404) is particularly noteworthy. The Administrator has established a list of resources in order of priority. The order of the resources reflects, in addition to floodplain management goals, program considerations such as the relative costs of alternatives, the speed of achieving the goal of temporarily housing all eligible disaster victims and various social considerations. Therefore, the ranking of temporary housing resources reflects in gross, the Administrator's determination as to the practicability of various housing alternatives. For any given resource, it is always preferable to use housing units outside the floodplain. It is important to note that existing resources are available only if they have been undamaged by the disaster. Largely to avoid dislocation of disaster victims, using resources created by making minimal repairs to existing owner-occupied homes is preferable to the use of mobile homes; use of mobile homes is also more expensive. In the placement of mobile homes the use of private sites and commercial sites are preferable to the development of group sites. Use of private sites and in particular, sites owned by the temporary housing applicants, is advantageous because they minimize the dislocation of the family, the disruption of normal

community life and the cost to the Federal Government. Commercial sites also minimize the Federal expenditure.

Therefore, group sites, even those outside the floodplain, are the least preferable sites. As to placement of mobile homes on private or commercial sites within the floodplain, the Administrator has determined that it is preferable to avoid upgrading of commercial sites in the floodplain because that would encourage continued long-term occupancy of the floodplain.

The Administrator has also made some determinations with respect to minimization. While minimization means to reduce the potential risk to the least possible extent, only practicable means need be employed. In carrying out a temporary housing program, the overriding concern is to place disaster victims in suitable housing until they can reoccupy permanent housing. Therefore, where significantly more time would be required to perform flood hazard minimization measure as to certain types of resources (i.e., existing (undamaged) resources) and minimally repaired homes need not be performed. As to mobile homes, the Administrator has determined that his designee for temporary housing must take appropriate minimization measures.

These determinations should be viewed in light of the nature of temporary housing. The program is designed to provide temporary shelter and thereby meet an emergency need while permanent accommodations are secured. Therefore, even if a victim is place in a housing unit in the floodplain, where no better alternatives are available, that placement is still temporary. One exception to this principle is the minimal repair program. However, mini-repair is feasible only where the dwelling has sustained relatively minor damage and can be quickly repaired to habitable conditions pending permanent repairs. The owners would undoubtedly reoccupy their residence regardless of mini-repair assistance. The other exception is where a family (or individual) is place in a mobile home which is eventually sold to them. While the Administrator has determined that there may be situations where the designee may find that minimization measures are unworkable, the rule is that the appropriate minimization measure shall be taken with regard to mobile homes which are place as temporary housing. Also, before that unit is sold, the appropriate Federal official must complete the full eight-step process.

Interested parties and government agencies are encouraged to submit written comments, suggestions, data or arguments regarding this rulemaking to the Rules Docket Clerk, Office of the General Counsel, Room 5218, Department of Housing and Urban Development, 451 Seventh Street, SW, Washington, DC 20410. All submissions received on or before August 13, 1979, will be evaluated. All comments shall be available for inspection at the Office of the Rules Docket Clerk. FDAA will evaluate all such comments and experiences to date and will then prepare a Final Rule in consultation with the Federal Insurance Administration (FIA), the Water Resources Council (WRC), and the Council on Environmental Quality (CEQ). This Final Rule will then be issued after HUD departmental review and clearance.

A Finding of Inapplicability of Section 102(2)(c) of the National Environmental Policy Act of 1969 has been made in accordance with HUD Handbook 1390.1 (38 FR 19182). It is the position of the signatories to the finding that this regulation in itself has no significant impact on the human environment beyond those impacts of Executive Orders 11988 and 11990.

Interested parties may inspect and obtain copies of this Finding of Inapplicability at the Office of the Rules Docket Clerk of the Department of Housing and Urban Development in Washington, DC 20410.

In compliance with Executive Orders 11988 and 11990, Title 24, Part 2205 is amended by the addition of the following Subpart N.

Subpart N—Floodplain Management

Sec.
2205.500 General.
2205.501 Policies.
2205.502 Definitions.
2205.503 Exempt actions.
2205.504 Inapplicable actions.
2205.505 Actions requiring decision-making process.
2205.506 Decision making process.

Authority: Sec. 601, Pub. L. 93–288, 88 Stat. 163 (42 U.S.C. 5201); Executive Order 11795 as amended by Executive Order 11919; Delegation of Authority, 39 FR 28227; Executive Order 11988, 42 FR 26951, and Executive Order 11990, 42 FR 26961.

Subpart N—Floodplain Management

§ 2205.500 General.

(a) *Purpose.* The purpose of this subpart is to prescribe the policies and procedures for implementing Executive Orders 11988 and 11990 as they apply to Pub. L. 93–288 as amended. Any conflicting provisions elsewhere in prior subparts of 24 CFR Part 2205 are suspended by this subpart.

(b) *Objective.* The objective of this subpart of the regulations is to integrate the objectives and requirements of these two Executive Orders into the policies, and procedures of the Federal Disaster Assistance Administration (FDAA) in its programs of disaster preparedness and disaster assistance under Pub. L. 93–288, as amended. The objective of Executive Order 11988 is to avoid to the extent possible the long and short-term adverse impacts associated with the occupancy and modification of floodplains and to avoid direct or indirect support of floodplain development wherever there is a practicable alternative. The objective of Executive Order 11990 is to avoid to the extent possible the long- and short-term adverse impacts associated with the destruction or modification of wetlands and to avoid direct or indirect support of new construction in wetlands wherever there is a practicable alternative.

(c) *Scope.* This subpart covers policies, procedures, standards and criteria for applying Executive Orders 11988 and 11990 to programs administered by FDAA under the Act. Refer also to §§ 2205.503, 2205.504, and 2205.505 of this subpart. These regulations are intended for the use of Federal, State and local government officials who have specific responsibilities under the regulations and others involved with disaster relief.

(d) *Responsibilities.* Under these executive orders the following have responsibilities which are described briefly below and may be discussed in more detail elsewhere in this report.

(1) Administrator—The Administrator, FDAA, is responsible for assuring that all Federal assistance given under Pub. L. 93–288, as amended, and 24 CFR 2205 meets the requirements of these Executive orders.

(2) Regional Director—Pursuant to these regulations and the orders the Regional Director shall make determinations of applicability of these orders and shall apply them to specific actions undertaken by eligible applicants receiving Federal assistance under Pub. L. 93–288 as amended. The Regional Director is responsible for accomplishment of applicable portions of the decision-making process as specified in Section 2205.506 of these regulations. When necessary the Regional Director shall instruct the State in carrying out the requirements of these orders.

(i) In this subpart, for actions dealing with Temporary Housing Assistance

(Sec. 404) reference to the Regional Director shall mean the Administrator's designee.

(3) State—The Governor's Authorized Representative (GAR) shall assist applicants carrying out their responsibilities in complying with these regulations. When the State or State agency is an applicant, the State or agency shall carry out the responsibilities of an applicant.

(4) Applicant—In order to receive Federal assistance under Pub. L. 93–288, as amended, State or local governments and eligible private non-profit organizations must agree to assist the Regional Director in evaluating applicable actions in accordance with these regulations and particularly this subpart. However, the final responsibility for compliance with the two Executive orders and this subpart remains with the Regional Director in decision-making on any proposed action.

§ 2205.501 Policies.

(a) FDAA will provide leadership and shall take action to reduce the risk of flood loss, to restore and preserve natural and beneficial values served by wetlands and floodplains; to minimize the impact of floods on human health, safety and welfare; to restore and preserve natural and beneficial values served by floodplains; and to develop an integrated process to involve the public in the decision-making process for floodplain management in providing Federal grant or loan assistance under Pub. L. 93–288, as amended, except for emergency work under Sections 305 and 306 of the Act.

(b) FDAA shall identify flood hazards and evaluate the potential effects of any actions it may take in wetlands or inside or outside a floodplain to achieve the goals and objectives set forth by the two Executive orders, except exempt actions.

(c) FDAA shall avoid direct or indirect support of floodplain development wherever there is a practicable alternative. For actions within or affecting the floodplain FDAA shall ensure that actions are designed to minimize potential harm to or within the floodplain.

(d) FDAA will support sound floodplain management as applied to broad agency program reviews, as well as to individual project actions, from their initial planning and scoping stages through post-implementation monitoring and evaluation.

(e) FDAA will monitor its actions to assure that they are carried out in accordance with Executive orders 11988/11990 and these regulations.

(f) FDAA will conduct an on-going analysis of consistency of its policies and programs with Executive orders 11988/11990 and these regulations.

(g) FDAA will comply fully with the requirements of the two Executive orders to give early public notice and full publicity to appropriate steps in the decision-making process set forth in this subpart.

(h) FDAA will assure that its preparedness programs and budget requests reflect consideration of flood hazards, protection of the wetlands, and floodplain management in accordance with applicable standards and the WRC guidelines.

(i) FDAA will coordinate its implementation of these two Executive orders under this subpart with the implementation of the National Environmental Policy Act and of Section 406, Pub. L. 93–288, as amended, to achieve the requirement of all these programs in the decision-making process with minimum duplication or conflict.

(j) In its contacts with other local, State and Federal agencies, FDAA will provide leadership in achieving the objectives of these two Executive orders by setting appropriate examples consistent with sound floodplain management in its actions within the base floodplain or wetlands; for all critical actions located within the 500-year floodplain which may have direct or indirect impact upon the base floodplain, or directly or indirectly support development of the floodplain. However, FDAA will not employ unworkable means to meet these objectives and FDAA procedures will not be inconsistent with the Flood Insurance Program of the Federal Insurance Administration (FIA) or "A Unified National Program for Floodplain Management" issued by the Water Resources Council.

§ 2205.502 Definitions.

As used in this subpart, the following basic definitions shall apply:

(a) *Action* means any Federal activity including: "* * * (1) acquiring, managing, and disposing of Federal lands and facilities; (2) providing Federally undertaken, financed or assisted construction and improvement; and (3) conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating, and licensing activities." For assistance to State or local governments or to eligible private non-profit organizations, an action shall normally include the work covered by one Damage Survey Report.

(b) *Agency* means an executive department, a government corporation, or an independent establishment. (An independent establishment is part of the executive branch which is not an executive department, military department, government corporation, or part thereof.)

(c) *Base flood* means that flood which has a one percent chance of being equalled or exceded in any given year (also known as a 100-year flood). This term is used in the National Flood Insurance Program (NFIP) to indicate the minimum level of flooding to be used by a community in its floodplain management regulations.

(d) *Base floodplain* means an area subject to flooding by the base flood (also see definition of floodplain).

(e) *Channel* means a natural or artificial watercourse of perceptible extent, with a definite bed and banks to confine and conduct continuously or periodically flowing water.

(f) *Critical action* means any activity for which even a slight chance of flooding would be too great.

(g) *Coastal high hazard area* means the area subject to high velocity waters, including but not limited to hurricane wave wash or tsunamis.

(h) *Damage Survey Report* (DSR) means a report of damages caused by a major disaster or emergency and a description and estimate of repair work. Aproved DSR's form the basis for a project application.

(i) *Facility* means any man-made or man-placed item other than a structure.

(j) *Flood or flooding* means a general and temporary condition of partial or complete inundation of normally dry land areas from the overflow of inland and/or tidal waters, and/or the unusual and rapid accumulation or runoff of surface waters from any source.

(k) *Floodplain* means the lowland and relatively flat areas adjoining inland and coastal waters, including floodprone areas of offshore islands, including at a minimum, that area subject to a one percent or greater chance of flooding in any given year. The base floodplain shall be used to designate the 100-year floodplain (one percent chance floodplain). The critical action floodplain is defined as the 500-year floodplain (0.2 percent chance floodplain).

(l) *Floodproofing* means the modification of individual structures and facilities, their sites, and their contents to protect against failure, to keep water out or to reduce effects of water entry.

(m) *Floodway* means that portion of the floodplain which is effective in carrying flow and within which this carrying capacity must be preserved. It is that area where the flood hazard is generally highest; i.e., where water depths are velocities are the greatest.

(n) *Flood fringe* means that portion of the floodplain outside of the floodway (often referred to as "flooway fringe").

(o) *Flood Hazard Boundary Map* (FHBM) means an official map of a community, issued by the Federal Insurance Administrator, where the boundaries of the flood, mudslide (i.e., mudflow) and related erosion areas having special hazards have been designated as Zone A, M, or E.

(p) *Flood Insurance Rate Map* (FIRM) means an official map of a community on which the Federal Insurance Administrator has delineated both the special hazard areas and the risk premium zones applicable to the community.

(q) *Flood Insurance Study* (FIS) means an examination, evaluation and determination of flood hazards and, if appropriate, corresponding water surface elevations or an examination, evaluation and determination of mudslide (i.e., mudflow) and/or flood-related erosion hazards.

(r) *Impacts (long-term)* means changes occurring during or after an action which may take the form of delayed changes or changes resulting from the cumulative effects of many individual actions.

(s) *Impacts (short-term)* means temporary changes occurring during or immediately following an action and usually persist for a short while.

(t) *Minimize* means to reduce to the smallest possible amount or degree.

(u) *New construction in wetlands* includes draining, dredging, channelizing, filling, diking, impounding, and related activities and any structures begun or authorized after October 1, 1977.

(v) *One percent chance flood* means the flood having one chance in 100 of being equalled or exceeded in any one-year period (a large flood). The likelihood of exceeding this magnitude increases in a time period longer than one year. For example, there are two chances in three of a larger flood exceeding the one percent chance flood in a 100-year period.

(w) *Practicable* means capable of being done within existing constraints. The test of what is practicable depends upon the situation and includes consideration of the pertinent factors, such as environment, cost or technology.

(x) *Preserve* means to prevent modification to the natural floodplain environment or to maintain it as closely as possible to its natural state.

(y) *Project Application* means an application by an eligible applicant for Federal funding of work approved under the Act.

(z) *Restore* means to reestablish a setting or environment in which the natural functions of the floodplain can again operate.

(aa) *Structure* means walled or roofed buildings, including mobile homes and gas or liquid storage tanks that are primarily above ground (as set by the NFIP).

(bb) *Wetands* means "those areas that are inundated by surface or ground water with a frequency sufficient to support and under normal circumstances does or would support a prevalence of vegetative or aquatic life that requires saturated or seasonally saturated soil conditions for growth and reproduction. Wetlands generally include swamps, marshes, bogs, and similar areas such as sloughs, potholes, wet meadows, river overflows, mud flats, and natural ponds" (as defined in Executive Order 11990).

§ 2205.503 Exempt actions.

(a) *General.* Section 8 of Executive Order 11988 and Section 9 of Executive Order 11990 specifically exempt from the provisions of these orders emergency work essential to save lives and protect property and public health and safety performed pursuant to Sections 305 and 306 of the Act. Such exempt actions include the following examples:

(1) Category A emergency debris clearance provided under Section 305 or 306 of the Act to save lives and protect property and public health and safety.

(2) Category B emergency protective measures under Section 305 or 306 of the Act to save lives, or to protect public health and safety, or to protect property.

(3) Restorative work under Section 305 or 306 of the Act consisting of emergency repairs to essential public facilities as necessary to provide for their continued operation in accordance with § 2205.31 of these regulations.

(b) Such exempt emergency actions do not require consideration of alternative actions, agency or public review, or any other procedures set forth in this subpart. However, to the extent practicable, considering the urgency of the situation, such emergency work shall be consistent with the spirit or intent of these two Executive Orders.

§ 2205.504 Inapplicable actions.

(a) The Administrator has determined that certain types of actions taken pursuant to Pub. L. 93-288, as amended, typically do not create adverse effects or incompatible development of floodplains or wetlands. The basis for this determination included analysis of: (1) potential long- or short-term adverse impacts associated with occupany or modification of floodplains, (2) potential direct or indirect support of floodplain development, (3) potential harm to lives and property or to natural and beneficial floodplain values, (4) potential cumulative impacts of multiple actions over time. It has further been determined that the procedures set forth in this subpart are not applicable to such actions, except that the Regional Director shall require compliance with the spirit of these two Executive Orders to the extent practicable considering the urgency of each situations. The following types of actions have been determined to be in this category:

(1) Preparedness (Title II) except for actions involved with floodplain management.

(2) Emergency Support Teams (Sec. 304).

(3) Availability of Materials (Sec. 318), except that for non-emergency uses, flood resistant materials shall be used where practicable.

(4) Mortgage and rental payment assistance (Sec. 404(b)).

(5) Unemployment Assistance (Sec. 407).

(6) Community Disaster Loans (Sec. 414), except to the extent that the proceeds of the loan will be used for repair of facilities or structures or for construction of additional facilities or structures.

(7) Emergency Communications (Sec. 415).

(8) Emergency Public Transportation (Sec. 416).

(9) Fire Suppression Assistance (Sec. 417).

(10) Actions located outside the base floodplain and critical actions located outside the 500-year floodplain which do not directly or indirectly support development and which do not impact on the base floodplain.

(b) The Administrator has also determined that certain other actions generally have no practicable alternative actions or sites. The basis for this determination included consideration of factors such as environment, cost and technology. Actions in this category are listed below. It has been further determined that, with certain exceptions, the procedures set forth in this subpart are

not applicable to such actions except that appropriate measures shall be taken to minimize potential harm to or within the floodplain and to restore and preserve beneficial floodplain values. The Regional Director may also require certain other portions of the decision-making process to be carried out for individual actions as he deems necessary.

(1) Grants for removing damaged timber from privately owned lands (Sec. 418(d)), when performed on an emergency basis.

(2) Debris removal (Sec. 413) except those grants involving non-emergency disposal of debris within the base floodplain or non-emergency removal of debris from the floodway.

(3) Individual and Family Grant programs (Sec. 408), except for the purchase of mobile homes to be placed in the base floodplain and for private structures providing access to homes.

(4) Small project grants (Sec. 419), after the Regional Director has applied steps 1, 2, 4 and 5 of the decision-making process of this subpart, except to the extent that Federal funding involved is used for construction of new facilities or structures within the base floodplain.

(5) Replacement of building contents, materials and equipment.

(6) Repairs under Section 402 of the Act to damaged facilities or structures after the Regional Director has applied steps 1, 2, 4, and 5 of the decision-making process of this subpart, except any such action for which one or more of the following are applicable:

(i) Cost of repairs is more than 50 percent of the reconstruction cost of the entire facility or structure and is more than $25,000, (or)

(ii) The action is located in a floodway or coastal high hazard area, (or)

(iii) The facility or structure has been subject to prior damage by a flooding major disaster.

(c) For those actions described in paragraphs (a) and (b) of this section, the publication of these regulations constitutes compliance with the requirements contained in § 2205.506 of these regulations, except as noted under paragraph (b) of this section.

(d) *Finding of inapplicability.* The Administrator may apply the decision-making process prescribed in § 2205.506 to other categories of action. Based upon the completion of this 8-step decision-making process, the Administrator may find that additional types of actions are also inapplicable as discussed in this section. Criteria stated in paragraph (a) of this section are applicable to each of these findings of inapplicability. No such finding of inapplicability may be made unless the criteria stated in paragraph (a) or (b) of this section are satisfied.

§ 2205.505 Actions requiring decision-making process.

This section includes actions which will require review and application of the decision-making process as set forth in this subpart, unless otherwise exempt or inapplicable in accordance with §§ 2205.503 or 2205.504 of these regulations. Such actions include but are not limited to:

(a) Preparedness (Title II) where the Federal funding is used for floodplain management plans or programs.

(b) Non-emergency actions under Section 418, and under Section 318 involving materials in floodprone areas that are not flood resistant.

(c) Community disaster loans (Sec. 414). Loans to the extent that construction of additional public facilities or structures is involved.

(d) Actions outside the base floodplain and critical actions outside the 500-year floodplain, when such actions have potential to impact the floodplain adversely or support floodplain development.

(e) Non-emergency debris removal from a floodway or non-emergency disposal of debris within the base floodplain.

(f) Temporary housing assistance (Sec. 404). (1) The following listing of temporary housing alternatives has been determined by the Administrator to be generally reflective of practicability concepts. This determination is based on floodplain management criteria and on the determinations of practicality included as regulatory guidance at § 2205.45 (d)(2), (e), (f). The Administrator's designee shall select temporary housing alternatives for each applicant from this list. However, despite this listing, practicable alternatives outside the base floodplain must be chosen in preference to practicable alternatives within the base floodplain.

(i) Existing resources outside the base floodplain.

(ii) Minimal repair of owner-occupied residences outside the base floodplain.

(iii) Existing resources within the base floodplain.

(iv) Minimal repair of owner-occupied residences within the base floodplain.

(v) Placement of a mobile home or readily fabricated dwelling on a private or commercial site outside the base floodplain.

(vi) Placement of a mobile home or readily fabricated dwelling on a private site within the base floodplain.

(vii) Placement of a mobile home or readily fabricated dwelling on a commercial site within the base floodplain.

(viii) Placement of a mobile home or readily fabricated dwelling on a group site outside the base floodplain.

(ix) Placement of a mobile home or readily fabricated dwelling on a group site within the base floodplain.

(x) Any action involving housing in a mapped floodway or coastal high hazard area.

(2) The Administrator has determined that minimization measures are impracticable (considering cost effectiveness and timeliness of assistance) in the case of existing resources and minimal repairs. The appropriate minimization measures shall be taken in the case of mobile homes, especially those placed in a mapped floodway or coastal high hazard area.

(3) The sale of mobile homes or other readily fabricated dwellings, and the donation of temporary housing units to States, other governmental entities, or voluntary organizations, shall require full implementation of the decision-making process described in this subpart.

(g) *Individual and Family Grant programs (Sec. 408).* Actions which involve purchase of a mobile home or building of bridges to provide access to private residences shall require implementation of the procedures of this subpart. Should the Governor or his/her designee determine an applicant eligible for either or the above items, he/she shall request the Regional Director to make a determination with respect to this subpart. If the action is approved, the appropriate minimization measures shall be taken by applicants and grant funds may be approved for this purpose.

(h) Small project grants (Sec. 419) where the Federal funding involved is used for construction of new facilities or of new structures within the base floodplain that are not otherwise exempt or inapplicable.

(i) *Repair and restoration of public facilities (Sec. 402).* (1) Categorical grants (Sec. 402 (a), (b), or (c)).

(i) Repairs to facilities or structures.

(ii) Replacement of destroyed facilities or structures.

(iii) A grant-in-lieu.

(2) Flexible funding (Sec. 402(f)).

(i) Repairs to facilities or structures.

(ii) Replacement of destroyed facilities or structures.

(iii) New facilities or structures which the State or local government determines to be necessary to meet its

needs for governmental services and functions in the disaster-affected area.

§ 2205.506 Decision making process.

(a) *General.* The Regional Director and individuals responsible to him for executing this decision-making process must be thoroughly familiar with the two Executive Orders, the USWRC Guidelines, and with this subpart. Questions requiring clarification of any aspect of this subpart should be referred to the Administrator for his review and determination. The Regional Director is responsible to the Administrator for appropriate execution of this decision-making process in each case, involving any non-exempt applicable action funded by FDAA grant or loan in the wetlands or in a flood-plain (see Appendix A for flow chart of this 8-step process).

(b) *Step 1.* Determine if a Proposed Action is in the Base Floodplain.

(1) Exempt or Inapplicable Actions. First it is necessary to verify whether the proposed action is exempt (§ 2205.503) or inapplicable (§ 2205.504). If so, the 8-step decisionmaking process need not be applied except as provided in the above sections, and Federal funding under the Act may be approved.

(2) Applicable Actions.

(i) Procedures for determining a floodplain location. (A) Areas of predominantly private land ownership: detailed maps showing the elevations and boundaries of the "100-year" (Zones A and V) and "500-year" (Zone B) floodplains are known as "Flood Insurance Rate Maps" (FIRM). Many of the communities which have a FIRM also have a Flood Insurance Study Report (FIS) containing detailed flood information. Some less detailed maps showing the approximate areas of the base (Zone A) floodplain are available for most of the remaining communities for which a FIRM is not available. These are called "Flood Hazard Boundary Maps" (FHBM). Similar information, some very detailed, is also available from the agencies described in Appendix A. The search for flood hazard information should follow the sequence below.

- The detailed map (FIRM) or the Flood Insurance Study (FIS) report shall be consulted first.
- If a detailed map (FIRM) is not available, obtain an approximate boundary map (FHBM). If the proposed site is at or near the "100-year" boundary, if data on flood elevations are needed, or if the map does not delineate the flood hazard boundaries in the vicinity of the proposed site, seek detailed information and assistance from the agencies listed in Appendix B.
- If an approximate boundary map (FHBM) is not available or if the map does not delineate the flood hazard boundaries in the vicinity of the proposed site, seek detailed information and assistance from the agencies listed in Appendix B.
- If the agencies listed do not have or know of detailed information and are unable to assist in determining whether or not the proposed site is in the base floodplain, seek the services of a licensed engineer experienced in this type of work to obtain data needed to identify the floodplain.

(B) Areas of predominantly Federal and State land holdings: If a decision involves an area or location within extensive Federal or State holdings and FIS reports and FIRM or FHBM maps are not available, information shall be sought from the land administering agency before information and/or assistance is sought from the agencies listed in Appendix B. If none of these agencies has information or can provide assistance, the services of an experienced consulting engineer shall be sought as described above.

(ii) Procedures if site is out of the base floodplain. Actions located out of the base floodplain as shown on either the FIRM or FHBM would meet the minimum requirements and no further action is required unless the action impacts the base floodplain, indirectly supports floodplain development, or is a critical action.

(3) Critical Action. As indicated previously, the minimum floodplain of concern for certain critical actions is the area subject to inundation from a flood having a 0.2 percent chance of occurring in any given year (500-year floodplain). This floodplain includes both Zones A and B as shown on FIRMs and the location of each critical action will be verified as discussed under § 2205.506(b)(2). Some key concerns in identifying critical actions are:

- Whether the proposed action, if flooded, would create an added dimension to the disaster as could be the case for liquified natural gas terminals and facilities producing and storing highly volatile, toxic, or water-reactive materials.
- Given the flood warning lead-time available, whether the occupants of buildings such as hospitals, schools, and nursing homes would be insufficiently modile to avoid loss of life and injury.
- Whether essential and irreplaceable records, utilities, and/or emergency services would be lost or become inoperative if flooded. Potential critical actions include, but are not limited to, those types of facilities or structures already mentioned in this section.

(4) Other Actions Outside the Base Floodplain. The location will be verified in Step 1 as discussed in § 2205.506(b)(2) for each proposed action outside the base floodplain which impacts the base floodplain or indirectly supports floodplain development.

(c) *Step 2—Early Public Review.* (1) General. The objective of public involvement is to provide sufficient information early enough in the process of making decisions affecting floodplains so that the public can have impact on the decision outcome. The order includes requirements that the public be provided adequate information on plans or proposals for actions in floodplains, an accounting for the rationale for proposed actions affecting floodplains and opportunity for review and comment. This requirement for public involvement can be met in a cumulative manner, when appropriate. Several actions may be addressed in one notice or series of notices. For some actions involving limited public interest a single notice in a local newspaper or letter to interested parties will suffice.

(2) Procedures. The Regional Director may require the State, or applicant through the State, to assist him in developing and executing a plan and a procedure for giving public notice of a proposed action. Such plan and procedure shall in each case contain the following elements:

- A description of the overall audience, including specific segments to whom public notice information will be targeted (e.g., floodplain residents, elected officials, basin residents, interest groups, other agencies, etc.). The responsibility is to reach as broad an audience as possible.
- A description of the vehicles or public information mechanisms which will be utilized to reach the target audience (e.g., public hearings, newsletters, workshops, advisory groups, etc.). The responsibility is to provide continuous interaction and involvement opportunities for the public during the floodplain decision-making process.
- A description of the purpose for which various public notice actions will be undertaken and assurance that public input will be integrated into the decision-making process (e.g., specific efforts to provide one-way information dissemination, two-way public communication or interaction, etc.). The responsibility is to provide information which promotes the fullest understanding of the proposed plan or action.
- A statement explaining the timing of public notice actions to promote public understanding and provide opportunities for the public to affect a proposed action or plan before alternative actions have been precluded.

The Regional Director of his designee shall insure that this plan and procedure is compatible with Section (2)(b) of Executive Order 11514 and that they apply to actions which do not require preparation of an Environmental Impact Statement (EIS) under Section 102(2)(C) of NEPA.

If there is a reasonable likelihood that a proposed action or a practicable alternative outside the base floodplain will impact the base floodplain, this shall be announced as early as possible without any delay to obtain more detailed information being developed. Public notice must precede major site identification and analysis so the public can have an input early in the decision-making process of preliminary site screening and selection. If not, options for public choice may be foreclosed, or decisions will not be based on similarly detailed information bases.

Early public notice is the first in a series of public information and involvement activities. This would logically be followed by continuing public communication at Step 4, in identifying impacts, Step 6, reevaluating alternatives through the environmental review process, and at Step 7, in the issuance of findings and explanation of why the proposed plan or action must impact the floodplain.

(d) *Step 3—Identify and Evaluate Practicable Alternatives to Locating in the Base Floodplain.* (1) Having determined that a proposed action is located in the base floodplain, the Regional Director is required by the Order to identify and evaluate practicable alternatives to locating in the base floodplain. Alternatives to be evaluated include: (i) carrying out the proposed action at a location outside the base floodplain (alternative sites); (ii) other means which accomplish the same purpose as the proposed action (alternative actions); and (iii) no action.

(2) In determining how this identification of alternatives is to be carried out, the Regional Director may categorize certain types of actions and shall perform the steps as prescribed in the following paragraphs.

(i) Actions which must be located in the floodway. Some facilities or structures may have functionally dependent uses and must be located in the floodplain in order to function. An example of such a facility would be a dam or floodwall. This type of action may be assumed to have no practicable alternative to locating in the floodplain. The Regional Director shall document the reasons why the floodplain location is required. Certain other facilities or structures must be located in the floodway in order to function, such as water intakes and stream gauging stations. For these actions no alternatives need be identified and the review may proceed to Step 4—Identification of Impacts and Step 5—Minimize, Restore and Preserve. In some instances where the magnitude and severity of damages within the base floodplain virtually eliminate all non-conforming facilities or structures, the proposed action, or actions, create a situation that is particularly conducive to sound floodplain management as well as minimization of harm to and within the floodplain. Recognition of this situation is a key factor to be considered by the Regional Director in the practicability determinations required by this decision-making process. This type of situation also may increase the practicability of sites outside the base floodplain.

(ii) Actions with alternative locations outside the base floodplain (or outside the 500-year floodplain for critical actions). The Regional Director will consult with the State and the applicant through the State to identify acceptable alternative locations for the proposed action. Separate reports will be prepared for each such alternative location. If a practicable location outside the floodplain (base or 500-year as applicable) is found based on FDAA review of these reports it must be used, and further consideration of alternative locations is not necessary. At this point, the Regional Director shall determine that the proposed action within the floodplain may not be Federally funded. If the applicant decides to proceed with the practicable alternative action outside the floodplain, the Regional Director may then complete the decision-making process and approve elegible Federal funding. If the applicant declines to proceed with the practicable alternative outside the base floodplain, as determined by the Regional Director, the latter may not approve Federal funding. However, the applicant may propose other actions, perhaps based on flexible funding or a grant-in-lieu. It may then be necessary to repeat the 8-step decision-making process for the new proposed action.

(iii) Actions with alternative locations within the base floodplain, or within the 500-year floodplain for critical actions involving facilities or structures that may not be adequately floodproofed. If no practicable location outside the floodplain is found, then locations within the floodplain which might have less potential for harm or impact on the floodplain should be considered. A report will be made out for each alternative location. Each report will also include a cost breakdown of applying minimization standards as described in Step 5 of this decision-making process (2205.506(f)).

(iv) Alternative actions at the same location. I no practicable alternative locations to the original location exist, then the Regional Director will consult with the applicant to determine if there are alternative methods, including floodproofing, for accomplishing the same purpose or function as that proposed which will have less potential for harm or impact on the floodplain. The alternative method will be evaluated as described above for alternative locations within the floodplain.

(v) No action—The alternative of not completing the action at all must be considered if no practicable alternative outside the floodplain or practicable alternate action is found.

(e) *Step 4—Identify Impacts of Proposed Action.* (1) General. After identifying a practicable alternative, the impacts of this action must be identified within two areas; potential harm to lives and property and impact upon the natural and beneficial floodplain values. Since the Order is based primarily on NEPA, the Regional Director can draw upon the impact identification and assessment procedures which have been developed in the implementation of NEPA. This review shall consider whether the proposed action will result in an increase in the useful life of any structure or facility in question, or maintain the investment at the same risk and exposure of lives to the flood hazard, or forego an opportunity to restore the natural and beneficial values served by the floodplain.

(2) Step 4.A. General Concepts. In his review of a proposed or alternative action that is not exempt or inapplicable, the Regional Director shall specifically consider and evaluate: (i) impacts associated with modification of wetlands or floodplains regardless of its location; (ii) additional impacts which may occur when certain types of actions may support subsequent actions which have additional impacts of their own; (iii) adverse impacts of the proposed actions on lives and property and on natural and beneficial floodplain or wetland values; (iv) the three basic types of impacts discussed in the following paragraphs.

(A) Step 4.A.1. Direct and Indirect Support of Floodplain or Wetland Development. An action supports floodplain development if it encourages, allows, serves, or otherwise facilitates additional floodplain development. The Regional Director shall consider whether or not proposed repair or restorative work has the effect of maintaining the status quo that existed prior to a major disaster in evaluating its impacts. These impacts may reinforce land use patterns which have developed without regard to hazard minimization or preservation of floodplain values and thus may be undesirable. Direct support results from actions located in wetlands or on the floodplain, while indirect

support results from those outside. All such impacts shall be evaluated.

(B) Step 4.A.2. Types of Impacts. Public notice will invite comments to identify these impacts. The Regional Director's analysis of impacts shall also consider other sources in making his analysis of impact. The three basic types of impacts which must be addressed are:

(*1*) Positive and negative impacts: both shall be identified, even though the focus of impact identification and assessment is on negative or adverse impacts. This is necessary in order to identify the full range of impacts against which to weigh the practicability of a proposed action. In addition, it must be recognized that impacts which are beneficial to some, may be harmful to others.

(*2*) Concentrated and dispersed impacts: both may result from any action. The impact is concentrated if it occurs at or near the site of the action and is dispersed if it occurs at a site remote from the action.

(*3*) Short- and long-term impacts: both must be analyzed in order to evaluate the total impact of an action. Short-term impacts are temporary changes occurring during or immediately following an action and usually persist for a short while. Long-term impacts occur during or after an action and may take the form of delayed changes or changes resulting from the cumulative effects of many individual actions. Long-term impacts may persist for a considerable time and may continue indefinitely.

(3) Step 4.B. Lives and Property. After determining that a proposed action is in the base floodplain, the risk to lives and property involved in using that site must be determined. This requires an understanding of the magnitude and consequences of flooding that can be expected.

(i) Step 4.B.2. High Hazard Areas. High hazard areas are those portions of riverine and coastal floodplains nearest the source of flooding. These are the frequently flooded areas that become arenas of major flood dynamics during large floods. Here flood waters exert their maximum pressures, erosion is greatly accelerated and loss potential is increased. Additionally, these are the areas of coastal and riverine floodplains within which many of the most critical floodplain values are concentrated. In riverine situations, the high hazard area is that portion of the floodplain where impedence to flood flow resulting from man's occupancy can increase flood heights and consequently the area subject to flooding. In coastal floodplains the high hazard area is usually confined to the beach area in front of high bluffs or the crest of primary or foredunes, where wave impact is the most significant inducing factor. In light of the high loss potential and the likelihood of significant adverse effects to floodplain values associated with the conduct, support or allowance of actions in these portions, the Regional Director must rigorously apply the Order's charge to avoid these areas.

(ii) Step 4.B.3. Evaluation of Flood Hazard. In reviewing the Damage Survey Report for a proposed action in the wetlands or in the floodplain, the Regional Director shall make a determination whether the 8-step decision-making process may be involved and shall record the determination on the Damage Survey Report. If the determination is affirmative, the hazard involved shall be clearly identified and the following considerations taken into account:

- Whether the proposed action is in a flood-fringe area such as the flood-fringe portion of a riverine floodplain or the backwater areas of a coastal floodplain.
- Whether the flood hazard is aggravated by the presence of, or potential for, destructive velocity flows, flood-related erosion, subsidence or sinkholes, or other special problems.
- Whether there is a combination of flood sources present which may flood simultaneously in the area (e.g., river and ocean, or shallow overland runoff and river, etc.).

(4) Step 4.C. Natural and Beneficial Floodplain Values. (i) Water and the adjacent floodplain exist in nature in a state of dynamic equilibrium. If one part of a coastal or riverine system is disturbed, the entire system usually readjusts toward a new equilibrium. Thus floodplain actions must be viewed with caution and a careful assessment made of their impact on natural and beneficial floodplain values.

(ii) Floodplains in their natural or relatively undisturbed state serve water resource values (natural moderation of floods, water quality maintenance, and groundwater recharge), living resource values (fish, wildlife, and plant resources), cultural resource values (open space, natural beauty, scientific study, outdoor education, and recreation), and cultivated resource values (agriculture, aquaculture, and foreatry). The review will consider whether the proposed action will forego an opportunity to restore the natural and beneficial values served by the floodplains. The Regional Director shall use appropriate measures to avoid this undesirable impact.

(f) *Step 5—Minimize, Restore, Preserve.* (1) General. The requirements of the Order to minimize, restore, and preserve apply if a proposed action will result in harm to or within the floodplain. The term "harm," as used in the context of the Order, applies to both lives and property (Step 4.B.), and natural and beneficial floodplain values (Step 4.C.). The concept of minimization (Step 5.A.), applies to harm. The concept of restoration and preservation (Step 5.B.) applies only to floodplain values. Step 5.C. discusses some mechanisms which may be applied to achieve these three requirements. The Regional Director shall start his/her analysis of these three requirements by applying these minimum standards: (i) no non-critical structure shall be built or improved significantly unless its lowest flood intended for human occupancy including basement is at or above the level of the 100-year frequency flood; (ii) there shall be no construction in a floodway or coastal high hazard area unless the use is functionally dependent on the floodplain site; (iii) the minor repair or improvement of a structure shall be accomplished with flood resistant materials. A Regional Director may withhold financial assistance to an applicant in those cases where these minimum standards are not met, or followup with the applicant to seek another practicable alternative action.

(2) Step 5.A. Minimize. Minimize is a demanding standard and requires that harm be reduced to the smallest possible degree. From the standpoint of lives and property, potential harm to or within the floodplain must be reduced to the smallest possible amount or degree. The goal is to avoid increasing the flood loss potential associated with the level of the base flood prior to the proposed action. Where a critical action is proposed (see Step 2.C.) the goal is associated with the 500-year level of flooding. The Order's requirement to minimize potential harm applies to (i) the investment at risk, i.e., the flood loss potential of the action itself, (ii) the impact the action may have on others, and (iii) the impact the action may have on floodplain values. In his/her review and findings the Regional Director shall specify how actions will be designed and modified to minimize harm to or within the floodplain. His/her review shall determine applicability of land use regulations and safe construction practices, including floodproofing or conversion of flood-exposed portions of a facility or structure to other uses less harmful to life or property or to the environment. He/she may consult with environmental or floodplain

management specialists from the State or other Federal agencies in deciding on appropriate design changes or other modifications to achieve minimization and still have a practicable proposed action or alternative.

(3) Step 5.B. Restore and Preserve. (i) In the context of this Order, "restore" focuses upon conditions existing as a result of prior actions, while "preserve" focuses upon the impacts of a proposed action. Restore means to reestablish a setting or environment in which the natural and beneficial floodplain values can again operate as well as or better than they did prior to the major disaster. Where floodplain values have been degraded by past actions, the Regional Director must identify, evaluate and implement appropriate measures to restore the values diminished or lost.

(ii) Preserve means to prevent modification to the natural floodplain environment as it existed prior to the major disaster, or to maintain it as closely as possible to its natural state. If an action will result in harm to or within the floodplain, the Regional Director must design or modify the action to assure that it will be carried out in an manner which preserves as much of the natural and beneficial floodplain values as is possible.

(4) Step 5.C. Methods to Minimize and Preserve. A wide range of methods have been developed over time to minimize harm to lives and property from flood hazards. For example, refer to page 36, Water Resources Council Guidelines, 43 FR 6048, **Federal Register** Volume 43, February 10, 1978. In the recent past, other methods directed toward minimizing harm to natural and beneficial environmental values, including those associated with the floodplain, have also been developed. The technology and methodologies for achieving restoration and preservation are not as well documented nor understood, but currently are receiving increasing attention. The tools and approaches, which are directed toward attaining these three goals of the Order, shall be considered and applied at all stages of a proposed action, as appropriate, e.g., during the planning, design, construction, operation and maintenance of a proposed project.

(g) *Step 6—Reevaluate Alternatives.* (1) General. (i) Having identified the impacts the proposed action would have on the floodplain (Step 4), methods to minimize these impacts, and opportunities to restore and preserve floodplain values (Step 5); the proposed action shall now be reevaluated. For proposed actions in the base floodplain, the reevaluation shall consider if the action is still practicable at the original site. If not, consider limiting the action to make non-floodplain sites practicable. If neither is acceptable, the alternative is no action. If the proposed action is outside the base floodplain but has impacts which cannot be minimized (Step 5), consider whether the action can be modified or relocated to eliminate or reduce the identified impacts, or if the no action alternative should be chosen.

(ii) When there is no practicable alternative outside the floodplain, the reevaluation shall also include a provision for comparison of the relative adverse impacts associated with the proposed action located in an out of the floodplain. The comparison shall emphasize floodplain values. However, a site out of the floodplain should not be chosen if the overall harm is significantly greater than that associated with the floodplain site.

(2) Step 6.A. Location in the Base Floodplain. In determining whether the proposed action will be located in the base floodplain, the Regional Director must ascertain that the floodplain site is the only practicable alternative. In carrying out his analysis, the Regional Director should keep in mind the just weight the Order accorded the following requirements and the importance of the location must outweigh them:

- Avoid direct or indirect support of floodplain development wherever there is a practicable alternative;
- Reduce the risk of flood loss;
- Minimize the impact of floods and human safety, health and welfare; and,
- Restore and preserve the natural and beneficial floodplain values.

(3) Step 6.B.1. Limit Action. If an action proposed to be located in the floodplain cannot satisfy the four requirements in Step 6.A., the Regional Director shall consider reducing the criteria for the proposed action in consultation with the Governor's Authorized Representative and the applicant. This would lower the threshold for what constitutes a practicable alternative. New alternative actions and sites could then be identified and previously rejected ones reevaluated for practicability based on scaled-down expectations. Public input would be solicited to help identify these new alternatives.

(4) Step 6.C. No Action. If neither of the above courses of action are feasible, the Regional Director shall reevaluate the no action alternative.

(h) *Step 7—Findings and Public Explanation.* (1) General. If reevaluation results in the determination that there is no practicable alternative to locating in or impacting upon the floodplain, a statement of findings and public explanation must be provided for the proposed action. The FDAA Public Statement of Findings and Explanation shall explain how any tradeoff analysis was conducted by the agency in making its findings. The Regional Director and the Governor's Authorized Representative should consult with the applicant to determine whether any other alternative than the proposed action within the floodplain should be considered. Possibilities of a grant-in-lieu or flexible funding as alternatives should be reviewed. If the applicant proposes an alternative outside the base floodplain, which the Governor's Authorized Representative and the Regional Director approve and determine practicable, public notice as in Step 2 can be given by the Regional Director of these findings together with a public explanation. The proposed practicable alternative outside the base floodplain can then be implemented. Some existing Regional public notice procedures may already satisfy part of the requirements of the Order (Section 2(a)(2)(ii)) through such mechanisms as OMB A–95 and NEPA procedures, or other public involvement programs. However, Regional procedures must incorporate the development and issuance of a written statement of findings and public explanation which includes:

(i) A description of why the proposed action must be located in the floodplain;

(ii) A description of all significant facts considered in making the determination including alternative sites and actions;

(iii) A statement indicating whether the actions conform to applicable State or local floodplain protection standards.

In addition, and in keeping with the concept of the overall public involvement process discussed in Step 2, the following items should be included in the statement of findings and public explanation:

(iv) A statement indicating why the NFIP criteria are demonstrably inappropriate for the proposed action;

(v) A provision for publication in the **Federal Register** or other appropriate vehicle;

(vi) A provision for a brief comment period prior to agency action (15 to 30 days);

(vii) A description of how the activity will be designed or modified to minimize harm to or within the floodplain.

(viii) A statement indicating how the action affects natural or beneficial floodplain values.

(ix) A statement listing other involved agencies and individuals.

(2) Step 7.A. Interagency Notice. Certain public review procedures already exist with which the Order's review requirements are to be integrated.

(i) Step 7.A.1. Programs Subject to OMB Circular A–95. For programs subject to OMB Circular A–95. For programs subject to OMB Circular A–95, the Regional Director shall send a notice, not to exceed three pages in length including a location map, to the State and area-wide A–95 clearinghouse for the areas affected. The notice shall include (as a minimum) paragraph (h)(1)(i), (ii), and (iii) from Step 7 above. It would also be helpful to the reviewer and consistent with the intent of the order to include Items 4 through 9.

(ii) Step 7.A.2. Other Programs. For programs not subject to OMB Circular A–95 review procedures, the Regional Director must develop procedures to provide for similar notice and explanation of why a proposed action is to be located in a floodplain. This notice must be circulated among interested agencies and also be made available to the public for review.

(3) Step 7.B. Actions Subject to NEPA. For major actions subject to NEPA which take place in the base floodplain, the public review requirements, discussed above as set out in Section 2(b) of Executive Order 11514, as amended, shall include the nine items listed in the introduction to Step 7. Section 2(a)(4) of the Order requires the same public notice procedures for Federal actions in the floodplain even though impacts are not significant enough to require the preparation of an environmental impact statement (EIS) under Section 102(2)(C) of NEPA (Pub. L. 91–190). Under NEPA procedures, a final EIS is circulated for public and interagency review and comment. A minimum of 30 days is required to allow a review and to receive responses from the public and governmental agencies. These comments must then be considered. The findings must be made in conjunction with a final FDAA decision, and the formal statement of findings required by the Order must be issued prior to initiating the proposed action. A final EIS shall explain, if appropriate, why the responsible official has recomended or why FDAA might support an action located in a floodplain.

(4) A statement of findings (including the explanatory information discussed in 7.A.) must be issued by the Regional Director in compliance with Section 2(a)(2) of the Order. This applies to all proposed actions located within or impacting the floodplain, including proposed actions whose impacts are not significant enough or are not otherwise required to complete an EIS.

(i) Step 8—Implement Action. With the conclusion of the decision-making process described in Steps 1–7, the proposed action can be implemented. However, the Regional Director has a continuing responsibility for insuring that the action is carried out in compliance with the Order. This is especially important for projects with long-term operation, maintenance and repair programs such as reservoirs or waste treatment facilities.

(Sec. 601, Pub. L. 93–288, 88 Stat. 163 (42 U.S.C. 5201); Executive Order 11795 as amended by Executive Order 11919; Delegation of Authority, 39 FR 20227; Executive Order 11988, 42 FR 26951, and Executive Order 11990, 42 FR 26961)

Issued at Washington, D.C., June 4, 1979.

Proposed Order Governing Oil and Gas Operations on the Outer Continental Shelf of the Arctic Ocean

DEPARTMENT OF THE INTERIOR

Geological Survey

Proposed Orders Governing Oil and Gas Operations on the Outer Continental Shelf of the Arctic Ocean

Notice is hereby given that, pursuant to Title 30 CFR 250.11, the Chief, Conservation Division, U.S. Geological Survey, has proposed Orders Nos. 1, 2, 3, 4, 5, 7 and 12 governing oil and gas lease operations on the Outer Continental Shelf (OCS) of the Arctic Ocean. These Orders will be applicable to OCS lands in the Beaufort Sea, the Chukchi Sea, and the Hope Basin.

These proposed Orders were developed from the revised Area OCS Orders which were published in final form in the **Federal Register** on May 18, 1979, Vol. 44, No. 96.

These proposed Orders do not reflect the revision of the existing regulations which are required by the enactment of the OCS Lands Act Amendments of 1978. It is recognized that some of these requirements will be reorganized and restructured when the existing regulations are revised to reflect the enactment of the OCS Lands Act Amendments of 1978.

The portions of the Orders which have been revised to reflect requirements for Arctic conditions are indicated in italics. Comments are solicited on these italicized portions and any other portions of the Orders which should be revised to include additional requirements pertaining to environmental, geological, or geophysical conditions which may be encountered in the Arctic Area.

A proposed Arctic Area OCS Order No. 8, containing requirements pertaining to the verification of the structural integrity of platforms and other structures including gravel and/or ice islands, is now being developed and will be published at a later date, with a solicitation for comments.

Copies of the U.S. Geological Survey standards which are referenced in OCS Order No. 2 are available from: Chief, Conservation Division, U.S. Geological Survey, Mail Stop 620, National Center, 12201 Sunrise Valley Drive, Reston, Virginia 22092.

Interested parties may submit written comments and suggestions on the proposed Arctic Area OCS Orders to the Chief, Conservation Division, at the address above, on or before July 30, 1979.

For further information, contact Mr. Richard B. Krahl, Chief of the Branch of Marine Oil and Gas Operations, Conservation Division, U.S. Geological Survey, Mail Stop 620, Reston, Virginia 22092 (703–860–7531). The primary author of this document is Mr. Rodney Smith, Area Oil and Gas Supervisor, Alaska Area, 800 "A" Street, Suite 109, Anchorage, Alaska 99501 (907–271–4303).

Dated: June 8, 1979.

J. R. Balsley,
Acting Director.

Arctic—OCS Orders

Contents

Order No. 1—Identification of Wells, Platforms, Structures, Mobile Drilling Units, and Subsea Objects:

1. Identification of Fixed Platforms or Structures
2. Identification of Mobile Drilling Units
3. Identification of Wells
4. Identification of Subsea Objects
5. Departures

Order No. 2—Drilling Operations:

1. Plans And Applications
1.1 Exploration Plan and Development and Production Plan
1.2 Application for Permit to Drill
2. Drilling From Fixed Platforms and Mobile Drilling Units
2.1 General Requirements
2.1.1 Fitness of Drilling Unit
2.1.2 Pre-Drilling Inspection
2.1.3 Well-Site Surveys
2.1.4 Oceanographic, Meteorlogical, Performance Data
2.1.5 Subfreezing Operations
2.2 Mobile Drilling Units
2.3 Fixed Drilling Platforms
3. Well Casing and Cementing
3.1 General Requirements
3.2 Drive or Structural Casing
3.3 Conductor and Surface Casing Setting and Cementing Requirements
3.3.1 Conductor and Surface Casing Setting Depths
3.3.2 Conductor Casing Cementing Requirements
3.3.3 Surface Casing Cementing Requirements
3.4 Intermediate Casing Setting and Cementing Requirements
3.5 Production Casing
3.6 Pressure-Testing of Casing
4. Directional Surveys
5. Blowout-Preventer (BOP) Equipment Requirements
5.1 General Requirements
5.1.1 BOP Equipment
5.1.2 Auxiliary Equipment
5.1.3 Subfreezing Operations
5.2 Subsea BOP Requirements
5.3 Surface BOP Requirements
5.4 Drive Pipe or Structural Casing BOP Requirements
5.4.1 Drilling Operations from Bottom-Supported Rigs
5.4.2 Floating Drilling Operations
5.5 Conductor Casing
5.6 Surface and Intermediate Casing
5.7 Testing of BOP Systems
5.7.1 BOP Testing Frequency
5.7.2 Pressure Testing Surface BOP Systems
5.7.3 Pressure Testing Subsea BOP Systems
5.7.4 Actuation of Surface BOP Systems
5.7.5 Actuation of Subsea BOP Systems
5.8 Inspection and Maintenance
5.9 Blowout-Preventer Drills
6. Mud Program
6.1 Mud Control
6.2 Mud Testing and Monitoring Equipment
6.3 Mud Quantities
6.4 Safety Precautions in Enclosed Mud-Handling Areas
7. Supervision, Surveillance, and Training
7.1 Supervision
7.2 Surveillance
7.3 Training
8. Hydrogen Sulfide
9. Critical Operations and Curtailment Plans
10. Field Drilling Rules
11. Departures

Order No. 3—Plugging and Abandonment of Wells

1. Permanent Abandonment
1.1 Isolation of Zones in Open Hole
1.2 Isolation of Open Hole
1.3 Plugging or Isolating Perforated Intervals
1.4 Plugging of Casing Stubs
1.4.1 Stub Termination Inside Casing String
1.4.2 Stub Termination Below Casing String
1.5 Plugging of Annular Space
1.6 Surface Plug
1.7 Testing of Plugs
1.8 Mud
1.9 Clearance of Location
1.10 Cement
2. Temporary Abandonment
3. Departures

Order No. 4—Determination of Well Producibility

1. Application for Determination of Well Producibility
2. Criteria for the Determination of Well Producibility
2.1 Production Tests
2.2 Production Capability Determination
3. Departures

Order No. 5—Production Safety Systems

1. Technological Improvement
2. Quality Assurance and Performance of Safety and Pollution-Prevention Equipment
3. Subsurface—Safety Devices
3.1 Installation
3.1.1 Subsurface-Safety Valves
3.2 Specification for Subsurface-Safety Valves
3.3 Design, Installation, and Operation
3.4 Surface-Controlled Subsurface-Safety Valves
3.4.1 Testing of Surface-Controlled Subsurface-Safety Valves
3.5 Subsurface-Controlled Subsurface-Safety Valves
3.5.1 Inspection and Maintenance of Subsurface-Controlled Subsurface-Safety Valves
3.6 Tubing Plugs in Shut-in Wells
3.7 Injection Wells
3.8 Temporary Removal for Routine Operations
3.9 Additional Safety Equipment

3.10 Emergency Action
3.11 Records
3.12 Reports
4. Design, Installation, and Operation of Surface Production Safety Systems
4.1 New Platforms
4.2 Specification for Wellhead Surface-Safety Valves
4.3 Submittal of Safety-System Design and Installation Features
5. Additional Safety and Pollution-Control Requirements
5.1 Design, Installation, and Operation
5.1.1 Pressure Vessels
5.1.2 Flowlines
5.1.3 Pressure Sensors
5.1.4 Emergency Shutdown System
5.1.5 Engine Exhausts
5.1.6 Glycol-Dehydration Units
5.1.7 Gas Compressors
5.1.8 Firefighting Systems
5.1.9 Fire and Gas Detection System
5.1.10 Electrical Equipment
5.1.11 Erosion
5.2 General Platform Operations
5.3 Simultaneous Platform Operations
5.4 Welding Practices and Procedures
5.5 Safety Device Testing
5.6 Records
5.6.1 Surface-Safety Valve and Associated Actuator Records
5.7 Safety Device Training
6. Failure and Inventory Reporting System (FIRS)
6.1 Data and Reporting Requirements
6.1.1 Format
6.1.2 Device Coverage
6.1.3 Device Inventory Reporting
6.1.3.1 Initial Inventory
6.1.3.2 Inventory Updates
6.1.3.3 Inventory-Reporting Methods
6.1.3.4 Inventory Verification
6.1.3.5 Inventory-Reporting Deviation
6.1.4 Device Failure Reporting
6.1.4.1 Failure-Data Submittal
6.1.4.2 Failure-Data Verification
6.1.4.3 Failure Definition
7. Crane Operations
8. Employee Orientation and Motivation Programs for Personnel Working Offshore
9. Requirements for Drilling Rigs
9.1 Fixed Structures
9.2 Mobile Drilling Units
10. Departures

Order No. 6—Completion of Oil and Gas Wells
(Under development)

Order No. 7—Pollution Prevention and Control
1. Pollution Prevention
1.1 Liquid Disposal
1.1.1 Drilling-Mud Components
1.1.2 Hydrocarbon-Handling Equipment
1.1.3 Curbs, Gutters, and Drains for Fixed Platforms or Structures and Mobile Drilling Units
1.1.4 Discharges from Fixed Platforms or Structures and Mobile Drilling Units
1.2 Solid Material Disposal
1.2.1 Well Solids
1.2.2 Containers
1.2.3 Equipment
2. Personnel, Inspections, and Reports
2.1 Personnel
2.2 Pollution Inspections
2.2.1 Manned Facilities
2.2.2 Unattended Facilities
2.3 Pollution Reports
2.3.1 Spills
2.3.2 Observed Malfunctions
3. Pollution-Control Equipment and Materials and Oil Spill Contingency Plans
3.1 Equipment and Materials
3.2 Oil Spill Contingency Plans
4. Drills and Training
4.1 Drills
4.2 Training
5. Spill Control and Removal
6. Departures

DEPARTMENT OF THE INTERIOR

Geological Survey, Conservation Division, Western Region

ALASKA AREA—ARCTIC

OCS Order No. 1, Effective

Identification of Wells, Platforms, Structures, Mobile Drilling Units, and Subsea Objects

This Order is issued pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.37.

1. *Identification of Fixed Platforms or Structures.* Platforms and structures shall be identified at two diagonal corners by a sign with letters and figures not less than 30 centimeters (12 inches) in height with the following information:

a. The name of the lease operator.

b. The area designation based on OCS Official Protraction Diagrams.

c. The block number in which the platform or structure is located.

d. The platform or structure designation.

The information shall be abbreviated as in the following example:

The Blank Oil Company operates "C" platform on Block 999 of the Salisbury Area. The identifying sign on the platform would indicate: BOC-SAL-999-C.

2. *Identification of Mobile Drilling Units.* Floating semisubmersible platforms, bottom-setting mobile rigs, and drilling ships shall be identified by one sign with letters and figures not less than 30 centimeters (12 inches) in height affixed to the derrick so as to be visible to approaching traffic and containing the following information:

a. The name of the lease operator.

b. The area designation based on OCS Official Protraction Diagrams.

c. The block number in which the drilling unit is located.

d. The OCS lease number.

e. The well number.

3. *Identification of Wells.* The OCS lease and well numbers shall be painted on, or a sign affixed to, the wellhead of each singly completed well. In multiple completed wells, each completion shall be individually identified at the wellhead. All identifying signs shall be maintained in a legible condition.

4. *Identification of Subsea Objects.* All subsea objects resulting from lease operations which are determined by the U.S. Coast Guard District Commander to be hazards to navigation or to the deployment of commercial fishing devices shall be identified by suitable aid-to-navigation devices as directed by the District Commander. Prior to the establishment of a subsea object or in the event of the accidental submergence of an object, the owner shall inform the District Commander of the object's description, location, and unobstructed depth of water above the object's highest point. Based on this information, the District Commander will determine what marking and permits, if any, will be required (14 U.S.C. 83, 85; 43 U.S.C. 1333; 33 CFR Part 67). The owner shall maintain these navigational markings onsite and properly functioning at all times while the obstruction remains.

5. *Departures.* All departures from the requirements specified in this Order shall be

subject to approval, pursuant to 30 CFR 250.12(b).

Rodney A. Smith,

Oil and Gas Supervisor, Arctic Area.

Approved:

Don E. Kash,

Chief, Conservation Division.

DEPARTMENT OF THE INTERIOR

Geological Survey, Conservation Division,

Western Region

ALASKA AREA—ARCTIC

OCS Order No. 2. Effective

Drilling Operations

This Order is issued pursuant to the authority prescribed in 30 CFR 250.11. All exploratory and development wells drilled for oil and gas shall be drilled in accordance with 30 CFR 250.34, 250.41, 250.91, and the provisions of this Order except for those provisions superseded by the issuance of field drilling rules.

1. *Plans and Applications*

1.1 *Exploration Plan and Development and Production Plan.* In accordance with 30 CFR 250.34, the lessee shall submit Exploration Plans and Development and Production Plans to the Supervisor for approval. All wells drilled under the provisions of this Order shall be included in the appropriate plan. *In addition, the Exploration Plans and Development and Production Plans shall include provisions to deal with emergency situations involving:*

a. A means of drilling a relief well should a blowout occur.

b. Loss or disablement of a drilling unit or a drilling rig.

c. Loss of or damage to support craft.

1.2 *Application for Permit to Drill.* Prior to commencing drilling under an approved Exploration Plan or a Development and Production Plan, the lessee shall file, in triplicate, an Application for Permit to Drill (Form 9–331 C) with the District Supervisor for approval. Additionally, the Supervisor will prescribe the number of public information copies to be submitted. If drilling activity does not commence within 6 months after the approval date, the Permit to Drill will expire.

2. *Drilling from Fixed Platforms and Mobile Drilling Units.*

2.1 *General Requirements.*

2.1.1 *Fitness of Drilling Unit.* All fixed and mobile drilling units shall be capable of withstanding the oceanographic and meteorological conditions for the proposed area of operations. The lessee shall submit evidence to the District Supervisor of the fitness of the drilling unit to perform the planned drilling operation. This evidence shall include drawings and specifications of the following:

a. The rated capacity of all major drilling equipment.

b. Drilling safety systems.

c. Firefighting equipment.

d. Pollution-prevention equipment associated with the drilling operation.

e. A schematic diagram of the drilling unit.

2.1.2 *Pre-Drilling Inspection.* Prior to commencing operations in an OCS Area, all fixed drilling platforms and mobile drilling units shall be made available for a complete inspection by the District Supervisor.

2.1.3 *Well-Site Surveys.* Lessees shall conduct a shallow geologic hazards survey, and other surveys as required by the Supervisor. In Areas where shallow hazards or hydrocarbons are unknown, shallow high-resolution geophysical data shall be obtained. The results of these surveys and an analysis of the geological hazards shall be furnished to the District Supervisor. All data obtained from the surveys and all geophysical data relating to shallow hazards shall be furnished upon request to the District Supervisor.

2.1.4 *Oceanographic, Meteorological, Performance Data.* Operators shall collect and report oceanographic, meteorological, and performance data during the period of operations. The type of information collected, method of collection, and report requirements will be as specified by the Supervisor.

2.1.5 *Subfreezing Operations.* Operators shall furnish evidence that the drilling equipment, drilling safety systems, and other associated equipment and materials are suitable for operations in those Areas which are subject to subfreezing conditions.

2.2 *Mobile Drilling Units.* Applications for drilling from mobile drilling units shall include the following:

a. Maximum environmental design criteria, operational criteria, and a critical operations plan as described in paragraph 9 of this Order.

b. Environmental data, statistical data and calculations which indicate the maximum-anticipated wave, wind, current values, and forces due to ice, icing, storm surges, and seismic motion to be encountered at the drill site during the period of drilling operations.

c. Current American Bureau of Shipping Classification, U.S. Coast Guard Certificate of Inspection, or other appropriate classifications, with operational limitations.

Unless required by the Supervisor, after a mobile drilling unit has been approved for use in an area, the information detailed in subparagraph 2.1.1 need not be resubmitted unless there are changes in equipment which affect the rated capability of the unit.

2.3 *Fixed Drilling Platforms.* Applications for installations of fixed drilling platforms or structures, including artificial islands, shall be submitted in accordance with OCS Order No. 8.

3. *Well Casing and Cementing.*

3.1 *General Requirements.* All wells shall be cased and cemented in accordance with the requirements of 30 CFR 250.41(a)(1). The Application for Permit to Drill shall include the casing design safety factors for collapse, tension, and burst. *In addition, the Application for Permit to Drill must include a proposal to fill all annuli within permafrost zones with cement or a liquid with a freezing point below the minimum permafrost temperature to prevent internal freezeback. The cement used to cement through permafrost zones must be designed to set before freezing and to have a low heat of dydration to prevent excessive thawing of the permafrost zones.* Wells drilled in areas which are underlain by freshwater aquifers shall have casing programs which are designed to protect the freshwater zones. In cases where cement has filled the annular space back to the ocean floor, upon approval by the District Supervisor, the cement may be washed out or displaced to a depth not exceeding 12 meters (39 feet) below the ocean floor to facilitate casing removal upon well abandonment. For the purpose of this Order, the several casing strings in order of normal installation are drive or structural, conductor, surface, intermediate, and production casing. If there are indications of inadequate cementing (such as lost returns, cement channeling, or mechanical failure of equipment in the surface-, intermediate-, and production-casing strings), the lessee shall evaluate the adequacy of the cementing operations by pressure testing the casing shoe, running a cement bond log, running a temperature survey, or a combination thereof before continuing operations. If the evaluation indicates inadequate cementing, the lessee shall recement or take other actions in accordance with the instructions of the District Supervisor. The lessee shall verify the adequacy of the remedial cementing operations as required by the District Supervisor.

The design criteria for all wells shall consider all pertinent factors for well control, such as:

a. Formation fracture gradients.

b. Formation pressure.

c. Maximum-anticipated surface pressure.

d. Casing setting depths.

e. Permafrost zones. The lessee shall utilize appropriate drilling technology and state-of-the-art methods, such as drilling-rate evaluation, shale-density analysis, or other appropriate methods in order to enhance the evaluation of conditions of abnormal pressure and to minimize the potential for the well to flow or kick.

All casing, except drive pipe or structural casing, shall be new pipe which meets or exceeds American Petroleum Institute (API) standards, or reconditioned used pipe that has been tested to assure that it will meet or exceed API standards for new pipe. If casing which is not fabricated to API standards is used, the manufacturer's specifications shall be included on the Application for Permit to Drill (Form 9–331 C).

In permafrost zones, the surface casing shall have minimum axial post-yield strain properties of 0.9 percent in tension and 1.25 percent in compression. Other means for maintaining the integrity of the well from the effects of permafrost thaw may be approved by the Supervisor upon application.

3.2 *Drive or Structural Casing.* This casing shall be set by drilling, driving, or jetting to a minimum depth of 30 meters (98 feet) below the ocean floor or to other depths, as may be required or approved by the District Supervisor, in order to support unconsolidated deposits and to provide hole stability for initial drilling operations. If this portion of the hole is drilled, the drilling fluid shall be of a type that is in compliance with the liquid disposal requirements of OCS Order No. 7, and a quantity of cement

sufficient to fill the annular space *of the drilled hole* shall be used.

3.3 *Conductor and Surface Casing Setting and Cementing Requirements.*

3.3.1 *Conductor and Surface Casing Setting Depths.* Casing design and setting depths shall be based upon all engineering and geologic factors, including the presence or absence of hydrocarbons, other potential hazards, and water depths. These strings of casing shall be set at the depths specified, subject to approved variation to permit the casing to be set in a competent bed, or through formations determined desirable to be isolated from the well by pipe for safer drilling operations; however, the conductor casing shall be set immediately prior to drilling into formations known to contain oil or gas, or, if unknown, upon encountering such formations. These casing strings shall be run and cemented prior to drilling below the specified setting depths. The District Supervisor may prescribe the exact setting depths for those wells which may encounter abnormal pressure conditions.

In permafrost-free areas, conductor casing setting depths shall be between 91 meters (298 feet) and 305 meters (1,000 feet) TVD below the ocean floor, and surface casing setting depths shall be between 305 meters (1,000 feet) and 1,400 meters (4,593 feet) TVD below the ocean floor.

In areas containing permafrost, the conductor or surface casing shall be set and cemented after drilling a maximum of 150 meters (492 feet) below the base of the permafrost. Where conditions warrant, the District Supervisor may approve a program where surface casing may be set at a greater depth below the base of permafrost, but not to exceed 1,400 meters (4,593 feet) below the ocean floor.

Engineering, geophysical, and geologic data used to substantiate the proposed setting depths of the conductor and surface casings (such as estimated fracture gradients, pore pressures, shallow hazards, etc.) shall be furnished with the Application for Permit to Drill.

3.3.2 *Conductor Casing Cementing Requirements.* Conductor casing shall be cemented with a quantity of cement sufficient to fill the calculated annular space *up to the top of the casing.* Cement fill to the ocean floor shall be verified by the observation of cement returns. In the event that observation of cement returns is not feasible or possible, *the method of verifying the cement fill shall be approved by the district Supervisor.*

3.3.3 *Surface Casing Cementing Requirements.* Surface casing shall be cemented with a quantity of cement sufficient to protect all freshwater zones, to provide well control until the next string of casing is set, with sufficient cement to fill the annular space to *the top of the permafrost zone, and with the cement fill* at least 60 meters (197 feet) inside the conductor casing, *or as approved by the District Supervisor. Any portion of the annulus opposite a permafrost zone which is not protected by cement shall be filled with a liquid with a freezing point below the minimum permafrost temperature to prevent internal freezeback.* After drilling a maximum of 15 meters (49 feet) of new hole, a pressure test shall be conducted to obtain data to be used in estimating the formation fracture gradient. Pressure data shall be obtained either by testing to formation leak-off or by testing to a predetermined equivalent mud weight. The results of this test and any subsequent tests of the formation shall be recorded on the driller's log and used to determine the depth and maximum mud weight to be used in the intermediate hole.

3.4 *Intermediate Casing Setting and Cementing Requirements.* One or more strings of intermediate casing shall be set when required by anticipated abnormal pressure, mud weight, sediment, and other well conditions. The setting depth for intermediate casing shall be based on the pressure tests of the exposed formation below the surface casing shoe or on subsequent pressure tests. After drilling a maximum of 15 meters (49 feet) of new hole, a pressure test shall be conducted to obtain data to be used in estimating the formation fracture gradient. Pressure data shall be obtained either by testing to formation leak-off or by testing to a predetermined equivalent mud weight. The results of this test and any subsequent tests of the formation shall be recorded on the driller's log and used to determine the depth and maximum mud weight to be used in the hole below the intermediate-casing string.

A quantity of cement sufficient to cover and isolate all hydrocarbon zones and to isolate abnormal pressure intervals from normal pressure intervals shall be used. This requirement for isolation may be satisfied by squeeze cementing prior to completion, suspension of operations, or abandonment, whichever occurs first. Sufficient cement shall be used to provide annular fill-up to a minimum of 150 meters (492 feet) above the zones to be isolated or 150 meters (492 feet) above the casing shoe in cases where zonal coverage is not required. *Any portion of the annulus opposite a permafrost zone not protected by cement must be filled with a liquid which has a freezing point below the minimum permafrost temperature to prevent internal freezeback.*

If a liner is used as an intermediate string, it shall be lapped a minimum of 30 meters (98 feet) into the previous casing string and cemented as required for intermediate casing. The liner shall be tested by a fluid entry or pressure test to determine whether a seal between the liner top and the next larger string has been achieved. The test shall be recorded on the driller's log. If the test indicates an improper seal, the top of the liner shall be squeeze cemented. When such liner is used as production casing, it shall be extended to the surface and cemented to avoid surface casing being used as production casing.

3.5 *Production Casing.* Production casing shall be set before completing the well for production. It shall be cemented in a manner necessary to cover or isolate all zones above the shoe which contain hydrocarbons; but in any case, a calculated volume sufficient to fill the annular space at least 150 meters (492 feet) above the uppermost hydrocarbon zone must be used. Any portion of the annulus opposite a permafrost zone not protected by cement must be filled with a liquid which has a freezing point below the permafrost temperature to prevent internal freezeback.

When a liner is used as production casing below intermediate casing, it shall be lapped a minimum of 30 meters (98 feet) into the previous casing string and cemented as required for the production casing. Testing of the seal between the liner top and the next larger string shall be conducted as in the case of intermediate liners and recorded on the driller's log. If the test indicates an improper seal, the top of the liner shall be squeeze cemented.

3.6 *Pressure-Testing of Casing.* Prior to drilling the plug after cementing, all casing strings, except the drive or structural casing, shall be pressure-tested as shown in the table below. The test pressure shall not exceed 70 percent of the internal yield pressure of the casing. If the pressure declines more than 10 percent in 30 minutes or if there is another indication of a leak, the casing shall be recemented, repaired, or an additional casing string run, and the casing tested again. The above procedures shall be repeated until a satisfactory test is obtained.

Casing:	*Minimum surface pressure*
Conductor	1,400 kilopascals (kPa)(203 psi).
Surface	* 10,800 kPa (1,000 psi).
Intermediate, liner, and Production.	* 110,400 kPa (1,500 psi) or 5 kPa/m (0.22 psi/ft) whichever is greater.

* Must not exceed 70 percent of the minimum internal yield pressure.

In the event of unscheduled drill pipe operations such as an unscheduled side-tracking operation or a fishing operation, the surface pipe shall be pressure tested, calipered, or otherwise evaluated, as approved by the District Supervisor.

After cementing any of the above strings, drilling shall not be resumed until a time lapse of 8 hours under pressure for the conductor casing string or 12 hours under pressure for all other strings. Cement is considered under pressure if one or more float valves are employed and are shown to be holding the cement in place or when other means of holding pressure is used. All casing pressure tests shall be recorded on the driller's log.

In addition to the time lapse stated above, sufficient time must elapse to allow the bottom 153 meters (502 feet) of annular cement fill, or total length of annular cement fill, if less, to attain a compressive strength of at least 3,448 kPa (500 psi) or as approved by the District Supervisor before drilling resumes.

The typical performance data for the particular cement mix used in the well shall be used to determine the time lapse required.

4. *Directional Surveys.* Wells are considered vertical if inclination does not exceed an average of 3 degrees from the vertical or the maximum individual inclination survey does not exceed 5 degrees. Inclinational surveys shall be obtained on all vertical wells at intervals not exceeding 150 meters (492 feet) during the normal course of drilling.

Wells are considered directional if inclination exceeds an average of 3 degrees

from the vertical or the maximum individual inclination survey exceeds 6 degrees. Directional surveys giving both inclination and azimuth shall be obtained on all directional wells at intervals not exceeding 150 meters (492 feet) during the normal course of drilling and at intervals not exceeding 30 meters (98 feet) in all planned angle-change portions of the hole.

On both vertical and directional wells, directional surveys giving both inclination and azimuth shall be obtained at intervals not exceeding 150 meters (492 feet) prior to, or upon, setting surface or intermediate casing, liners, and at total depth. Composite directional surveys shall be filed with the District Supervisor. The interval shown will be from the bottom of conductor casing or, in the absence of conductor casing, from the bottom of drive or structural casing to total depth. In calculating all surveys, a correction from true north to Universal Transverse Mercator Grid north or Lambert Grid north shall be made after making the magnetic-to-true-north correction.

5. *Blowout-Preventer (BOP) Equipment Requirements*

5.1 *General Requirements.* Blowout preventers and related well-control equipment shall be installed, used, maintained, and tested in a manner necessary to assure well control.

5.1.1 *BOP Equipment.* Blowout-preventer equipment shall consist of an annular preventer and the specified number of ram-type preventers. The pipe rams shall be of proper size to fit the drill pipe in use. The working pressure of any blowout preventer shall exceed the maximum-anticipated surface pressure to which it may be subjected, except that the working pressure of the annular preventer need not exceed 34,475 kPa (5,000 psi).

Information submitted with the Application for Permit to Drill shall include the maximum-anticipated surface pressure and the criteria used to determine this pressure. All blowout-preventer systems shall be equipped with:

a. A hydraulic actuating system that provides sufficient accumulator capacity to supply 1.5 times the volume necessary to close all BOP equipment units with a minimum pressure of 1,400 kPa (203 psi) above the precharge pressure. An accumulator backup system, supplied by a secondary power source independent from the primary power source, shall be provided with sufficient capacity to close all blowout preventers and hold them closed. Locking devices shall be provided on the ram-type preventers. The method of BOP actuation control such as hydraulic, acoustic, or other methods, shall be described and included in the Application for Permit to Drill.

b. At least one operable remote blowout-preventer-control station, in addition to the one on the drilling floor. This control station shall be in a readily accessible location away from the drilling floor.

c. A drilling spool with side outlets, if side outlets are not provided in the BOP body, to provide for separate kill and choke lines.

d. A kill line equipped with 2 kill-line valves is required. The master valve shall be located adjacent to the BOP. This valve shall not normally be used for opening or closing on flowing fluid. The second valve shall be located adjacent to the master valve. This valve shall be used as the control valve.

e. A fill-up line above the uppermost preventer.

f. A choke manifold equipped in accordance with "API Recommended Practice for Blowout-Prevention Equipment Systems," API RP 53, First Edition, February 1976, reissued February 1978, Sections 3A and 3B, or subsequent revisions which the Chief, Conservation Division, has approved for use.

g. Valves, pipes, and fittings upstream of, and including, the choke manifold shall have a pressure rating at least equal to the maximum-anticipated surface pressure.

h. A wellhead assembly with a working pressure at least equal to the maximum-anticipated surface pressure.

5.1.2 *Auxiliary Equipment.* The following auxiliary equipment shall be provided and maintained in operable condition at all times:

a. A kelly cock shall be installed below the swivel and an essentially full-opening valve of such design that it can be run through blowout preventers shall be installed at the bottom of the kelly. A wrench to fit each valve shall be stored in a conspicuous location readily accessible to the drilling crew.

b. An inside blowout preventer and an essentially full-opening drill string safety valve in the open position shall be maintained on the rig floor at all times while drilling operations are being conducted. These valves shall be maintained on the rig floor to fit all connections that are in the drill string.

c. A safety valve shall be available on the rig floor assembled with the proper connection to fit the casing string that is being run in the hole at the time.

5.1.3 *Subfreezing Operations.* The blowout preventers and related control equipment shall be suitable for operations in those Areas which are subject to subfreezing conditions.

5.2 *Subsea BOP Requirements.* The minimum requirements for drilling below the casing strings for subsea blowout-preventer stacks are tabulated below:

Drive or Structural	None required [1, 2]
Conductor	1—Annular
	1—Diverter System [2, 3]
Surface	1—Annular
	2—Pipe Rams
	1—Blind Shear Ram
Intermediate	1—Annular
	2—Pipe Rams [4]
	1—Blind Shear Ram

[1] When drilling fluids are circulated to the drilling vessel, a diverter system as described in subparagraph 5.4.1 shall be installed on top of the marine riser.

[2] If returns to the surface cannot be established, refer to subparagraph 5.4.2.

[3] The choke and kill lines or equivalent vent lines, equipped with necessary connections and fittings, can be used for diversion, if approved by the Supervisor, or an annular preventer or pressure-rotating, packoff-type head, equipped with suitable diversion lines, shall be installed on top of the marine riser.

[4] To be installed on top of the marine riser. The diverter system shall provide, as a minimum two 15-centimeter (6-inch) internal diameter lines and full-opening valves.

[5] When a tapered drill string is in use, the BOP stack shall be equipped with pipe rams to fit both sizes of drill pipe.

Subsea blowout-preventer stacks shall be equipped with blind shear rams. A subsea accumulator or a suitable alternate approved by the District Supervisor is required to provide fast closure of the preventers and to operate all critical functions in case of loss of power fluid connection to the surface. The blowout-preventer system shall include dual pod control systems in accordance with API RP 53, First Edition, February 1976, reissued February 1978, Subsection 5.B.13, or subsequent revisions which the Chief, Conservation Division, has approved for use. Prior to the removal of the marine riser for installing casing, the riser shall be displaced with seawater. Sufficient hydrostatic head shall be maintained within the well bore to compensate for the reduction in head and to maintain a safe well condition. If repair or replacement of the blowout-preventer stack is necessary after installation, this work shall be accomplished after casing has been cemented prior to drilling out the casing shoe or by setting a cement or bridge plug to assure safe well conditions.

5.3 *Surface BOP Requirements.* The minimum requirements for drilling below the casing strings for conventional surface blowout-preventer stacks are tabulated below:

Drive or Structural	1—Diverter System[1]
Conductor	1—Annular
	1—Diverter System[1]
Surface	1—Annular
	2—Pipe Rams
	1—Blind Ram
Intermediate	1—Annular
	2—Pipe Rams[2]
	1—Blind Ram

[1] The diverter system shall include a minimum of two 15-centimeter (6-inch) internal diameter lines and full-opening valves.

[2] When a tapered drill string is in use, the BOP stack shall be equipped with pipe rams to fit both sizes of drill pipe.

5.4 *Drive Pipe or Structural Casing BOP Requirements.*

5.4.1. *Drilling Operations from Bottom-Supported Rigs.* Before drilling below this string with a bottom setting rig, a diverter system and related equipment shall be installed for circulating the drilling fluid to the drilling structure. The diverter system shall be equipped with remote control valves in the main and diverter flow lines that can be operated from the control panel prior to shutting in the well. The diverter lines shall vent in different directions to permit downwind diversion. A schematic diagram and operational procedure for the diverter system shall be submitted with the Application for Permit to Drill (Form 9-331 C) to the District Supervisor for approval.

5.4.2 *Floating Drilling Operations.* In drilling operations where a floating or semi-submersible type of drilling vessel is used and formation competency at structural casing setting depth is not adequate to permit circulation of drilling fluids to the vessel while drilling the conductor hole, a program which provides for safety in these operations shall be described and submitted to the District Supervisor for approval. This program shall include all known pertinent information, including seismic and geologic data, water depth, drilling-fluid hydrostatic pressure, a schematic diagram indicating the equipment to be installed from the rotary table to the proposed conductor-casing seat, and a contingency plan for moving off location.

5.5 *Conductor Casing.* Before drilling below this string, at least one remote-controlled, annular-type blowout preventer shall be installed. A diverter system and other equipment for circulating the drilling fluid to the drilling structure or vessel shall be installed as described in subparagraph 5.4.1.

5.6 *Surface and Intermediate Casing.* Before drilling below these strings, the blowout-preventer system shall consist of at least four remote-controlled, hydraulically operated blowout preventers including at least two equipped with pipe rams, one with blind rams, and one annular type. Subsea blowout-preventer stacks used with floating drilling vessels shall include one set of blind shear rams.

5.7 *Testing of BOP Systems.* Prior to conducting high-pressure tests, all BOPs shall be tested to a low pressure of 1,400 to 2,000 kPa (203 to 290 psi).

5.7.1 *BOP Testing Frequency.* Surface and subsea BOP stacks shall be tested as follows:

a. When installed.

b. Before drilling out after each string of casing has been set.

c. At least once each week, but not exceeding 7 days between tests, alternating between control stations. A period of more than 7 days between tests may be allowed where drilling problems prevent testing and remedial efforts are being made, provided BOP tests will be conducted as soon as possible. Testing shall be at staggered intervals to allow each drilling crew to operate the equipment.

d. Following repairs that require disconnecting a pressure seal in the assembly.

5.7.2 *Pressure Testing Surface BOP Systems.* Ram-type BOPs and related control equipment shall be tested at the maximum-anticipated surface pressure or at 70 percent of the minimum internal yield pressure of the casing, whichever if the lesser. The annular-type BOP shall be tested at 70 percent of its rated working pressure or 70 percent of the minimum internal yield pressure of the casing, whichever is the lesser. Before drilling out of each casing or liner shoe, the blind rams shall be tested as required for pipe rams. When a tapered drill string is in use, the smaller pipe rams shall be tested when the smaller pipe is within the stack during a trip.

5.7.3 *Pressure Testing Subsea BOP Systems.* Subsea BOPs and all related well-control equipment shall be stump tested at the surface with water to the maximum-anticipated surface pressure, except that the annular-type BOP shall not be tested above 70 percent of its rated working pressure. After the installation of the BOP stack on the sea floor, the control equipment and pipe rams, conforming to the drill string within the stack, shall be tested as required under subparagraph 5.7.2. Before drilling out of each casing or liner shoe, the blind shear rams shall be tested as required for blind rams under subparagraph 5.7.2.

5.7.4 *Actuation of Surface BOP Systems.* The following minimum-actuation frequencies are required:

a. Pipe Rams—Daily. In order to prevent damage to the rams, complete closure of the rams on drill pipe is not required, provided proper operation is indicated.

b. Blind Rams—Once each trip while the drill pipe is out of the hole. If multiple trips are made, only one action per day is required.

c. Annular-Type Preventer—Once each week in conjunction with the pressure test.

d. Control Stations—Once each trip while the drill pipe is out of the hole; however, not more than once each day, if multiple trips are made.

e. Choke manifold valves, kelly cocks, drill pipe safety valves—Weekly.

5.7.5 *Actuation of Subsea BOP Systems.* The actuation frequency requirements for subsea BOP systems shall be the same as those listed in subparagraph 5.7.4 for surface BOP systems, except item "b" pertaining to blind rams.

The blind shear rams shall be actuated once each trip from alternate control stations and control systems; however, not more than once each day, if multiple trips are made. During the weekly pressure tests, all hydraulic systems except those actuating the blind shear rams shall be actuated from each control station and control system.

5.8 *Inspection and Maintenance.* All BOP systems, marine risers, and associated equipment shall be inspected and maintained in accordance with the manufacturer's recommended procedures. The BOP systems and marine risers shall be visually inspected at least once each day if the weather and sea conditions permit the inspection. Inspection of subsea installations may be accomplished by the use of television equipment.

5.9 *Blowout-Preventer Drills.* All drilling personnel shall be indoctrinated in blowout-preventer drills and be familiar with the blowout-preventer equipment before starting work on the well. A blowout-preventer drill shall be conducted for each drilling crew in accordance with the well-control drill requirements of the U.S. Geological Survey (USGS) Outer Continental Shelf Standard, "Training and Qualifications of Personnel in Well-Control Equipment and Techniques for Drilling on Offshore Locations," No. T 1 (GSS-OCS-T 1), First Edition, December 1977, and subsequent revisions thereto. A BOP drill may be required by a USGS designated representative at any time during the drilling operation.

6. *Mud Program.* The characteristics, use, and testing of drilling mud and the implementation of related drilling procedures shall be designed to prevent the loss of well control. Sufficient quantities of mud materials shall be maintained readily accesible for use at all times to assure well control.

Mud temperatures shall be controlled to minimize heat loss to and thawing of the permafrost which can result in serious well problems. To insure maximum safety, hydrate zones shall be anticipated and diagnosed quickly, and drilled at controlled rates with mud cooled to the hydrate equilibrium temperature. To prevent problems after hydrate zones are penetrated, cooled muds shall continue to be used, and where possible, hydrate zones should be cased off with high-collapse-strength casing.

6.1 *Mud Control.* Before starting out of the hole with drill pipe, the mud shall be properly conditioned. Proper conditioning requires either circulation with the drill pipe just off bottom to the extent that the annular volume is displaced, or proper documentation in the driller's log prior to pulling the drill pipe as follows:

a. There was no indication of influx of formation fluids prior to starting to pull the drill pipe from the hole.

b. The weight of the returning mud is not less than the weight of the mud entering the hole.

c. Other mud properties recorded on the daily drilling log are within the specified ranges required by the mud program.

When the mud in the hole is circulated, the driller's log shall be so noted.

When coming out of the hole with drill pipe, the annulus shall be filled with mud before the change in mud level decreases the hydrostatic pressure 517 kPa (75 psi) or every 5 stands of drill pipe, whichever gives a lower decrease in hydrostatic pressure. The number of stands of drill pipe and drill collars that may be pulled prior to filling the hole and the equivalent mud volume shall be calculated and posted. A mechanical, volumetric, or electronic device for measuring the amount of mud required to fill the hole shall be utilized.

When there is an indication of swabbing or influx of formation fluids, the necessary safety devices and action shall be employed to control the well. The mud shall be circulated and conditioned, on or near bottom, unless well or mud conditions prevent running the drill pipe back to the bottom.

For each casing string, the maximum pressure to be contained under the blowout preventer, before controlling excess pressure by bleeding through the choke, shall be posted near the driller's control console.

An operable vacuum-type gas separator shall be installed in the mud system prior to commencement of drilling operations. The separator shall be maintained for use throughout the drilling and completion of the well.

The mud in the hole shall be circulated or reverse-circulated prior to pulling the drill-stem test tools from the hole.

6.2 *Mud Testing and Monitoring Equipment.* Mud-testing equipment shall be maintained on the drilling rig at all times, and mud tests shall be performed once each tour, or more frequently, as conditions warrant. Such tests shall be conducted in accordance with procedures outlined in "API Recommended Practice for Standard Procedure for Testing Drilling Fluids," API RP 13B, Seventh Edition, April 1978, or subsequent revisions which the Chief, Conservation Division, has approved for use. The results of the tests shall be recorded and maintained at the drill site.

The following mud-system monitoring equipment shall be installed with derrick floor indicators and used when mud returns are established and throughout subsequent drilling operations:

a. Recording mud pit level indicator to determine mud pit volume gains and losses.

This indicator shall include both a visual and an audio warning device.

b. Mud-volume measuring device for accurately determining mud volumes required to fill the hole on trips.

c. Mud-return indicator to determine that returns essentially equal the pump discharge rate.

d. Gas-detecting equipment to monitor the drilling mud returns, with indicators located in the mud-logging compartment or on the derrick floor. If the indicators are in the mud-logging compartment, there shall be a means of immediate communication with the rig floor, and the equipment shall be continually manned.

6.3 *Mud Quantities.* The lessee shall include, with his Application for Permit to Drill, a tabulation of well depth versus minimum quantities of mud material, including weighting material, to be maintained at the drill site. The minimum quantities of mud material required shall be based on the following:

a. The volume required to replace the calculated capacity of the downhole and active surface mud system.

b. The quantity of weighting material required to overcome the highest anticipated formation pressure.

When the mud quantity required exceeds the storage capacity of the drilling facility, the lessee shall maintain maximum mud inventories and must receive approval from the District Supervisor of the lessee's plans to resupply mud inventories in the event of an emergency. The plan shall include an estimate of the time required for delivery of the mud supplies.

Daily inventories of mud materials, including weighting material, shall be recorded and maintained at the well site. Drilling operations shall be suspended in the absence of minimum quantities of mud material specified in the table or as modified in the approved plan.

6.4 Safety Precautions in Enclosed Mud-Handling Areas. All enclosed mud-handling areas where dangerous concentrations of combustible gases may accumulate shall be equipped with a ventilation system and with gas monitors. These enclosed areas shall be:

a. Ventilated with high-capacity, mechanical ventilation systems capable of changing the air once every 2 minutes.

b. Maintained at a negative pressure relative to the surrounding areas where discharge to an adjacent enclosed area may be hazardous.

c. Fitted with gas detectors and alarms.

d. Equipped with electrical equipment of the "explosion proof" type. Alternatively, the equipment may be pressurized to prevent the ingress of explosive gases, and where air is used for pressurizing, the air intake shall be located outside of, and as far as practicable from, hazardous areas.

7. Supervision, Surveillance, and Training.

7.1 *Supervision.* A representative of the operator shall provide onsite supervision of drilling operations on a 24-hour basis.

7.2 *Surveillance.* From the time drilling operations are initiated and until the well is completed or abandoned, a member of the drilling crew or the toolpusher shall maintain rig-floor surveillance continuously, unless the well is secured with blowout preventers, bridge plugs, or cement plugs.

7.3 *Training.* By December 1, 1979, lessee and drilling contractor personnel shall be trained and qualified in accordance with the provisions of the USGS Outer Continental Shelf Standard, "Training and Qualifications of Personnel in Well-Control Equipment and Techniques for Drilling on Offshore Locations," No. T 1 (GSS–OCS–T 1), First Edition, December 1977, and subsequent revisions thereto.

Any driller, toolpusher, or operator's representative who received training in well-control operations between December 1, 1975, and December 1, 1979, will be credited with having met the training requirements of GSS–OCS–T 1.

After December 1, 1979, in order to maintain qualification, employees must successfully complete a USGS-approved refresher course annually and repeat the basic well-control course every 4 years, as described in the provisions of GSS–OCS–T 1. Credit for these courses shall be obtained from USGS-approved schools. The refresher course shall be completed within 45 days of the student's anniversary date. The anniversary date is established upon the student's successful completion of a basic course in well control.

Records shall be maintained at the drill site for the affected personnel, indicating the specific training and refresher courses successfully completed, the dates of completion, and the names and dates of the courses.

In those Areas which are subject to subfreezing conditions, the lessee shall ensure that personnel responsible for maintenance of the blowout-preventer stack, the associated-control equipment, and the hydraulic-control fluids shall be instructed in the proper procedures to prevent freezing of the hydraulic-control fluids in the control system and the fluids in the choke and kill lines.

8. *Hydrogen Sulfide.* When drilling operations are planned which will penetrate reservoirs known or expected to contain hydrogen sulfide (H_2S), or in those Areas where the presence of H_2S is unknown, or upon encountering H_2S, the preventive measures and the operating practices set forth in USGS Outer Continental Shelf Standard, "Safety Requirements for Drilling Operations in a Hydrogen Sulfide Environment," No. 1 (GSS–OCS–1), Second Edition, June 1979, or subsequent revisions thereto, shall be followed.

9. *Critical Operations and Curtailment Plans.* Certain operations performed in drilling are more critical than others with respect to well control, and for the prevention of fire, explosion, oil spills, and other discharges or emissions. The lessee shall file with the District Supervisor, for approval, a Critical Operations and Curtailment Plan to be followed while conducting drilling operations on each lease. This plan shall include:

a. A list or description of the critical drilling operations that are, or are likely to be, conducted on the lease. This list or description shall specify the operations to be ceased, limited, or not to be commenced under given circumstances or conditions. This list shall include operations such as:

(1) Drilling in close proximity to another well.

(2) Drill-stem testing.

(3) Running and cementing casing.

(4) Cutting and recovering casing.

(5) Logging or wireline operations.

(6) Well-completion operations.

(7) Moving the drilling vessel off location in an emergency, repositioning the vessel on location, and reestablishing entry into the well.

b. A list or description of circumstances or conditions under which such critical operations shall be curtailed. This list or description shall be developed from all the factors and conditions relating to the conduct of operations on the lease, and shall consider but not necessarily be limited to the following:

(1) Whether the drilling operations are to be conducted from mobile or fixed platforms.

(2) The availability and capability of containment and cleanup equipment and spill-control system response time.

(3) Abnormal or unusual conditions expected to be encountered during drilling operations.

(4) Known or anticipated meteorological or oceanographical conditions.

(5) Availability of personnel and equipment for particular operations to be conducted.

(6) Other factors peculiar to the particular lease under consideration.

c. The name of the person who has overall responsibility, as the person in charge at the site, for safety of drilling operations.

When any circumstance or condition listed or described in the plan occurs or other operational limits are encountered, the lessee shall notify the District Supervisor and shall curtail the critical operations as set forth under 9a.

Deviations from the plan shall require prior approval of the District Supervisor. If emergency action requires deviation from the plan, the District Supervisor shall be notified as soon as possible.

The lessee shall review the plan at least annually. The lessee shall notify the District Supervisor of the results of this review. Any amendments or modifications of the plan are subject to the approval of the District Supervisor.

10. *Field Drilling Rules.* When sufficient geological and engineering information is obtained as a result of drilling operations, the lessee may make an application or the Supervisor may require an application for the establishment of field drilling rules. After field drilling rules have been established by the Supervisor, development wells shall be drilled in accordance with these rules and the requirements of this Order which are not affected by such rules.

11. *Departures.* All departures from the requirements specified in this Order shall be

subject to approval, pursuant to 30 CFR 250.12(b).

Rodney A. Smith,
Oil and Gas Supervisor, Arctic Area.

Approved:
Don E. Kash,

Ocs Order No. 3 Effective

Plugging and Abandonment of Wells

The Order is issued pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.15. The operator shall comply with the following minimum plugging and abandonment procedures which have general application to all wells drilled for oil and gas. Plugging and abandonment operations shall not be commenced prior to obtaining approval from the appropriate District Supervisor. Oral or telegraphic approvals shall be in accordance with 30 CFR 250.13.

1. *Permanent Abandonment.*

1.1 *Isolation of Zones in Open Hole.* In uncased portions of wells, cement plugs shall be spaced to extend 30 meters (98 feet) below the bottom to 30 meters (98 feet) above the top of any oil, gas, and freshwater zones so as to isolate them in the strata in which they are found and to prevent them from escaping into other strata or the surface. The placement of additional cement plugs to prevent the migration of formation fluids in the well bore may be required by the District Supervisor.

1.2 *Isolation of Open Hole.* Where there is open hole below the casing, a cement plug shall be placed in the deepest casing string in accordance with "a" or "b" below. In the event lost circulation conditions have been experienced or are anticipated, a permanent-type bridge plug may be placed in accordance with "c" below:

a. A cement plug set by the displacement method so as to extend a minimum of 30 meters (98 feet) above and 30 meters (98 feet) below the casing shoe.

b. A cement retainer with effective back-pressure control set not less than 15 meters (49 feet) nor more than 30 meters (98 feet) above the casing shoe, with a cement plug calculated to extend at least 30 meters (98 feet) below the casing shoe and 15 meters (49 feet) above the retainer.

c. A permanent-type bridge plug set within 45 meters (148 feet) above the casing shoe with 15 meters (49 feet) of cement on top of the bridge plug. This bridge plug shall be tested in accordance with subparagraph 1.7 prior to placing subsequent plugs.

1.3 *Plugging or Isolating Perforated Intervals.* A cement plug shall be set by the displacement method opposite all open perforations (perforations not squeezed with cement) extending a minimum of 30 meters (98 feet) above and 30 meters (98 feet) below the perforated interval or down to a casing plug, whichever is less. In lieu of setting a cement plug by the displacement method, the following two methods are acceptable, provided the perforations are isolated from the hole below:

a. A cement retainer with effective back-pressure control set not less than 15 meters (49 feet) nor more than 30 meters (98 feet) above the top of the perforated interval with a cement plug calculated to extend at least 30 meters (98 feet) below the bottom of the perforated interval and 15 meters (49 feet) above the retainer.

b. A permanent-type bridge plug set within 45 meters (148 feet) above the top of the perforated interval with 15 meters (49 feet) of cement on top of the bridge plug.

1.4 *Plugging of Casing Stubs.* If casing is cut and recovered leaving a stub, one of the following methods shall be used to plug the casing stub.

1.4.1 *Stub Termination Inside Casing String.* A stub terminating inside a casing string shall be plugged by one of the following methods:

a. A cement plug set so as to extend 30 meters (98 feet) above and 30 meters (98 feet) below the stub.

b. A cement retainer set 15 meters (49 feet) above the stub with 45 meters (148 feet) of cement set below and 15 meters (49 feet) above.

c. A permanent bridge plug set 15 meters (49 feet) above the stub and capped with 15 meters (49 feet) of cement.

1.4.2 *Stub Termination Below Casing String.* If the stub is below the next larger string, plugging shall be accomplished in accordance with either subparagraph 1.1 or 1.2.

1.5 *Plugging of Annular Space.* Any annular space communicating with any open hole and extending to the ocean floor shall be plugged with cement.

1.6 *Surface Plug.* A cement plug at least 45 meters (148 feet) in length, with the top of the plug 45 meters (148 feet) or less below the ocean floor, shall be placed in the smallest string of casing which extends to the ocean floor.

1.7 *Testing of Plugs.* The setting and location of the first plug below the surface plug shall be verified by one of the following methods:

a. By placing a minimum pipe weight of 6,800 kilograms (15,000 pounds) on the cement plug, cement retainer, or bridge plug. The cement placed above the bridge plug or retainer need not be tested.

b. By testing the plug with a minimum pump pressure of 6,900 kPa (1,000 psi) with no more than a 10-percent pressure drop during a 15-minute period.

1.8 *Mud.* Each of the respective intervals of the hole between the various plugs shall be filled with mud fluid of sufficient density to exert hydrostatic pressure exceeding the greatest formation pressure encountered while drilling the intervals between the plugs. *Fluid left in the hole adjacent to the permafrost zone shall have a freezing point below the temperature of the permafrost zone and shall not have an oil base.*

1.9 *Clearance of Location.* All casing, wellhead, equipment, and piling shall be removed to a depth of at least 5 meters (16 feet) below the ocean floor or at a depth approved by the District Supervisor after a review of data on the ocean-bottom conditions. The operator shall verify that the location has been cleared of all obstructions.

1.10 *Cement. The cement used for cement plugs placed across the permafrost zones must be designed to set before freezing and to have a low heat of hydration.*

2. *Temporary Abandonment.* Any drilling well which is to be temporarily abandoned shall be mudded and cemented as required for permanent abandonment except for the requirements in subparagraphs 1.6. and 1.9. When a drilling well is temporarily abandoned, a bridge plug or a cement plug shall be set at the base of the deepest casing string. If a cement plug is set, it is not necessary for the cement plug to extend below the casing shoe into the open hole. When a casing stub extends above the ocean floor, the operator shall comply with the following requirements:

a. A mechanical, retrievable, or permanent bridge plug, or a cement plug at least 30 meters (98 feet) in length shall be set in the casing between 5 and 60 meters (16 and 197 feet) below the ocean floor.

b. The requirements of OCS Order No. 1, paragraph 4, "Identification of Subsea Objects."

3. *Departures.* All departures from the requirements specified in this order shall be subject to approval, pursuant to 30 CFR 250.12(b).

Rodney A. Smith,
Oil and Gas Supervisor, Arctic Area.

Approved:
Don E. Kash,
Chief, Conservation Division.

DEPARTMENT OF THE INTERIOR

Geological Survey, Conservation Division, Western Region

ALASKA AREA, ARCTIC

OCS Order No. 4, Effective

Determination of Well Producibility

This Order is issued pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.12. An OCS lease provides for extension beyond its primary term for as long as oil or gas may be produced from the lease in paying quantities. The term "paying quantities" as used herein means production of oil and gas in quantities sufficient to yield a return in excess of operating costs. An OCS lease may be maintained beyond the primary term, in the absence of actual production, when a suspension of production has been approved in accordance with 30 CFR 250.12.

1. *Application for Determination of Well Producibility.* An application shall be submitted to the District Supervisor for the determination of every new well's capability of producing until a well, drilled on the lease, has been determined to be capable of producing oil or gas in paying quantities. The application shall be submitted within 60 days after the drilling rig has been moved from the well.

2. *Criteria for the Determination of Well Producibility.* The Supervisor shall prescribe which of the following criteria is to be used to determine the capability of a well to produce in paying quantities.

2.1 *Production Tests.* All tests must be witnessed by an authorized respresentative of the U.S. Geological Survey. Test data accompanied by operator's affidavit, or third-party test data, may be accepted in lieu of a witnessed test, provided approval is obtained from the District Supervisor prior to the performance of the test. All tests must conform to the following minimum requirements:

a. A production test for oil wells of at least 2 hours' duration following stabilization of flow.

b. A deliverability test for gas wells of at least 2 hours' duration following stabilization of flow or a 4-point back-pressure test.

2.2 *Production Capability Determination.* When the District Supervisor determines that open-hole evaluation data, such as wireline formation tests, drill stem tests, core data, and logs, have been demonstrated as reliable in a geologic area such data may be considered as acceptable evidence that a well is capable of producing in paying quantities.

3. *Departures.* All departures from the requirements specified in this Order shall be subject to approval, pursuant to 30 CFR 250.12(b).

Rodney A. Smith,

Oil and Gas Supervisor, Arctic Area.

Approved:

Don E. Kash,

Chief, Conservation Division.

DEPARTMENT OF THE INTERIOR

Geological Survey, Conservation Division, Western Region

ALASKA AREA, ARCTIC

OCS Order No. 5, Effective

Production Safety Systems

This Order is issued pursuant to the authority prescribed in 30 CFR 250.11 and 250.12(a), and in accordance with 30 CFR 250.41(b), 250.42, and 250.46. The lessee shall be responsible for compliance with the requirements of this Order in the installation and operation of the production safety systems on all platforms and structures including those facilities not operated or owned by the lessee. All applications for approval under the provisions of this Order shall be submitted to the District Supervisor.

1. *Technological Improvement.* The lessee is encouraged to continue the development of safety-system technology. As research and product improvement result in increased effectiveness of existing safety equipment or the development of new equipment systems, such equipment may be used or required.

2. *Quality Assurance and Performance of Safety and Pollution-Prevention Equipment.* Safety and Pollution-Prevention Equipment (SPPE) shall conform to the following quality assurance standards or subsequent revisions which the Chief, Conservation Division, has approved for use.

a. American National Standards Institute/American Society of Mechanical Engineers Standards "Quality Assurance and Certification of Safety and Pollution Prevention Equipment Used in Offshore Oil and Gas Operations," ANSI/ASME SPPE-1-1977, December 1977 (formerly ANSI/ASME-OCS-1-1977).

b. American National Standards Institute/American Society of Mechanical Engineers Standard "Accreditation of Testing Laboratories for Safety and Pollution Prevention Equipment Used in Offshore Oil and Gas Operations," ANSI/ASME-SPPE-2-1977, December 1977 (formerly ANSI/ASME-OCS-2-1977).

The dates for compliance with these quality assurance standards, the applicable SPPE components, and the applicable SPPE specifications are identified in subparagraph 3.2 and subparagraph 4.2.

3. *Subsurface-Safety Devices.*

3.1 *Installation.* All tubing installations open to hydrocarbon-bearing zones shall be equipped with a subsurface-safety device such as a Surface-Controlled Subsurface-Safety Valve (SCSSV), a Subsurface-Controlled Safety Valve (SSCSV), an injection valve, or a tubing plug, unless, after application and justification, the well is determined to be incapable of flowing. The device shall be installed at a depth of 30 meters (98 feet) or more below the ocean floor within 2 days after production is stabilized. *In areas with permafrost, the device shall be installed at a depth of 30 meters (98 feet) or more below the base of the permafrost within 2 days after production is stabilized.*

The well shall be attended at the wellhead while open to a hydrocarbon-bearing zone, unless a subsurface-safety device is installed.

3.1.1 *Subsurface-Safety Valves.* The requirements for subsurface-safety valves vary according to the shut-in tubing pressure of the well. Alternatives to the following requirements may be approved by the Supervisor when greater reliability or safety can be demonstrated.

Wells completed after the effective date of this Order shall be equipped with one of the following:

a. All tubing installations shall be equipped with a surface- or other remotely controlled subsurface-safety device if the shut-in tubing pressure of the well is 27,600 kilopascals (kPa) (4,000 psi) or less.

b. If the shut-in tubing pressure of the well is greater than 27,600 kPa (4,000 psi), the well shall be equipped with a subsurface-controlled subsurface-safety valve. When the shut-in tubing pressure declines below 27,600 kPa (4,000 psi), a surface- or other remotely controlled subsurface-safety valve shall be installed when the tubing is first removed and reinstated.

3.2 *Specification for Subsurface-Safety Valves.* Surface-controlled and subsurface-controlled subsurface-safety valves required by subparagraphs 3.4 and 3.5, which are installed on new installations after July 1, 1979, shall conform to "American Petroleum Institute (API) Specification for Subsurface-Safety Valves," API Spec 14A, Third Edition, November 1978, or subsequent revisions which the Chief, Conservation Division, has approved for use at the time of installation.

3.3 *Design, Installation, and Operation.* After the effective date of this Order, new installations of subsurface-safety valves shall be in accordance with "API Recommended Practice for Design, Installation, and Operation of Subsurface Safety Valve Systems," API RP 14B, First Edition, October 1973, or subsequent revisions which the Chief, Conservation Division, has approved for use.

3.4 *Surface-Controlled Subsurface-Safety Valves.* After the effective date of this Order, all tubing installations open to a hydrocarbon-bearing zone shall be equipped with a surface-controlled subsurface-safety valve, except as specified in subparagraphs 3.1, 3.5, and 3.6. The surface controls may be located on the site or at a remote location.

The lessee shall furnish evidence that the surface-controlled subsurface-safety devices and related equipment are capable of normal operation in those Areas which are subject to subfreezing conditions.

3.4.1 *Testing of Surface-Controlled Subsurface-Safety Valves.* Each surface-controlled, or other remotely controlled, subsurface-safety valve installed in a well shall be tested in accordance with Appendix E of API RP 14B, when installed or reinstalled, at least monthly for the first 3 months, and thereafter at intervals not to exceed 6 months. If the device does not operate properly, it shall be promptly removed, repaired, reinstalled, or replaced, and tested to ensure proper operation.

3.5 *Subsurface-Controlled Subsurface-Safety Valves.* Tubing installations in wells completed from single-well and multiwell satellite caissons or jackets and ocean floor completions may be equipped with a subsurface-controlled subsurface-safety valve in lieu of surface- or other remotely controlled subsurface-safety valves.

3.5.1 *Inspection and Maintenance of Subsurface-Controlled Subsurface-Safety Valves.* Each subsurface-controlled subsurface-safety valve installed in a well shall be removed, inspected, and repaired or adjusted as necessary and reinstalled at intervals not exceeding:

(1) 6 months for those valves not installed in a landing nipple.

(2) 12 months for those valves installed in a landing nipple.

3.6 *Tubing Plugs in Shut-in Wells.* A tubing plug shall be installed in lieu of, or in addition to, other subsurface-safety devices if a well has been shut in for a period of 6 months. Tubing plugs shall be set at a depth of 30 meters (98 feet) or more below the ocean floor. *In areas containing permafrost, each tubing-plug installation shall be approved by the District Supervisor on a case-by-case basis.* All retrievable plugs installed after the date of this Order shall be of the pump-through type. All wells perforated and completed but not placed on production shall be equipped with a subsurface-safety valve or tubing plug within 2 days after completion. A surface-controlled subsurface-safety valve of the pump-through type may be used as a pump-through tubing plug for the purpose of this subparagraph,

provided the surface control has been rendered inoperative. A shut-in well which is equipped with a tubing plug shall be inspected for leakage by opening the well to possible flow at intervals not exceeding 6 months. If a liquid leakage rate in excess of 400 cc/min or a gas leakage rate in excess of 7d m³/sec (15 cubic ft/min) is observed, the plug shall be removed, repaired, and reinstalled, or an additional tubing plug may be installed in lieu of removal and repair.

3.7 *Injection Wells.* A surface-controlled subsurface-safety valve or an injection valve capable of preventing backflow shall be installed in all wells placed in injection service after the effective date of this Order.

This requirement is not applicable if the District Supervisor concurs that the well is incapable of flowing. The lessee shall verify the no-flow condition of the well annually and submit an annual report certifying the no-flow status of the well.

3.8 *Temporary Removal for Routine Operations.* Each wireline or pumpdown-retrievable subsurface-safety device may be removed, without further authorization or notice, for a routine operation which does not require the approval of a Sundry Notice and Report on Wells (Form 9–331), for a period not to exceed 15 days. The well shall be identified by a sign on the wellhead stating that the subsurface-safety device has been removed. The removal of the subsurface-safety device shall be noted in the records as required by subparagraph 3.11g. The well shall be attended at the wellhead until the subsurface-safety device has been reinstalled, unless attendance has been waived by the District Supervisor.

3.9 *Additional Safety Equipment.* All tubing installations in which a wireline- or pumpdown-retrievable subsurface-safety device is installed after the effective date of this Order shall be equipped with a landing nipple, flow couplings to prevent internal abrasion, or other protective equipment, above and below, to provide for the setting of the subsurface-safety valve. The control system for all surface-controlled subsurface-safety valves shall be an integral part of the platform Emergency Shutdown System (ESD) as defined in API RP 14C, Appendix C, Section C1. In addition to the activation of the ESD system by manual action on the platform, the system may be activated by a signal from a remote location. Surface-controlled subsurface-safety valves shall close in response to shut-in signals from the ESD system or the fire loop, or both.

3.10 *Emergency Action.* All tubing installations open to hydrocarbon-bearing zones in which the subsurface-safety device has been removed, in accordance with the provisions of this Order, shall be identified by a sign on the wellhead stating the subsurface-safety device has been removed. A subsurface-safety device shall be available for each well on the platform. In the event of an emergency such as an impending storm, this device shall be properly installed as soon as possible with due consideration being given to personnel safety.

3.11 *Records.* The lessee shall maintain records for a minimum period of 5 years for each subsurface-safety device installed. These records shall be maintained in the nearest offshore field office for a minimum period of 2 years. The records may then be transferred to the onshore field office for the remaining 3 years of the 5-year retention period. These records shall be available for review by any authorized representative of the U.S. Geological Survey (USGS). The records to be maintained shall contain verification of:

a. The design, including make, model, and type. For subsurface-controlled valves, number of the spacers, size of beans, springs, and the pressure settings.

b. The devices having been manufactured in accordance with the quality-assurance requirements of ANSI/ASME–SPPE–1 (formerly ANSI/ASME–OCS–1) as required by paragraph 2.

c. The completion and return of the receiving report to the manufacturer as required by ANSI/ASME–SPPE–1.

d. The record of all configuration modifications to the certified design.

e. Installation at the required setting depth and in accordance with the manufacturer's instructions and API RP 14B.

f. The qualifications of the personnel who directed all installations and removals.

g. The results of tests required by this Order, the dates of removals and reinstallations, and the reasons for removals and reinstallations.

h. The completion and submission of all failure reports required by paragraph 6 and all investigation reports required by paragraphs OE–2520 and OE–2670 of ANSI/ASME–SPPE–1.

3.12 *Reports.* Well completion reports (Form 9–330) and any subsequent reports of workover (Form 9–331) shall include the type and the depth of the subsurface-safety devices.

4. *Design, Installation, and Operation of Production Safety Systems.* All production facilities, including separators, treaters, compressors, headers, and flowlines, shall be designed, installed, and maintained in a manner which will facilitate an efficient, safe, and pollution-free operation.

The lessee shall furnish evidence that the surface-safety systems and related equipment are capable of normal operation in those Areas which are subject to subfreezing conditions, and that all equipment and operating procedures take into account floating ice, *icing*, and other extreme environmental conditions that may occur in the Area.

4.1 *New Platforms.* New platform production facilities shall be protected with a basic and ancillary surface-safety system designed, analyzed, tested, and maintained in operating condition in accordance with the provisions of "API Recommended Practice for Analysis, Design, Installation, and Testing of Basic Surface Safety Systems on Offshore Production Platforms," API RP 14C, Second Edition, January 1978, except Section A9, "Pipelines," which will be covered under OCS Order No. 8, or subsequent revisions which the Chief, Conservation Division, has approved for use and the additional requirements of the Order. For this application, the word "should" contained in API RP 14C shall be read "shall," except for those contained in explanatory statements, sections 3.4c and 4.3a(4)(a)–(f). If processing components are to be utilized, other than those for which Safety Analysis Checklists (SAC's) are included in API RP 14C, the analysis technique and documentation specified therein shall be utilized to determine the effects and requirements of these components upon the safety system.

4.2 *Specification for Wellhead Surface-Safety Valves.* All wellhead Surface-Safety Valves (SSV's) required by subparagraph 4.1 which are installed on new installations after July 1, 1979, shall conform to "API Specification for Wellhead Surface Safety Valves for Offshore Service," API Spec 14D, Second Edition, November 1977, as amended by Supplement 1, March 1978, or subsequent revisions which the Chief, Conservation Division, has approved for use at the time of installation.

4.3 *Submittal of Safety-System Design and Installation Features.* Prior to installation, the lessee shall submit for approval to the District Supervisor, in duplicate, information relative to design and installation features, as indicated in subparagraphs a through g. This information shall also be maintained at the lessee's onshore field engineering office. All approvals are subject to field verifications. This information shall include:

a. A schematic flow diagram showing size, capacity, and design working pressure of separators, treaters, storage tanks, compressors, pipeline pumps, and metering devices.

b. A schematic flow diagram (reference API RP 14C, example: figure E1) and the related Safety Analysis Function Evaluation (SAFE) chart (reference API RP 14C, Subsection 4.3c). These diagrams and charts shall be developed in accordance with the provisions of API RP 14C and the additional requirements of this Order.

c. A schematic piping diagram showing the size and design pressure with reference to welding specification(s) or code(s) used. The maximum-allowable working pressures shall be determined in accordance with "API Recommend Practice for Design and Installation of Offshore Production Platform Piping System," API RP 14E, First Edition, August 1975, and Supplement 2, October 1977, or subsequent revisions which the Chief, Conservation Division, has approved for use. The recommendations contained in API RP 14E are acceptable for the design and installation of the platform piping system.

d. A diagram of the fire-fighting system.

e. Electrical system information including the following:

(1) A plan of each platform deck outlining any nonrestricted area, i.e., areas which are unclassified with respect to electrical equipment installations and outlining areas in which potential ignition sources, other than electrical, are to be installed. The area outline shall include the following information:

(a) Any surrounding production or other hydrocarbon source and a description of the deck, overhead, and firewall.

(b) Location of generators, control rooms, panel boards, major cabling or conduit

routes, and identification of the wiring method, including the identification of each wire and cable type that is utilized.

(2) Elementary electrical schematic of any platform safety-shutdown system with a functional legend.

(3) Classification of areas for electrical installations in accordance with the National Electrical Code, 1978 Edition, and with the "API Recommended Practice for Classification of Areas for Electrical Installations at Drilling Rigs and Production Facilities on Lands and on Marine Fixed and Mobile Platforms," API RP 500B, Second Edition, July 1973, or subsequent revisions which the Chief, Conservation Division, has approved for use.

f. The design and schematics of the installation and maintenance of all fire and gas detection systems shall include the following:

(1) Type, location, and number of detection heads.

(2) Type and kind of alarm, including emergency equipment to be activated.

(3) Method used for detection.

(4) Method and frequency of calibration.

(5) Name of organization to perform system inspection and calibration.

(6) A functional block diagram of the detection system, including the electric power supply.

g. Certification that the design for the mechanical and electrical systems were approved by registered professional engineers. After these systems are installed, the lessee shall submit a statement to the District Supervisor certifying that the complete installations conform to the approved designs or the lessee shall request approval of the "As-Built" changes.

5. *Additional Safety and Pollution-Control Requirements.* The following requirements modify or are in addition to those contained in API RP 14C.

5.1 *Design, Installation, and Operation.*

5.1.1 *Pressure Vessels.* Pressure vessels shall be designed, fabricated, stamped, and maintained in accordance with specific sections of the ASME Boiler and Pressure Vessel Code as listed below. The pressure vessels shall conform to the July 1, 1977, edition of the Code or subsequent revisions which the Chief, Conservation Division, has approved for use.

a. Pressure relief valves shall be designed, installed, and maintained in accordance with applicable provisions of sections I, IV, and VIII. The relief valves shall conform to the valve-sizing and pressure-relieving requirements specified in these documents; however, the relief valves shall be set no higher than the maximum-allowable working pressure of the vessel. All relief valves and vents shall be piped in such a way as to prevent fluid from striking personnel or ignition sources.

b. Steam generators shall be equipped with low-water-level controls in accordance with applicable provisions of sections I and IV.

c. The lessee shall determine and record the operating pressure ranges of all pressure-operated vessels in order to establish the pressure-sensor settings. The high-pressure shut-in sensor shall be set no higher than 10 percent above the highest operating pressure of the vessel. This setting shall also be sufficiently below the relief valve's set pressure to assure that the pressure source is shut in before the relief valve starts relieving. The low-pressure shut-in sensor shall activate no lower than 15 percent or 35 kPa (5 psi), whichever is greater, below the lowest pressure in the operating range.

d. All pressure or fired vessels used in the production of oil or gas, ordered after the effective date of this Order, shall conform to the requirements stipulated in the edition of the ASME Boiler and Pressure Vessel Code, sections I, IV, and VIII, as appropriate, in effect at the time the vessel is ordered. Uncoded vessels now in use shall have been hydrostatically tested to a pressure 1.5 times their work pressures.

The test date, test pressure, and working pressure shall be marked on the vessel in a prominent place. A record of the test shall be maintained by the lessee in the field area.

5.1.2 *Flowlines.*

a. All flowlines from wells shall be equipped with high- and low-pressure shut-in sensors located downstream of the well choke. All pressure sensors shall be equipped to permit testing with an external pressure source. The lessee shall determine and record the operating pressure ranges in order to establish pressure-sensor settings. The high-pressure shut-in sensor shall be set no higher than 10 percent above the highest operating pressure of the line; but, in all cases, it shall be set sufficiently below the maximum shut-in wellhead pressure or the gas-list supply pressure to assure actuation of the surface-safety valve. The low-pressure shut-in sensor shall be set no lower than 10 percent or 35 kPa (5 psi), whichever is greater, below the lowest operating pressure of the line in which it is installed.

b. If a well flows directly to the pipeline before separation, the flowline and valves from the well located upstream of, and including, the header inlet valve(s) shall be able to withstand the maximum shut-in pressure of the well, unless the flowline is protected by one of the following:

(1) A relief valve which vents into the platform flare scrubber or some other location approved by the District Supervisor.

(2) An additional automatic shutdown valve controlled by an independent high-pressure sensor. The platform flare scrubber shall be designed to handle, without liquid-hydrocarbon carryover to the flare, the maximum-anticipated flow of liquid-hydrocarbons which may be relieved to the vessel.

5.1.3 *Pressure Sensors.* Pressure sensors may be of the automatic- or nonautomatic-reset type. When the automatic-reset types are used, a nonautomatic-reset relay shall be installed. All pressure sensors shall be equipped to permit testing with an external pressure source.

5.1.4 *Emergency Shutdown System.* The manually operated ESD valve shall be quick-opening and nonrestricted to enable the rapid actuation of the shutdown system. ESD stations may utilize a loop of breakable synthetic tubing in lieu of a valve. The time for the safety system to effect platform shutdown shall not exceed 45 seconds after the automatic detection of an abnormal condition or the actuation of an ESD station. A schematic of the ESD system shall be posted at a prominent location on the platform. This schematic shall indicate the control functions of all safety devices.

5.1.5 *Engine Exhausts.* Engine exhausts shall be equipped to comply with the insulation and personnel-protection requirements of API RP 14C, Section 4.2c(4). Exhaust piping from internal-combustion engines shall be equipped with spark arrestors.

5.1.6 *Glycol-Dehydration Units.* A pressure relief system or an adequate vent shall be installed on the glycol regenerator, or at a location approved by the District Supervisor, which will prevent overpressurization of all glycol-dehydration units. The set pressure of the pressure-relief system shall be determined by the lessee and approved by the District Supervisor. The discharge of the relief valve must be vented in a nonhazardous manner. The glycol-dehydration unit shall be properly maintained to prevent overpressurization of the unit.

5.1.7 *Gas Compressors.*

a. *New Compressor Installations.* Each compressor installed after the effective date of this Order shall be equipped with the following protective equipment:

(1) A PSH, a PSL, a PSV, and an LSH to protect each interstage scrubber.

(2) An LSL to protect each interstage scrubber, unless the fluid is dumped through a choke restriction to another pressure vessel. An LSL shut-in control(s) installed in interstage scrubber(s) may be designed to actuate the automatic Shutdown Valve(s) (SDV's) installed in the scrubber dump line(s).

(3) A TSH on each compressor cylinder or other components as applicable.

(4) In addition to the provisions of API RP 14C, Subsection A8.3, PSH and PSL shut-in sensors and LSH shut-in controls protecting compressor suction and interstage scrubbers shall be designed to actuate automatic SDV's located in each compressor suction and fuel gas line so that the compressor unit and the associated vessels can be isolated from all input sources.

All automatic SDV's installed in compressor suction and fuel gas piping shall also be actuated by the shutdown of the prime mover.

b. *Small Compressor Installations.* Compressor installations of 745 kilowatts (1,000 horsepower) or less are excluded from those requirements of API RP 14C, A8.3d, which provide for installation of a blowdown valve (BDV) on the discharge line.

5.1.8 *Firefighting Systems.* Firefighting systems installed after the effective date of this Order shall conform to Subsection 5.2, "Fire Water Systems," of "API Recommended Practice for Fire Prevention and Control on Open Type Offshore Production Platforms," API RP 14G, First Edition, September 1978, or to subsequent revisions which the Chief, Conservation Division, has approved for use and to the additional requirements of this subparagraph.

A firewater system consisting of rigid pipe with firehose stations shall be installed. A fixed water-spray system shall be installed in the well bays. The system shall be installed to provide needed protection at all times in all areas where production-handling equipment is located.

Acceptable pump drivers include diesel engines, natural gas engines, and electric motors. Fuel or power shall be available for at least 30 minutes of run-time during platform shut-in time. If necessary, an alternate fuel supply shall be installed to provide for this pump-operating time.

A firefighting system using chemicals may be used or may be required in lieu of a water-spray system if the District Supervisor determines that the use of a chemical system provides equivalent fire-protection control. A diagram of the firefighting system showing the location of all firefighting equipment shall be posted in a prominent place on the platform or structure.

5.1.9 *Fire and Gas Detection System.*

a. Fire (flame, heat, or smoke) sensors shall be used in all enclosed high-hazard areas. Gas sensors shall be used in all inadequately ventilated, enclosed, high-hazard areas. A high-hazard area is defined as:

(1) Any enclosed area containing a gas source, except a meter house with adequate ventilation.

(2) A compressor building.

(3) Any nonsealed enclosed area within 25 feet of a producing well or service area of a producing well, unless the enclosed area does not contain an ignition source. A diagram of the detection system showing the location of all detection points shall be posted in a prominent place on the platform or structure.

b. All detection systems shall be capable of continuous monitoring. The systems shall be of the manual-reset type.

c. A fuel gas odorant and an automatic gas-detection and alarm system are required in enclosed, continuously manned areas of the facility.

d. The District Supervisor may require a gas detector or alarm in any potentially hazardous area.

e. Fire and gas detection systems shall be of a type as defined in the National Electrical Code, 1978 Edition, or subsequent revisions which the Chief, Conservation Division, has approved for use.

5.1.10 *Electrical Equipment.* The following requirements shall be applicable to all electrical equipment and systems:

a. All engines with ignition systems shall be equipped with a low-tension ignition system of a low-fire-hazard type and shall be designed and maintained to minimize the release of sufficient electrical energy to cause ignition of an external, combustible mixture.

b. All electrical generators, motors, and lighting systems shall be installed, protected, and maintained in accordance with the edition of the National Electrical Code and API RP 500B in effect at the time of approval.

c. At the time of approval, wiring methods shall conform to the National Electrical Code, 1978 Edition, or to the Institute of Electrical and Electronic Engineers (IEEE) "Recommended Practice for Electric Installation on Shipboard," IEEE Std. 45–1977, or subsequent revisions which the Chief, Conservation Division, has approved for use. Each conductor of a wire, a cable, or a bus bar shall be made of copper on all new installations constructed after the effective date of this Order.

d. An auxiliary power supply shall be installed to provide emergency power, capable of operating all electrical equipment required to maintain safety of operations, in the event a of failure in the primary electrical power supply.

e. The elementary electrical schematic of the platform safety-shutdown system required by subparagraph 4.3e(2) shall be posted in a prominent place on the platform or structure. This schematic shall indicate the control functions of all electrically actuated safety devices.

f. Maintenance of these systems shall be by qualified personnel.

5.1.11 *Erosion.* A program of erosion control shall be in effect for wells or fields having a history of sand production. The erosion-control program may include sand probes, X-ray, ultrasonic, or other satisfactory monitoring methods. An annual report, by lease, indicating the wells which have erosion-control programs in effect and the results of the programs shall be submitted by the first of December to the appropriate District Supervisor.

5.2 *General Platform Operations.*

a. Safety devices and safety systems on wells which are capable of producing shall not be bypassed or blocked out of service. Safety devices may be bypassed or blocked out of service if they are temporarily out of service due to startup, maintenance, or testing procedures, provided that personnel are monitoring the blocked-out functions. Any device on wells, vessels, or flowlines which is temporarily out of service shall be flagged.

b. When wells are disconnected from producing facilities and blind-flanged or equipped with a tubing plug, compliance is not required with the provisions of API RP 14C of this Order concerning:

(1) Installation of automatic fail-close SSV on wellhead assemblies.

(2) Installation of the PSH and the PSL shut-in sensors downstream of the choke in flowlines from wells.

(3) Installation of flow safety valves (FSV's) in header individual flowlines.

c. All open-ended lines connected to producing facilities shall be plugged or blind-flanged, except those lines designed to be open-ended, such as flare or vent lines.

5.3 *Simultaneous Platform Operations.* Prior to conducting activities simultaneously with production operations which could increase the possibility of occurrence of undesirable events, such as harm to personnel or to the environment or damage to equipment, a "General Plan for Conducting Simultaneous Operations" in a producing field shall be filed for approval with the District Supervisor. This plan shall be modified and updated by supplemental plans when actual simultaneous operations are scheduled. Activities requiring these plans are drilling, completion, workover, wireline, pumpdown, and major construction operations.

The "General Plan for Conducting Simultaneous Operations" shall include:

a. A narrative description of operations.

b. Procedures for the mitigation of potentially undesirable events including:

(1) The guidelines the lessee will follow to assure coordination and control of simultaneous activities.

(2) An indication of the person having overall responsibility at the site for the safety of platform operations.

The "Supplemental Plan for Conducting Simultaneous Operations" shall include:

a. A floor plan of each platform deck indicating critical areas of simultaneous activities.

b. An outline of any additional safety measures that are required for simultaneous operations.

c. Specification of any added or special equipment or procedural conditions imposed when simultaneous activities are in progress.

5.4 *Welding Practices and Procedures.* The following requirements are applicable to any welding practice or procedure performed on:

a. An offshore mobile-drilling unit during the drilling mode.

b. A mobile workover unit during any drilling, completion, recompletion, remedial, repair, stimulation, or other workover activity.

c. A platform, structure, artificial island, or other installation during any drilling, completion, workover, or production operation.

d. A platform, structure, artifical island, or other installation which contains a well open to a hydrocarbon-bearing zone.

For the purpose of this Order, the terms "welding" and "burning" are defined to include arc or acetylene cutting and arc or acetylene welding.

Each lessee shall file, for approval by the District Supervisor, a "Welding and Burning Safe Practices and Procedures Plan." The plan shall be filed within 90 days after the effective date of this Order and shall include the qualification standards or requirements for personnel and the methods by which the lessee will assure that only personnel meeting such standards or requirements are utilized. A copy of this plan shall be available in the field area. Any person designated as a welding supervisor shall be thoroughly familiar with this plan.

Prior to welding or burning operations, the lessee shall establish approved safe-welding areas. These areas shall be constructed of noncombustible or fire-resistant materials, be free of combustible or flammable contents, and be suitably segregated from adjacent areas. National Fire Protection Association Bulletin "Cutting and Welding Processes," No. 51B, 1971, or subsequent revisions which the Chief, Conservation Division, has approved for use, shall be used as a guide to designate these areas. A drawing showing the location of these areas shall be posted in a prominent place on the facility. All offshore welding and burning shall be minimized by onshore fabrication when feasible.

All welding equipment shall be inspected prior to beginning any welding or burning.

Welding machines located on production or process platforms shall be equipped with spark arrestors and drip pans. Welding leads shall be completely insulated and in good condition; oxygen and acetylene bottles secured in a safe place; and hoses leak-free and equipped with proper fittings, gauges, and regulators.

All welding which cannot be done in the approved safe-welding area shall be performed in compliance with the procedures outlined below:

a. Prior to the commencement of any welding or burning operation on a structure, the lessee's designated person-in-charge at the installation shall personally inspect the qualifications of the welder or welders to assure that they are properly qualified in accordance with the lessee-approved qualification standards or requirements for welders. The designated person-in-charge and the welders shall personally inspect the work area for potential fire and explosion hazards. After it has been determined that it is safe to proceed with the welding or burning operation, the designated person-in-charge shall issue a written authorization for the work.

b. During all welding and burning operations, one or more persons shall be designated as a Fire Watch. Persons assigned as a Fire Watch shall have no other duties while actual welding or burning operations are in progress. The Fire Watch shall not be a member of the welding crew. If welding is to be done in an area which is not equipped with a gas detector, the Fire Watch shall also maintain a continuous surveillance with a portable gas detector during welding.

c. Prior to any welding or burning operation, the Fire Watch shall have in his possession firefighting equipment in a usable condition. At the end of the welding operation, the equipment shall be returned to a usable condition.

d. No welding shall be done on piping, containers, tanks, or other vessels which have contained a flammable substance unless the contents have been rendered and determined to be safe for welding or burning by the designated person-in-charge.

e. If drilling, workover, or wireline operations are in progress on the platform, welding operations in other than approved safe-welding areas shall not be conducted unless the well(s) where these operations are in progress contain noncombustible fluids and the entry of formation hydrocarbons into the wellbore is precluded. All other provisions of this section shall also be applicable.

f. If welding or burning operations are conducted on wells or in the well-bay area, all producing wells shall be shut in at the surface-safety valve.

5.5 *Safety Device Testing.* The safety-system devices which are required by this Order shall be tested by the lessee at the interval specified below or more frequently if operating conditions warrant.

Testing shall be in accordance with API RP 14C, appendix D, and the following:

a. All PSV's shall be tested for operation at least annually. These valves shall be either bench-tested or equipped to permit testing with an external pressure source.

b. All Pressure Sensors-High/Low (PSHL) shall be tested at least once each calendar month, but at no time shall more than 6 weeks elapse between tests.

c. All SSV's shall be tested for operation and for leakage at least once each calendar month, but at no time shall more than 6 weeks elapse between tests. The SSV's shall be tested for operation in accordance with the test procedure specified in API RP 14C, appendix D, section D4, table D2, subsection L, and tested for leakage in accordance with subsection M. If the valve does not operate properly or any fluid flow is observed in step 3 of the leakage test, the valve shall be repaired or replaced.

d. All flowline FSV's shall be checked for leakage at least once each calendar month, but at no time shall more than 6 weeks elapse between tests. The FSV's shall be tested for leakage in accordance with the test procedure specified in API RP 14C, appendix D, section D4, table D2, subsection D. If the leakage measured in step 6 exceeds a liquid flow of 400 cc/min or a gas flow of 7 dm^3/sec (15 cubic ft/min), the FSV's shall be repaired or replaced.

e. All LSH and LSL controls shall be tested at least once each calendar month, but at no time shall more than 6 weeks elapse between tests. These tests shall be conducted by raising and lowering the liquid level across the level-control detector.

f. All automatic inlet SDV's which are actuated by a sensor on a vessel or a compressor shall be tested for operation at least once each calendar month, but at no time shall more than 6 weeks elapse between tests.

g. All SDV's located in liquid-discharge lines and actuated by vessel low-level sensors shall be tested for operation once each calendar month, but at no time shall more than 6 weeks elapse between tests.

h. The TSH shutdown controls installed in all compressors which are protected against abnormal pressures solely by temperature safety devices shall be tested semiannually and repaired or replaced as necessary.

i. All pumps for firefighting water systems shall be inspected and test-operated weekly.

j. All fire (flame, heat, or smoke) and gas detection systems shall be tested for operation and recalibrated semiannually, if necessary.

k. The lessee shall notify the District Supervisor when the lessee is ready to conduct a preproduction test and inspection of the integrated safety system. The lessee shall also notify the District Supervisor upon commencement of production in order that a post-production test and inspection of the integrated system may be conducted.

l. All other safety devices shall be tested annually and repaired or replaced as necessary.

5.6 *Records.* The lessee shall maintain records for a minimum period of 5 years for each surface-safety device installed. These records shall be maintained in the nearest offshore field office for a minimum period of 2 years. The records may then be transferred to the onshore field office for the remaining 3 years of the 5-year retention period. These records shall be available for review by any authorized representative of the U.S. Geological Survey (USGS). The records shall show the present status and history of each device, including dates and details of installation, inspection, testing, repairing, adjustments, and reinstallation. The records shall also include all failure and inventory reports required by paragraph 6 of this Order.

5.6.1 *Surface-Safety Valve and Associated Actuator Records.* Records for surface-safety valves and associated actuators which require compliance with paragraph 2 shall contain additional information showing verification of:

a. The devices having been manufactured in accordance with the quality assurance requirements of ANSI/ASME–SPPE–1 (formerly ANSI/ASME–OCS–1) as required by paragraph 2.

b. The completion and return of the receiving report to the manufacturer as required by ANSI/ASME–SPPE–1.

c. The completion and submission of all failure reports required by paragraph 6 and all investigation reports required by paragraphs OE–2529 and OE–2670 of ANSI/ASME–SPPE–1.

5.7 *Safety Device Training.* Prior to the commencement of production, the lessee shall ensure that all personnel engaged in installing, inspecting, testing, and maintaining these safety devices will have been qualified under a program as recommended by "API Recommended Practice for Qualification Programs for Offshore Production Personnel Who Work With Anti-Pollution Safety Devices," API RP T–2, revised October 1975, or subsequent revisions which the Chief, Conservation Division, has approved for use.

Documented evidence of the qualifications of individuals performing these functions shall be maintained in the field area.

Manufacturers' representatives need not be qualified in accordance with API RP T–2 if they are working on equipment supplied by their company and if they are directly supervised by a qualified person who is capable of evaluating the impact of the work on the total system.

On-the-job trainees working with safety devices shall be directly supervised by a qualified person.

At the time that the lessee submits the Plan of Development and Production, required by 30 CFR 250.34–2, the lessee shall submit an application for approval to the Chief, Conservation Division, describing the training to be conducted and the methods the lessee will utilize. The application shall include:

a. A designation of the lessee's representative who is responsible for training and coordinating training matters with the USGS.

6. *Failure and Inventory Reporting System (FIRS).* The USGS has established a safety and pollution-prevention device Failure and Inventory Reporting System (FIRS) to enhance the reliability and safety of operations in the OCS. This system applies to offshore structures, including satellites and jackets, which produce or process

hydrocarbons and includes the attendant portions of hydrocarbon pipelines, when physically located on the structure.

When the devices specified herein are used as a part of the production-safety and pollution-prevention system, the lessee shall:

a. Submit an initial inventory and periodic updates in accordance with the procedures described in subparagraph 6.1.3.

b. Report all device failures which occur. The report content and format shall be in accordance with the procedures described in subparagraph 6.1.4.

Inventory and failure data required by this Order shall be submitted to the USGS Conservation Manager in the appropriate regional office.

6.1 *Data and Reporting Requirements.*

6.1.1 *Format.* Inventory and failure data shall be submitted in a format containing the same information that is in the Safety Device Inventory Report (Form 9–1994) and the Safety Device Failure Report Form (Form 9–1995) and as outlined in the respective User's Instruction Booklets. Copies of the forms and booklets may be obtained from the USGS Conservation Manager in the appropriate regional office.

The specific method of submitting the required data may be selected from the following:

a. USGS Forms 9–1994 and 9–1995, using a standard coding convention (e.g., all letters capitalized, Z, I, letter O, number 0).

b. ADP card decks of standard 80-column cards.

c. Magnetic tapes which are 9-track, 800 BPI, unlabeled, blocking cannot exceed 1040 characters, odd parity, single gap (i.e., compatible with IBM equipment EBCDIC).

6.1.2 *Device Coverage.* Inventory and failure reports are to be submitted on the safety- and pollution-prevention devices on offshore structures, including satellites and jackets, which produce or process hydrocarbons, and hydrocarbon pipelines thereon. These reports shall be submitted on the following:

a. Blowdown Valve		(BDV)
b. Burner Flame Detector		(BSL)
c. Check Valve		(FSV)
d. Combustible Gas Detector		(ASH)
e. Emergency Shutdown Valve		(ESD)
f. Level Sensor	High	(LSH)
	Low	(LSL)
	Hi/Lo	(LSHL)
g. Pressure Sensor	High	(PSH)
	Low	(PSL)
	Hi/Lo	(PSHL)
h. Relief Valve		(PSV)
i. Shutdown Valve		(SDV)
j. Surface-Safety Valve		(SSSV)
k. Surface-Safety Valve		(SSV)
l. Temperature Sensor	High	(TSH)
	Low	(TSL)
	Hi/Lo	(TSHL)
m. Valve Actuator on, the shutdown valve, the blowdown valve, the surface-safety valves		(VA)

6.1.3 *Device Inventory Reporting.*

6.1.3.1 *Initial Inventory.*

a. For platforms in existence at the time this Order becomes effective, a complete inventory of the safety and pollution-prevention devices shall be submitted no later than 6 months after the effective date of this Order.

b. For platforms completed after this Order becomes effective, a complete inventory of the safety and pollution-prevention devices shall be submitted no later than 1 month after the initial platform production date.

6.1.3.2 *Inventory Updates.* An updating of or addition/deletion to the latest inventory shall be submitted on a monthly basis so as to maintain a current and accurate data base. The inventory will be updated by using the contents of the Safety Device Inventory Report (Form 9–1994) and the Safety Device Failure Report (Form 9–1995).

Inventory updating due to the addition, deletion, or changeout of a device is accomplished by the lessee's reporting of all the data required on the Safety Device Inventory Report (9–1994).

Whenever a device fails and is either replaced with a new device or "fixed" and put back into service, the inventory shall be updated to reflect this change. Inventory updating, due to the failure of a device, will be performed by the USGS, using the contents of the Safety Device Failure Report (Form 9–1995). Inventory updating information shall be received no later than 30 days following the month in which the device change was made.

6.1.3.3 *Inventory-Reporting Methods.* Inventory data shall be reported either on the Safety Device Inventory Reporting forms (Form 9–1994), punched cards, or magnetic tapes.

The reports shall contain all of the required information in the standard format as described in subparagraph 6.1.1.

6.1.3.4 *Inventory Verification.* The device inventory shall be verified by the lessee to ensure that the inventory data base is maintained on a current basis and that changes are being incorporated as they occur. The verification shall be accomplished no more frequently than once each 6-month period. When verification is required, the USGS will provide the lessee with a copy of the information on record, in the lessee's selected reporting format. The lessee shall review the information and either submit a letter stating that the information is correct, or make the appropriate corrections to the information provided by the USGS. The letter or appropriate corrections shall be received no later than 30 days following the month in which the inventory information which is to be verified was forwarded to the lessee.

6.1.3.5 *Inventory-Reporting Deviation.* A lessee may submit an inventory, update, or verification report differing from that described in subparagraph 6.1.3 when authorized by the USGS.

6.1.4 *Device Failure Reporting.*

6.1.4.1 *Failure-Data Submittal.* Device failure data shall be recorded as soon as possible after detecting the failure as defined in subparagraph 6.1.4.2. This data shall be received no later than 30 days following the month in which the failure was detected. This data must contain all of the required information and be submitted in the standard format either on Safety Device Failure Report forms (Form 9–1995), punched cards, or magnetic tape, as previously described in subparagraph 6.1.1. Information on the failed device must match that previously submitted in inventory reporting. A formal failure analysis is not required by this Order, but each failed device shall undergo sufficient test/disassembly to establish the basic cause(s) of the failure.

6.1.4.2 *Failure-Data Verification.* After receipt of the complete failure data from the lessees, a printout shall be made of all failures by manufacturer, model, and reported cause. Each manufacturer listed shall be furnished a copy of the printout containing the reported failures of his devices only. If he disagrees with the reported failure causes, he is invited to investigate the questioned causes in coordination with the reporting lessee and provide a coordinated reply within 30 days after receipt of the printout. If no reply is received within that time period, the originally reported causes shall be considered to be correct, and the data shall be evaluated accordingly.

6.1.4.3. *Failure Definition.* The safety and pollution-prevention device Failure and Inventory Reporting System does not differentiate between a malfunction and a failure. For the purpose of this program, a failure is defined as the inability of a device to perform its designed function within specified limits. A device is considered to have failed if it does not operate (perform its function) as required within the specified tests' tolerances.

A failure report is not required for:

a. Adjustments made within specified tolerances.

b. Adjustments required due to changes in operating conditions.

7. *Crane Operations.* Cranes shall be operated and maintained to ensure the safety of facility operations in accordance with the provisions of "API Recommended Practice for Operation and Maintenance of Offshore Cranes," API RP 2D, October 1972, or subsequent revisions which the Chief, Conservation Division, has approved for use. Records of inspection, testing, maintenance, and crane operators qualified in accordance with the provisions of API RP 2D shall be kept in the field area for a period of 2 years.

"API Specification for Offshore Cranes," API Specification 2C, February 1972, or subsequent revisions which the Chief, Conservation Division, has approved for use, shall be used as a guideline for the selection of cranes.

8. *Employee Orientation and Motivation Programs for Personnel Working Offshore.* The lessee shall make a planned, continuing effort to eliminate accidents due to human error. This effort shall include the training of personnel in their functions. A program to achieve safe and pollution-free operations shall be established. This program shall include instructions in the provision of "API Recommended Practice Orientation Program for Personnel Going Offshore for the First Time," API RP T–1, January 1974, or subsequent revisions which the Chief, Conservation Division, has approved for use. "API Employee Motivation Programs for Safety and Prevention of Pollution in Offshore Operations," API Bulletin T–5, September 1974, or subsequent revisions which the Chief, Conservation Division, has approved for use, shall be used as a guide in developing employee safety and pollution-prevention motivation programs.

9. *Requirements for Drilling Rigs.*

9.1 *Fixed Structures.* The following requirements contained in this Order are applicable to drilling rigs on fixed structures:

a. Subparagraph 5.1.10, "Electrical Equipment."

b. Subparagraph 5.4, "Welding Practices and Procedures."

c. Paragraph 6, "Employee Orientation and Motivation Programs for Personnel Working Offshore."

9.2 *Mobile Drilling Units.* The following requirements contained in this Order are applicable to drilling rigs on mobile drilling units:

a. Subparagraph 5.4, "Welding Practices and Procedures."

b. Paragraph 6, "Employee Orientation and Motivation Programs for Personnel Working Offshore."

10. *Departures.* All departures from the requirements specified in this Order shall be subject to approval, pursuant to 30 CFR 250.12(b).

Rodney A. Smith,
Oil and Gas Supervisor, Arctic Area.

Approved:

Don E. Kash,
Chief, Conservation Division.

DEPARTMENT OF THE INTERIOR

Geological Survey, Conservation Division, Western Region

ALASKA AREA, ARCTIC

OCS Order No. 7, Effective

Pollution Prevention and Control

This Order is issued pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.43. The lessee shall comply with the following requirements.

1. *Pollution Prevention.* During the exploration, development, production, and transportation of oil and gas, the lessee shall prevent pollution of the ocean. Furthermore, by the disposal of waste materials into the ocean, the lessee shall not create conditions which will adversely affect the public health, life, property, aquatic life, wildlife, recreation, navigation, commercial fishing, or other uses of the ocean.

1.1 *Liquid Disposal.*

1.1.1 *Drilling-Mud Components.* The lessee shall submit, as a part of the Application for Permit to Drill (Form 9–331 C), a detailed list of drilling-mud components including the common chemical or chemical trade name of each component, a list of the drilling-mud additives anticipated for use in meeting special drilling requirements, and the proposed method of drilling-mud disposal. The disposal of drilling mud is subject to the Environmental Protection Agency's permitting procedures, pursuant to the Federal Water Pollution Control Act, as amended. Approval of the method of drilling-mud disposal into the ocean shall be obtained from the District Supervisor; each request will be decided on a case-by-case basis.

1.1.2 *Hydrocarbon-Handling Equipment.* All hydrocarbon-handling equipment for testing and production such as separators, tanks, and treaters shall be designed and operated to prevent pollution. Maintenance or repairs which are necessary to prevent pollution of the ocean shall be undertaken immediately.

1.1.3 *Curbs, Gutters, and Drains for Fixed Platforms or Structures and Mobile Drilling Units.*

a. *Fixed Platforms, Structures, and Artificial Islands.* Curbs, gutters, and drains shall be installed in all deck areas to collect all contaminants in a closed sump. When open decks are used, drip pans or the equivalent shall be placed under equipment and piped to a closed sump. Closed sumps shall automatically maintain fluid at a level sufficient to prevent the discharge of oil into the ocean. Contaminants that are removed from sumps shall be disposed of in a manner which will not create pollution.

All walking and working surfaces shall be equipped with proper drainage to provide safety for personnel and to prevent pollution.

On artificial islands, all vessels containing hydrocarbons shall be placed inside an impervious berm. The volume enclosed by the berm must be in excess of the volume of the vessels containing hydrocarbons. In addition, the rig mat must be made impervious, and all drainage ditches must be directed away from the drilling rig to an impervious sump.

b. *Mobile Drilling Units.* Curbs, gutters, and drains which collect contaminants associated with the drilling operation on a mobile drilling unit shall be installed as required by subparagraph 1.1.3a.

Curbs, gutters, and drains which collect contaminants not associated with the drilling operations are subject to regulation by the U.S. Coast Guard.

1.1.4 *Dischargers from Fixed Platforms or Structures and Mobile Drilling Units.* Discharges from fixed platforms or structures and mobile drilling units, including sanitary waste, produced water, drilling mud, and deck drainage, are subject to the Environmental Protection Agency's permitting procedures, pursuant to the Federal Water Pollution Control Act, as amended.

1.2 *Solid Material Disposal.*

1.2.1 *Well Solids.* The disposal of drill cuttings, sand, and other well solids containing oil is subject to the Environmental Protection Agency's permitting procedures, pursuant to the Federal Water Pollution Control Act, as amended. Approval of the method of disposal of drill cuttings, sand, and other well solids shall be obtained from the District Supervisor.

1.2.1 *Containers.* Containers and other similar solid-waste materials shall not be disposed of into the ocean.

1.2.3 *Equipment.* Disposal of equipment into the ocean is prohibited except under emergency conditions. The location and description of any equipment disposed of into the ocean shall be reported to the District Supervisor and to the U.S. Coast Guard in accordance with paragraph 4 of OCS Order No. 1.

2. *Personnel, Inspections, and Reports.*

2.1 *Personnel.* The lessee's personnel shall be instructed in the techniques of equipment maintenance and operation for the prevention of pollution. Contractor personnel providing services offshore shall be informed in writing, prior to executing contracts, of the lessee's obligations to prevent pollution and of the provisions of this Order.

2.2 *Pollution Inspections.*

2.2.1 *Manned Facilities.* Manned drilling and production facilities shall be inspected daily to determine if pollution is occurring. Maintenance or repairs which are necessary to prevent pollution of the ocean waters shall be undertaken and performed immediately.

2.2.2 *Unattended Facilities.* Unattended facilities, including those equipped with remote control and monitoring systems, shall be inspected daily or at intervals prescribed by the District Supervisor to determine if pollution is occurring. Necessary maintanance or repairs shall be made immediately.

2.3 *Pollution Reports.* All spills of oil and liquid pollutants shall be reported orally to the District Supervisor and shall be confirmed in writing. All reports shall include the cause, location, volume of spill, and action taken. Reports of spills of more than 5.0 cubic meters (31.5 barrels) shall include information on the sea state, meteorological conditions, size, and appearance of slick. All spills of oil and liquid pollutants shall also be reported in accordance with the procedure contained in 33 CFR 153.203.

2.3.1 *Spills.* Spills shall be reported orally within the following time limits:

a. Within 12 hours, if spills are 1.0 cubic meters (6.3 barrels) or less.

b. Without delay, if spills are more than 1.0 cubic meters (6.3 barrels).

2.3.2 *Observed Malfunctions.* Lessees shall notify each other of observed pollution resulting from another's operation.

3. *Pollution-Control Equipment and Materials and Oil Spill Contingency Plans.* The lessee shall submit a description of procedures, personnel, and equipment that will be used in reporting, cleanup, and prevention of the spread of any pollution resulting from an oil spill which might occur during exploration or development activities. The following subparagraphs describe the minimum requirements for pollution-control equipment and procedures.

3.1 *Equipment and Materials.* Pollution-control equipment and materials shall be maintained by, or shall be available to, each lessee at an offshore location or at a location approved by the Supervisor. The equipment shall include containment booms, skimming apparatus, cleanup materials, and chemical agents which shall be available prior to the commencement of operations. The equipment and materials shall be inspected monthly and maintained in a state of readiness for use. The results of the inspections shall be recorded and maintained at the site.

3.2 *Oil Spill Contingency Plans.* The lessee shall submit an Oil Spill Contingency Plan for approval by the Supervisor, prior to the approval of an Exploration Plan or a Development and Production Plan. Oil Spill Contingency Plans shall be reviewed annually. All modifications of the Oil Spill Contingency Plan and the results from the review of the plan shall be submitted to the

Supervisor for approval. The Oil Spill Contingency Plan shall contain the following:

a. Provisions to assure that full resource capability is known and can be committed during an oil spill, including the identification and inventory of applicable equipment, materials, and supplies which are available locally and regionally, both committed and uncommitted, and the time required for deployment of the equipment.

b. Provisions for varying degrees of response effort depending on the severity of the oil spill.

c. Provisions of identifying and protecting areas of special biological sensitivity.

d. Establishment of procedures for the purpose of early detection and timely notification of an oil spill including a current list of names, telephone numbers, and addresses of the responsible person and alternates on call to receive notification of an oil spill; and the names, telephone numbers, and addresses of regulatory organizations and agencies to be notified when an oil spill is discovered.

e. Provisions for well-defined and specific actions to be taken after discovery and notification of an oil spill, including:

(1) Specification of an oil-spill-response operating team consisting of trained, prepared, and available operating personnel.

(2) Predesignation of an oil-spill-response coordinator who is charged with the responsibility and is delegated commensurate authority for directing and coordinating response operations.

(3) A preplanned location for an oil-spill-response operations center and a reliable communication system for directing the coordinated overall response operations.

(4) Provisions for disposal of recovered spill materials.

4. *Drills and Training.*

4.1 *Drills.* Drills for familiarization with pollution-control equipment and operational procedures shall be held by the lessee. The personnel identified as the oil-spill-response operating team in the Contingency Plan shall participate in these drills. The drills shall be realistic and shall include deployment of equipment. A time schedule with a list of equipment to be deployed shall be submitted to the Supervisor for approval. The drill schedule shall provide sufficient advance notice to allow U.S. Geological Survey (USGS) personnel to witness any of the drills. Drills shall be recorded, and the records shall be made available to USGS personnel. Where drill performance and results are deemed inadequate, the Supervisor may require an increase in the frequency or a change in the location of the drills until satisfactory results are achieved.

4.2 *Training.* The lessee shall ensure that training classes for familiarization with pollution-control equipment and operational procedures are provided of the oil-spill-response operating team. The supervisory personnel responsible for directing the oil-spill-response operations shall receive oil-spill-response instruction *suitable for all seasons.* The lessee shall retain course-completion certificates or attendance records issued by the organization where the instruction is provided. These records shall be available to any authorized representative of the USGS, upon request.

5. *Spill Control and Removal.* Immediate corrective action shall be taken in all cases where pollution has occurred. Corrective action taken under the lessee's Oil Spill Contingency Plan shall be subject to modification when directed by the Supervisor. The primary jurisdiction to require corrective action to abate the source of pollution shall remain with the Supervisor, pursuant to the provisions of this Order and the Memorandum of Understanding (MOU) between the Department of Transportation (U.S. Coast Guard) and the Department of the Interior (U.S. Geological Survey) dated August 16, 1971. The use of chemical agents or other additives shall be permitted only after approval by the Supervisor in accordance with Annex X, National Oil and Hazardous Substances Pollution Contingency Plan and in accordance with the previously mentioned MOU.

6. *Departures.* All departures from the requirements specified in this Order shall be subject to approval, pursuant to 30 CFR 250.12(b).

Rodney A. Smith,
Oil and Gas Supervisor, Arctic Area.

Approval:
Don E. Kash,
Chief, Conservation Division.

DEPARTMENT OF THE INTERIOR

Geological Survey, Conservation Division, Western Region

ALASKA AREA, ARCTIC

OCS Order No. 12, Effective

Public Inspection of Records

This Order is issued pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.34, 250.97, 252.6, and 43 CFR Part 2. Requests for information made under the Freedom of Information Act, 5 U.S.C. § 552, will be governed by the provisions of 43 CFR Part 2 (40 FR 7304, February 19, 1975).

1. *Filing of Reports.* All reports on Forms 9-152, 9-330, 9-331, 9-331 C, 9-1869, 9-1870 and the forms used to report the results of multipoint back-pressure tests shall be filed by the lessee in accordance with the following:

a. All reports submitted on these forms shall include a copy with the words "Public Information" shown on the lower right-hand corner. This copy of the form shall be made available for public inspection.

b. All items on the form not marked "Public Information" shall be completed in full, and such forms and all attachments thereto shall not be available for public inspection.

c. The copy marked "Public Information" shall be completed in full except that the items described in subparagraphs 2.1 through 2.4 below and the attachments relating to such items may be excluded.

2. *Availability of Records.* It has been determined that certain records pertaining to leases and wells in the OCS and submitted under 30 CFR 250 shall be made available for public inspection, as specified below, in the Area office.

2.1 *Form 9-152—Monthly Report of Operations.* All information contained on this form shall be available except the information required in the "Remarks" column.

2.2 *Form 9-330—Well Completion or Recompletion Report and Log.*

2.2.1 *Prior to Commencement.* Prior to commencement of production, all information contained on this form shall be available except:

a. Item 1a, Type of Well.

b. Item 4, Location of Well, at top production interval and at total depth.

c. Item 22, If Multiple Completion, how many.

d. Item 24, Producing Interval.

e. Item 26, Type Electric and Other Logs Run.

f. Item 28, Casing Record.

g. Item 29, Liner Record.

h. Item 30, Tubing Record.

i. Item 31, Perforation Record.

j. Item 32, Acid, Shot, Fracture, Cement Squeeze, Etc.

k. Item 33, Production.

l. Item 37, Summary of Porous Zones.

m. Item 38, Geologic Markers.

2.2.2 *After Commencement of Production.* After commencement of production, all information shall be available except Item 37, Summary of Porous Zones, and Item 38, Geologic Markers.

2.2.3 *5 Years' Elapsed Time.* If production has not commenced after an elapsed time of 5 years from the date of filing Form 9-330 as required in 30 CFR 250.33(b), excluding the total time that operations and production are suspended by direction of the Secretary of the Interior or his duly authorized representative, and further excluding the total time that operations and production are stopped or prohibited by Court order, all information contained on this form shall be available except Item 37, Summary of Porous Zones, and Item 38, Geologic Markers. Within 90 days prior to the end of the 5-year period, exclusive of exceptions noted above, the lessee shall file a Form 9-330 containing all information requested on the form except Item 37, Summary of Porous Zones, and Item 38, Geologic Markers, to be made available for public inspection. Objections to the release of such information may be submitted with the completed Form 9-330.

2.3 *Form 9-331—Sunday Notices and Reports on Wells.*

2.3.1 *"Request for Approval to."* When used as a "Request for Approval to" conduct operations, all information contained on this form shall be available except Item 4, Location of Well, at top production interval and at total depth, and Item 17, Describe Proposed or Completed Operations.

2.3.2 *"Subsequent Report of."* When used as a "Subsequent Report of:" operations, and after commencement of production, all information contained in this form shall be available, except information contained in Item 17 pertaining to subsurface locations and measured and true vertical depths for all markers and zones not placed on production.

2.4 *Form 9-331 C—Application for Permit to Drill, Deepen, or Plug Back.* All information contained on this form and the

location plat attached thereto shall be available except Item 4, Location of Well at Proposed Production Zone, and Item 23, Proposed Casing and Cementing Program.

2.5 *Form 9–1669—Quarterly Oil-Well-Test Report.* All information contained on this form shall be available.

2.6 *Form 9–1670—Semi-Annual Gas-Well-Test Report.* All information contained on this form shall be available.

2.7 *Multi-point Back-Pressure-Test Report.* All information contained in this report shall be available.

2.8 *Sales of Lease Production.* Information contained on the monthly U.S. Geological Survey computer printout showing sales volumes, value, and royalty on production of oil, condensate, gas, and liquid products by lease shall be made available.

2.9 *Availability of Inspection Records.* All accident-investigation reports, pollution-incident reports, facilities-inspection data, and records of enforcement actions are also available for public inspection.

2.10 *Availability of Data and Information Submitted by Lessees.* It has been determined that much information submitted by lessees, as a result of OCS Orders and OCS Notices to Lessees and Operators, is nonproprietary in nature or that release of such information is necessary for the proper development of the lease. This information will be made available for public inspection, except for those portions which the lessee shall designate, with the Supervisor's approval, as trade secrets and commercial or financial information which is privileged or confidential. The available information will include:

a. Notices of support activity.

b. Oceanographic and meteorological data collected from drilling units and production facilities during the period of operations.

c. Results of site surveys required prior to drilling or placement of platforms or structures, such as shallow geologic hazards surveys, archeological/cultural resource surveys, or other surveys related to the placement of platforms or structures.

d. Drawings, maximum environmental design criteria, and rated capability data of mobile drilling units and structures.

e. Oil Spill Contingency Plans.

f. Critical Operations and Curtailment Plans.

g. Other data required under 30 CFR 250.34.

2.11 *Expired Leases.* All information is available upon the expiration of a lease.

3. *Information Exempt from Public Inspection.* The information in subparagraphs 2.1 through 2.4 which has been restricted from public inspection is classified as geological and geophysical data. The release of this data is subject to the following restrictions.

3.1 *Leases Issued Prior to June 11, 1976.* For leases issued prior to June 11, 1976, the classified data is exempt from disclosure under exemption No. (9) of the Freedom of Information Act (5 U.S.C. 552(b)(9) and 43 CFR 2.13 subsection (c), *"Statutory Exemptions,"* (9)).

3.2 *Leases Issued After June 11, 1976.* For leases issued after June 11, 1976, the classified data is available in accordance with 30 CFR 250.97, *Public Inspection of Records*, as follows:

a. *Geophysical Data.* Geophysical data shall not be available for public inspection, except as provided in 2.10c, without consent of the lessee as long as the lease remains in effect or for a period of 10 years after the date of submission, whichever is less, unless the Supervisor, with the approval of the Director, determines that earlier release of this information is necessary for proper development of the field or area.

b. *Geological Data.* Geological data shall not be made available for public inspection without the consent of the lessee as long as the lease remains in effect or for a period of 2 years after the date of submission, whichever is less, unless the Supervisor, with the approval of the Director, determines that earlier release of such information is necessary for the proper development of the field or area. In accordance with 30 CFR 250.38, *Well Records*, data and well records shall be transmitted to the Supervisor upon request or, if not requested, within 30 days following completion of suspension of any well.

For the purpose of orderly release of data, in all cases the date of submission will be considered to be 30 days following such completion or suspension.

4. *Departures.* All departures from the requirements specified in this Order shall be subject to approval, pursuant to 30 CFR 250.12(b).

Rodney A. Smith,
Oil and Gas Supervisor, Arctic Area.

Advisory Council on Historic Preservation

Handicapped Access to Historic Properties; Proposed Statement of Program Approach

ADVISORY COUNCIL ON HISTORIC PRESERVATION

Handicapped Access to Historic Properties; Proposed Statement of Program Approach

AGENCY: Advisory Council on Historic Preservation.

ACTION: Proposed Statement of Program Approach.

SUMMARY: The Advisory Council on Historic Preservation offers this proposed statement of program approach for public comment. This statement was developed to respond to the review of agency regulations concerning handicapped access required by the Department of Health, Education and Welfare as it relates to historic properties. Because of the special issues presented in rendering such properties accessible to the handicapped while still maintaining the architectural features that are the basis for their significance, the Council has drafted this statement in an effort to establish a workable approach to meeting both federal policies satisfactorily.

COMMENTS DUE: July 13, 1979.

ADDRESS: Comments should be addressed to the Executive Director, Advisory Council on Historic Preservation, 1522 K Street NW., Suite 510, Washington, D.C. 20005.

FOR FURTHER INFORMATION CONTACT: Peter Smith, Acting Director, Office of Intergovernmental Programs & Planning, 202–254–3495; Katherine Raub Ridley, Legal Assistant, Office of Intergovernmental Programs & Planning, 202–254–3495.

PREAMBLE: The Advisory Council on Historic Preservation is interested in the special problems presented in making historic properties accessible to handicapped persons. Under Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 706), Federal agencies are required to publish regulations to ensure that federally assisted programs are accessible to the handicapped. Because historic properties will be affected through activities undertaken pursuant to such agency regulations, the Council believes there is a need to coordinate the Federal policies of access and historic preservation. Procedures that incorporate the program approach set forth below would ensure that activities undertaken to make historic properties accessible would not alter or destroy a historic property's significant features and would also serve as a basis for expediting agency responsibilities under Section 106 of the National Historic Preservation Act.

The Council is an independent Federal agency established by the National Historic Preservation Act of 1966 (16 U.S.C. 470) to advise the President and the Congress on matters relating to historic preservation, and to review and comment on Federal, federally licensed and federally assisted undertakings that affect properties listed or eligible for the National Register of Historic Places. Under Section 202 of the Act, the Council is vested with general coordination and advisory responsibilities on historic preservation matters, including the conduct of studies, recommendations for legislation and the provision of training and educational programs. Under Section 106 of the Act, the Council must be afforded an opportunity for comment when Federal, federally licensed or assisted undertakings affect National Register or eligible properties. The process for obtaining the Council's comments is set forth in the recently amended regulations for "Protection of Historic and Cultural Properties" (36 CFR Part 800). In certain circumstances, building alterations or structural changes to National Register properties undertaken in order to accomplish accessibility may be subject to the provisions of Section 106 and therefore require the comments of the Council. In such instances, the comments must be requested by the undertaking Federal agency.

Because the significance of historic properties is often the result of architectural features and associational values, building alterations or structural changes may impair the qualities that qualify the property as significant. For example, various Federal programs provide funding for buildings in historic districts, which may consist of 18th century rowhouses, the front door of which is reachable only by a steep staircase and whose doorframe is too narrow for wheelchair entry.

Such features are often both the reason for the building's architectural significance and the consequent award of Federal funds for restoration, as well as the source of difficulty in providing access.

In rare cases, it is conceivable that a historic property could not be modified in a way which would allow both access and retention of signficant features. This possibility has been the subject of considerable discussion. Opinion is divided as to whether, in such isolated cases, a waiver of access to a significant property would be appropriate.

This statement of approach is offered for public comment. It is expected that a final statement could serve as a basis for dealing with historically and culturally significant buildings in agency procedures implementing Section 504.

It is anticipated that technical guidelines on this subject will be published by the Technical Preservation Services Division, Office of Archeology and Historic Preservation, Heritage Conservation and Recreation Service, Department of the Interior. The guidelines will suggest appropriate treatments for specific problems commonly encountered in providing access to various types of historic buildings and structures through case studies.

Public comments are specifically requested on the following points.

(1) Among the alternatives to building alerations or structural changes, are any more or less preferable than others? If so, what is the general priority? For example, is use of an interpretive program about a second or third floor of a house museum preferable to provision for carrying?

(2) Are there particularly satisfactory solutions that have been found through experience with achieving access to historic structures?

(3) In the case of a private residence that has been awarded Federal funds for interior restoration work and may consequently be required to provide minimal public access, what is the most feasible form of access?

(4) Should a waiver of access be considered in certain circumstances where a historic property can not be rendered accessible without also impairing the qualities responsible for its significance? What criteria should be used to govern the decision? Proposed language is set forth in paragraph (4) below.

Statement: In the case of historic properties, program accessibility shall mean that when programs are viewed in their entirety, they are accessible to and useable by handicapped persons. A recipient of Federal assistance is not required to make building alterations or structural changes to historic properties where other methods are effective in achieving accessibility. The recipient shall make every effort to accomplish accessibility under Section (1). Only if there is no prudent and feasible alternative, shall a recipient consider building alterations (Section 2). A recipient shall exhaust Section 2 alternatives before proceeding to consider structural changes (Section 3). "Historic Properties" shall mean those properties listed or eligible for listing in

the National Register of Historic Places or architecturally, historically, or culturally significant properties designated under a statute of the appropriate State or local governmental body, including a single structure within a designated district.

(1) *Methods to Accomplish Program Accessibility without Building Alterations or Structural Changes.* The recipient shall investigate and utilize compliance methods which do not alter the historic character or architectural integrity of the property. Such methods may include, but are not limited to:

Reassigning programs to accessible locations within the facility.

Assigning persons to aid handicapped persons into or through an otherwise inaccessible facility.

Delivering programs or activities at alternative accessible sites operated by or available for such use by the recipient.

Adopting other innovative methods which comply with the intent of this section.

(2) *Methods to Accomplish Program Accessibility Resulting in Building Alterations.* Building alteration means those changes to the existing conditions and equipment of a building which do not involve any structural changes, but which typically improve and upgrade a building, such as alterations to stairways, doors, toilets, elevators, and site improvements.

The recipient must determine that program accessibility as outlined in section (1) above cannot be accomplished before considering building alterations. Building alterations shall be undertaken so as not to alter or destroy historically, architecturally, or culturally significant elements or features and shall comply with the "Secretary of the Interior's Standards for Rehabilitation" (36 CFR 67.7).

(3) *Methods to Accomplish Program Accessibility Resulting in Structural Changes.* Structural change means those changes which alter the structure of a historic building, including but not limited to its bearing walls and all types of post and beam systems in wood, steel, iron, or concrete.

The recipient must determine that program accessiblity as outlined in sections (1) and (2) above cannot be accomplished before considering structural changes. Structural changes shall be undertaken so as not to alter or destroy historically, architecturally, or culturally significant elements or features and shall comply with the Secretary of the Interior's Standards for Rehabilitation (36 CFR 67.7).

(4) *Modification or Waiver of Accessibility Standards.* The applicability of agency accessibility standards may be modified or waived on a case-by-case basis, where the recipient can demonstrate that, because of the nature of the activity, the provision of access would be infeasible or would substantially impair the historic, architectural, or cultural significance of the historic property.

Robert R. Garvey, Jr.,
Executive Director.

Department of the Interior

Fish and Wildlife Service

Migratory Bird Hunting; Supplemental Proposed Rulemaking

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[50 CFR Part 20]

Migratory Bird Hunting; Supplemental Proposed Rulemaking

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Supplemental proposed rulemaking.

SUMMARY: This document supplements FR Doc. 79–4803, published on February 15, 1979, which notified the public that the U.S. Fish and Wildlife Service proposes to establish hunting season regulations for certain migratory game birds during 1979–80, and provided information on certain proposed regulations. Further information and clarification is provided relative to some regulatory items for which information was not available when the initial document was published. These relate to framework dates for waterfowl seasons; wood ducks; canvasbacks and redheads; zoning in Massachusetts, Pennsylvania, and Tennessee; certain goose seasons; the sandhill crane season in Colorado and areas in Wyoming; and several other issues.

DATES: All relevant comments received no later than June 21, 1979, for regulations proposed for Alaska, Puerto Rico, and the Virgin Islands will be considered. The comment period for early season proposed regulations will end on July 13, 1979, and that for late season proposals on August 20, 1979.

ADDRESS: Comments to: Director (FWS/MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: John P. Rogers, Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240, 202–254–3207.

SUPPLEMENTARY INFORMATION: On February 15, 1979, the Fish and Wildlife Service published for comment in the **Federal Register** (44 FR 9928) a proposal to amend 50 CFR Part 20. That document dealt with the establishment of seasons, limits and shooting hours for migratory game birds under §§ 20.101 through 20.107 of Subpart K of 50 CFR Part 20. In that document, the Service indicated that additional proposals and considerations developed after publication of 44 FR 9928 would be available for public review. Consequently, this supplemental proposed rulemaking is the second in a series of proposed and final rulemaking documents for migratory bird hunting regulations effective during 1979–80. It deals specifically with a number of supplemental proposals and minor clarifications arising from comments received on the initial proposals, or from new information. These relate to framework dates for waterfowl seasons; wood ducks; canvasbacks and redheads; zoning in Massachusetts, Pennsylvania, and Tennessee; certain goose seasons; the sandhill crane season in Colorado and areas in Wyoming; and several other regulatory matters.

Review of Public Comments and the Service's Response

Forty-six letters dated on or prior to May 16, 1979, the closing date of the public comment period for the February 15, 1979, proposals, were received by the Service. These included letters from 20 State or Commonwealth conservation agencies, 16 from individuals, 7 from organizations, and 3 from waterfowl flyway councils. In some instances, the letters did not specifically mention the open comment period or regulatory proposals. However, because they were received during the comment period and generally related to migratory bird hunting regulations, they were treated as comments. Many communications addressed two or more topics, and in some cases, subjects outside the scope of regulations under consideration. An example of the latter are hunting season dates which are actually selected by State conservation agencies within the Federal framwork. Of the letters, 8 (5 from State conservation agencies and 3 from individuals) concurred with the proposals and offered no other suggestions. The remaining communications recommended modifications to the proposals, or new considerations.

General.

Comments on the procedures followed by the Service in developing the annual hunting regulations were received from Defenders of Wildlife (Defenders) and the Institute for Public Representation (Institute) of the Georgetown University Law Center, Washington, D.C., which identified itself as representing Defenders. Similar views were expressed by Defenders in a letter dated January 17, 1979, prior to the opening of the first comment period on regulations being proposed for the 1979–80 migratory bird hunting season. In essence, Defenders and the Institute asserted that consultations and communications between the Service and the four flyway councils during preparation of the hunting regulations are contrary to the Federal Advisory Committee Act, 5 U.S.C. App. 1, and to several court decisions dealing with *ex parte* communications in informal rulemaking. The two organizations recommended several changes in the Service's procedures for issuing the hunting regulations, including abandonment of Service/Flyway Council consultation activities.

Response. In reply to these claims by Defenders, Mr. James D. Webb, the Department's Associate Solicitor for Conservation and Wildlife, stated in a letter dated May 7, 1979:

"After a careful review and study of the points raised in your letter, I have concluded that the Flyway Councils are not functioning as "advisory committees" within the meaning of the Federal Advisory Committee Act. The Councils were not established as advisory committees by statute, reorganization plan, or the Service, nor are they being utilized in that capacity by the Service.

I have also concluded that the Service's contacts with the councils are in compliance with the requirements applicable to *ex parte* communications during informal rulemaking. In this regard, it is my understanding that communications between the Service and the Councils that relate to the substance or merits of the hunting regulations will be placed promptly in the public file for the regulations. In the case of written communications, the documents themselves will be placed in the public file. In the case of oral communications, written summaries which identify the source will be placed in the file."

In its comments, Defenders reiterated its concerns about a number of specific migratory bird subjects including waterfowl shooting hours, the hunting of mourning doves in September, and the status of certain species including the Tule white-fronted goose, canvasback, mallard, black duck, ring-necked duck, scaup, mergansers, sea ducks, goldeneye, and bufflehead. Defenders again recommended that shooting hours commence one-half hour after sunrise and end one-half hour before sunset so that hunters would have adequate light by which to identify birds in flight. An experiment for testing hunter ability to identify waterfowl was suggested.

Response. As noted previously (see 44 FR 9928, February 15, 1979) the matter of shooting hours was extensively reviewed and discussed during the regulatory process for the 1977–78 hunting season, including preparation of an environmental assessment made available to the public in August 1977. Copies of the assessment are still available upon request to the Office of Migratory Bird Management, U.S. Fish

and Wildlife Service, Department of the Interior, Washington, D.C. 20240. The Director, U.S. Fish and Wildlife Service, concluded on the basis of this assessment that the proposed shooting hours did not constitute a significant impact on the environment. Additional studies were initiated during the 1978–79 hunting season to evaluate the impact of shooting hours, running from one-half hour before sunrise to sunset, on protected species. These studies will be continued during the 1979–80 waterfowl hunting season. Also, cooperative State-Service studies were initiated last year to further evaluate the effects of hunting upon September dove nesting. These studies will continue for at least one more year. An environmental assessment on September dove hunting was prepared by the Service and made available to the public on July 18, 1977. Copies of the assessment are still available upon request to the Office of Migratory Bird management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

Defenders' concerns about the status of specific waterfowl were summarized and discussed last year in the Federal Register (see 43 FR 22822; May 25, 1978). Most of the species they mention (see above) were addressed at that time. Others were addressed in the proposals published on February 15, 1979 (44 FR 9928), at which time it was noted that further studies or data gathering efforts were presently underway. Thus, consideration has been or is being given to all the species mentioned.

Substantive supplemental proposals and recommendations from the flyway councils, State conservation agencies, and other organizations, and individuals are addressed below under the specific numbered regulations categories listed in 44 FR 9928, February 15, 1979. Only those numbered items for which changes are proposed, or on which substantive comment was received, are listed.

Supplemental Proposals

The following proposals and other modifications are numbered to correspond with the numbered items published in the Federal Register of February 15, 1979.

1. *Shooting hours.* As noted previously, Defenders opposed retention of shooting hours for waterfowl extending from one-half hour before sunrise to sunset. The Mississippi Flyway Council and several States urged retention of these shooting hours. One hunter requested that consideration be given to establishing "standardized" shooting hours which would not change each day in reference to times of sunrise and sunset.

Response. As noted above, the issue of shooting hours has been discussed at length in an environmental assessment and in previous Federal Register publications. In summary, the Service has found no evidence that those portions of the shooting hours, to which objection is made, have a significant adverse effect on protected species. See the Federal Register dated March 10, 1977 (42 FR 13313) and July 22, 1977 (42 FR 37552) for further details. It is the view of the Service that no general modification of shooting hours is necessary or desirable at this time. The Service observes that time of day is not the only factor affecting ability of hunters to identify ducks in flight. Effective utilization of the point system to take advantage of low point birds requires that hunters defer shooting until they have identified the birds to be shot at. This requires judgment on the part of each individual hunter as to the exercise of his skills under different hunting circumstances. The Service notes that a number of States have established "standardized" shooting hours to which there is no objection as long as the actual shooting times are within the one-half hour before sunrise to sunset period. The Service does not consider it necessary or desirable to prescribe such arrangements by Federal regulation.

2. *Framework dates for ducks and geese in the continental United States.* The Upper Region of the Mississippi Flyway Council proposed that season framework dates for its member States begin with the Saturday closest to October 1 instead of October 1 (see Iowa, below), and end on the Saturday closest to January 20 instead of January 20. Also supporting the opening of the framework on the Saturday closest to October 1 was a petition submitted on behalf of 90 Minnesota waterfowl hunters, and a communication from the Minnesota Waterfowl Association, Inc.

Response. The Service notes that these framework dates are similar to those in the Central and Pacific Flyways. The Service proposes to consider this change based on further information and consultation with affected States and others.

Iowa proposed and the Upper Region of the Mississippi Flyway Council endorsed that it be permitted to hunt ducks for several days during the period September 20 through September 30; the days taken during this period to be subtracted from the total days allocated for the regular waterfowl hunting season which customarily begins no earlier than October 1. All ducks which may legally be taken during the regular season could be taken during the September period but the primary objective is to provide opportunity to harvest blue-winged teal which migrate early and are generally not available in Iowa during the regular season dates. The proposal was initiated by Iowa in 1978 as an alternative to the special September teal season available to some States but not to Iowa or other designated waterfowl production States. It was deferred pending further consideration by the Council and the Service. If approved, it would be subject to a three-year evaluation.

Response. The Service is of the view that this proposal should be considered for implementation on a trial basis in Iowa, on the grounds that it appears to have merit as a potentially desirable alternative to the special September teal season. The Service will consult further with Iowa regarding more specific details and will consider other comments and views on the matter.

The Lower Region of the Mississippi Flyway Council generally endorsed season framework dates of October 1 through January 20 for its member States but recommended that the framework date for Mississippi be extended to January 31, 1980, on an experimental basis. The recommendation is based on a belief that the migration of mallards and wood ducks into that State has been delayed in recent years because of agricultural and management practices in the northern United States. The Council recommended that the relaxation in Mississippi, if allowed, be monitored by a plan mutually agreeable to the Service and Mississippi. Alabama also wrote that it favored a duck hunting season framework which would run to the end of January. However, the Council recommendation is limited to the State of Mississippi.

Response. This recommendation will be given further consideration by the Service based on additional information and consultation with the State and the Flyway Council and comments from other interested parties.

Several other comments related to framework dates. Several hunters urged that seasons opening in September be permitted. One hunter asked that the waterfowl season be left unchanged.

A northern Michigan hunter requested that earlier goose seasons be allowed as the bulk of the migration has passed by the time the season opens. Maine urged that the Wednesday noon opening be reinstated on the ground that it would reduce opening day hunting pressure for the benefit of the resource and the public. No Atlantic Flyway Council

recommendation on the subject was received.

Response. The Service will further consider these recommendations based on additional information, and consultation, and in the light of comments from interested parties.

One individual in the Pacific Flyway expressed opposition to waterfowl seasons which in some years extend to January 23 on the ground that such seasons may have an adverse effect on duck breeding behavior.

Response. The Service has no information to indicate that such seasons are adverse to breeding duck biology. Further, duck populations in the Pacific Flyway have remained at generally satisfactory levels for many years, varying mainly as a result of changes in habitat quality and quantity.

4. *Wood ducks.* The Lower Region of the Mississippi Flyway Council has proposed that Kentucky, Mississippi, and Tennessee hunters be permitted to take two wood ducks during the special September teal season in addition to the four teal normally allowed. The main purpose of the request is to allow additional harvests of southern wood ducks, which appear to be subjected to low hunting pressure, prior to the influx of wood ducks breeding in northern areas. In support of the request, Kentucky has stated that the wood duck population in its State is very satisfactory, the species comprises less than 5 percent of the statewide duck harvest, and that additional opportunity for legal harvest of wood ducks is desirable.

Response. A similar proposal was presented along with justification by Tennessee in 1978. The Service is of the view that, pending more thorough and extensive review and consideration involving other States that participate in special September teal seasons, it is inadvisable at this time to expand such seasons to include species other than teal. An alternative approach to providing additional opportunity to harvest wood ducks produced in southern breeding areas is presently available. During the 1978–79 season, southern States in the Atlantic Flyway (Florida, North Caroline, South Carolina, and Virginia) and the Mississippi Flyway (Alabama, Arkansas, Georgia, Kentucky, Louisiana, Mississippi, and Tennessee) were allowed to designate, experimentally, up to 9 days of their regular duck season between October 1 and October 15, during which no special bag limit restrictions were placed on wood ducks. It is anticipated that this option will be continued in the 1979–80 hunting season.

11. *Canvasback and redhead ducks.* In the **Federal Register** dated February 15, 1979 (44 FR 9934), the Service announced receipt of a proposal from Virginia on behalf of the Atlantic Flyway Council. The proposal would provide for a subseason of 8 to 15 days on male canvasbacks and male redheads in portions of Virginia, Maryland, New York, and North Carolina where canvasbacks normally winter. In States selecting the point system, males of these species would be assigned 25 points; in States selecting conventional regulations, four male birds singly or in the aggregate of these species could be taken within the overall bag limit. A more recent communication from the Atlantic Flyway Council endorsed the proposal and provided additional details.

Response. The Service will further review the proposal and consider this on the basis of additional information and consultation and in the light of comments from interested parties.

The Central Flyway Council recommended that North Dakota and South Dakota be permitted the option of one canvasback or one redhead per day under conventional regulations or allocations of 100 points each for canvasbacks and redheads in the daily bag and possession limits statewide under the point system, except that specific areas of high canvasback use be closed to all duck hunting.

Response. The Service does not presently favor this proposal because: (1) No criteria are given for designating the areas of high canvasback and redhead use; (2) the prohibition of all duck hunting on these areas may represent an excessive and unnecessary restriction; and (3) the current year's survey data are not yet available for consideration. The Service favors continued use of the area closure concept should the results of the current year's surveys justify continued special protection of the two species.

Two other public comments were received on these species. Defenders of Wildlife expressed general concern about the status of canvasbacks. A sportsmen's club in Minnesota requested that consideration be given to abolishing the canvasback and redhead closure area in Sibley County, Minnesota, because few ducks of these species migrate through the area during the fall.

Response. The Service notes that hunting regulations for these species will be proposed later after all available information on breeding population size, habitat conditions, current production and harvest has been assembled and evaluated. Additional information is being solicited on the abundance and distribution of the two species in Sibley County.

12. *Zoning.* In the **Federal Register** dated February 15, 1979, the Service proposed to continue offering States in the Atlantic and Mississippi Flyways the option to divide their States into two zones for the purpose of establishing differential, full-length hunting seasons. The criteria for the experimental zoning studies were also described in detail.

Massachusetts proposes to initiate a zoning study which would meet the Service's criteria (also see "Other" item). The request is supported by a detailed plan, copies of which are available from the Massachusetts Division of Fisheries and Wildlife. Under the proposal, coastal and inland hunting zones would be established.

Pennsylvania asked that it be permitted to experimentally designate a Lake Erie Waterfowl Hunting Zone, defined as the Pennsylvania waters of Lake Erie and the adjoining land 150 yards inland from the Lake Erie shoreline. This request was also supported by a detailed plan, copies of which are available from the Pennsylvania Game Commission.

Tennessee, through the Lower Region of the Mississippi Flyway Council, asked that it be permitted to participate in experimental zoning of duck seasons in Lake and Obion Counties (or restricted areas in these counties) and the remainder of Tennessee. Ducks migrate into and depart from the Reelfoot Lake area earlier than elsewhere in Tennessee. Supporting data and information are given in a report available from the Tennessee Department of Wildlife and Fisheries.

Response. The Service has the zoning requests for Massachusetts, Pennsylvania, and Tennessee under consideration and will defer action for now pending additional information, consultation and comments from interested parties.

Two communications from the Chautauqua Lake Area Waterfowlers, New York, were critical of the duck seasons in effect during recent years because they did not coincide with peaks of waterfowl abundance.

Response. By agreement between the Service and the State, New York embarked upon a zoning study in the 1976 hunting season in which duck hunting seasons are set separately for three different zones in the upstate area of the State. The study is still underway and depending on its continuation, it appears that ample opportunity is available for the selection of season

dates desired by most hunters in each zone.

The Upper Region of the Mississippi Flyway Council recommended that Ohio be permitted to split its waterfowl seasons within each of its two zones for a new three-year experimental period commencing with the 1979–80 season. This change would enable seasons to be set to coincide with the availability of locally produced wood ducks and migrant waterfowl.

Similarly, the Upper Region of the Mississippi Flyway Council recommended that Illinois be permitted to establish its goose season in its South Zone and outside the Canada goose quota zone to run concurrently with the regular duck season. This change would simplify hunting regulations in most of the South Zone but not markedly alter the harvest of Canada geese, which occurs in the four southern counties comprising the quota zone. This modification would also be evaluated for a 3-year period.

Alabama reiterated is request that it be permitted to split the duck season in its South Zone, which is comprised of Baldwin and Mobile Counties. The Lower Region of the Mississippi Flyway Council offered no views on the proposal.

Response. The Service will consider these proposals for implementation in the 1979–80 hunting season based on further information, consultation, and comments from interested parties.

Two hundred ten persons signing a single petition requested the Service to change the boundary separating the North and South Zones of Missouri. They requested that the Lake of the Ozarks Region be transferred from the North to South Zones, stating that waterfowl do not migrate to the area until after the hunting season in the North Zone terminates.

Response. The Service notes that the three-year zoning study in Missouri will be going into its third year this season and that for evaluation purposes the zone boundaries should not be changed until the study period has ended and all available information examined.

13. *Goose and brant seasons.*—a. *Atlantic Flyway.* New Jersey has proposed that the snow goose season be continued at 70 days but that the daily bag limit be increased from 2 to 5. This is similar to a 1978 proposal by New Jersey and is based on a belief that the population is increasing and is beyond the capacity of wintering habitat to support it, resulting in damage to marshlands, crop depredations, starvation among the snow geese, and conflicts with other species. Delaware recommended that the season framework for snow geese be extended to January 31 and increased from 70 to 90 days so that the hunting season could be selected to better coincide with the period during which these geese damage agricultural crops and saltmarshes, and be contiguous with the 90-day hunting season for Canada geese in the Delmarva area. A representative of a New Jersey waterfowlers' association also favored raising the daily bag limit of snow geese to 5 birds as a means of generating additional hunting interest to control the population expansion.

Response. The Service is of the view that changes in seasons and bag limits for these geese should be considered in the light of information on production success which will not be available until later in the year. These geese nest in high Arctic areas where snow and ice conditions sometimes greatly limit annual production. Action on this request is deferred pending receipt of additional information on 1979 production.

New Jersey also proposed that Canada goose seasons and bag limits, extended to 90 days and 4 birds daily in southern New Jersey last year, be applied Statewide based on a belief that there are throughout the State increasing complaints about crop depredations.

Response. The same response provided above for the relaxation of snow goose regulations are also pertinent to this proposal for Canada geese. In addition, the Service believes that additional rationale and data should be provided to support New Jersey's recommendation for statewide application of more liberal Canada goose regulations.

b. *Mississippi Flyway.* For the Mississippi Valley Population (MVP) of Canada geese the Upper Region of the Mississippi Flyway Council has proposed harvest quotas in Illinois and Wisconsin in 1979 of 35,000 birds, a reduction from the 50,000 bird quota in effect last season.

Response. The Service customarily considers harvest recommendations from the Councils in the process of establishing hunting regulations for the MVP and certain other populations of Canada geese where the councils take the lead in acquiring information and monitoring the status of the populations involved. The Service has reviewed and concurs with the above proposal which is consistent with recommendations of the Council's MVP Committee, and with a flyway management plan recently developed for this population.

The Lower Region of the Mississippi Flyway Council has proposed that the harvest quota of 15,000 birds for MVP Canada geese in Kentucky be eliminated in accordance with a request from Kentucky because it has not been attained in past years. Kentucky would continue to monitor harvests in Ballard County where most of the goose hunting and harvest occurs.

Response. The Service will give further consideration to this proposal but is of the view that the harvest quota should be retained since it will not unduly restrict harvest in Kentucky.

c. *Central Flyway.* A South Dakota hunter has proposed that South Dakota be permitted to establish goose hunting zones in response to changes in goose distribution and migration apparently caused by reservoirs on the Missouri River, irrigation, and increased corn production.

Response. It appears that this proposal relates primarily to harvest management of the so-called Western Prairie Population of Canada geese. A management plan for this population was recently completed by the Service and the Canadian Wildlife Service and endorsed by the Central Flyway Council. The Service is of the view that the objectives outlined in the plan should provide the basis for any changes in management strategies, including zones, seasons, and harvests. At present the need for separate hunting zones is unclear.

d. *Pacific Flyway.* In the Federal Register dated February 15, 1979, the Service proposed goose seasons and limits generally similar to those in effect the previous year but stated that specific proposals would depend upon more current data and information. The Service also noted concern about the status of lesser snow geese which breed on Wrangel Island, U.S.S.R., and white-fronted geese. Also, it is possible that consideration of additional information for the endangered Aleutian Canada goose may require modifications in the protective measures recently in effect. The Service solicits further information on these various geese.

14. *Whistling swans.* Deleware has recommended that the Service prepare an environmental assessment to document the advisability of a hunting season on whistling swans in portions of the Atlantic Flyway.

Response. While the Service believes the hunting of whistling swans in portions of the Atlantic Flyway may be biologically justifiable, there is not, at this time, a consensus that hunting should be initiated and it does not appear to be a high priority management need.

15. *Sandhill cranes.* Colorado has requested that it be permitted to set its 37-day sandhill crane hunting season within the framework of the Saturday closest to October 1 and the Sunday closest to November 20. The slightly later season possible under this framework would better coincide with the presence of sandhill cranes in eastern Colorado. In recent years the Colorado harvest has averaged about 100 birds and it appears that this modification should result in little additional harvest. No whooping cranes have been observed in eastern Colorado in recent years, and the San Luis Valley where whooping cranes of the Grays Lake, Idaho, population stage during their fall migration, would remain closed to hunting.

Sandhill crane hunting in Wyoming is restricted to Goshen and Platte Counties in the eastern part of the State. Wyoming has requested that the eastern counties of Crook, Laramie, Niobrara, and Weston be added to this area, that the season be extended from 30 to 37 days, and that the framework be the same as that requested by Colorado. The Wyoming harvest of sandhill cranes has been only about 10 birds annually in recent years.

Response. The Service proposes to further consider these recommendations, taking into account any additional information and comments that may be developed.

20. *Woodcock.* Maine repeated its concern about the status of this species in the northeast, and suggested that consideration be given to shortening the hunting season framework in the Atlantic Region.

Response. The Service is aware of recent concern about the status of the woodcock population in the Atlantic Region. Investigations have recently been initiated aimed at better understanding their status and factors that may be affecting it. The Service is of the view that pending further progress with the investigation it would be desirable to avoid manipulations, including changes in hunting regulations, that might unnecessarily complicate interpretation of findings.

21. *Band-tailed pigeons.* California has requested that Alpine County be added to the 13 northern California counties which are offered an early hunting season for band-tailed pigeons. The area is frequently subjected to snowfall in late October which restricts harvest opportunities when late seasons are set.

Response. The Service is of the view that this change in California would be of little or no consequence in regard to the status of the Coastal band-tailed pigeon population. Consideration will be given to making this change pending additional information and comment.

22. *Mourning doves.* This February (44 FR 9936), the Service proposed to retain the same regulations which were in effect during the 1978–79 hunting season. Defenders of Wildlife repeated its concern about the hunting of mourning doves in September.

Response. As noted earlier, an environmental assessment has been prepared on dove hunting in September. Defenders' concerns have been addressed repeatedly in the Federal Register in the past, and the Service has embarked upon a cooperative nationwide study of mourning dove nesting in September and throughout the year. Information gathered in 14 States in 1978 indicates a mean daily survival rate of eggs and nestlings on hunted areas of 95.2 percent compared with 95.4 percent on non-hunted areas. This study is still underway. The Service is of the view that any changes in hunting regulations that might be considered should be based on the findings of the study.

25. *Migratory game birds in Puerto Rico and doves and pigeons in the Virgin Islands.* The Virgin Islands Department of Conservation and Cultural Affairs has requested that the proposed season framework for the Zenaida dove (*Zenaida aurita*) be changed to permit hunting prior to September 1.

Response. The Service notes that the provisions of the U.S.-Canada migratory bird treaty and the Migratory Bird Treaty Act prohibit hunting of designated migratory game birds, including the Zenaida dove, between March 10 and September 1 each year. A solicitor's opinion rendered in 1976 concluded that these treaty restrictions also applied to the Virgin Islands and Puerto Rico. These provisions appear to preclude consideration of the Department's request.

26. *Migratory game bird seasons for falconers.* In response to the Service's proposal to retain regulations in effect the past year, Maryland urged that consideration be given to allowing extended falconry seasons outside the framework dates applicable to other hunters using other means of taking. No other comments were received.

Response. The Service is of the view that it is desirable to maintain the previously established frameworks for several years in order to facilitate evaluation of falconry hunting seasons. It does not appear that this causes any significant hardship to falconers.

27. *Hawaii mourning doves.* The Hawaii Division of Fish and Game has requested that consideration be given to removing several migratory bird species found in Hawaii from the designated list of U.S. migratory game birds. The involved species, although legally defined as migratory, do not make true migratory movements in Hawaii. Justification for the request is that Hawaii would then have greater flexibility in setting hunting regulations for the mourning dove, the only migratory species in Hawaii for which hunting is allowed.

Response. The Service notes that the designated list of migratory game birds is based on species or groups of species identified and included in international migratory bird treaties with Canada, Mexico, Japan, and the U.S.S.R. The Service has no authority to make changes in the species covered.

Other. Massachusetts has requested that as an alternative to zoning, under which separate waterfowl hunting seasons may be set in different designated zones within States, it be permitted to divide a statewide waterfowl season into three segments, the request, if accepted, would be subject to a three-year evaluation. The State envisions that the three-way split season would result in no significant change in waterfowl harvest but would better satisfy hunters. Delaware supported the request that 3-way duck hunting season splits be permitted as an alternative to zoning.

Response. The Service proposes to consider this request for implementation on a trial basis on the ground that it appears to have merit as a potentially desirable alternative to zoning. A decision on this matter will be guided by additional information, consultation, and comment from interested parties.

Two individuals submitted comments on the point system as a means of establishing daily bag limits for waterfowl hunting. One individual recommended against the system and urged that it be abandoned because the order in which birds are taken influences the permissible number of birds allowed hunters. The second individual objected to apparent inequities between the number of canvasbacks and redheads which can be taken under point system and conventional regulations.

Response. The Service has recognized the problem for some time. There is no indication, however, that the point system has significantly increased the overall duck harvest. The Service believes that both conventional and point system options should be made

available to hunters in the three eastern flyways.

The Service notes further that it is not intended nor is it practical to make the point system exactly comparable to conventional regulations in terms of overall bag limits or bag limits for individual species. While the point system has some liberal aspects not possessed by conventional regulations, other aspects are more restrictive because of the way that birds already bagged count against the opportunity to bag others. From a practical standpoint, the inequities mentioned above are more apparent than real.

One individual recommended that the hunting season be closed on snow geese, without noting whether the lesser or greater snow goose was of particular concern.

Response. In either case, these species appear to be in excellent population status and the Service is of the view that there is no justification for closed seasons.

Public Hearings

The regulatory schedule published in the Federal Register dated February 15, 1979 (44 FR 9928), provided information on the two public hearings scheduled for reviewing the proposed 1979–80 hunting regulations and obtaining further public comments and recommendations. In order to further publicize these meetings, details on their date, location, and time are repeated.

Two public hearings pertaining to migratory bird hunting regulations being considered for the 1979–80 hunting seasons are scheduled. Both meetings will be conducted in accordance with 455 DM 1 of the Departmental Manual. On June 21 a public hearing for reviewing proposed hunting regulations for species for which early (opening prior to September 29) seasons are set will be held at 9 a.m. in the Auditorium of the Department of the Interior Building, on C Street, between 18th and 19th Streets NW., Washington, D.C. This hearing is scheduled primarily for the purpose of reviewing the status of mourning doves, woodcock, band-tailed pigeons, white-winged doves, rails, gallinules, and common snipe, and discussing proposed hunting regulations for these species plus regulations for sandhill cranes in some States; migratory game birds in Alaska, Puerto Rico, and the Virgin Islands; mourning doves in Hawaii; September teal seasons; and special sea duck seasons in the Atlantic Flyway. On August 2 a public hearing for reviewing the status of other waterfowl and consideration of proposed regulations for those waterfowl and other migratory game birds for which regulations were not previously formulated will be held at 9 a.m. in the Auditorium of the General Services Administration Building, F Street, between 18th and 19th Streets NW., Washington, D.C. These deliberations will pertain to hunting seasons commencing September 29 or later. The public is invited to participate in both hearings.

Persons wishing to participate in these hearings should write the Director (FWS/MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240, or telephone 202–254–3207. Those wishing to make statements should file copies of the statements with the Director before or during each hearing.

Public Comments Solicited

The Director intends that finally adopted rules be as responsive as possible to all concerned interests. He therefore desires to obtain the comments and suggestions of the public, other concerned government agencies, and private interests on these proposals.

Final promulgation of migratory bird hunting regulations for the continental United States, Puerto Rico, the Virgin Islands, and Hawaii for the 1979–80 season will take into consideration all comments received by the Director. Such comments, and any additional information received, including consideration of the Endangered Species Act of 1973, may lead the Director to adopt final regulations differing from these proposals. Interested persons are invited to participate in this rulemaking by submitting written comments on these supplemental proposals to the Director (FWS/MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240. Comments received will be available for public inspection during normal business hours at the Service's office in Room 526A, Matomic Building, 1717 H Street, NW., Washington, D.C.

The comment period for the Service's initial proposals for the 1979–80 hunting regulations was open for 90 days, and ended on May 16, 1979. The Service is of the view that the public should be given the greatest possible opportunity to comment upon proposed regulations; however, it is essential that certain deadlines be met if the annual regulations are to be finalized and cooperating agencies and the public be informed of them. State conservation agencies proclaim companion hunting regulations, within Federal frameworks, and often must conduct public hearings, provide notices of proposed regulations for public comment, and print and distribute their regulations. Satisfying these requirements necessitates shorter public comment periods for the Service's supplemental proposals, particularly those which must be finalized early because of seasons opening in September. Consequently, the Service finds that "good cause" exists, within the terms of 5 U.S.C. 553(d)(3) of the Administrative Procedure Act, for shorter comment periods. Accordingly, the Service prescribes the following public comment periods for these proposed supplemental regulations.

All relevant comments received no later than June 21, 1979, for regulations proposed for Alaska, Puerto Rico, and the Virgin Islands will be considered. The comment period for early season proposed regulations will end on July 13, 1979, and that for late season proposals on August 20, 1979. The Service will attempt to acknowledge received comments, but substantive response to individual comments may not be provided.

NEPA Consideration

The "Final Environmental Statement for the Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FES 75–54)" was filed with the Council on Environmental Quality on June 6, 1975, and notice of availability was published in the Federal Register on June 13, 1975 (40 FR 25241). In addition, several environmental assessments have been prepared on specific matters which serve to supplement the material in the Final Environmental Statement.

Endangered Species Act Consideration

Prior to finalization of the 1979–80 migratory game bird hunting regulations, consideration will be given to provisions of the Endangered Species Act of 1973, and as amended, (16 U.S.C. 1531–1543; hereinafter the act) to insure that hunting does not jeopardize the continued existence of any species designated as endangered or threatened or modify or destroy its critical habitat and is consistent with the conservation programs for those species. Consultations under section 7 of this act may cause changes to be made to proposals in this and future supplemental proposed rulemaking documents.

Non-toxic Shot Regulations

On January 12, 1978, the Service published in the Federal Register (44 FR 2629) proposed rules describing non-toxic shot zones for waterfowl hunting for hunting seasons commencing in 1979.

The intended effect of these non-toxic shot zones is to reduce the number of deaths to waterfowl caused by eating spent lead pellets. The final regulations will be published in the Federal Register shortly under § 20.108 of 50 CFR and will also be summarized in the Service's waterfowl regulations leaflets to be published late this summer.

Authorship

The primary author of this proposed rule is Henry M. Reeves, Office of Migratory Bird Management, working under the direction of John P. Rogers, Chief.

Exception From Executive Order 12044 and 43 CFR Part 14

As discussed in the Federal Register dated February 15, 1979 (44 FR 9929), the Assistant Secretary for Fish and Wildlife and Parks has concluded that the ever decreasing time frames in the regulatory process are mandated by the Migratory Bird Treaty Act and the Administrative Procedure Act. The regulatory process simply has no remaining slack in its timetable between the accumulation of critical summer survey data and the publication of the revised sets of proposed rulemakings. Compliance with the determination of significance and regulatory analysis criteria established under Executive Order 12044 would simply not be possible if the fall hunting season deadlines are to be achieved.

Consequently, the Assistant Secretary for Fish and Wildlife and Parks has approved the exemption of these regulations from the procedures of Executive Order 12044 and 43 CFR Part 14 which is provided for in section 6(b)6 and § 14.3(f), respectively.

Dated: June 8, 1979.

Lynn A. Greenwalt,

Director, Fish and Wildlife Service.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
CSA	MSPB*/OPM*		CSA	MSPB*/OPM*
	LABOR			LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408

*NOTE: As of January 1, 1979, the Merit Systems Protection Board (MSPB) and the Office of Personnel Management (OPM) will publish on the Tuesday/Friday schedule. (MSPB and OPM are successor agencies to the Civil Service Commission.)

REMINDERS

The items in this list were editorially compiled as an aid to Federal Register users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.

Rules Going into Effect Today

HEALTH, EDUCATION, AND WELFARE DEPARTMENT

Food and Drug Administration—

59966 12-22-7 / Nonclinical laboratory studies; good laboratory practice regulations

Next Week's Deadlines for Comments on Proposed Rules

Federal Register

Thursday
June 14, 1979

Highlights

Briefings on How to Use the Federal Register—For details on briefings in Washington, D.C.; Los Angeles, and San Francisco, Calif., see announcement in the Reader Aids Section at the end of this issue.

34083 **Energy Emergency—Florida** Presidential memorandum

34089 **Steel Imports** Presidential proclamation extending import relief

34095 **Trade With Romania and Hungary** Presidential determination

34157 **Local Educational Agencies** HEW/OE proposes rules to govern the awarding of special grants to LEA with especially high concentrations of children from low-income families, comments by 8-13-79

34418, 34422 **Aircraft Accident/Incident Investigation Procedures** NTSB issues rules effective 8-14-79 and extends comment period (2 documents) (Part IV of this issue)

34097 **Interest on Deposits** FRS issues rule concerning temporary suspension of early withdrawal penalty; effective 4-11-79

34346 **National Pollutant Discharge Elimination System** EPA proposes revisions of rules, comments by 9-12-79 (Part III of this issue)

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies of 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

Area Code 202-523-5240

Highlights

34213 **Arson Control Assistance Program** Justice/LEAA publishes draft proposed guidelines

34424 **Energy-Procurement** DOE issues rule; effective 6-14-79 (Part V of this issue)

34193 **Pesticides** EPA establishes temporary tolerance for 2-Chloro-*N*-(2,3-dimethylphenyl)-*N*-(1-methylethyl) acetamide

34194 **Toxic Substances** EPA issues summary of premanufacture notices

34167 **Toxic Substances** EPA proposes rules concerning fully halogenated chlorofluorocarbons, comments by 9-12-79

34192 **University Coal Research Laboratories Program** DOE issues notice of availability of program announcement; effective 6-13-79

34129 **Lighting of Barges** DOT/CG amends rules requiring use of flashing yellow light at the head of tows being pushed ahead

34132 **Fire Extinguishing Equipment** DOT/CG amends rules concerning wheeled semiportable fire extinguishers; effective 7-11-79

34440, 34443 **Tank Barges** DOT/CG proposes rules to prevent oil pollution, comments by 9-30-79 (2 documents) (Part VI of this issue)

34346 **Consolidated Permits Program** EPA solicits comments by 9-12-79 on draft application forms and accompanying instructions (Part III of this issue)

34244 **Hazardous Waste Management Program** EPA proposes rule to establish consolidated permit program requirements, comments by 9-12-79 (Part II of this issue)

34240 **Sunshine Act Meetings**

Title 3—

The President

Proclamation 4805 of June 12, 1979

Extension of Temporary Quantitative Limitation on the Importation Into the United States of Certain Articles of Stainless Steel or Alloy Tool Steel

By the President of the United States of America

A Proclamation

1. On June 11, 1976, by Proclamation 4445, the President proclaimed, pursuant to the Constitution and the statutes of the United States (including section 203 of the Trade Act of 1974 (19 U.S.C. 2253) (the Trade Act)), the imposition of temporary quantitative limitations on the importation into the United States of certain articles of stainless steel or alloy tool steel. These limitations were effective as to those articles entered, or withdrawn from warehouse, for consumption on or after June 14, 1976, and were to continue for a period of three years from that date unless earlier modified, or terminated. Proclamation 4445 was subsequently modified by Proclamation 4477 of November 16, 1976, Proclamation 4509 of June 15, 1977, and Proclamation 4559 of April 5, 1978. Import relief currently in effect under Proclamation 4445, as amended, with respect to articles provided for in items 923.20 through 923.28, inclusive, of the Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202), is scheduled to terminate at the close of June 13, 1979, unless extended by the President pursuant to section 203(h)(3) of the Trade Act (19 U.S.C. 2253(h)(3)).

2. Pursuant to sections 203(i)(2) and (i)(3) of the Trade Act (19 U.S.C. 2253(i)(2) and (i)(3)), the United States International Trade Commission (USITC), on April 24, 1979, reported to the President (USITC Report 203–5) the results of its investigation under section 203(i) of the Trade Act (19 U.S.C. 2253(i)). The USITC advised that it was evenly divided on the question of the probable economic effect on the domestic industry concerned of the termination of the import relief provided for in items 923.20 through 923.28, inclusive, of the TSUS.

3. Section 203(h)(3) of the Trade Act (19 U.S.C. 2253(h)(3)) provides that any import relief provided pursuant to section 203 may be extended by the President, at a level of relief no greater than the level in effect immediately before such extension, if the President determines, after taking into account the advice received from the USITC under section 203(i)(2) of the Trade Act (19 U.S.C. 2253(i)(2)) and after taking into account the considerations described in section 202(c) of the Trade Act (19 U.S.C. 2252(c)), that such extension is in the national interest.

4. In accordance with section 203(h)(3) of the Trade Act (19 U.S.C. 2253(h)(3)), having taken into account the advice received from the USITC under section 203(i)(2) of the Trade Act (19 U.S.C. 2253(i)(2)), and the considerations described in section 202(c) of the Trade Act (19 U.S.C. 2252(c)), I have determined that the extension of the import relief provided for in items 923.20 through 923.28, inclusive, of the TSUS is in the national interest.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, acting under the authority vested in me by the Constitution and the statutes of the United States, including section 203 of the Trade Act (19 U.S.C. 2253), and in accordance with Article XIX of the General Agreement on Tariffs and Trade (GATT) (61 Stat. (pt. 5) A58; 8 UST (pt. 2) 1786), do proclaim that—

(1) Items 608.52, 608.76, 608.78, 608.85, 608.88, 609.06, 609.07 and 609.09 in Part I of Schedule XX to the GATT are modified to conform with the Quantitative restrictions set forth in the Annex to this proclamation.

(2) Subpart A, part 2 of the Appendix to the TSUS is modified as set forth in the Annex to this proclamation.

(3) The authority to make changes in the quantitative restrictions provided for in this proclamation, as set forth in the Annex to this proclamation, is hereby delegated to the Special Representative for Trade Negotiations.

(4) This proclamation shall be effective as to those articles entered, or withdrawn from warehouse, for consumption on or after June 14, 1979, and before the close of February 13, 1980, unless the period of its effectiveness is earlier expressly modified or terminated.

IN WITNESS WHEREOF, I have hereunto set my hand this twelfth day of June, in the year of our Lord nineteen hundred and seventy-nine, and of the Independence of the United States of America the two hundred and third.

Jimmy Carter

ANNEX

Subpart A, part 2 of the Appendix to the Tariff Schedules of the United States (19 U.S.C. 1202) is modified—

(a) by deleting paragraph (i) of headnote 2(a) and inserting the following new paragraph (i):

"(i) The term *"restraint period"* refers to the 2-month period beginning June 14, 1979, and ending August 13, 1979, and thereafter to the three subsequent 2-month periods ending at the close of February 13, 1980;";

(b) by deleting headnotes 2 (b), (c), (d), (e), and (f);

(c) by inserting the following new headnote 2(b):

"(b) *Carryover.*—Whenever the quota quantity for item 923.22 or 923.26 has not been entered during any restraint period, the shortfall may be entered under the same item during the following restraint periods and not be counted against the quota quantity therefor. Whenever any quota quantity for a country or instrumentality under item 923.20, 923.21, or 923.23 has not been entered during any restraint period, the shortfall may be entered under the quota for that country or instrumentality under the same item during the following restraint periods and not be counted against the quota quantity therefor;";

(d) by inserting the following new headnote 2(c):

"(c) *Shortfall.*—During the second month of the third restraint period, should the Special Representative for Trade Negotiations determine that any quota quantity for a country or instrumentality under item 923.20, 923.21, or 923.23 is unlikely to be used during the remainder of the third restraint period or during the fourth restraint period, the Special Representative may modify the quota quantities for that item for the fourth restraint period by reallocating the shortfall to other suppliers, such modification to be effective with respect to articles entered, or withdrawn from warehouse, for consumption nonor after December 13, 1979. Notice of such modification is to be published in the *Federal Register* prior to December 13, 1979;";

(e) by redesignating headnote 2(g) as headnote 2(d); and

(f) by deleting items 923.20 through 923.26, inclusive, and inserting the following new items in lieu thereof:

Item	Articles	Quota Quantity (in short tons) Effective on or after— June 14, 1979	August 14, 1979	October 14, 1979	December 14, 1979
	Whenever, in any restraint period the respective aggregate quantity of articles specified below for items 923.20, 923.21, 923.22, 923.23, or 923.26 the product of a specified foreign country or instrumentality has been entered (whether, for tariff purposes, in schedule 6 or in parts 1, 2, and 3 of schedule 8), no article in such item the product of such country or instrumentality may be entered during the remainder of such restraint period:				
923.20	Sheets and strip of stainless steel (except razor blade steel) of the types provided for in items 608.85, 608.86, 608.06, 608.07, and 608.08:				
	Japan	7,341	8,022	8,757	9,071
	European Economic Community	3,082	3,249	3,852	3,783

Memorandum of June 12, 1979

Energy Emergency—Florida

Memorandum for the Administrator of the Environmental Protection Agency

Based on a request submitted to me by the Governor of the State of Florida to extend my May 5, 1979 determination that a regional energy emergency continues to exist in the State of Florida of such severity that a temporary suspension of certain particulate and opacity control regulations which apply to fossil-fuel fired electric generating plants under the Florida Air Quality Implementation Plan may be necessary, and that other means of responding to the energy emergency may be inadequate, I hereby extend that determination for thirty days from June 5 to and including July 4, 1979. This extension is limited by the same conditions as my original determination.

If, during the extension, I find that a regional energy emergency no longer exists in Florida, I will direct that this extension be rescinded, and that all suspension orders issued by the Governor be terminated on the day of that rescission. Please continue to work with State officials to monitor carefully the residual oil supply in Florida, and to inform me if the emergency should cease to exist. You will continue to retain full authority to disapprove temporary suspension of regulations in Florida and to exercise your emergency powers authority under Section 303 of the Clean Air Act, when and if necessary. It is important to keep suspensions to an absolute minimum since Section 110(f) of the Clean Air Act limits each suspension to a maximum duration of 120 days.

I commend Governor Graham for his continued efforts in energy conservation and his commitment that no extension of any suspension will be granted if the result would be a violation of any national ambient primary or secondary air quality standard.

This determination shall be published in the Federal Register.

Jimmy Carter

Presidential Determination No. 79-18 of June 1, 1979

Determination Under Subsections 402(d)(5) and (d)(5)(C) of the Trade Act of 1974—Continuation of Waiver Authority

Memorandum for the Secretary of State

Pursuant to the authority vested in me under the Trade Act of 1974, (Public Law 93-618, January 3, 1975; 88 Stat. 1978) (hereinafter "the Act"), I determine, pursuant to Subsections 402(d)(5) and (d)(5)(C) of the Act, that the further extension of the waiver authority granted by Subsection 402(c) of the Act will substantially promote the objectives of Section 402 of the Act. I further determine that continuation of the waivers applicable to the Socialist Republic of Romania and to the Hungarian People's Republic will substantially promote the objectives of Section 402 of the Act.

This determination shall be published in the Federal Register.

Jimmy Carter

Rules and Regulations

Federal Register
Vol. 44, No. 118
Thursday, June 14, 1979

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 908

[Valencia Orange Reg. 616]

Valencia Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona Valencia oranges that may be shipped to market during the period June 15–21, 1979. Such action is needed to provide for orderly marketing of fresh Valencia oranges for this period due to the marketing situation confronting the orange industry.

EFFECTIVE DATE: June 15, 1979.

FOR FURTHER INFORMATION CONTACT: Malvin E. McGaha, 202–447–5975.

SUPPLEMENTARY INFORMATION: *Findings.* This regulation is issued under the marketing agreement, as amended, and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendations and information submitted by the Valencia Orange Administrative Committee and upon other available information. It is hereby found that the action will tend to effectuate the declared policy of the act. This regulation has not been determined significant under the USDA criteria for implementing Executive Order 12044.

The committee met on June 12, 1979, to consider supply and market conditions and other factors affecting the need for regulation and recommended a quantity of Valencia oranges deemed advisable to be handled during the specified week. The committee reports the demand for Valencia oranges is weak.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the Federal Register (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

§ 908.516 Valencia Orange Regulation 616.

Order. (a) The quantities of Valencia oranges grown in Arizona and California which may be handled during the period June 15, 1979, through June 21, 1979, are established as follows:

(1) District 1: 300,000 cartons;

(2) District 2: 200,000 cartons;

(3) District 3: Unlimited.

(b) As used in this section, "handled", "District 1", "District 2", "District 3", and "carton" mean the same as defined in the marketing order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: June 13, 1979.

D. S. Kuryloski,

Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 79-18868 Filed 6-13-79; 11:21 am]

BILLING CODE 3410-02-M

FEDERAL RESERVE SYSTEM

12 CFR Part 217

[Regulation Q, Docket No. R-0232]

Interest on Deposits; Temporary Suspension of Early Withdrawal Penalty

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Temporary suspension of the Regulation Q penalty normally imposed upon the withdrawal of funds from deposits prior to maturity.

SUMMARY: The Board of Governors, acting through its Secretary, pursuant to delegated authority, has suspended temporarily the Regulation Q penalty for the withdrawal of time deposits prior to maturity from member banks for depositors affected by the severe storms and tornadoes beginning on or about April 8, 1979, in the State of Arkansas.

EFFECTIVE DATE: April 11, 1979.

FOR FURTHER INFORMATION CONTACT: Paul S. Pilecki, Attorney, Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202/452-3281).

SUPPLEMENTARY INFORMATION: On April 11 and 13, 1979, pursuant to section 301 of the Disaster Relief Act of 1974 (42 U.S.C. § 5141) and Executive Order 11795 of July 11, 1974, the President, acting through the Administrator of the Federal Disaster Assistance Administration, designated the following counties of the State of Arkansas a major disaster area: Ashley, Bradley, Calhoun, Howard, Jackson, Nevada, Ouachita, and Polk. The Board regards the President's action as recognition by the Federal government that a disaster of major proportions has occurred. The President's designation enables victims of the disaster to qualify for special emergency financial assistance. The Board believes it appropriate to provide an additional

measure of assistance to victims by temporarily suspending the Regulation Q early withdrawal penalty.[1] The Board's action permits a member bank, wherever located, to pay a time deposit before maturity without imposing this penalty upon a showing that the depositor has suffered property or other financial loss in the disaster area as a result of the severe storms and tornadoes. A member bank should obtain from a depositor seeking to withdraw a time deposit pursuant to this action a signed statement describing fully the disaster-related loss. This statement should be approved and certified by an officer of the bank. This action will be retroactive to April 11, 1979, and will remain in effect until 12 midnight October 15, 1979.

Section 19(j) of the Federal Reserve Act (12 U.S.C. § 371b) provides that no member bank shall pay any time deposit before maturity except upon such conditions and in accordance with such rules and regulations as may be prescribed by the Board. The Board has determined it to be in the overriding public interest to suspend the penalty provision in § 217.4(d) of Regulation Q for the benefit of depositors suffering disaster-related losses within those geographical areas of the State of Arkansas officially designated a major disaster area by the President. The Board, in granting this temporary suspension, encourages member banks to permit penalty-free withdrawal before maturity of time deposits for depositors who have suffered disaster-related losses within the designated disaster area.

In view of the urgent need to provide immediate assistance to relieve the financial hardship being suffered by persons directly affected by the severe damage and destruction occasioned by the storms and tornadoes in the designated counties of Arkansas, good cause exists for dispensing with notice and public participation referred to in section 553(b) of Title 5 of the United States Code with respect to this action and public procedure with regard to this action would be contrary to the public interest. Because of the need to provide assistance as soon as possible and because the Board's action relieves a restriction, there is good cause to make the action effective immediately.

By order of the Board of Governors, acting through its Secretary, pursuant to delegated authority (12 CFR 265.2(a) (18)), June 8, 1979.

Theodore E. Allison,

Secretary of the Board.

[FR Doc. 79-18800 Filed 6-13-79; 8:45 am]

BILLING CODE 6210-01-M

[1] Sec. 217.4(d) of Regulation Q provides that where a time deposit issued prior to July 1, 1979, or any portion thereof, is paid before maturity, a member bank may pay interest on the amount withdrawn at a rate not to exceed that currently prescribed for a savings deposit and that the depositor shall forfeit three months of interest payable at such rate. Time deposits issued on or after July 1, 1979, will be subject to a new penalty rule (refer to 44 FR 32648).

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 79-SO-39; Amdt. 39-3485]

Airworthiness Directives; Piper Model PA-28 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: An emergency Airworthiness directive by priority mail was adopted on May 1, 1979, and made effective immediately upon receipt of the letter to all known U.S. operators of certain Piper Model PA-28 series airplanes. This directive requires repetitive checks until the Parker-Hannifin unions and fittings in the fuel system are retorqued, repaired, or replced within 100 hours time in service after receipt of the letter. This AD was needed to inspect for fuel leakage and/or fumes and to retorque, repair, or replace leaking unions to prevent a possible fire hazard.

DATES: This AD is effective June 8, 1979, and was effective upon receipt for all recipients of the emergency Airworthiness Directive dated May 2, 1979.

ADDRESSES: Piper Service Bulletin No. 638 may be obtained from Piper Aircraft Corporation, Lock Haven, Pennsylvania 17745, telephone (707) 748-6711. A copy of the bulletin is contained in the Rules Docket, Room 275, Engineering and Manufacturing Branch, FAA, Southern Region, 3400 Whipple Street, East Point, Georgia 30320, telephone (404) 763-7407.

FOR FURTHER INFORMATION CONTACT: John J. Lyness, Manufacturing Inspection Section, Engineering and Manufacturing Branch, Flight Standards Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320, telephone (404) 763-7280.

SUPPLEMENTARY INFORMATION: There have been reports of fuel leakage at the Parker-Hannifin unions installed in certain Piper Aircraft Corporation Model PA-28 series airplanes. Fuel leaks and/or fumes at these unions could possibly result in a fire. Since this condition is likely to exist or develop in other airplanes of the same type design, an emergency Airworthiness Directive was issued on May 2, 1979, which required checks prior to the next flight and prior to each flight thereafter until the Parker-Hannifin unions and fittings in the fuel system were retorqued, repaired, or replaced within 100 hours time in service after receipt of the letter.

Since a situation existed that required immediate corrective action, it was found that notice and public procedure thereon were impractical and contrary to the public interest, and good cause existed for making the AD effective immediately to all known U.S. operators of certain Piper Aircraft Corporation Model PA-28 series airplanes by the emergency Airworthiness Directive dated May 2, 1979. This condition still exists and is hereby published in the Federal Register.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

Piper Aircraft Corporation. Applies to the following Piper models of aircraft certified in all categories: PA-28-101, S/N 28-7616340 through 28-7916410; PA-28-181, S/N 28-7890276 through 28-7990429; PA-28-236, S/N 28-7911001 through 28-7911167; PA-28-201T, S/N 28-7921001 through 28-7921028; PA-28R-201, S/N 28R-7837150 through 28R-7837317; PA-28R-201T, S/N 28R-7803185 through 28R-7808373; PA-28RT-201, S/N 28R-7918001

through 28R-7918126; PA-28RT-201T, S/N 28R-7931001 through 28R-7931187.

Compliance is required as indicated, unless already accomplished.

To prevent a potential fire hazard, accomplish the following:

(a) Prior to the next flight after the effective date of this AD and prior to each flight thereafter until compliance with the requirements of paragraphs (b)(1) through (b)(7) have been accomplished, check for evidence of fuel leads, wetting, fuel stains, and/or fumes at inboard area of both wings and in the cabin area. Make appropriate maintenance record entry.

(b) If, as a result of checks required by paragraph (a), leakage, wetting, fuel stains or fumes are evident, accomplish the following prior to further flight:

(1) Gain access to all Parker-Hannifin unions (identified D1 or D1PH6) located at inboard areas of both wings, under the left cabin side panel and in the spar box area. For 201T models only, include vent line fitting at lower aft corner of the door.

(2) Torque each fitting to the requirements of Table I.

(3) Measure the distance between the face of union and face of tubing fitting. Refer to Figure I.

(4) If Torque and/or dimensions are not in accordance with the requirements of Table I and Figure I, comply with paragraph (c).

(5) Fill the airplane tanks full of fuel and run engine for three (3) to five (5) minutes on each tank.

(6) Inspect fittings for leakage and if no leaks are found, no further action is necessary except for the appropriate maintenance record entry.

(7) If leakage is still evident, comply with the requirements of paragraph (c).

(c) If as a result of checks or inspections required by this Airworthiness Directive, the fittings or unions are found damaged, they continue to leak, or they do not comply with the requirements of Table I and Figure I, correct in accordance with (1), (2), or (3) below and accomplish paragraphs (b)(4), (b)(5), and (b)(6).

(1) Remove the leaking union and replace it using a standard "AN" fitting as outlined in AC 43.13-1A, paragraphs 362 and 708, or

(2) Replace with Piper preswaged and presealed tube and union and apply thread lube as outlined in Table II. Carefully align the tube, snug up the nut finger tight, and tighten the nut one (1) to two (2) flats (⅙ to ⅓ of a turn). Maintain dimensional tolerance of Figure I, or

(3) Repair by using the same size Parker-Hannifin unions and fittings which have not been preswaged or presealed. Apply thread lube as outlined in Table II, snug up the nut finger tight, and using a tube wrench tighten the nut one and one-quarter (1¼) turns.

(d) Within the next 100 hours time in service after the effective date of this Airworthiness Directive, comply with the requirements of paragraphs (b)(1) through (b)(7), unless already accomplished.

(e) Checks specified in paragraph (a) may be accomplished by the pilot.

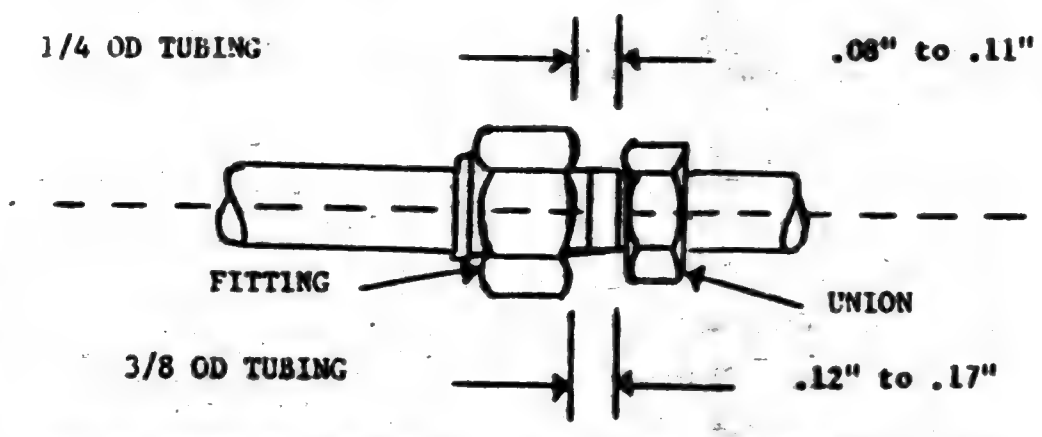
(f) Compliance with the provisions of this Airworthiness Directive may be accomplished in an equivalent manner approved by the Chief, Engineering and Manufacturing Branch, Southern Region.

Table I

Tube Size	Applied torque	Equipment
¼ OD	75–85 inch pounds.	Use a tubing crows foot.
⅜ OD	175–195 inch pounds.	Use a tubing crows foot.

Table II

Slip spray lubricant (Dupont), or equivalent.
Perulube (Parker-Hannifin), or equivalent.
Apply the lubricant to the male connector thread.
Do not allow lubricant to enter the throat of the connector seat or contact the ferrule seat face.



Piper Service Bulletin No. 638 pertains to this subject.

This amendment becomes effective June 8, 1979.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Issued in East Point, Ga., on June 1, 1979.

Phillip M. Swatek,
Director, Southern Region.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 79-NE-07; Amdt. 39-3496]

Sikorsky S-61 Series Helicopters Certificated in All Categories; Airworthiness Directives

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: On April 21, 1979, a telegraphic airworthiness directive (AD) was issued requiring repetitive inspections of the honeycomb tail rotor blades and an inspection of the tail rotor gearbox of Sikorsky S-61 type helicopters equipped with honeycomb tail rotor blades. The AD also required the replacement of the components prior to further flight, if cracks were found. These cracks could lead to failures of these components and loss of control of the helicopter.

DATES: Effective date—June 14, 1979.

ADDRESSES: To obtain copies of the service bulletin referenced in the AD contact Sikorsky Aircraft Division of United Technologies Corporation, Stratford, Connecticut 06602.

FOR FURTHER INFORMATION CONTACT: William E. Garlock, Airframe Section, ANE-212, Engineering and Manufacturing Branch, Flight Standards Division, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone: (617) 273-7336.

SUPPLEMENTARY INFORMATION: On April 21, 1979, a telegraphic AD was adopted and made effective immediately to all known United States operators of Sikorsky S-61 type helicopters. This airworthiness directive required an initial dye penetrant inspection of the tail rotor blades and tail rotor gearbox mounting feet, repetitive visual inspections of the blades, and repetitive ultrasonic inspections of the blades with more than 1200 hours of service. It also required replacement of these components prior to further flight, if cracks were found.

This AD was necessary because of the failures found in a tail rotor blade and the tail rotor gearbox of an S-61L helicopter that was involved in a recent accident while in commercial operation. In the accident investigation, a laboratory examination revealed that a fatigue failure had caused the separation of part of tail rotor blade. This type of failure of the blade can cause the loss of control of the helicopter.

Since it was found that immediate corrective action was required, notice and public procedure thereon were impracticable and contrary to the public interest, and good cause existed for making and AD effective immediately to all known United States operators of Sikorsky model S-61 helicopters by individual telegrams dated April 21, 1979.

Since the telegraphic AD was issued, operators have recommended that it is not necessary to require a daily ultrasonic inspection in addition to the six hour interval ultrasonic inspection. The FAA agrees with this recommendation. The visual and ultrasonic inspections have therefore been revised to clarify these requirements.

These conditions still exist, and the telegraphic AD as revised is hereby published in the Federal Register as an amendment to § 39.13 of Part 39 of the Federal Aviation Regulations.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator (14 CFR 11.89) § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended, effective 1979, by addition of the following new AD:

Sikorsky Aircraft. Applies to S-61 series helicopters certificated in all categories, including FAA certificated military counterparts, equipped with P/Ns S6115-30001 or S6117-30001 series tail rotor blades.

To preclude the possibility of failure of the tail rotor blade, accomplish the following:

1. Inspect tail rotor blades, P/Ns S6115-30001 and S6117-30001, series for cracks in accordance with the following:

a. Prior to further flight, unless already accomplished, dye penetrant inspect the inboard 32 inch section in accordance with Sikorsky Aircraft Service Bulletin 61B15-26.

b. Thereafter, prior to the first flight of the day, conduct visual inspections of the blades in accordance with Sikorsky Service Bulletin 61B15-1E.

c. Within the next six hours time in service, unless already accomplished, ultrasonically inspect the blades for spar and skin cracks in accordance with Sikorsky Service Bulletin 61B15-26. Thereafter for blades with over 1200 hours time in service, inspect ultrasonically at intervals not to exceed six hours time in service in accordance with Sikorsky Service Bulletin 61B15-26.

2. Prior to further flight, unless already accomplished, perform a one-time dye penetrant or Zyglo inspection of the tail rotor gearbox mounting feet for cracks in accordance with Sikorsky Service Bulletin 61B15-26.

3. If a crack is found during the inspection of paragraph 1 or 2 above, replace the cracked blade or gearbox with a new or serviceable component, prior to further flight. A serviceable blade or gearbox is one that has been inspected in accordance with the subject service bulletins and found to be free of cracks.

4. Report in writing any cracks found during the inspections of paragraph 1 or 2 above to: Chief, Engineering and Manufacturing Branch, FAA, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803. Each report must include the length and location of the cracks and total time in service of the blade or gearbox. Reporting approved by the Office of Management and Budget under OMB No. 04-R0174.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Sikorsky Aircraft, Stratford, Connecticut 06602. These documents may also be examined at FAA, New England Region, 12 New England Executive Park, Burlington, Massachusetts, and at FAA Headquarters, 800 Independence Avenue, SW., Washington, D.C. A historical file on this AD which includes the incorporated material in full is maintained by the FAA at its Headquarters in Washington, D.C., and at the FAA, New England Headquarters, Burlington, Massachusetts.

Issued in Burlington, Massachusetts, on June 6, 1979.

Robert E. Whittington,

Director, New England Region.

Note.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on June 19, 1967.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 79-EA-18; Amdt. 39-3495]

Airworthiness Directives; Bendix

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) applicable to certain Bendix Models D-2000/D-2200 six and eight cylinder magnetos and requires a repetitive inspection of the distributor block bushings for movement between the bushing and the block. The purpose of the inspection is to preclude failure of the magneto in flight.

DATE: June 19, 1979. Compliance is required as set forth in the AD.

ADDRESSES: Bendix Service Bulletins may be acquired from the manufacturer at the Electrical Components Division, Sidney, New York 13838.

FOR FURTHER INFORMATION CONTACT: A. Farrar, Propulsion Section, AEA-214, Engineering and Manufacturing Branch, Federal Building, J.F.K. International Airport, Jamaica, New York 11430; Tel. 212-995-2894.

SUPPLEMENTARY INFORMATION: There had been reports of failure of the right side of a D-2000 magneto in flight due to a detachment of the distributor gear bushing. This could lead to loss of both sides of the magnetos which incorporate the green blocks for movement between the bushing and the blocks. An emergency airmail transmittal had been distributed on April 19, 1979, to all known owners of airplanes incorporating the magneto. Since this deficiency affects air safety, notice and public procedure hereon are impractical and good cause exists for making the rule effective in less than 30 days.

Adoption of the Amendment

Accordingly, and pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by issuing a new airworthiness directive, as follows:

Applies to Bendix Model D-2000/D-2200 series (green distributor block only) six-and-eight-cylinder magnetos identified as follows:

Magneto	
Model	Part No.
D6LN-2031	10-382980-03
D6LN-2200	10-382920-51
D6LN-2230	10-382910-03
D6LN-2200	10-382920-51
D6RN-2230	10-382910-03
D6RN-2230	10-382910-12
D6LN-2230	10-382910-17
D6LN-2230	10-382910-03

These magnetos are installed on but not limited to the following aircraft engines or aircraft engine/aircraft combinations:

AVCO Lycoming engines	Installations
TIO-540-R2AD	
TIO-540-F2BD	
TIO-540-N2BD	
IO-720-B1BD	
IO-720-D1CD	
IO-720-D1CD	Piper, PA-36-375.
IO-720-B1BD	Cessna 414 per Riley STC SA2660-SW.

AVCO Lycoming engines	Installations
IO-720-B1BD	Rockwell 690B, 690C, and 690C modified by STC SA2991WE.
IO-720-B1BD	Rockwell 690F, 690FL and 690 FLP modified by STC SA 2991WE.

To detect loose distributor block bushings, accomplish the following within the next 10 hours in service after the effective date of this A.D. unless previously accomplished, and every 25 hours thereafter until green distributor blocks are replaced by comparable black distributor blocks with part numbers as follows:

P/N 10-382978 by 10-382998 and P/N 10-382976 by 10-382972, or equivalent FAA approved parts and procedures.

a. Remove the ventilator plugs, threaded bushing, or solid plug from both ends of the magneto housing, as applicable.

b. Remove gear axle retaining ring P/N 10-92815-37, plain washer P/N 10-50753, and felt washer P/N 10-50752 from both distributor gear axle positions.

c. Fabricate a ¼ in. round probe of non-metallic material, preferably wood dowel rod, approximately six inches long, with one end approximately ⅛ in. wide by ⅛ in. thick by 1 in. long to resemble a screw driver blade.

d. Insert the formed end of the tool thru the inspection hole at one end of the magneto housing and between two teeth of the distributor gear. Gently so as not to damage the gear teeth, attempt to push the gear back and forth sideways, while observing the corresponding bronze bushing in the distributor block. If there is no movement between the bushing and the block, insert the tool under the flat surface of the gear on its outside diameter. Exert pressure on the end of the tool to lift the gear towards the distributor block. Inspect for movement between the bushing and the block. If no bushing movement is detected by either of these two inspections, repeat the procedures at the gear bushing location at the opposite end of the magneto.

e. If no movement is detected, re-assemble the magneto per maintenance and overhaul instructions listed in Bendix publications L-928-1 and L-945 or other approved procedures.

f. If bushing movement is detected at either end, the distributor block must be replaced prior to further flight. When replacing distributor block, center the block relative to any lateral movement of block.

g. Tighten distributor block screws to a torque value of 25 to 30 inch lbs. Reassemble the magneto according to applicable instructions in D-2000/D-2200 series magneto over-haul publication, Bendix Form L-945 and tighten the magneto cover screws to a torque value of 30-35 in. lb. for black magnetos and 40-45 in. lb. for gray magnetos.

h. If replacing the green distributor block with a black distributor block, reidentify the magneto system P/N and magneto P/N by stamping the numeral 1 over the first digit of the dash number suffixes. For example:

System P/N-201 becomes -101; Magneto P/N-51 becomes -11.

Record magneto serial number in aircraft engine log. Equivalent methods of compliance must be approved by the Chief, Engineering and Manufacturing Branch, FAA Eastern Region. As permitted by FAR 21.197, aircraft may be flown to a base where maintenance required by this airworthiness directive can be accomplished.

Bendix Service Bulletin No. 608 pertains to this problem.

Effective Date: This amendment is effective June 19, 1979.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, 49 U.S.C. 1354(a), 1421, and 1423; Sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c); and 14 CFR 11.89.)

Issued in Jamaica, New York, on June 5, 1979.

Thomas C. Halleran,
Acting Director, Eastern Region.

[FR Doc. 79-18087 Filed 6-13-79; 8:45 am]
BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 79-EA-4; Amdt. 39-3494]

Airworthiness Directives; Piper Aircraft

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) applicable to Piper PA-36-285 type airplanes and requires an inspection of the gusset welds on the fuselage where the engine mount is attached to the fuselage for cracks and alteration where necessary. The purpose of the requirement is to preclude failure of the weld and compromise of the engine structure.

DATE: June 19, 1979. Compliance is required as set forth in the AD.

ADDRESSES: Piper Service Bulletins may be acquired from the manufacturer at Piper Aircraft Corporation, 820 East Bald Eagle Street, Lock Haven, Pennsylvania 17745.

FOR FURTHER INFORMATION CONTACT: I. Mankuta, Airframe Section, AEA-212, Engineering and Manufacturing Branch, Federal Building, J.F.K. International Airport, Jamaica, New York 11430; Tel. 212-995-2875.

SUPPLEMENTARY INFORMATION: There had been reports of cracks in the welds in the engine mount attachment brackets. The manufacturer has issued S/B 615 and a Modification Kit No. 763877 for an inspection and installation of reinforcement fitting and gussets which are welded to the mount junction. Since this deficiency affects air safety, notice and public procedure hereon are impractical and good cause exists for making the rule effective in less than 30 days.

Adoption of the Amendment

Accordingly, and pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by issuing a new airworthiness directive, as follows:

Piper Aircraft Corp. Applies to Model PA-36-285 serial numbers 36-7360001 through 36-7660135 airplanes certificated in all categories. To detect cracks in the engine mount attachment brackets, accomplish the following:

(a) Within the next 50 hours in service from the effective date of this AD, unless accomplished within the previous 50 hours in service, and at intervals thereafter not to exceed 100 hours in service from the last inspection, inspect welds for cracks on the aft side of the gussets on the fuselage where the engine mount is attached using dye check or fluorescent penetrant inspection procedures or equivalent.

(b) If cracks are found, install Piper Engine Mount Attachment Modification Kit No. 763877, or equivalent, prior to further flight. During the installation of the kit, inspect the welds for cracks on the forward side of the gussets on the fuselage where the engine mount is attached using dye check or fluorescent penetrant inspection procedures or equivalent. If cracks are found, remove weld from cracked area and reweld.

(c) Upon incorporation of Piper Modification Kit No. 763877 or equivalent, compliance with this AD may be cancelled.

(d) Equivalent inspections and repairs must be approved by the Chief, Engineering and Manufacturing Branch, FAA, Eastern Region.

(e) Upon submission of substantiating data by an owner or operator through an FAA Maintenance Inspector, the Chief, Engineering and Manufacturing Branch, FAA, Eastern Region may adjust the inspection intervals specified in this AD.

Piper S/B No. 615 dated 9/21/78, pertains to this subject.

Effective date: This amendment is effective June 19, 1979.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, 49 U.S.C. 1354(a), 1421, and 1423; Sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c); and 14 CFR 11.89.)

Issued in Jamaica, New York, on June 5, 1979.

Thomas C. Halleran,
Acting Director, Eastern Region.

[FR Doc. 79-18089 Filed 6-13-79; 8:45 am]
BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 78-EA-112; Amdt. 39-3403]

Airworthiness Directives; Piper Aircraft

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) applicable to Piper PA-24-400, PA-30 and PA-39 type airplanes and requires repetitive check for possible fuel selector valve leakage and repetitive check for ice contamination of the fuel supply. The purpose of the requirement is to preclude engine failure due to inadvertent fuel mismanagement or ice blockage.

DATE: June 19, 1979. Compliance is required as set forth in the AD.

ADDRESSES: Piper Service Bulletins may be acquired from the manufacturer at Piper Aircraft Corporation, 820 East Bald Eagle Street, Lock Haven, Pennsylvania 17745.

FOR FURTHER INFORMATION CONTACT: F. Covelli, Propulsion Section, AEA-214, Engineering and Manufacturing Branch, Federal Building, J.F.K. International Airport, Jamaica, New York 11430; Tel. 212-995-2894.

SUPPLEMENTARY INFORMATION: There had been a report of an inflight failure due to leakage of fuel through the selector valve from one tank to another. There have also been reports of power failure due to ice blockage of the fuel lines and strainers.

Adoption of the Amendment

Accordingly, and pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by issuing a new airworthiness directive, as follows:

Piper

Applies to series PA-24-400 S/N 28-2 through 28-148; PA-30 S/N 30-2 through 30-2000; and PA-39 S/N 39-1 through 39-155 aircraft.

Part A

This part applies to all aircraft listed above. Compliance required within 50 hours of operation after the effective date of this AD and at each 50 hours of operation thereafter.

To prevent fuel mismanagement from interport leakage within the fuel selector valve causing fuel to transfer from one tank to another, accomplish checks in accordance with the Instructions paragraph in Piper Service Letter No. 851, Part A or an approved equivalent. Item 3 is to be *repeated* only twice. If drainage still exceeds one half (½) fluid ounce of fuel then comply with Item 5. Item 5 is maintenance and must be performed by a certified mechanic.

Part B

This part applies to the cited Models PA-30 and PA-39 aircraft.

If the airplane has been exposed to below freezing temperatures, compliance is required prior to the first flight of the day and after each refueling operation.

To eliminate water contamination of the aircraft fuel supply, accomplish a check in accordance with the Instructions paragraph of Piper Service Letter 851, Part B, Item 2a and 2b or an approved equivalent check.

Part C

This part applies to the cited Model PA-24-400 aircraft.

If the airplane has been exposed to below freezing temperatures, compliance is required prior to the first flight of the day and after each refueling operation.

To eliminate water contamination of the aircraft fuel supply, accomplish a check in accordance with the Instructions paragraph in Piper Service Letter No. 851, Part C, Item 2a or an approved equivalent check.

Upon submission of substantiating data through an FAA maintenance inspector, the Chief, Engineering and Manufacturing Branch, FAA, Eastern Region, may adjust the repetitive intervals. The checks required by this AD may be performed by the pilot.

Equivalent checks, inspections, and maintenance must be approved by Chief, Engineering and Manufacturing Branch, FAA, Eastern Region.

Effective date: This amendment is effective June 19, 1979.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, 49 U.S.C. 1354(a), 1421, and 1423; Sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c); and 14 CFR 11.89.)

Issued in Jamaica, New York, on June 5, 1979.

L. J. Cardinali,

Acting Director, Eastern Region.

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 78-RM-34]

Designation of Alternate Airway Segment

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment designates V-211W, an alternate airway segment, between Durango and Cortez, Colorado. This airway provides an additional arrival and departure route for Durango to help reduce the congestion at this location.

EFFECTIVE DATE: August 9, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-3715.

SUPPLEMENTARY INFORMATION:

History

On March 19, 1979, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate an east alternate segment to V-95 between Durango and Gunnison, Colorado (44 FR 16439). Also a west alternate segment to V-211 between Durango and Cortez. Since that time it has been determined that the proposed segment of V-952 could not be used at the desired altitudes. For this reason V-95 will not be changed at this time. With this exception, this amendment is the same as proposed in the notice. Interested persons were invited to participate in the rulemaking proceeding by submitting written comments on the proposal to the FAA. The only comment received expressed no objection. Section 71.123 of Part 71 was republished in the Federal Register on January 2, 1979 (44 FR 307).

Rule

This amendment to Part 71 of the Federal Aviation Regulations adds a west alternate segment to V-211 from Durango, Colorado to Cortez, Colorado, via the INT of Durango 249°T (235°M) and the Cortez 150°T (136°M) radials.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (44 FR 307) is amended, effective 0901 G.m.t., August 9, 1979 as follows:

Under V-211 all after "Cortez, Colorado, 115° radials;" is deleted and "to Cortez, including a W alternate via INT Durango 249° and Cortez 150° radials." is substituted therefor.

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this

action does not warrant preparation of a regulatory evaluation.

Issued in Washington, D.C., on June 7, 1979.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc. 79-18639 Filed 6-13-79; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 79-EA-17]

Alteration of Federal Airways and Reporting Points

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: In a rule published in the Federal Register of June 4, 1979, Volume 44, page 31944, the effective date of August 9, 1979, is incorrect and is hereby changed to October 4, 1979, because of technical problems encountered in the installation process for the Calverton, N.Y., VORTAC.

EFFECTIVE DATE: June 14, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-3715.

SUPPLEMENTARY INFORMATION: FR Doc. 79-17237 was published on June 4, 1979, (44 FR 31944) with an effective date of August 9, 1979, and alters several airways and a reporting point caused by the relocation of the Riverhead, N.Y. VORTAC to Calverton, N.Y. Technical problems arising from this relocation will not be resolved in time to flight check and commission the navigation aid prior to August 9, 1979. For this reason the effective date of this action is changed to October 4, 1979.

Adoption of the Correction

Accordingly, pursuant to the authority delegated to me by the Administrator, FR Doc. 79-17237 as published on June 4, 1979, page 31944, is amended effective upon publication in the Federal Register as follows: In the "EFFECTIVE DATE" and in the "Adoption of the Amendment" "August 9, 1979," is deleted and "October 4, 1979." is substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Washington, D.C., on June 7, 1979.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 79-NE-1]

Designation of Airway Segments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment extends V-151 eastward from Providence, R.I., to Hyannis, Mass., via an intersection northwest of Hyannis on V-141, and extends V-203 eastward from Norwich, Conn., to Nantucket, Mass., via an intersection southwest of Nantucket on V-46. This action reduces the congestion in the Hyannis and Nantucket areas, additionally flight planning and communication time are reduced by designating two new routes as airways.

EFFECTIVE DATE: August 9, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Everett L. McKisson, Airspace Regulations Branch (ATT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8525.

SUPPLEMENTARY INFORMATION:

History

On May 7, 1979, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to extend V-151 eastward from Providence to the INT of Providence 079°T(094°M) and Hyannis 318°T(333°M) radials and to extend V-203 southeastward from Norwich to the INT of Norwich 120°T(134°M) and Nantucket 255°T(270°M) radials (44 FR 26748). Interested persons were invited to participate in the rulemaking proceeding by submitting written comments on the proposal to the FAA. The comments received expressed no objection to the proposal. Since this action involves, in part, the designation of navigable airspace outside the United States, the Administrator has consulted with the Secretary of State and the Secretary of Defense in accordance with the provisions of Executive Order 10854. Section 71.123 of Part 71 was republished in the Federal Register on January 2, 1979, (44 FR 307).

The Rule

This amendment to Part 71 of the Federal Aviation Regulations adopts the rule as proposed and adds airway segments to V-151 and V-203. It extends V-151 to overlie V-141 from its described intersection to Hyannis and V-203 to overlie V-46 from its described intersection to Nantucket. By extending these airways to overlie present airways a reduction in flight planning and communication time is made without adjusting any controlled airspace. "Nantucket, Mass., 255°" under the proposed amendment in the notice should have been "Nantucket, Mass. 255°" the same as the proposal in the notice and is corrected herein. With these exceptions, this amendment is the same as initially proposed.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (44 FR 307) is amended, effective 0901 G.m.t., August 9, 1979, as follows:

Under V-151

"From Providence, R.I.," is deleted and "From Hyannis, Mass., via INT Hyannis 318° and Providence, R.I., 079° radials; Providence;" is substituted therefor.

Under V-203

"From Norwich, Conn.," is deleted and "From Nantucket, Mass., via INT Nantucket 255° and Norwich, Conn., 120° radials; Norwich" is substituted therefor.

(Secs. 307(a), 313(a), and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854 (24 FR 9565); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Washington, D.C. on June 7, 1979

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

14 CFR Part 71

[Airspace Docket No. 79-RM-11]

Establishment of Transition Areas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This Amendment establishes a 700' and a 1,200' transition area at New Town, North Dakota to provide controlled airspace for aircraft executing the new nondirectional radio beacon (NDB) standard instrument approach procedure developed for the New Town Municipal Airport, New Town, North Datota.

EFFECTIVE DATE: 0901 G.m.t. August 9, 1979.

FOR FURTHER INFORMATION CONTACT: David M. Laschinger, Operations, Procedures and Airspace Branch Air, Traffic Division, ARM-500, Federal Aviation Administration, Rocky Mountain Region, 10455 East 25th Avenue, Aurora, Colorado 80010; telephone (303) 837-3937.

SUPPLEMENTARY INFORMATION:

History

On April 19, 1979, the FAA published for comment a Notice of Proposed Rulemaking (NPRM) to establish a 700' and a 1,200' transition area at New Town, North Dakota (44 FR 23280). No objections were received in response to this Notice.

Rule

This Amendment to Subpart G of Part 71 of the Federal Aviation Regulations (FAR's) establishes a 700' and a 1,200' transition area at New Town, North Dakota. This action is necessary to provide controlled airspace for aircraft executing the new NDB standard instrument approach procedure to New Town Municipal Airport, New Town, North Dakota.

Drafting Information

The principal authors of this document are David M. Laschinger, Operations, Procedures and Airspace Branch, Air Traffic Division, and Daniel J. Peterson, office of Regional Counsel.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended effective 0901 G.m.t., August 9, as follows:

By amending Subpart G, § 71.181 by designating the following 700' and 1,200' transition areas:

New Town, North Dakota

That airspace extending upward from 700' above the surface within a 5-mile radius of the New Town Municipal Airport (latitude 47°57'59" N., longitude 102°28'36" W.) and within 3 miles each side of the 142° bearing from the New Town NDB (latitude 47°56'15" N., longitude 102°28'40" W.) extending from the 5-mile radius to the 8.5 miles southeast of the New Town NDB, and that airspace extending upward from 1,200' above the surface bounded on the east by the Minot, North Dakota 1,200' transition area and longitude 102°00'00" W., on the south and west by V71, on the north by V430 excluding the Williston, North Dakota 1,200' transition area.

(Sec. 307(a), Federal Aviation Act of 1958, as amended, (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c); 14 CFR 11.89).

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves and established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Aurora, Colo., on June 4, 1979.

M. M. Martin,

Director, Rocky Mountain Region.

14 CFR Part 71

[Airspace Docket No. 79-RM-09]

Establishment of Transition Areas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This Amendment establishes a 700' and a 1,200' transition area at Watford City, North Dakota to provide controlled airspace for aircraft executing the new nondirectional radio beacon (NDB) standard instrument approach procedure developed for the Watford City Municipal Airport, Watford City, North Dakota.

EFFECTIVE DATE: 0901 G.m.t. August 9, 1979.

FOR FURTHER INFORMATION CONTACT: David M. Laschinger, Operations, Procedures and Airspace Branch, Air Traffic Division, ARM-500, Federal Aviation Administration, Rocky Mountain Region, 10455 East 25th Avenue, Aurora, Colorado 80010; telephone (303) 837-3937.

SUPPLEMENTARY INFORMATION:

History

On April 19, 1979, the FAA published for comment, A Notice of Proposed Rulemaking (NPRM) to establish a 700' and a 1,200' transition area at Watford City, North Dakota (44 FR 23280). No objections were received in response to this Notice.

Rule

This Amendment to Subpart G of Part 71 of the Federal Aviation Regulations (FAR's) establishes a 700' and a 1,200' transition area at Watford City, North Dakota. This action is necessary to provide controlled airspace for aircraft executing the new NDB standard instrument approach procedure to Watford City Municipal Airport, Watford City, North Dakota.

Drafting Information

The principal authors of this document are David M. Laschinger, Operations, Procedures and Airspace Branch, Air Traffic Division, and Daniel J. Peterson, office of Regional Counsel.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended effective 0901 G.m.t., August 9, 1979, as follows:

By amending Subpart G, § 71.181 by designating the following 700' and 1,200' transition areas:

Watford City, North Dakota

That airspace extending upward from 700' above the surface within a 5.5-mile radius of the Watford City Municipal Airport (latitude 47°47'58" N., longitude 103°15'24" W.) and within 3 miles each side of the 208° bearing from the Watford City NDB (latitude 47°47'58" N., longitude 103°15'09" W.) extending from the 5.5-mile radius to the 8.5 miles northwest of the Watford City NDB, and airspace extending upward from 1,200' above the surface bounded on the south by latitude 47°39'00" N., on the west and northwest by V465, on the northeast and east by V71 excluding Williston, North Dakota, 1,200' transition area.

(Sec. 307(a), Federal Aviation Act of 1958, as amended, (49 U.S.C. 1348(a)); sec. 6(c),

Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Aurora, Colo., on June 4, 1979.

M. M. Martin,

Director, Rocky Mountain Region.

[FR Doc. 79-18091 Filed 6-13-79; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 79-AL-7]

Revocation of Annette Island, Alaska, Control Zone

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Final rule.

SUMMARY: This amendment revokes the Annette Island, Alaska, control zone. Revocation of the control zone will allow more efficient use of the airspace. The requirement for the control zone no longer exists. The 700-foot transition area within a 14-mile radius of Annette Island VORTAC shall remain in effect to protect a special instrument approach procedure which utilizes the Annette Island VORTAC to Ketchikan airport.

EFFECTIVE DATE: 0901 G.m.t., August 9, 1979.

FOR FURTHER INFORMATION CONTACT: Jerry M. Wylie, Operations, Procedures, and Airspace Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 14, 701 C Street, Anchorage, Alaska 99513, telephone 907-271-5903.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to revoke the Annette Island, Alaska, control zone. The Annette Island, Alaska, control zone was last described in § 71.171 of the Federal Aviation Regulations (44 FR 353) on January 2, 1979. All prescribed instrument approach procedures to Annette Island have been canceled and there is no longer a control tower in operation at the airport. Consequently, the requirement for a control zone no longer exists. The FAA believes that revocation of the control zone will allow more efficient use of this airspace. The aforementioned action will reduce the constraints and impact on the public in the affected airspace. Therefore, I find that notice and public procedure thereon are not necessary.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (44 FR 353) is amended by revoking the Annette Island control zone.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 1134, February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, and anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Anchorage, Alaska, on June 1, 1979.

Robert L. Faith,

Director, Alaskan Region.

[FR Doc. 79-18095 Filed 6-13-79; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 79-SO-78]

Alteration of VOR Federal Airway

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment realigns Victor airway V-159 in the vicinity of Fort Lauderdale, Florida. This action provides an alternate route for traffic between Fort Lauderdale and Vero Beach, Florida and increases efficient use of the airspace by reducing congestion in the Palm Beach, Florida, area.

EFFECTIVE DATE: August 9, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. John Watterson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8526.

SUPPLEMENTARY INFORMATION:

History

On March 29, 1979, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to realign a segment of V-159 between Fort Lauderdale and Vero Beach, Florida, to provide for more efficient use of the airspace (44 FR 18088). Interested persons were invited to participate in the rulemaking proceeding by submitting written comments on the proposal to FAA. No objections were received. This amendment is that proposed in the notice. Subpart C of Part 71 was republished in the Federal Register on January 2, 1979 (44 FR 307).

The Rule

This amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) realigns a segment of V-159 between Fort Lauderdale and Vero Beach, Florida. The realignment provides more flexibility for traffic operations in the area and reduces the potential for traffic congestion in the Palm Beach, Florida area. This action improves ATC services and provides for more efficient use of the airspace.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (44 FR 307) is amended, effective 0901 G.m.t., August 9, 1979, as follows:

Under V-159—"From Miami, Fla., INT Miami 327° and Palm Beach, Fla., 322° radials; Palm Beach; INT Palm Beach 328° and Vero Beach, Fla., 178° radials; Vero Beach;" is deleted and "From Fort Lauderdale, Fla., via Fort Lauderdale 329° and Vero Beach, Fla., 178° radials; Vero Beach;" is substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a), and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69).

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Washington, D.C., on June 7, 1979.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc. 79-18682 Filed 6-13-79; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 79-AL-5]

Rescission of Reporting Point

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment rescinds HAPIT as a compulsory reporting point at the intersection of bearings from Ocean Cape, Alaska, Nondirectional Radio Beacon (NDB) and Cape Spencer, Alaska, NDB. This action relieves pilots of the responsibility of reporting at this position without being asked to do so by air traffic control. This action also helps to simplify chart depiction.

EFFECTIVE DATE: August 9, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-3715.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Part 71 is to rescind the HAPIT reporting point in Alaska. This action will relieve a burden on pilots using Amber 1 and Blue 37 airways who have been required to report their position at this location without being asked to do so. Because this action merely rescinds a reporting point in accordance with the requirements of current air traffic control procedures without altering any route structure or designated airspace, it is a minor matter on which the public would have no particular desire to comment. Therefore, notice and public procedure thereon are unnecessary.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to be by the Administrator, § 71.211 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (44 FR 650) is amended, effective 0901 G.M.T., August 9, 1979, as follows:

HAPIT: title and text is deleted.

(Secs. 307(a), and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69).

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Washington, D.C., on June 7, 1979.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

14 CFR Part 71

[Airspace Docket No. 79-RM-05]

Establishment of Transition Areas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes a 700' and 1,200' transition area at Hettinger, North Dakota to provide controlled airspace for aircraft executing the new nondirectional radio beacon (NDB) standard instrument approach procedure developed for the Hettinger Municipal Airport, Hettinger, North Dakota.

EFFECTIVE DATE: 0901 G.m.t., August 9, 1979.

FOR FURTHER INFORMATION CONTACT: Pruett B. Helm, Operations, Procedures and Airspace Branch, Air Traffic Division, ARM-500, Federal Aviation Administration, Rocky Mountain Region, 10455 East 25th Avenue, Aurora, Colorado 80010; telephone (303) 837-3937.

SUPPLEMENTARY INFORMATION:

History

On Monday, March 19, 1979, the FAA published for comment (44 FR 16438) a proposal to establish a 700' and 1,200' transition area at Hettinger, North Dakota. In the NPRM, it was noted that a typographical error was made in the description of the 700' transition area. In the fourth line it showed the 132° bearing; this should read the 157° bearing. This error was considered minor and is corrected in the final rule. The only comment received was from W. L. Marcy of the Experimental Aircraft Association (EAA), Rocky Mountain Region Chapter 301, objecting to the following:

a. The proposed 1,200' transition area could restrict VFR traffic and force VFR traffic to fly at relatively unsafe altitudes.

b. Off-airway IFR operations at large distances from an IFR airport as low as 1,500' AGL is unduly hazardous and creates an excessive area which must be monitored by ATC.

c. The 1,200' transition area is excessive in size.

In consideration of the objections by W. L. Marcy of the EAA, Rocky Mountain Chapter 301, is was disclosed that:

a. VFR aircraft are not restricted from controlled airspace as they can operate in controlled airspace in accordance with FAR 91.105. Additionally, the establishment of controlled airspace with its increased meteorological requirements will enhance aviation by virtue of enabling the air traffic control system to provide separation and enhance the pilot's responsibility when meterorological conditions permit, to see and avoid other traffic, terrain, or other obstacles, regardless of type of flight plan and whether or not under control of radar facility.

b. The minimum obstruction clearance altitude (MOCA) is 1,000' above the highest obstacle within a horizontal distance of 5 statue miles from the course to be flown. The 1,200' transition floor is designed to provide controlled airspace to assure air safety and allow flexibility to utilize all available airspace for all traffic control purposes.

c. The 1,200' transition area was designed to give the air traffic control system the flexibility to allow the IFR pilot to transition from the surrounding en route structure and navigational aids for expeditious routing and fuel economy to execute the new NDB standard instrument approach procedure developed for Hettinger Municipal Airport, Hettinger, North Dakota.

Rule

This amendment to Subpart G of Part 71 of the Federal Aviation Administration regulations (FAR's) establishes 700' and 1,200' transition areas at Hettinger, North Dakota to provide controlled airspace for aircraft transitioning from the existing en route structure, navigational aids to execute the new NDB standard instrument approach procedure developed for the Hettinger Municipal Airport, Hettinger, North Dakota.

Drafting Information

The principal authors of this document are Pruett B. Helm, Operations, Procedures and Airspace

Branch, Air Traffic Division, and Daniel J. Peterson, Office of Regional Counsel.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended effective 0901 G.M.t., August 9, 1979, as follows:

By amending Subpart G, § 71.181 to establish the following transition area to read:

Hettinger, North Dakota

That airspace extending upward from 700' above the surface within a 5.5 mile radius of the Hettinger Municipal Airport (latitude 46°00'48" N., longitude 102°39'00" W.), and within 3 miles each side of the 157° bearing from the Hettinger NDB (latitude 46°00'59" N., longitude 102°39'35" W.) extending from the 5.5 mile radius area to 8.5 miles southeast of the Hettinger NDB, and that airspace extending upward from 1,200' above the surface bounded on the north by V-2, on the east by V-169, on the south by V-128, and on the west by the Bowman, North Dakota 1,200' transition area excluding the Bismark, North Dakota 1,200' transition area.

(Sec. 307(a) Federal Aviation Act of 1958 (49 U.S.C. 1348 (a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c); and 14 CFR 11.69).

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Aurora, Colo., on June 5, 1979.

M. M. Martin,

Director, Rocky Mountain Region.

[FR Doc. 79-18838 Filed 6-13-79; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 79-RM-29]

Establishment and Alteration of Transition Areas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This Amendment alters the existing 700' transition area and establishes a 1,200' transition area at Moab, Utah to provide controlled airspace for aircraft executing the new VOR/DME Runway 23 standard instrument approach procedure developed for Canyonlands Field Airport, Moab, Utah and additional controlled airspace for air traffic control purposes.

EFFECTIVE DATE: 0901 GMT August 9, 1979.

FOR FURTHER INFORMATION CONTACT: David M. Laschinger, Operations, Procedures and Airspace Branch, Air Traffic Division, ARM-500, Federal Aviation Administration, Rocky Mountain Region, 10455 East 25th Avenue, Aurora, Colorado 80010; telephone (303) 837-3937.

SUPPLEMENTARY INFORMATION:

History

On March 26, 1979, the FAA published for comment a Notice of Proposed Rulemaking (NPRM) to alter the 700' transition area and establish a 1,200' transition area at Moab, Utah. Two letters of objection were received as a result of this circular. The United States Air Force objected to the proposal based upon potential effect on military training routes. However, subsequent coordination resulted in the withdrawal of their objection. W. L. Marcy from the Experimental Aircraft Association (EAA), Chapter 301, objected to the proposal contending the following:

a. The 700' transition area as proposed is much larger than it needs to be.

b. With the establishment of a 1,200' transition area, VFR traffic attempting to traverse this region in IFR conditions, and therefore flying at 1,200' AGL or less, will be constrained to fly circuitous routes along canyons and washes, and dangerously near peaks and ridges which are often awash with severe up and downdrafts.

c. The FAA should consider the number of IFR flights per year anticipated at Canyonlands Field, the percentage of that number that may require the use of off-airway controlled airspace for holding purposes, the number of VFR operations per year at all five airports within this area, and the number of these operations that can be expected to be rerouted, curtailed, or canceled by being forced to avoid controlled airspace in IFR conditions.

d. The 1,200' transition area should be reduced and changed to a level floor zone appropriate to the needs of IFR flight and the ability of the ATC radar system to monitor it.

In consideration of the objections of Mr. Marcy it was disclosed:

a. The proposed 700' transition area was designed to contain arriving IFR operations below 1,500 feet above the surface and departing IFR operations until they reach 1,200 feet above the surface. Therefore, the size is deemed appropriate.

b. The establishment of controlled airspace, with its increased meteorological requirements, will enhance aviation safety by virtue of enabling the air traffic control system to provide separation and enhance the pilot's responsibility when meteorological conditions permit, to see and avoid other traffic, terrain or other obstacles, regardless of type of flight plan and whether or not under control of a radar facility.

c. The minimum obstruction clearance altitude (MOCA) is 1,000' above the highest obstacle within a horizontal distance of 5 statute miles from the course to be flown. The 1,200' transition floor is consistent with FAA policy to provide controlled airspace to assure air safety and allow flexibility to utilize all available airspace for air traffic control purposes.

Rule

This amendment to Subpart G of Part 71 of the Federal aviation Regulations (FAR's) alters the 700' transition area and establishes a 1,200' transition area at Moab, Utah. This action is necessary to provide controlled airspace for aircraft executing the new VOR/DME Runway 33 standard instrument approach procedure to Canyonlands Field Airport, Moab, Utah and additional controlled airspace for air traffic control purposes.

Drafting Information

The principal authors of this document are David M. Laschinger, Operations, Procedures and Airspace Branch, Air Traffic Division, and Daniel J. Peterson, office of Regional Counsel.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71 is amended effective 0901 G.M.T., August 9, 1979, as follows:

By amending Subpart G, § 71.181 by designating the following 700' and 1,200' transition areas:

Moab, Utah

That airspace extending upward from 700' above the surface within a 10 mile radius of the Canyonlands Field Airport, Moab, Utah (latitude 38°45'34.3" N., longitude 109°44'08.1" W.) and within 7 miles northeast and 10 miles southwest of the Moab VOR (latitude 38°45'23" N., longitude 109°44'35" W.) 301° radial extending from the 10 mile radius area to 18.5 miles northwest of Moab, Utah; and that airspace extending upward from 1,200' above the surface bounded on the north by

V-134, on the east by V-187W, on the south by V-244 and on the west by V-206, excluding the Price, Utah and Grand Junction, Colorado transition areas and all Federal airways.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69).

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Aurora, Colo., on June 4, 1979.

M. M. Martin,

Director, Rocky Mountain Region.

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket Number 79-CE-7]

Designation of Transition Area—Emmetsburg, Iowa

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this federal action is to designate a 700-foot transition area at Emmetsburg, Iowa, to provide controlled airspace for aircraft executing a new instrument approach procedure to the Emmetsburg, Iowa Airport, based on the Non-Directional Radio Beacon (NDB), a navigational aid being installed on the airport. The intended effect of this action is to ensure segregation of aircraft using the new approach procedure under Instrument Flight Rules (IFR) and other aircraft operating under Visual Flight Rules (VFR).

EFFECTIVE DATE: August 9, 1979.

FOR FURTHER INFORMATION CONTACT: Dwaine E. Hiland, Airspace Specialist, Operations, Procedures and Airspace Branch, Air Traffic Division, ACE-537, FAA, Central Region, 601 East 12th Street, Kansas City, Missouri 64106, telephone (816) 374-3408.

SUPPLEMENTARY INFORMATION: An instrument approach procedure to the Emmetsburg, Iowa Airport, is being established based on a Non-Directional Radio Beacon (NDB), a navigational aid being installed on the airport. This radio facility provides new navigational guidance for aircraft utilizing the airport. The establishment of an instrument approach procedure based on this approach aid entails the designation of a transition area at Emmetsburg, Iowa, at an above 700 feet above the ground (AGL) within which aircraft are provided air traffic control service. The intended effect of this action is to ensure segregation of aircraft using the new approach procedure under Instrument Flight Rules (IFR) and other aircraft operating under Visual Flight Rules (VFR).

Discussion of Comments

On pages 21815 and 21816 of the **Federal Register** dated April 12, 1979, the Federal Aviation Administration published a Notice of Proposed Rule Making which would amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Emmetsburg, Iowa. Interested persons were invited to participate in this rule making proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the Notice of Proposed Rule Making.

Accordingly, Subpart G, § 71.181 of the Federal Aviation Regulations (14 CFR 71.181) as republished on January 2, 1979, (44 FR 442), is amended effective 0901 G.M.T. August 9, 1979, by adding the following new transition area:

Emmetsburg, Iowa

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Emmetsburg Airport (latitude 43°06'12" N., longitude 94°42'24" W.) and within 3 miles each side of the 121° bearing from the Emmetsburg NDB (latitude 43°06'04" N., longitude 94°42'25" W.), extending from the 5-mile radius area to 8½ miles southeast of the airport and within 3 miles each side of the 326° bearing from the Emmetsburg NDB extending from the 5-mile radius area to 8½ miles northwest of the airport.

(Sec. 307(a), Federal Aviation Act of 1958 as amended (49 U.S.C. 1348); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); sec. 11.69 of the Federal Aviation Regulations (14 CFR 11.69)).

Note.—The FAA has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Kansas City, Missouri, on June 1, 1979.

John E. Shaw,

Acting Director, Central Region.

[FR Doc. 79-18802 Filed 6-13-79; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 79-WA-7]

Designation of Federal Airways

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment designates a very short segment of a Canadian airway V367 for a distance of less than 5 miles from the International Falls, Minnesota, VORTAC to the U.S./Canadian boundary on a direct radial to the Sioux Lookout, Ontario, radio beacon. This action would help to provide air traffic services, published radial/bearing and minimum altitudes on a route that is presently being used without these advantages.

EFFECTIVE DATE: August 9, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone: (202) 426-3715.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Part 71 is to designate the United States segment of Canadian airway V-367 between International Falls and Sioux Lookout as requested by the Canadian Government. This segment of airway is relatively short and is in an area that is presently designated as controlled airspace in Part 71; therefore, this action will add no new controlled airspace. Thus, it is a minor matter on which the public would have no particular desire to comment. Therefore, notice and public procedure are unnecessary.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (44 FR 307) is amended, effective 0901 G.m.t., August 9, 1979 by adding the following:

"V-367 From International Falls, Minnesota, to Sioux Lookout, Ontario, Canada, excluding the portion within Canada."

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a));

sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89).

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Washington, D.C., on June 7, 1979.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 79-EA-74]

Designation of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment designates the Stone Harbor, N.J., transition area. This action lowers the floor of controlled airspace outside the United States to permit a lower minimum en route altitude to accommodate helicopter activity to and from oil rig sites east of the state of New Jersey.

EFFECTIVE DATE: August 9, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. John Watterson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8525.

SUPPLEMENTARY INFORMATION:

History

On May 3, 1979, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate a Stone Harbor, N.J., transition area (44 FR 25665). This action would lower the floor of controlled airspace from 2,000 feet MSL to 1,200 feet MSL. Such action would permit a reduction in the available minimum en route altitude from 2,300 feet MSL to 1,500 feet MSL to accommodate IFR helicopter over water operations to and from oil rig sites east of the state of New Jersey. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received. Section 71.181 was republished in the Federal Register on January 2, 1979 (44 FR 442).

The Rule

This amendment to Part 71 of the Federal Aviation Regulations designates a Stone Harbor, N.J., transition area to lower the floor of controlled airspace to permit a reduction in minimum en route altitude from 2,300 feet MSL to 1,500 feet MSL. This reduction would permit the use of lower altitudes to accommodate IFR helicopter over water operations to and from off-shore oil rig sites.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (44 FR 442) is amended, effective 0901 G.M.T., August 9, 1979, as follows:

Under § 71.181 add—"Stone Harbor, N.J. That airspace extending upward from 1,200 feet MSL beginning at Lat. 39°10'00" N., Long. 74°40'00" W.; to Lat. 38°48'00" N., Long. 74°08'00" W.; to Lat. 38°39'00" N., Long. 74°48'00" W.; to point of beginning."

(Secs. 307(a), 313(a), and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a), and 1510; Executive Order 10854 (24 FR 9565); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89).

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Washington, D.C., on June 7, 1979.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

14 CFR Part 71

[Airspace Docket No. 79-GW-3]

Alternation of VOR Federal Airway V-17

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment rescinds a segment of V-17E between San Antonio, Tex., and Austin, Tex., and also establishes a standard west alternate (V-17W) between McAllen, Tex., and Laredo, Tex. This alternate airway helps to expedite the movement of air traffic northwest of McAllen. V-17E is not used north of San Antonio.

EFFECTIVE DATE: August 9, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8715.

SUPPLEMENTARY INFORMATION:

History

On April 12, 1979, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to rescind a segment of V-17E between San Antonio, and Austin, because it is not used and designate a segment of V-17W between McAllen, and Laredo to help expedite the movement of air traffic northwest of McAllen. (44 FR 21814).

Interested persons were invited to participate in the rulemaking proceeding by submitting written comments on the proposal to the FAA. The comments received expressed no objection to the proposal. Section 71.123 of Part 71 was published in the Federal Register on January 2, 1979, (44 FR 307).

The Rule

This amendment to Part 71 of the Federal Aviation Regulations rescinds an unused segment of alternate airway between San Antonio and Austin. This will help to reduce chart clutter and possible confusion in that area. This amendment also designates a new segment of alternate airway between McAllen and Laredo to help reduce congestion and increase air traffic handling capability in that area.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (44 FR 307) is amended, effective 0901 G.m.t., August 9, 1979 as follows:

Under V-17 "Laredo, Tex.;" is deleted and "Laredo, Tex., including a W alternate;" is substituted therefor. Also, "Austin, including an east alternate via the INT of San Antonio 056° and Austin 211° radials, and also" is deleted and "Austin," is substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89).

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Washington, D.C., on June 6, 1979.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 79-GL-7]

Designation of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this federal action is to designate controlled airspace near Warroad, Minnesota to accommodate a new instrument approach into Warroad International Airport (Swede Carlson Field), Warroad, Minnesota, established on the basis of a request from the Warroad Airport officials to provide that facility with instrument approach capability.

EFFECTIVE DATE: August 9, 1979.

FOR FURTHER INFORMATION CONTACT: Doyle W. Hegland, Airspace and Procedures Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, Telephone (312) 694-4500, Extension 456.

SUPPLEMENTARY INFORMATION: The intended effect of this action is to insure segregation of the aircraft using this approach procedure in instrument weather conditions and other aircraft operating under visual conditions. The floor of the controlled airspace in this area will be lowered from 1200' above ground to 700' above ground. The development of the proposed instrument procedures necessitates the FAA to lower the floor of the controlled airspace to insure that the procedure will be contained within controlled airspace. The minimum descent altitude for this procedure may be established below the floor of the 700 foot controlled airspace. In addition, aeronautical maps and charts will reflect the area of the instrument procedure which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

Discussion of Comments

On page 22471 of the Federal Register dated April 16, 1979, the Federal Aviation Administration published a Notice of Proposed Rule Making which would amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Warroad, Minnesota. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the Notice of Proposed Rule Making.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective August 9, 1979, as follows:

In § 71.181 (44 FR 442), the following addition should be made to the existing Warroad, Minnesota transition area:

Warroad, Minnesota

That airspace extending upward from 700 feet above the surface within a 6 statute mile radius (5.3 nautical miles) of the Warroad International, Swede Carlson Field (latitude 48°55'15"N., longitude 95°20'30"W., estimated) excluding that area north of latitude 49° (Canadian airspace) and within three statute miles (2.5 nautical miles) each side of the 106° true bearing from the Warroad International, Swede Carlson Field, extending from the six statute mile (5.3 nautical miles) radius to 8.5 statute miles (7 nautical miles) east southeast of the airport.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); sec. 11.61 of the Federal Aviation Regulations (14 CFR 11.61).)

The Federal Aviation Administration has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A copy of the final evaluation prepared for this document is contained in the docket. A copy of it may be obtained by writing to the Federal Aviation Administration, Attention: Rules Docket Clerk (AGL-7), Docket No. 79-GL-7, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

Issued in Des Plaines, Ill., on June 6, 1979.

Wayne J. Barlow,

Acting Director, Great Lakes Region.

[FR Doc. 79-18130 Filed 6-13-79; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 79-GL-3]

Designation of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this federal action is to designate controlled airspace near Neilsville, Wisconsin to accommodate a new non-directional beacon (NDB) Runway 27 instrument approach into Neilsville Municipal Airport, Neilsville, Wisconsin, established on the basis of a request from the Neilsville Airport officials to provide that facility with instrument approach capability.

EFFECTIVE DATE: August 9, 1979.

FOR FURTHER INFORMATION CONTACT: Doyle W. Hegland, Airspace and Procedures Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, Telephone (312) 694-4500, Extension 456.

SUPPLEMENTARY INFORMATION: The intended effect of this action is to insure segregation of the aircraft using this approach procedure in instrument weather conditions and other aircraft operating under visual conditions.

The floor of the controlled airspace in this area will be lowered from 1200' above ground to 700' above ground. The development of the proposed instrument procedures necessitates the FAA to lower the floor of the controlled airspace to insure that the procedure will be contained within controlled airspace. The minimum descent altitude for this procedure may be established below the floor of the 700 foot controlled airspace. In addition, aeronautical maps and charts will reflect the area of the instrument procedure which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

Discussion of Comments

On page 20448 of the Federal Register dated April 5, 1979, the Federal Aviation Administration published a Notice of Proposed Rule Making which would amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Neilsville,

Wisconsin. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the Notice of Proposed Rule Making.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective August 9, 1979, as follows:

In § 71.181 (44 FR 442), the following addition should be made to the existing Neillsville, Wisconsin transition area:

Neillsville, Wisconsin

That airspace extending upward from 700 feet above the surface within a five (5) mile radius of Neillsville Municipal Airport (latitude 44°33'15" N., longitude 90°30'45" W.) and within three (3) miles each side of the 092° bearing from the Neillsville Airport, extending from the five (5) mile radius area to eight (8) miles east of the airport.

(Sec. 307(a), Federal Aviation Act of 1958 (47 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); sec. 11.61 of the Federal Aviation Regulations (14 CFR 11.61)).

The Federal Aviation Administration has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A copy of the final evaluation prepared for this document is contained in the docket. A copy of it may be obtained by writing to the Federal Aviation Administration, Attention: Rules Docket Clerk (AGL-7), Docket No. 79-GL-3, 2300 East Devon Avenue, Des Plaines, Illinois.

Issued in Des Plaines, Ill., on June 8, 1979.

Wayne J. Barlow,

Acting Director, Great Lakes Region.

14 CFR Parts 71, 73

[Airspace Docket No. 79-NW-2]

Establishment of Temporary Restricted Areas and Alteration of Continental Control Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: These amendments establish temporary joint use restricted areas in the Yakima, Wash., area to contain a military joint readiness exercise called BRAVE SHIELD 20. This action provides for the safe and efficient use of the navigable airspace by prohibiting unauthorized flight operations of nonparticipating aircraft within the temporary restricted areas during the hours this area is activated August 16 through August 23, 1979.

EFFECTIVE DATE: August 9, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Lewis W. Still, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8525.

SUPPLEMENTARY INFORMATION:

History

On April 23, 1979, the FAA proposed to amend Parts 71 and 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) to establish Temporary Restricted Areas identified as R-6714A, R-6714B, R-6714C, R-6714D, R-6714E, R-6714G and R-6714H in the Fort Lewis/Yakima, Wash., area to contain a military joint service exercise known as BRAVE SHIELD 20. Since these restricted areas penetrate the Continental Control Area, they are added to Subpart D of Part 71 to provide controlled airspace for the duration of their designation (44 FR 23677). Interested persons were invited to participate in the rulemaking by submitting written comments on the proposal to the FAA. No comments were received. Sections 71.151 and 73.67 were republished in the Federal Register on January 2, 1979 (44 FR 344 and 716).

The Rule

These amendments to Parts 71 and 73 of the Federal Aviation Regulations designate Temporary Restricted Areas in the vicinity of Yakima, Wash., to protect nonparticipating aircraft during the time that BRAVE SHIELD 20 readiness exercise is in operation. In addition, the airspace at above 14,500 feet MSL within these Temporary Restricted Areas during the designated period is included in the Continental Control Area. Headquarters Tactical Air Command has provided certification that the requirements of the National Environmental Policy Act has been met.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart D of Part 71 and Subpart B of Part 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) as republished (44 FR 344 and 716) is amended, effective 0901 G.M.T., August 9, 1979 as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

§ 71.151 [Amended]

Under § 71.151 (44 FR 344) the following temporary restricted areas are added for the duration of their time of designation from 0001 local time August 16, 1979 to 2359 local time August 23, 1979.

R-6714E BRAVE SHIELD 20, Wash.
R-6714F BRAVE SHIELD 20, Wash.
R-6714G BRAVE SHIELD 20, Wash.
R-6714H BRAVE SHIELD 20, Wash.

PART 73—SPECIAL USE AIRSPACE

§ 73.67 [Amended]

Under § 73.67 (44 FR 716) the following temporary restricted areas are added:

R-6714E BRAVE SHIELD 20, Wash.

Boundaries. Beginning at Lat. 46°37'00" N., Long. 120°20'00" W.; to Lat. 46°36'00" N., Long. 120°29'00" W.; to Lat. 46°35'00" N., Long. 120°36'00" W.; to Lat. 46°36'00" N., Long. 120°31'00" W.; to Lat. 46°39'00" N., Long. 119°57'00" W.; to Lat. 46°34'30" N., Long. 120°15'00" W.; along the western boundary of R-6714A to point of beginning.
Designated altitudes. 200 feet AGL up to and including 6,000 feet MSL.
Time of designation. Continuous, 0001 August 16 to 2359, local time, August 23, 1979.
Controlling agency. Federal Aviation Administration, Seattle ARTC Center.
Using agency. U.S. Air Force Tactical Air Command/USAF Readiness Command (TAC/USAFRED), Langley Air Force Base, Va. 23665.

R-6714F BRAVE SHIELD 20, Wash.

Boundaries. Beginning at Lat. 46°39'00" N., Long. 119°57'00" W.; to Lat. 46°36'00" N., Long. 119°19'00" W.; to Lat. 46°32'00" N., Long. 119°15'00" W.; to Lat. 46°46'00" N., Long. 119°15'00" W.; to point of beginning.
Designated altitudes. 15,000 feet MSL up to and including FL 200.
Time of designation. Continuous, 0001 August 16 to 2359, local time, August 23, 1979.
Controlling agency. Federal Aviation Administration, Seattle ARTC Center.
Using agency. U.S. Air Force Tactical Air Command/USAF Readiness Command (TAC/USAFRED), Langley Air Force Base, Va. 23665.

R-6714G BRAVE SHIELD 20, Wash.

Boundaries. Beginning at Lat. 46°34'30" N., Long. 120°15'00" W.; to Lat. 46°39'00" N., Long. 119°57'00" W.; to Lat. 46°46'00" N., Long. 119°15'00" W.; to Lat. 46°46'00" N., Long. 119°03'00" W.; to Lat. 46°40'00" N., Long. 118°57'00" W.; to Lat. 46°30'00" N., Long. 119°22'00" W.; to Lat. 46°27'00" N., Long. 119°41'00" W.; to Lat. 46°28'00" N.,

Long. 120°00'00" W.; thence along the southern boundaries of R-6716C/B and the eastern boundaries of R-6714B/A to the point of beginning, but excluding the airspace at and below 2,200 feet MSL within a 1½ NM radius of Vantage, Wash., Airport, and within a corridor extending northward from the airport and conforming to the boundaries of the Columbia River.

Designated altitudes. 200 feet AGL up to and including FL 200.

Time of designation. Continuous, 0001 August 16 to 2359, local time, August 23, 1979.

Controlling agency. Federal Aviation Administration, Seattle ARTC Center.

Using agency. U.S. Air Force Tactical Air Command/USAF Readiness Command (TAC/USAFRED), Langley Air Force Base, Va. 23665.

R-6714H BRAVE SHIELD 28, Wash.

Boundaries. Beginning at Lat. 46°27'00" N., Long. 119°41'00" W.; to Lat. 46°39'00" N., Long. 119°22'00" W.; to Lat. 46°40'00" N., Long. 118°57'00" W.; to Lat. 46°20'00" N., Long. 119°15'00" W.; to point of beginning.

Designated altitudes. 15,000 feet MSL up to and including FL 200.

Time of designation. Continuous, 0001 August 16 to 0001, local time, August 23, 1979.

Controlling agency. Federal Aviation Administration, Seattle ARTC Center.

Using agency. U.S. Air Force Tactical Air Command/USAF Readiness Command (TAC/USAFRED), Langley Air Force Base, Va. 23665.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85.)

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Washington, D.C., on June 7, 1979.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc. 79-18811 Filed 6-13-79; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Parts 71, 73

[Airspace Docket No. 78-EA-73]

Alteration of Federal Airways and Restricted Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: These amendments divide the Warren Grove, N.J., restricted area (R-5002) into five areas and increase the overall restricted airspace. They also alter airways to bypass or exclude the restricted areas. These actions permit greater use of the separate areas for military and nonmilitary use.

EFFECTIVE DATE: August 9, 1979.

FOR FURTHER INFORMATION CONTACT:
Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-3715.

SUPPLEMENTARY INFORMATION:

History

On March 28, 1979, the FAA proposed to amend Parts 71 and 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) to increase the size of the Warren Grove, N.J., restricted area and divide it into five areas, and to alter several airways to bypass or exclude the restricted areas (44 FR 18043). Interested persons were invited to participate in the rulemaking proceeding by submitting written comments on the proposal to the FAA. The comments received expressed no objection to the proposal except for one commentor who objected to that part of the proposal to expand R-5002B over a small part of the Garden State Parkway which is occasionally used as a VFR flyway. Action is taken herein to reduce the proposed expansion of R-5002B to the extent that it will not conflict with this flyway. This reduction is satisfactory to the objector and to the military proponent. This rule is the same as the Notice of Proposed Rule Making (NPRM) except that the size of R-5002B is reduced as stated above and the alteration of V-44 is an addition of a south alternate via the proposed route rather than the realignment of the present airway between Atlantic City and Deer Park. Retention of the present alignment of V-44 will permit the use of this shorter route when the restricted areas are not in use. Because these changes from the NPRM merely retain the segment of V-44, renumber the new segment as V-44S and reduce the proposed size of R-5002B, they are minor matters on which the public would have no particular desire to comment. Therefore, notice and public procedure thereon are unnecessary. § 71.123 of Part 71 and § 73.50 of Part 73 were published in the Federal Register on January 2, 1979 (44 FR 307, 702) and amended (44 FR 1087).

Since these actions involve in part, the designation of navigable airspace outside the United States, the Administrator has consulted with the Secretary of State and the Secretary of Defense in accordance with the provisions of Executive Order 10854.

The Rule

These amendments to Parts 71 and 73 of the Federal Aviation Regulations alter the Warren Grove restricted area by enlarging it and dividing it into five separate areas and alter V-44, V-229, V-1, V-16, and V-312 airways to bypass or exclude the Warren Grove restricted areas. Alignment of a segment of V-44E via the INT of Atlantic City, N.J., 055°T (055°M) and Deer Park, N.Y., 209°T (221°M) radials and the realignment of a segment of V-229 via the INT of Atlantic City 055°T (055°M) and Kennedy, N.Y., 194°T (205°M) radials cause these airways to bypass the restricted areas sufficiently to permit their simultaneous use. Segments of these airways are reduced slightly in width. Dividing the restricted areas provide for a greater use of the airspace by permitting different areas (upper, lower, side by side) to be used for military and nonmilitary operation at the same time.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Parts 71 and 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) as republished (44 FR 307, 702) and amended (44 FR 1087) is further amended, effective 0901 G.m.t., August 9, 1979 as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

§ 71.123 [Amended]

In § 71.123; Under V-1 "R-5002 is excluded." is deleted and "R-5002A, R-5002C and R-5002D are excluded during their times of use." is substituted therefor.

Under V-16 "The airspace within R-5002A, R-5002C and R-5002D is excluded during their times of use." is added.

Under V-44 all after "Atlantic City;" is deleted and "INT Atlantic City 048° and Deer Park, N.J., 209° radials, including a south alternate via INT Atlantic City 055° and Deer Park 209° radials; to Deer Park. The airspace within R-4001B, R-5002A, R-5002B and R-5002E is excluded during their times of use. The airspace within V-139, V-308 airways is excluded. The airspace below 2,000 feet MSL outside the United States is excluded." is substituted therefor.

Under V-229 "INT of Atlantic City 048° and Kennedy, N.Y., 195° radials;" is deleted and "INT of Atlantic City 055° and Kennedy, N.Y., 194° radials;" is substituted therefor. All after "Burlington, Vt., 160° radials;" is deleted and "Burlington. The airspace within R-5002A, R-5002B and R-5002E is excluded during their times of use. The airspace within V-139, V-306 airways; the airspace below 2,000 feet MSL outside the United States and the airspace above 7,000 feet MSL between the INT of Atlantic City 055° and Kennedy 194° radials and Kennedy is excluded." is substituted therefor.

Under V-312 "R-5002" is deleted and "R-5002D" is substituted therefor.

PART 73—SPECIAL USE AIRSPACE

§ 73.50 [Amended]

In § 73.50 R-5002 Warren Grove, N.J., title and text is deleted.

R-5002A Warren Grove, N.J., is added as follows:

R-5002A Warren Grove, N.J.

Boundaries: Beginning at lat. 39°43'25" N., long. 74°17'37" W.; to lat. 39°38'25" N., long. 74°24'20" W.; to lat. 39°38'30" N., long. 74°29'30" W.; to lat. 39°30'20" N., long. 74°30'00" W.; to lat. 39°44'50" N., long. 74°24'40" W.; to lat. 39°44'50" N., long. 74°19'20" W.; to the point of beginning.
Designated altitudes: Surface to 14,000 feet MSL.
Time of designation: Sunrise to sunset, Tuesday through Saturday; other days by NOTAM 48 hours in advance.
Controlling agency: Federal Aviation Administration, New York ARTCC.
Using agency: Commander, 108th Tactical Fighter Wing, New Jersey Air National Guard, McGuire AFB, N.J.

R-5002B Warren Grove, N.J., is added as follows:

R-5002B Warren Grove, N.J.

Boundaries: Beginning at lat. 39°41'00" N., long. 74°20'52" W.; to lat. 39°40'10" N., long. 74°20'15" W.; to lat. 39°38'50" N., long. 74°21'20" W.; to lat. 39°36'00" N., long. 74°26'30" W.; to lat. 39°36'00" N., long. 74°27'30" W.; to lat. 39°37'00" N., long. 74°28'50" W.; to lat. 39°38'30" N., long. 74°29'30" W.; to lat. 39°38'25" N., long. 74°24'20" W.; to the point of beginning.
Designated altitudes: 1,000 feet MSL to 14,000 feet MSL.
Time of designation: Sunrise to sunset Tuesday through Saturday; other days by NOTAM 48 hours in advance.
Controlling agency: Federal Aviation Administration, New York ARTCC.
Using agency: Commander, 108th Tactical Fighter Wing, New Jersey Air National Guard, McGuire AFB, N.J.

R-5002C Warren Grove, N.J., is added as follows:

R-5002C Warren Grove, N.J.

Boundaries: Beginning at lat. 39°39'20" N., long. 74°30'09" W.; to lat. 39°40'30" N., long. 74°30'40" W.; to lat. 39°44'50" N., long. 74°27'30" W.; to lat. 39°44'50" N., long. 74°24'40" W.; to the point of beginning.
Designated altitudes: Surface to 3,000 feet MSL.
Time of designation: Sunrise to sunset, Tuesday through Saturday; other days by NOTAM 48 hours in advance.
Controlling agency: Federal Aviation Administration, New York ARTCC.
Using agency: Commander, 108th Tactical Fighter Wing, New Jersey Air National Guard, McGuire AFB, N.J.

R-5002D Warren Grove, N.J., is added as follows:

R-5002D Warren Grove, N.J.

Boundaries: Beginning at lat. 39°44'50" N., long. 74°24'40" W.; to lat. 39°45'20" N., long. 74°23'45" W.; to lat. 39°45'50" N., long. 74°20'00" W.; to lat. 39°44'50" N., long. 74°19'20" W.; to the point of beginning.
Designated altitudes: Surface to 4,000 feet MSL.
Time of designation: Sunrise to sunset, Tuesday through Saturday; other days by NOTAM 48 hours in advance.
Controlling agency: Federal Aviation Administration, New York ARTCC.
Using agency: Commander, 108th Tactical Fighter Wing, New Jersey Air National Guard, McGuire AFB, N.J.

R-5002E Warren Grove, N.J., is added as follows:

R-5002E Warren Grove, N.J.

Boundaries: Beginning at lat. 39°43'25" N., long. 74°17'37" W.; to lat. 39°41'00" N., long. 74°20'52" W.; to lat. 39°40'10" N., long. 74°20'15" W.; to the point of beginning.
Designated altitudes: 3,500 feet MSL to 14,000 feet MSL.
Time of designation: Sunrise to sunset, Tuesday through Saturday; other days by NOTAM 48 hours in advance.
Controlling agency: Federal Aviation Administration, New York ARTCC.
Using agency: Commander, 108th Tactical Fighter Wing, New Jersey Air National Guard, McGuire AFB, N.J.

(Secs. 307(a), 313(a) and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a) and 1510); Executive Order 10854 (24 FR 9565); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Washington, D.C., on June 7, 1979.

R. Keith Potts,
Acting Chief, Airspace and Air Traffic Rules Division.

14 CFR Parts 71, 73

[Airspace Docket No. 78-RM-36]

Designation of Restricted Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: These amendments designate a restricted area at Blanding, Utah, to contain the launching and patterns of Advanced Strategic Air Launched Missiles (ASALM). These actions provide for the safe and efficient use of the navigable airspace by prohibiting unauthorized flight operations within the restricted area during its time of designation.

EFFECTIVE DATE: August 9, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. John Watterson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone (202) 426-8525.

SUPPLEMENTARY INFORMATION:

History

On may 10, 1979, the FAA proposed to amend Parts 71 and 73 of Federal Aviation Regulations (14 CFR Parts 71 and 73) to designate a restricted area identified as R-6410, Blanding, Utah, to contain the launching and patterns of Advanced Strategic Air Launched Missiles (ASALM) (44 FR 27494). Since the restricted area would penetrate the Continental Control Area, the FAA proposed to list it under § 71.151 to provide controlled airspace above 14,500 feet MSL. The affected airspace would be prohibited to nonparticipating aircraft during its time of use by the military. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to FAA. No objections were received. Sections 71.151 and 73.64 were republished in the Federal Register on January 2, 1979 (44 FR 344 and 713).

The Rule

These amendments to Parts 71 and 73 of the Federal Aviation Regulations designate restricted area airspace at

Blanding, Utah, to protect nonparticipating aircraft during the time that the area is used for the launching patterns of Advanced Strategic Air Launched Missiles (ASALM). Additionally, the airspace at and above 14,500 feet MSL within the restricted area is included in the Continental Control Area during its time of designation. The U.S. Army has advised that the requirements of the National Environmental Policy Act (NEPA) have been met.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Parts 71 and 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) as republished (44 FR 344 and 713) are amended, effective 0901 G.m.t., August 9, 1979 as follows:

Under § 71.151 (44 FR 344), the following restricted area is added: "R–6410, Blanding, Utah"

Under § 73.64 (44 FR 713), the following is added:

"R–6410 Blanding, Utah

Boundaries. Beginning at Lat. 37°34'08" N., Long. 109°34'16" W.; to Lat. 37°16'10" N., Long. 109°16'00" W.; to Lat. 37°11'40" N., Long. 109°25'15" W.; to Lat. 37°32'36" N., Long. 109°36'54" W.; to point of beginning.

Designated altitudes. Surface to unlimited.

Time of designation. To be activated by NOTAM at least 12 hours in advance.

Controlling agency. Federal Aviation Administration, Denver Air Route Traffic Control Center.

Using Agency. Deputy for Air Force, Armament Development and Testing Center, White Sands Missile Range, New Mex."

(Secs. 307(a), 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69).

Note: The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Washington, D.C., on June 7, 1979.

[Airspace Docket No. 78-RM-32]

Alteration of Restricted Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters Restricted Area R–7001 from its current designated hours and date to "Intermittent," and divides the restricted area vertically as R–7001A and R–7001B. There is no change to the current lateral and vertical limits of the restricted area.

EFFECTIVE DATE: August 9, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Lewis W. Still, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426–8525.

SUPPLEMENTARY INFORMATION: On March 1, 1979, the FAA proposed to amend Part 73 of the Federal Aviation Regulations (14 CFR Part 73) to alter the description of Restricted Area R–7001 by changing the time of designation to "Intermittent" (44 FR 11559). At the present time it is designated as "From 0430 to 2400 local time, March 1 through November 30." Also, R–7001 is vertically segmented as R–7001A and R–7001B. The lateral and vertical limits of the restricted area remain the same. Interested persons were invited to participate in the rulemaking proceeding by submitting comments on the proposal to the FAA. No objections were received. The amendment is the same as that proposed in the notice. Section 73.70 was republished in the **Federal Register** on January 2, 1979 (44 FR 718).

The Rule

The purpose of this amendment to Part 73 of the Federal Aviation Regulations (14 CFR Part 73) is to change the time of designation of R–7001A and R–7001B from its present designation "From 0430 to 2400 local time March 1 through November 30." to "Intermittent." This action will give the U.S. Army more flexibility for training, and increased air-to-ground firing.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 73 of the Federal Aviation Regulations (14 CFR Part 73) as republished (44 FR 718) is amended, effective 0901 G.m.t., August 9, 1979, as follows:

R–7001 Guernsey, Wyo., is rewritten as follows:

R–7001A Guernsey, Wyo.

Boundaries. Beginning at Lat. 42°27'30" N., Long. 104°52'30" W.; to Lat. 42°27'30" N., Long. 104°42'30" W.; to Lat. 42°22'30" N., Long. 104°42'30" W.; to Lat. 42°20'00" N., Long. 104°52'30" W.; to the point of beginning.

Designated altitudes. Surface to but not including 8,000 feet MSL.

Time of designation. Intermittent, 24 hours in advance by NOTAM.

Controlling agency. Federal Aviation Administration, Denver ARTCC.

Using agency. Adjutant General, State of Wyoming.

R–7001B Guernsey, Wyo.

Boundaries. Beginning at Lat. 42°27'30" N., Long. 104°52'30" W.; to Lat. 42°27'30" N., Long. 104°52'30" W.; to Lat. 42°27'30" N., Long. 104°42'30" W.; to Lat. 42°22'30" N., Long. 104°42'30" W.; to Lat. 42°20'00" N., Long. 104°52'30" W.; to the point of beginning.

Designated altitudes. 8,000 feet MSL to 23,500 feet MSL.

Time of designation. Intermittent, 24 hours in advance by NOTAM.

Controlling agency. Federal Aviation Administration, Denver ARTCC.

Using agency. Adjutant General, State of Wyoming.

(Secs. 307(a), 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69).

Note: The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of regulatory evaluation.

14 CFR Part 73

[Airspace Docket No. 79-NW-3]

Temporary Restricted Area Designation and Alteration

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment designates a temporary restricted area in the vicinity

of Fort Lewis, Wash., and alters the Fort Lewis restricted areas R-6703A, B, C and D temporarily by changing their upper limits to include 9,000 feet MSL to contain a major military exercise (BRAVE SHIELD 20). This action provides for the safe and efficient use of the navigable airspace by prohibiting unauthorized flight operations of nonparticipating aircraft within the joint use restricted airspace during the time the areas are in use from August 16 to August 23 inclusive.

EFFECTIVE DATE: August 9, 1979.

FOR FURTHER INFORMATION CONTACT:
Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426-3715.

SUPPLEMENTARY INFORMATION:

History

On April 23, 1979, the FAA proposed to amend Part 73 of the Federal Aviation Regulations (14 CFR Part 73) to designate a temporary restricted area in the vicinity of Fort Lewis and alter the present four restricted areas there temporarily to contain a major military exercise for approximately ten days (44 FR 23878). Interested persons were invited to participate in the rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments were received. Section 73.67 of Part 73 was published in the Federal Register January 2, 1979, (44 FR 716).

The Rule

This amendment to Part 73 of the Federal Aviation Regulations (14 CFR Part 73) designates a temporary restricted area R-6703 Subarea E and alters restricted areas R-6703 Subareas A, B, C and D to contain the BRAVE SHIELD 20 military exercise. This action provides for the safe and efficient use of the navigable airspace by prohibiting unauthorized flight operations of nonparticipating aircraft within the joint use restricted airspace during the times the areas are in use. Headquarters Tactical Air Command has provided certification that the requirements of the National Environmental Policy Act have been met.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 73 § 73.67 of the Federal Aviation Regulations (14 CFR Part 73) as republished (44 FR 716) is amended, effective 0901 G.M.T., August 9, 1979, as follows:

1. In R-6703 Subarea A, under Designated altitudes, "except from 0001 PDT August 16 to 0001 PDT August 24, 1979, during which time it is surface to 9,000 feet MSL." is added.

2. In R-6703 Subarea B, under Designated altitudes, "except from 0001 PDT August 16 to 0001 PDT August 24, 1979, during which time it is surface to 9,000 feet MSL." is added.

3. In R-6703 Subarea C, under Designated altitudes, "except from 0001 PDT August 16 to 0001 PDT August 24, 1979, during which time it is surface to 9,000 feet MSL." is added.

4. In R-6703 Subarea D, under Designated altitudes, "except from 0001 PDT August 16 to 0001 PDT August 24, 1979, during which time it is surface to 9,000 feet MSL." is added.

5. In R-6703 Subarea E is added as follows:

Boundaries. Beginning at Lat. 47°04'35"N., Long. 122°41'05"W.; to Lat. 47°04'21"N., Long. 122°42'15"W.; to Lat. 46°59'47"N., Long. 122°47'09"W.; to Lat. 46°54'23"N., Long. 122°47'07"W.; to Lat. 46°52'50"N., Long. 122°44'07"W.; to Lat. 46°52'50"N., Long. 122°42'05"W.; to Lat. 46°54'11"N., Long. 122°39'12"W.; to Lat. 46°54'50"N., Long. 122°35'28"W.; to Lat. 46°56'07"N., Long. 122°34'11"W.; to Lat. 46°56'33"N., Long. 122°33'09"W.; to Lat. 46°59'43"N., Long. 122°32'32"W.; to Lat. 47°01'00"N., Long. 122°31'37"W.; to Lat. 47°01'46"N., Long. 122°31'36"W.; to Lat. 47°03'38"N., Long. 122°35'36"W.; to Lat. 47°04'42"N., Long. 122°36'15"W.; to point of beginning.

Excluding the airspace 2,000 feet AGL and below within a 1NM radius of the center of the town of Yelm, (Lat. 46°56'30"N., Long. 122°36'20"W.) and within a ⅛ NM radius of the center of the town of Roy, (Lat. 47°05'00"N., Long. 122°32'30"W.); the airspace 1,000 feet AGL and below within a ½NM radius of the center of the town of Nisqually, (Lat. 47°03'40"N., Long. 122°41'50"W.) and within a ½NM radius of the center of the town of Rainier, (Lat. 46°53'10"N., Long. 122°41'05"W.) and within a 1NM radius of the center of the Western Airpark Airport, (Lat. 46°55'29"N., Long. 122°33'02"W.) and within a ½NM radius of the center of the Flying Carpet Airport, (Lat. 46°57'55"N., Long. 122°47'45"W.).

Designated altitudes. 800 feet AGL to and including 9,000 feet MSL.

Time of designation. From 0001 PDT August 16 to 0001 PDT August 24, 1979.

Controlling agency. Federal Aviation Administration, McChord Approach Control.

Using agency. U.S. Air Force Tactical/Readiness Command, Langley AFB, Va.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Washington, D.C., on June 7, 1979.

B. Keith Potts,
Acting Chief, Airspace and Air Traffic Rules Division.

14 CFR Part 97

[Docket No. 19241; Amdt. No. 1150]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591;
2. The FAA Regional Office of the region in which the affected airport is located; or
3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Information Center (APA–430), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, may be ordered from Superintendant of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The annual subscription price is $135.00.

FOR FURTHER INFORMATION CONTACT: Lewis O. Ola, Flight Procedures and Airspace Branch (AFS–730), Aircraft Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426–8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260–3, 8260–4 and 8260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). in developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, or contrary to the public interest, and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 G.m.t. on the dates specified, as follows:

1. By amending § 97.23 VOR-VOR/DME SIAPs identified as follows:

** * * Effective August 9, 1979:*

Hayward, CA—Hayward Air Terminal, VOR-A, Amdt. 6
Hayward, CA—Hayward Air Terminal, VOR/DME/B, Amdt. 1
Danville, IL—Vermilion County, VOR Rwy 21, Amdt. 8
Danville, IL—Vermilion County, VOR/DME Rwy 3, Amdt. 6
Springfield, KY—Lebanon-Springfield, VOR/DME Rwy 11, Original
Fond du Lac, WI—Fond du Lac County, VOR/DME Rwy 18, Amdt. 4
Fond du Lac, WI—Fond du Lac County, VOR/DME Rwy 36, Amdt. 4

** * * Effective July 26, 1979:*

Fayetteville, AR—Drake Field, VOR-A, Amdt. 18
Kendallville, IN—Kendallville Municipal, VOR-A, Amdt. 2
Ironwood, MI—Gogebic County, VOR Rwy 9, Amdt. 8
Ironwood, MI—Gogebic County, VOR/DME Rwy 27, Amdt. 4
Sparta, MI—Sparta, VOR-A, Amdt. 1
Tecumseh, MI—Al Meyers, VOR-A, Amdt. 4
Corvallis, OR—Corvallis Muni, VOR-A, Amdt. 4
Corvallis, OR—Corvallis Muni, VOR-B, Amdt. 2
Corvallis, OR—Corvallis Muni, VOR/DME Rwy 17, Amdt. 2
Corvallis, OR—Corvallis Muni, VOR/DME Rwy 35, Amdt. 5
Newport, OR—Newport Muni, VOR-A, Amdt. 1
Newport, OR—Newport Muni, VOR/DME Rwy 16, Amdt. 4
Roseburg, OR—Roseburg Muni, VOR-A, Amdt. 3
Beaumont, TX—Beaumont Muni, VOR/DME Rwy 12, Original
Beaumont, TX—Beaumont Muni, VOR/DME Rwy 30, Amdt. 1
Houston, TX—William P. Hobby, VOR/DME or TACAN Rwy 4, Amdt. 12

** * * Effective July 12, 1979:*

Spokane, WA—Spokane Int'l, VOR Rwy 3, Amdt. 12

** * * Effective June 5, 1979:*

Chattanooga, TN—Lovell Field, VOR Rwy 32, Amdt. 13

2. By amending § 97.25 SDF-LOC-LDA SIAPs identified as follows:

** * * Effective August 9, 1979:*

Danville, IL—Vermilion County, LOC Rwy 21, Original
Glasgow, KY—Glasgow Municipal, SDF Rwy 7, Amdt. 2
Muskegon, MI—Muskegon County, LOC Rwy 23, Original
Temple, TX—Draughon-Miller Muni, LOC BC Rwy 33, Amdt. 5
Fond du Lac, WI—Fond du Lac County, SDF Rwy 36, Amdt. 3

** * * Effective July 26, 1979:*

Fayetteville, AR—Drake Field, LOC Rwy 16, Amdt. 7
Beaumont—Port Arthur, TX—Jefferson County, LOC BC Rwy 29, Amdt. 14
Houston, TX—William P. Hobby, LOC BC Rwy 22, Amdt. 19

** * * Effective July 12, 1979*

Enid, OK—Enid Woodring Muni, LOC Rwy 35, Amdt. 1
Spokane, WA—Spokane Int'l, LOC Rwy 3, Amdt. 2

3. By amending § 97.27 NDB/ADF SIAPs identified as follows:

** * * Effective August 9, 1979:*

French Lick, IN—French Lick Municipal, NDB Rwy 26, Amdt. 4
Washington, IN—Daviess County, NDB Rwy 18, Amdt. 4
Glasgow, KY—Glasgow Municipal, NDB Rwy 7, Amdt. 3
Warroad, MN—Warroad Intl-Swede Carlson Field, NDB Rwy 31, Original
Fond du Lac WI—Fond du Lac County, NDB Rwy 9, Amdt. 3
Neillsville, WI—Neillsville Municipal, NDB Rwy 27, Original

* * * *Effective July 26, 1979:*

Kankakee, IL—Greater Kankakee, NDB Rwy 4, Amdt. 4, cancelled
Patterson, LA—Harry P. Williams Memorial, NDB Rwy 5, Amdt. 5
Houston, TX—William P. Hobby, NDB Rwy 4, Amdt. 29

* * * *Effective June 4, 1979:*

Olathe, KS—Johnson County Industrial, NDB Rwy 35, Amdt. 1

4. By amending § 97.29 ILS–MLS SIAPs identified as follows:

* * * *Effective August 9, 1979:*

Temple, TX—Draughon-Miller Muni, ILS Rwy 15, Amdt. 5

* * * *Effective July 26, 1979:*

Miami, FL—Miami International, ILS Rwy 27L, Amdt. 18
Beaumont-Port Arthur, TX—Jefferson County, ILS Rwy 11, Amdt. 17
Galveston, TX—Scholes Field, ILS Rwy 13, Amdt. 4
Houston, TX—Houston Intercontinental, ILS Rwy 14, Amdt. 5
Houston, TX—William P. Hobby, ILS Rwy 4, Amdt. 30
Houston, TX—William P. Hobby, ILS Rwy 13, Amdt. 4

* * * *Effective July 12, 1979:*

Oxnard, CA—Oxnard, ILS Rwy 25, Amdt. 3

* * * *Effective June 4, 1979:*

Olathe, KS—Johnson County Industrial, ILS Rwy 35, Amdt. 1

* * * *Effective May 30, 1979:*

Wilmington, DE—Greater Wilmington, ILS Rwy 1, Amdt. 14

5. By amending § 97.31 RADAR SIAPs identified as follows:

Note.—The FAA published an amendment in Docket No. 19154, Amdt. No. 1136 to Part 97 of the Federal Aviation Regulations (Vol 44 FR No. 87 page 28788; dated Thursday, May 17, 1979) under § 97.31 effective June 28, 1979, which is hereby amended as follows:

Fairbanks, AK—Fairbanks INTL, Radar-1, Original. Change Effective Date to June 14, 1979.

(Secs. 307, 313(a), 601, and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348, 1354(a), 1421, and 1510); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.49(b)(3))

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Washington, D.C. on June 8, 1979.

James M. Vines,
Chief, Aircraft Programs Division.

Note.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on May 12, 1969.

BILLING CODE 4910-13-M

CIVIL AERONAUTICS BOARD

[Regulation ER-1130; Amdt. 66; Docket 29387]

14 CFR Part 288

Exemption of Air Carriers for Military Transportation

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This final rule establishes a 3.11 percent fuel surcharge rate applicable to the minimum military charter rates (ER–1045, December 27, 1977) for foreign and overseas air transportation services performed for the Department of Defense (DOD) and procured by the Military Airlift Command (MAC). This surcharge amendment is effective May 1, 1979, and is triggered by an increase in the average fuel price for the participating MAC carriers of 5.65 cents per gallon—from 41.31 cents per gallon to 46.96 cents per gallon.

DATES: Adopted: June 7, 1979. Effective: June 7, 1979.

FOR FURTHER INFORMATION CONTACT: James E. Gardner, Domestic Fares and Rates Division, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428, Phone: 202–673–5364.

SUPPLEMENTARY INFORMATION: As indicated in ER–1024 (42 FR 58902, November 11, 1977), dated November 3, 1977, the Board monitors fuel price changes and will establish a fuel surcharge rate adjustment when the average price of fuel for participating MAC carriers changes one cent or more per gallon. ER–1111, effective March 21, 1979, established a fuel surcharge of 1.40 percent based on January 1979 data.

The Board has completed its review of the latest available fuel cost data as reported on C.A.B. Form 41, Schedule P–12(a) for foreign and overseas MAC air transportation services for the month of April 1979, and is establishing surcharge provisions in Part 288 of its Economic Regulations (14 CFR Part 288) applicable to the rates established for those services.[1] The basis for issuing this surcharge amendment is the increase in average fuel price for the participating MAC carriers of 5.65 cents per gallon—from 41.31 cents per gallon reflected in the currently effective base rates to the latest reported average price of 46.96 cents per gallon.

The attached Appendix sets forth the results of the surcharge rate computation for the reported fuel price changes for commercial and military fuels consumed in military charter service for the month of April 1979, and the rate impact of the changes in current average fuel prices from those reflected in the base rates. Accordingly, we will establish the fuel surcharge rate applicable to the current base final rates, effective May 1, 1979, to increase the Category B and Category A rates by 3.11 percent.

In our notice of Final Action on Revised Procedures for Part 288 Fuel Surcharge Amendments, Docket 29759, December 22, 1978, we stated that "in the event that we are unable to issue a fuel surcharge amendment reasonably within the customary period of time after the fuel reports are filed, we shall examine our established procedure and determine whether any modifications are warranted at that time."

Our last two fuel surcharge rule amendments were effective three months apart—December 21, 1978 and March 21, 1979, and the carriers had to wait between seven and eleven weeks from the time fuel prices escalated to the level which triggered the surcharge amendment procedure to the date when the revised rates became effective. Fuel prices are now increasing more frequently and at a much steeper rate than in the past so that any significant time lapse between the time fuel prices escalate and the time revised MAC rates become effective can work a hardship on the carriers. Therefore, in order to reduce this time lapse, we find it reasonable to make this and future fuel surcharge amendments effective the first day of the month following the month of the latest fuel price report used as a basis for determining a revised fuel surcharge. Since the fuel surcharge determined here is based on reported data for the month of April 1979, the revised surcharge shall become effective May 1, 1979.

In view of the present need for a fuel surcharge to the minimum rates set forth in Part 288, we find that good cause

[1] This and future surcharge amendments will be made applicable to the minimum MAC rates established in ER–1045, effective December 27, 1977, until such time as new final base rates may be established.

exists for adopting these amendments without notice and public procedure and for making them effective on less than thirty (30) days' notice.

In consideration of the foregoing, the Board amends Part 288 of its Economic Regulations (14 CFR Part 288), as follows:

1. Amend § 288.7(a) by amending the paragraph following the tables so as to reflect an additional proviso, and amend the proviso to paragraphs (d) (1) and (2) to read as follows:

§ 288.7 Reasonable level of compensation.

* * * * *

(a) * * *

* * * * *

Provided, That subject to the provisions of § 288.8, the minimum rates set forth above shall not be applicable to passengers or cargo carried on a particular trip in excess of the amount that the contract calls for DOD to supply and the carrier to provide space: *And provided further,* That if a carrier performs a one-way charter flight carrying nonmilitary traffic for a nonmilitary user, the carrier may charter the return flight of that aircraft to DOD at a published one-way charter traffic rate that is in fact available to the general public for equivalent services: *Provided, however,* That the total minimum compensation pursuant to the rates set forth in paragraph (a)(1) above for services performed on or after May 1, 1979, with regular jet, wide-body jet and DC–8–61/63 aircraft shall be increased by a surcharge of 3.11 percent.

* * * * *

(d) * * *

(1) * * *

(2) * * *

Provided, That the total minimum compensation pursuant to the rates specified in paragraphs (a)(1) and (a)(2) of § 288.7 shall be increased by a surcharge of 3.11 percent for services performed on or after May 1, 1979.

* * * * *

(Secs. 204, 403 and 416 of the Federal Aviation Act of 1958, as amended; 72 Stat. 743, 758 and 771, as amended; 49 U.S.C. 1324, 1373 and 1386.)

By the Civil Aeronautics Board:

Phyllis T. Kaylor,

Secretary.

14 CFR Part 323

[Regulation PR–207; Procedural Regulations Amendment No. 1]

Terminations, Suspensions and Reductions of Service; Notice of Approval by the General Accounting Office

AGENCY: Civil Aeronautics Board.

ACTION: Final Rule.

SUMMARY: This final rule gives notice that the General Accounting Office has approved the reporting requirements contained in a regulation which governs (1) notices of terminations, suspensions, and reductions of air transportation by air carriers, and (2) objections asking the Board to prohibit those terminations, suspensions or reductions that appear to affect essential air transportation (PR–200, 44 FR 20635, April 6, 1979). This approval is required under the Federal Reports Act, and was transmitted to the Civil Aeronautics Board by letter dated May 29, 1979.

DATES: Adopted: June 6, 1979. Effective: June 6, 1979.

FOR FURTHER INFORMATION CONTACT: Clifford M. Rand, Chief, Data Requirements Division, Office of Economic Analysis, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428, (202) 673–6044.

SUPPLEMENTARY INFORMATION: A line was inadvertently dropped from the summary of Regulation PR–207 published in 44 FR 33397, June 11, 1979. The corrected summary appears above.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320–01–M

14 CFR Part 385

[Regulation OR–148A; Finalization of Interim Rule; Docket 34666; Dated June 7, 1979]

Delegations and Review of Action Under Delegation: Nonhearing Matters

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. June 7, 1979.

AGENCY: Civil Aeronautics Board.

ACTION: Finalization of Interim Rule.

SUMMARY: By OR–148,[1] the Board delegated authority to the Directors of the Bureau of Pricing and Domestic Aviation (now Bureau of Domestic Aviation) and the Bureau of International Aviation to grant or deny applications of air carriers, intrastate air carriers and foreign air carriers for temporary authority to provide substitute service during any work stoppage in the domestic and foreign markets normally served by the struck carrier. These grants of authority were reflected in 14 CFR 385.13(qq) and 385.26(u). The Board also requested comments on these final rules by ODR–16.[2]

[1] 44 FR 13668, March 15, 1979.
[2] 44 FR 15733, March 15, 1979.

A comment was filed by United Air Lines, which objected to the rules as an unwarranted intermeddling in labor disputes. Its objection is not, however, relevant to the rule, which merely delegates the authority to implement established Board policy. In any event, we are unpersuaded that the underlying policy should be changed. We refer to out rationale in Order 79–5–40, which confirmed exemptions granted to carriers during the strike against United Air Lines. Accordingly, the final rules will remain in the form in which they were issued.

DATE: Adopted: June 7, 1979.

FOR FURTHER INFORMATION CONTACT: Richard B. Dyson, Office of the General Counsel, Civil Aeronautics Board, Washington, D.C. 20428, phone: (202) 673–5442.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Government National Mortgage Association

24 CFR Part 300

[Docket No. R–79–657]

List of Attorneys-in-Fact

AGENCY: Department of Housing and Urban Development.

ACTION: Final rule.

SUMMARY: This amendment updates the current list of attorneys-in-fact by amending Paragraph (c) of 24 CFR 300.11. These attorneys-in-fact are authorized to act for the Association by executing documents in its name in conjunction with servicing GNMA's mortgage purchase programs, all as more fully described in Paragraph (a) of 24 CFR 300.11.

EFFECTIVE DATE: July 16, 1979.

ADDRESSES: Rules Docket Clerk, Office of General Counsel, Room 5218, Department of Housing and Urban Development, 451 7th Street, S.W., Washington, D.C. 20410. Telephone: (202) 755–5003.

FOR FURTHER INFORMATION CONTACT: Mr. William J. Linane, Office of General Counsel, on (202) 755–7186.

SUPPLEMENTARY INFORMATION: Notice and public procedure on this amendment are unnecessary and impracticable because of the large volume of legal documents that must be executed on behalf of the Association.

§ 300.11 [Amended]

1. Paragraph (c) of § 300.11 is amended by adding the following names to the current list of attorneys-in-fact:

Name and Region

Elizabeth Brouwer-Ancher, Philadelphia, Pennsylvania
Mark Spencer, Philadelphia, Pennsylvania
Marie A. Thompson, Philadelphia, Pennsylvania

(Sec. 309(d), National Housing Act, 12 U.S.C. 1723a(d), and sec. 7(d), Department of Housing and Urban Development Act, (42 U.S.C. 3535(d))).

Issued at Washington, D.C., June 4, 1979.

R. Frederick Taylor,

Acting Executive Vice President, Government National Mortgage Association.

[FR Doc. 79-18021 Filed 6-13-79; 8:45 am]

BILLING CODE 4210-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

24 CFR Part 1914

[Docket No. FI 5556]

List of Communities Eligible for the Sale of Insurance Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, Federal Emergency Management Agency. [1]

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the program and have agreed to enact certain flood plain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATES: The date listed in the fifth column of the table.

ADDRESSES: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Phone: (800) 638–8620.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street, SW., Washington, DC 20410.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Federal Insurance Administrator has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the food map, if one has been published, is indicated in the sixth column of the table. In the communities listed where a flood map has been published, Section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

Section 1914.6 is amended by adding in alphabetical sequence new entries to the table.

[1] The functions of the Federal Insurance Administration, U.S Department of Housing and Urban Development, were transferred to the newly established Federal Emergency Management Agency by Reorganization Plan No. 3 of 1978 (43 FR 41943, September 19, 1978) and Executive Order 12127 (44 FR 19367, April 3, 1979)

§ 1914.6 List of eligible communities.

State	County	Location	Community No.	Effective dates of authorization/ cancellation of sale of flood insurance in community	Special flood hazard area identified
Pennsylvania	Bucks	West Rockhill, township of	421123–A	June 1, 1979, emergency.	Sept. 13, 1974.
Connecticut	New Haven	Ledyard, town of	090157–A	Aug. 22, 1979, emergency, Apr. 2, 1979, suspended, June 1, 1979, reinstated.	May 27, 1977.
Kansas	Allen	Unincorporated areas	200568–A	June 4, 1979, emergency.	May 24, 1977.
Missouri	Boone	do	290034–A	do	Apr. 25, 1978.
North Carolina	Hoke	do	370397	do	June 12, 1978.
Pennsylvania	Union	West Buffalo, township of	422106	do	Nov. 1, 1974.
Massachusetts	Bristol	Norton, town of	250060–A	June 1, 1979, suspension withdrawn.	June 28, 1974 and May 10, 1977.

(National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968); effective Jan. 28, 1969 (33 FR 17804, Nov. 28, 1968), as amended (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963.)

Issued: June 6, 1979.

Gloria M. Jimenez,

Federal Insurance Administrator.

[FR Doc. 79-18543 Filed 6-13-79; 8:45 am]

BILLING CODE 4210-23-M

24 CFR Part 1915

[Docket No. 5555]

List of Withdrawal of Flood Insurance Maps Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, Federal Emergency Management Agency.[1]

ACTION: Final Rule.

SUMMARY: This rule lists communities where Flood Insurance Rate Maps or Flood Hazard Boundary Maps published by the Federal Insurance Administration, have been temporarily withdrawn for administrative or technical reasons. During that period that the map is withdrawn, the insurance purchase requirement of the National Flood Insurance Program is suspended.

EFFECTIVE DATES: The date listed in the fifth column of the table.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, Office of Flood Insurance, (202) 755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street, SW., Washington, DC 20410.

SUPPLEMENTARY INFORMATION: The list includes the date that each map was withdrawn, and the effective date of its republication, if it has been republished. If a flood prone location is now being identified on another map, the community name for the effective map is shown.

The Flood Disaster Protection Act of 1973 (Pub. L. 93–234), as amended, requires, at Section 102, the purchase of flood insurance as a condition of Federal financial assistance if such assistance is:

(1) For acquistion and construction of buildings, and

(2) For buildings located in a special flood hazard area identified by the Secretary of Housing and Urban Development.

One year after the identification of the community as flood prone, the requirement applies to all identified special flood hazard areas within the United States, so that, after that date, no such financial assistance can legally be provided for acquisition and construction of buildings in these areas unless the community has entered the program. The denial of such financial assistance has no application outside of the identified special flood hazard areas of such flood-prone communities.

Prior to July 1, 1975, the statutory requirement for the purchase of flood insurance did not apply until and unless the community entered the program and the special flood hazard areas were identified by the issuance of a flood insurance map. However, after July 1, 1975, or one year after identification, whichever is later, the requirement applies to all communities in the United States that are identified as having special flood hazard areas within their community boundaries, so that, no such financial assistance can legally be provided for buildings in these areas unless the community has entered the program.

The insurance purchase requirement with respect to a particular community may be altered by the issuance or withdrawal of the Federal Insurance Administration's (FIA's) official Flood Insurance Rate Map (FIRM) or the Flood Hazard Boundary Map (FHBM). A FHBM is usually designated by the letter "E" following the community number and a FIRM by the letter "R" following the community number. If the FIA withdraws a FHBM for any reason the insurance purchase requirement is suspended during the period of withdrawal. However, if the community is in the Regular Program and only the FIRM is withdrawn but a FHBM remains in effect, then flood insurance is still required for properties located in the identified special flood hazard areas shown on the FHBM, but the maximum amount of insurance available for new applications or renewal is first layer coverage under the Emergency Program, since the community's Regular Program status is suspended while the map is withdrawn. (For definitions see 24 CFR Part 1909 et seq.).

As the purpose of this revision is the convenience of the public, notice and public procedure are unnecessary, and cause exists to make this amendment effective upon publication. Accordingly, Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended as follows:

1. Present § 1915.6 is revised to read as follows:

§ 1915.6 Administrative withdrawal of maps.

(a) *Flood Hazard Boundary Maps (FHBM's).* The following is a cumulative list of withdrawals pursuant to this part:

[1] The functions of the Federal Insurance Administration, U.S. Department of Housing and Urban Development, were transferred to the newly established Federal Emergency Management Agency by Reorganization Plan No. 3 of 1978 (43 FR 41943, September 19, 1978) and Executive Order 12127 (44 FR 19367, April 3, 1979).

40 FR 5140
40 FR 17015
40 FR 20708
40 FR 46102
40 FR 53570
40 FR 56972
41 FR 1478
41 FR 50990
41 FR 13262

KEY TO SYMBOLS

E—The community is participating in the Emergency Program. It will remain in the Emergency Program without an FHBM.

C—The community is participating in the Emergency Program. It will be converted to the Regular Program without an FIA map.

R—The community is participating in the Regular Program.

1. The Community appealed its flood-prone designation and FIA determined the Community would not be inundated by a flood having a one-percent chance of occurrence in any given year.

1A. FIA determined the Community would not be inundated by a flood having a one-percent chance of occurrence in any given year.

2. The Flood Hazard Boundary Map (FHBM) contained printing errors or was improperly distributed. A new FHBM will be prepared and distributed.

3. The Community lacked land-use authority over the special flood hazard area.

4. A more accurate FIA map is the effective map for this community.

5. The FHBM does not accurately reflect the Community's special flood hazard areas (i.e., sheet flow flooding, extremely inaccurate map, etc.). A new FHBM will be prepared and distributed.

6. The Flood Insurance Rate Map was rescinded because of inaccurate flood elevations contained on the map.

7. The Flood Insurance Rate Map was rescinded in order to re-evaluate the mudslide hazard in this Community.

8. The T&E or H&E Map was rescinded.

9. A revision of the FHBM within a reasonable period of time was not possible. A new FHBM will be prepared and distributed.

(National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968); effective Jan. 28, 1969 (33 FR 17804, Nov. 28, 1968), as amended (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963.)

Issued: June 6, 1979.

[Docket No. FI-3994]

Final Flood Elevation Determination for the City of St. Peter, Nicollett County, Minn., Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the City of St. Peter, Nicollett County, Minnesota.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the City of St. Peter, Nicollett County, Minnesota.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of St. Peter, Nicollett County, Minnesota, are available for review at the City Hall, 227 South Front Street, St. Peter, Minnesota.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755-5581 or Toll Free Line (800) 424-8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the final determinations of flood elevations for the City of St. Peter, Nicollett County, Minnesota.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR

[1] The functions of the Federal Insurance Administration, Department of Housing and Urban Development, were transferred to the newly established Federal Emergency Management Agency by Reorganization Plan No. 3 of 1978 (43 FR 41943, September 19, 1978) and Executive Order 12127 (44 FR 19367, April 3, 1979).

Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Minnesota River	St. Julien Street (extended)	756
	Broadway Avenue (State 99)	
	Downstream	758
	Upstream	759
	Locust Street (extended)	760
	Jackson Street	761
	Upstream Corporate Limits	763

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator 44 FR 20963).

Issued: June 1, 1979.

BILLING CODE 4210-23-M

DEPARTMENT OF THE TREASURY

Fiscal Service

31 CFR Part 306

General Regulations Governing United States Securities

AGENCY: Department of the Treasury.

ACTION: Final rule.

SUMMARY: The purpose of this amendment of the General Regulations governing United States securities is to extend the tables contained in the appendix to Subpart E to provide decimal factors for daily interest computations for interest payable on a semiannual or annual basis for interest rates of up to 12 percent per annum.

EFFECTIVE DATE: June 14, 1979.

FOR FURTHER INFORMATION CONTACT: A. E. Martin, Attorney-Advisor, Bureau of the Public Debt, (202) 376-0636.

SUPPLEMENTARY INFORMATION: Tables I and II in the appendix to Subpart E of the regulations provide decimal factors which are used to compute daily accrued interest on a security, based on the annual interest rate paid thereon. Both Table I, which provides the decimal factors for interest payable on a semiannual basis, and Table II, which provides the decimal factors for interest payable on an annual basis, now only cover interest rates extending to 6 percent per annum. In view of current interest rates being paid on United States securities, these tables are being extended to cover interest rates of up to 12 percent per annum.

Accordingly, Department of the Treasury Circular No. 300, Fourth Revision, dated March 15, 1973 (31 CFR, Part 306), is hereby amended by the deletion of Tables I and II in the Appendix to Subpart E and the addition of new Tables I and II.

The foregoing amendment was effected under authority of the Second Liberty Bond Act (40 Stat. 288, as amended; 31 U.S.C. 752, et seq.) and 5 U.S.C. 321. Since this amendment involves the fiscal policy of the United States and does not meet the Department's criteria for significant regulations, it has been determined that notice and public procedures thereon are unnecessary.

Dated: June 5, 1979.

Paul H. Taylor,
Fiscal Assistant Secretary.

BILLING CODE 4810-39-M

TABLE I-DECIMAL FOR 1 DAY'S INTEREST ON $1,000 AT VARIOUS RATES OF INTEREST, PAYABLE SEMIANNUALLY OR ON A SEMIANNUAL BASIS IN REGULAR YEARS OF 365 DAYS AND IN LEAP YEARS OF 366 DAYS (TO DETERMINE APPLICABLE NUMBER OF DAYS, SEE "COMPUTATION OF INTEREST ON SEMIANNUAL BASIS")

INFORMATION SECURITY OVERSIGHT OFFICE

32 CFR Parts 2000 and 2001

Re-titling of Chapter; Deletion of Obsolete Regulation; Designation of Published Regulations

AGENCY: Information Security Oversight Office.

ACTION: Final rules.

SUMMARY: Executive Order 12065 (43 FR 28949, July 3, 1978) provided for the classification, downgrading, declassification and safeguarding of national security information. The executive order is intended to increase openness in Government by limiting classification and accelerating declassification but at the same time, provide improved protection in the interest of national security. The executive order provides for the Information Security Oversight Office (ISOO) to develop and promulgate directives to implement the Order. This document makes technical and editorial changes to the chapter in which the directives are and will be published.

EFFECTIVE DATE: June 14, 1979.

FOR FURTHER INFORMATION CONTACT: Robert W. Wells, (202) 633-6880.

SUPPLEMENTARY INFORMATION: Information Security Oversight Office administrative procedures will be published at a later time. The regulations published on October 5, 1978 (43 FR 46280) set forth guidelines to agencies on original and derivative classification, downgrading, declassification and safeguarding of national security information.

Title 32 of the Code of Federal Regulations is amended as follows:

CHAPTER XX—INFORMATION SECURITY OVERSIGHT OFFICE

1. The title of Chapter XX is revised by deleting the present heading "Interagency Classification Review Committee" and inserting "Information Security Oversight Office."

PART 2000—ADMINISTRATIVE PROCEDURES [RESERVED]

2. In Chapter XX, "Part 2000—Administrative Procedures" is deleted and reserved.

PART 2001—NATIONAL SECURITY INFORMATION; CLASSIFICATION; DECLASSIFICATION AND DOWNGRADING; SAFE GUARDING; IMPLEMENTATION AND REVIEW; GENERAL PROVISIONS

3. The regulations appearing at 43 FR 46280, October 5, 1978 are designated as "Part 2001—National security information; classification; declassification and downgrading; safeguarding; implementation and review; general provisions."

4. The authority citation for Part 2001 is:

Authority: Sec. 6-204, E.O. 12065, 43 FR 28949, July 3, 1978.

Michael T. Blouin,
Director, Information Security Oversight Office.

June 12, 1979.

[CGD 79-108]

Pilot Rules for Inland Waters and for Western Rivers; Flashing Yellow Light at the Head of Tows Being Pushed Ahead

AGENCY: Coast Guard, DOT.

ACTION: Final Rule.

SUMMARY: This document amends the regulations governing the lighting of barges by requiring the use of a flashing yellow light at the head of barges being pushed ahead on Inland Rules waters and by making the Western Rivers Rules requirement for flashing yellow lights more flexible.

EFFECTIVE DATE: This amendment is effective on May 1, 1980, but compliance with it is optional immediately.

FOR FURTHER INFORMATION CONTACT: Mr. Chris Liana, Office of Marine Environment and Systems (G-WLE-4/73), Department of Transportation, Washington, DC 20590, (202) 426-4958.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking on this subject was published on July 18, 1978 (43 FR 30256). Interested persons were given until August 14, 1978 to submit comments.

Drafting Information

The principal persons involved in the drafting of this rule are Chris Liana, Project Manager, Office of Marine Environment and Systems, and Michael Mervin, Project Counsel, Office of the Chief Counsel.

Discussion of Comments

We received six letters of comment in response to the notice of proposed rulemaking. Three of these favored the proposal and three were generally opposed.

One comment suggested that there might be insufficient justification for the new requirement, and questioned whether the 1973 accident cited in the preamble to the notice of proposed rulemaking was the only basis for the proposed rule. The 1973 accident, which caused three deaths, was cited because it was the particular incident prompting the change in the lighting requirements. Other similar accidents, although not frequently involving fatalities, occur regularly. A search of the reported accidents for 1977, for example, revealed at least three such accidents causing personal injury and property damage. In addition, other preventable incidents may not have been reported, especially where damage was minor or in the case of "close calls".

Two commented that the proposed language allowing the horizontal arc of visibility to extend to either on the beam or up to 2 points abaft the beam was not clear. We agree and have reworded that provision to eliminate the confusion.

One commented that the flashing yellow light would not increase safety because pleasure boat operators would steer toward it rather than away from it. We disagree. The danger this requirement attempts to counter is that the tow may not be seen at all. We believe that the flashing yellow light is the most effective way to draw attention to the tow, and that once it is seen, it will be properly identified.

One comment objected to the proposed requirement for a flashing yellow light at the head of barges being towed alongside. We reviewed that part of the proposal and agree that barges being towed alongside do not pose the same hazard (of not being seen) as do barges being pushed ahead, and so we are not requiring the use of a flashing yellow light at the head of barges being towed alongside.

Two commented that a flashing yellow light at the head of a tow could be confused with the intermittent flashing yellow light carried by submarines. We disagree. The flash characteristic for tows (50 to 70 flashes per minute) is sufficiently different from the flash characteristic for submarines (one flash per second for 3 seconds

followed by a 3 second off period) to make mistaken identity very unlikely.

The proposed rule expressed arcs of the horizon in points of the compass. This has been changed to read in degrees in keeping with modern navigation rule practice.

Evaluation

This final rule has been reviewed under the Department of Transportation's "Improving Government Regulations, Regulatory Policies and Procedures" (44 FR 11034, February 26, 1979). A final evaluation of the rule has been prepared, and has been included in the public docket. A copy of this evaluation is available for examination at the Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW, Washington, DC 20590.

In consideration of the foregoing, Parts 80 and 95 of Title 33 of the Code of Federal Regulations are amended as follows:

PART 80—PILOT RULES FOR INLAND WATERS

1. In § 80.16, by adding a sentence at the end of paragraph (f) and by revising paragraph (g) to read as follows:

§ 80.16 Lights for barges, canal boats, scows and other nondescript vessels on certain inland waters on the Atlantic and Pacific coasts.

* * * * *

(f) Barges, canal boats or scows must when being propelled by pushing ahead of a steam vessel, display a red light on the port bow and a green light on the starboard bow of the head barge, canal boat or scow, carried at a height sufficiently above the superstructure of the barge, canal boat or scow as to permit said sidelights to be visible; and if there is more than one barge, canal boat or scow abreast, the colored lights must be displayed from the outer side of the outside barges, canal boats or scows. Additionally, a flashing yellow light must be displayed at the forward end of the tow, so placed to be as nearly as practicable on the centerline of the tow.

(g)(1) The colored sidelights referred to in this section shall be fitted with inboard screens so as to prevent them from being seen across the bow, and of such character as to be visible on a dark night, with a clear atmosphere, at a distance of at least 2 miles, and so constructed as to show a uniform and unbroken light over an arc of the horizon of 10 points of the compass, and so fixed as to throw the light from right ahead to 2 points abaft the beam on either side.

(2) The flashing yellow light must—

(i) be visible on a dark night with a clear atmosphere at a distance of at least 2 miles;

(ii) flash 50 to 70 times per minute; and

(iii) be constructed to show a uniform light over an arc of the horizon from right ahead to at least 90 degrees, but no more than 112.5 degrees on each side of the tow.

* * * * *

2. In § 80.16a, by substituting for the word "amber" in paragraph (b) the word "yellow" and by revising paragraph (j) to read as follows:

§ 80.16a Lights for barges, canal boats, scows and other nondescript vessels on certain inland waters on the Gulf Coast and the Gulf Intracoastal Waterway.

* * * * *

(b) When one or more barges, canal boats, scows, or other vessels of nondescript type not otherwise provided for, are being towed by pushing ahead of a steam vessel, or by a combination of pushing ahead or towing alongside of a steam vessel, such tow must be lighted by a flashing yellow light at the extreme forward end of the tow, so placed as to be as nearly as practicable on the centerline of the tow, a green light on the starboard side of the tow, so placed as to mark the maximum projection of the tow to starboard, and a red light on the port side of the tow, so placed as to mark the maximum projection of the tow to port.

* * * * *

(j) The flashing yellow light must—

(1) be visible on a dark night with a clear atmosphere at a distance of at least 2 miles;

(2) flash 50 to 70 times per minute; and

(3) be constructed to show a uniform light over an arc of the horizon from right ahead to at least 90 degrees, but no more than 112.5 degrees on each side of the tow.

* * * * *

PART 95—PILOT RULES FOR WESTERN RIVERS

3. In § 95.29, by substituting for the word "amber" in paragraph (a) the word "yellow" and by revising paragraph (d) to read as follows:

§ 95.29 Lights for barges towed ahead or alongside.

(a) When one or more barges are being towed by pushing ahead of a steam vessel, or by a combination of pushing ahead and towing alongside of a steam vessel, such tow must be lighted by a flashing yellow light at the extreme forward end of the tow, so placed as to be as nearly as practicable on the centerline of the tow, a green light on the starboard side of the tow, so placed to mark the maximum projection of the tow to starboard, and a red light on the port side of the tow, so placed to mark the maximum projection of the tow to port.

* * * * *

(d) The flashing yellow light must—

(1) be visible on a dark night with a clear atmosphere at a distance of at least 2 miles;

(2) flash 50 to 70 times per minute; and

(3) be constructed to show a uniform light over an arc of the horizon from right ahead to at least 90 degrees, but no more than 112.5 degrees on each side of the tow.

* * * * *

33 CFR Part 117

[CGD 79-075]

Drawbridge Operation Regulations; Lake Washington, WA

AGENCY: Coast Guard, DOT.

ACTION: Final Rule.

SUMMARY: At the request of the State of Washington Department of Transportation (DOT) the Coast Guard is amending the telephone requests procedure contained in the regulations governing the operation of the pontoon bridge across Lake Washington between Foster Island and Evergreen Point to delete the "Toll Office" as the place to call and insert the "Highway Radio" in its stead. This is due to the closing of the Toll Office as of June 22, 1979. The change from call letters "KOW" to "KOH" for the Seattle Marine Operator Station was also requested by the Washington DOT.

EFFECTIVE DATE: This amendment is effective on June 14, 1979.

FOR FURTHER INFORMATION CONTACT: Frank L. Teuton, Jr., Chief, Drawbridge Regulations Branch (G-WBR/73), Room 7300, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590 (202-426-0942).

SUPPLEMENTARY INFORMATION: Since this action merely brings the regulation into conformity with present circumstances, and does not change the operating procedures for the bridge, the Coast Guard finds good cause under 5 U.S.C. 553(b)(B) for not issuing a general notice of proposed rulemaking. So that the regulatory revision may be concurrent with the change that it reflects, the Coast Guard finds good cause under 5 U.S.C. 553(d)(3) for making it effective in less than 30 days.

Drafting Information

The principal persons involved in drafting this rule are: Frank L. Teuton, Jr., Project Manager, Office of Marine Environment and Systems, and Coleman Sachs, Project Attorney, Office of the Chief Counsel.

PART 117—DRAWBRIDGE OPERATION REGULATIONS

In consideration of the foregoing, Part 117 of Title 33 of the Code of Federal Regulations is amended by revising § 117.801(b)(1) to read as follows:

§ 117.801 Lake Washington, Wash.; pontoon bridge between Foster Island and Evergreen Point, Wash.

* * * * *

(b) * * *

(1) Telephone requests for bridge openings will be directed as collect calls to the Highway Radio. The call may also be made by direct telephone communication, through the Seattle Marine Operator, Station KOH, or through other marine wire or radiotelephone service.

* * * * *

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937; 33 U.S.C. 499, 49 U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5).)

Dated: June 8, 1979.

R. H. Scarborough,

Vice Admiral, U.S. Coast Guard Acting Commandant.

BILLING CODE 4910-14-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 5664

[N-058648]

Nevada; Revocation of Public Land Orders No. 3501, No. 3574, and No. 3814

AGENCY: Bureau of Land Management (Interior).

ACTION: Final rule.

SUMMARY: This order revokes three public land orders which withdrew 15,216 acres of land for the proposed Moapa Valley Pumping Project. This action will restore the lands to operation of the public land laws, including the mining laws.

EFFECTIVE DATE: July 13, 1979.

FOR FURTHER INFORMATION CONTACT: Louis B. Bellesi, 202-343-8731.

By virtue of the authority contained in section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714, it is ordered as follows:

1. Public Land Orders No. 3501 of December 2, 1964, No. 3574 of March 26, 1965, and No. 3814 of September 7, 1965, which withdrew the following described lands for use by the Bureau of Reclamation for the proposed Moapa Valley Pumping Project are hereby revoked:

Mount Diablo Meridian

- sec. 6, Lots 3, 4, 5, 6, 7, and SE¼NW¼, E½SW¼;
- sec. 7, Lots 1, 2, and E½NW¼.

Containing approximately 15,216 acres in Clark County.

2. At 10 a.m., on July 13, 1979, the lands shall be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals and the requirements of applicable law. All valid applications received at or prior to 10 a.m., on July 13, 1979, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. At 10 a.m., on July 13, 1979, the lands will be open to location under the United States mining laws. They have been open to applications and offers under the mineral leasing laws.

Inquiries concerning the lands should be addressed to the State Director, Bureau of Land Management, 300 Booth Street, Reno Nevada 89509.

Guy R. Martin,

Assistant Secretary of the Interior.

June 7, 1979.

Wheeled Semiportable Fire Extinguishers

AGENCY: Coast Guard, DOT.

ACTION: Final Rule.

SUMMARY: This document amends the firefighting and fire protection equipment requirements to allow limited use of wheeled semiportable fire extinguishers on merchant vessels, offshore structures, and mobile offshore drilling units. Previous regulations contained a blanket prohibition against the approval and use of wheeled extinguishers. In certain vessel operations, however, wheeled extinguishers can be used effectively in conjunction with non-wheeled extinguishers to provide increased fire protection capability. On offshore structures, a prohibition against wheeled extinguishers is unnecessary. These amendments also include stowage and installation requirements for wheeled semiportable extinguishers.

EFFECTIVE DATE: These amendments become effective on July 11, 1979.

ADDRESS: The final evaluation for these regulations is available for examination and copying at the Marine Safety Council (G-CMC/81), U.S. Coast Guard, Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590 (202) 426–1477.

FOR FURTHER INFORMATION CONTACT:
Frank K. Thompson, Office of Merchant Marine Safety (G–MMT/83), Room 8213, U.S. Coast Guard, Department of Transportation, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590 (202 426–2174).

SUPPLEMENTARY INFORMATION: The Coast Guard published a notice of proposed rule making in the November 9, 1978 issue of the **Federal Register** (43 FR 52201). Interested persons were invited to submit comments on the proposed amendments before December 26, 1978. Only one comment was received in response to the notice and the commenter was in favor of the proposal.

These amendments have been reviewed under the Department of Transportation's "Regulatory Policies and Procedures" (44 FR 11034, February 26, 1979). They have been determined to be non-significant regulations.

The principal persons involved in drafting these rules are: Frank K. Thompson, Office of Merchant Marine Safety; and William R. Register, Office of the Chief Counsel.

In consideration of the foregoing, the proposed amendments published in the November 9, 1978 **Federal Register** are adopted without change as set forth below.

Dated: June 4, 1979.
R.H. Scarborough,
Vice Admiral, U.S. Coast Guard, Acting Commandant.

Chapter I of Title 46, Code of Federal Regualtions is amended as follows:

Subchapter C—Uninspected Vessels

PART 25—REQUIREMENTS

1. In § 25.30–20, by adding new paragraphs (b)(3) and (b)(4) to read as follows:

§ 25.30–20 Fire extinguishing equipment required.

* * * * *

(b) * * *

(3) The frame or support of each Type B-III fire extinguisher required by paragraph (b)(2)(ii) of this section must be welded or otherwise permanently attached to a bulkhead or deck.

(4) If an approved semiportable fire extinguisher has wheels and is not required by this section, it must be securely stowed when not in use to prevent if from rolling out of control under heavy sea conditions.

Subchapter D—Tank Vessels

PART 34—FIRE FIGHTING EQUIPMENT

2. By adding a new § 34.50–20 to read as follows:

§ 34.50–20 Semiportable fire extinguishers—TB/ALL.

(a) The frame or support of each size III, IV, and V fire extinguisher required by Table 34.50–10(a) must be welded or otherwise permanently attached to a bulkhead or deck.

(b) If a size III, IV, or V fire extinguisher has wheels and is not required by Table 34.50–10(a), it must be securely stowed when not in use to prevent it from rolling out of control under heavy sea conditions.

Subchapter H—Passenger Vessels

PART 76—FIRE PROTECTION EQUIPMENT

3. By adding a new § 76.50–20 to read as follows:

§ 76.50–20 Semiportable fire extinguishers.

(a) The frame or support of each size III, IV, and V fire extinguisher required by Table 76.50–10(a) must be welded or otherwise permanently attached to a bulkhead or deck.

(b) If an approved size III, IV, or V fire extinguisher has wheels and is not required by Table 76.50–10(a), it must be

securely stowed when not in use to prevent it from rolling out of control under heavy sea conditions.

Subchapter I—Cargo and Miscellaneous Vessels

PART 95—FIRE PROTECTION EQUIPMENT

4. By adding a new § 95.50–20 to read as follows:

§ 95.50–20 Semiportable fire extinguishers.

(a) The frame or support of each size III, IV, and V fire extinguisher required by Table 95.50–10(a) must be welded or otherwise permanently attached to a bulkhead or deck.

(b) If an approved size III, IV, or V fire extinguisher has wheels and is not required by Table 95.50–10(a), it must be securely stowed when not in use to prevent it from rolling out of control under heavy sea conditions.

Subchapter I–A—Mobile Offshore Drilling Units

PART 108—DESIGN AND EQUIPMENT

5. By adding a new § 108.496 to read as follows:

§ 108.496 Semiportable fire extinguishers.

(a) The frame or support of each size III, IV, and V fire extinguisher required by Table 108.495(a), except a wheeled size V extinguisher provided for a helicopter landing deck, must be welded or otherwise permanently attached to a bulkhead or deck.

(b) If the following semiportable fire extinguishers have wheels, they must be securely stowed when not in use to prevent them from rolling out of control under heavy sea conditions:

(1) Each size V extinguisher required for a helicopter landing deck.

(2) Each size III, IV, and V extinguisher that is not required by Table 108.495(a).

Subchapter Q—Specifications

PART 162—ENGINEERING EQUIPMENT

§ 162.039–3 [Amended]

6. In § 162.039–3, by deleting the words "as a stationary unit" from paragraph (a), and by deleting the words "arranged for stowage in a fixed location (wheeled units not permitted)," from the first sentence of paragraph (b).

Subchapter T—Small Passenger Vessels (Under 100 Gross Tons)

PART 181—FIRE PROTECTION EQUIPMENT

7. By adding a new § 181.30–12 to read as follows:

§ 181.30–12 Semiportable fire extinguishers.

(a) The frame or support of each semiportable fire extinguisher permitted under § 181.30–10(b) in lieu of a portable fire extinguisher required by Table 181.30–01(a) must be welded or otherwise permanently attached to a bulkhead or deck.

(b) If an approved semiportable fire extinguisher has wheels and is not required by Table 181.30–01(a), it must be securely stowed when not in use to prevent it from rolling out of control under heavy sea conditions.

Subchapter U—Oceanographic Vessels

PART 193—FIRE PROTECTION EQUIPMENT

8. By adding a new § 193.50–20 to read as follows:

§ 193.50–20 Semiportable fire extinguishers.

(a) The frame or support of each size III, IV, and V fire extinguisher required by Table 193.50–10(a) must be welded or otherwise permanently attached to a bulkhead or deck.

(b) If an approved size III, IV, or V fire extinguisher has wheels and is not required by Table 193.50–10(a), it must be securely stowed when not in use to prevent it from rolling out of control under heavy sea conditions.

Agricultural Marketing Service

[7 CFR Ch. IX]

[Docket No. AO-362]

Ruby Seedless Grapes Grown in California; Recomended Decision and Opportunity To File Written Exceptions to Proposed Marketing Agreement and Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This recommended decision proposes a marketing agreement and order regulating the handling of Ruby Seedless grapes grown in California. It provides interested persons with the opportunity to file written exceptions concerning the recommendations made in this decision. The proposed order would: Establish a committee of growers for local administration; authorize grade, size, quality, maturity, pack, and container regulations; and allow the committee to engage in production and marketing research and development projects financed by handler assessments. The primary objective is to authorize establishment of minimum quality requirements for Ruby Seedless grapes shipped to market. Consumers would thereby be assured of satisfactory quality and growers would benefit from an expanded market.

DATE: Written exceptions to this recommended decision may be filed by July 16, 1979.

ADDRESSES: Written exceptions should be filed in duplicate with the Hearing Clerk, Room 1077, South Building, U.S. Department of Agriculture, Washington, D.C. 20250. All written submissions will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: Malvin E. McGaha, Fruit Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250, Phone: (202) 447-5975.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding: Notice of Hearing: Issued November 24, 1978, and published in the Federal Register (43 FR 56045) on November 30, 1978.

PRELIMINARY STATEMENT: Notice is hereby given of the filing with the Hearing Clerk of this recommended decision with respect to a proposed marketing agreement and order regulating the handling of Ruby Seedless grapes (also referred to herein as "this variety" and "grapes") grown in California.

This notice of filing of this decision and of opportunity to file exceptions thereto is issued under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), hereinafter referred to as the "act", and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

The proposed marketing agreement and order, herefinafter referred to collectively as the "order", were formulated on the record of a public hearing held at Reedley, California, February 1–2, 1979. Notice of the hearing was published in the November 30, 1978, issue of the Federal Register. The notice set forth a proposed order submitted by the "Proponents for Ruby Seedless Marketing Order" on behalf of producers and handlers of Ruby Seedless grapes grown in the proposed production area.

Material issues. The material issues presented on the record of the hearing are as follows:

(1) The existence of the right to exercise Federal jurisdiction in this instance;

(2) The need for the proposed regulatory program to effectuate the declared purposes of the act;

(3) The definition of the commodity and the determination of the production area to be covered by the proposed order;

(4) The identity of the persons and the marketing transactions to be regulated; and

(5) The specific terms and provisions of the proposed order including:

(a) The definition of the terms used herein which are necessary and incidental to attain the declared policy and objectives of the act;

(b) The establishment, maintenance, composition, procedures, powers, duties, and operation of a committee which shall be the local administrative agency for assisting the Secretary in the administration of the proposed order;

(c) The authority to incure expenses and the procedure to levy assessments on handlers to obtain revenue for paying such expenses;

(d) The authority to establish production and marketing research and market development projects;

(e) The method of regulating the handling of Ruby Seedless grapes grown in the production area;

(f) The authority for inspection and certification of shipments of regulated grapes;

(g) The establishment of requirements for handler reporting and recordkeeping;

(h) The requirement of compliance with all provisions of the proposed order and with regulations issued under it; and

(i) Additional terms and conditions as set forth in § .62 through § .71 of the Notice of Hearing published in the Federal Register of November 30, 1978 (43 FR 56045) which are common to all marketing agreements and marketing orders, and certain other terms as set forth in § .72 through § .74 which are common to marketing agreements only.

Findings and conclusions. The following findings and conclusions on the material issues are based on the record of the hearing:

(1) Ruby Seedless grapes are grown commercially in five counties in the San Joaquin Valley in California. Principal areas of production are Fresno and Tulare counties. The primary outlets for this variety are the fresh table grape markets within the State of California, in other States, and export. This variety is not ordinarily grown for drying into raisins or for sale to wineries, though some minor quantities may be disposed of in these outlets. Small quantities of this variety are also canned or frozen, though the market for frozen grapes appears to be still in the early stages of development.

Harvesting of the grapes begins in the early part of August. Since all grapes do not mature at the same time, the vineyards are usually picked three times. The first picking accounts for

about 25 percent of the production of a given vineyard; the second picking for about 60 percent; and the final picking for the remainder.

Current packing practices in the Ruby Seedless grape industry make it impracticable to separate the grapes on the basis of the intended market; i.e., intrastate, interstate, or export. The grapes may be harvested and packed at the vineyard or they may be harvested and transported to a central location for packing. Subsequent to packing, the grapes are precooled. Immediately thereafter they may be shipped or they may be placed in cold storage for later shipment. Some of the grapes may be held in storage for as long as six months. Generally, a handler does not know the destination of the grapes at the time they are packed.

Ruby Seedless grapes are marketed in the major market areas in the United States. In addition, they are shipped to such countries as England, Canada, New Zealand, and to Hong Kong, Singapore, and the Caribbean Islands. The record indicates that the movement of grapes in the channels of commerce is so intermingled as to make it impracticable to differentiate between those shipped only to destinations within the production area and those shipped in interstate and foreign commerce. Any handling of Ruby Seedless grapes for the fresh market exerts an influence on all other handling of such grapes. Sellers of Ruby Seedless grapes, as with any other commodity, seek to conduct their business so as to secure the best return for the grapes they have for sale. The seller continually surveys the available markets in order to take advantage of the best possible opportunity to market grapes. Markets within the State of California provide opportunities to dispose of grapes the same as do markets in other States, or for export; and the sale of a quantity of grapes in a market within California exerts an influence on sales of such grapes in a market in any other State. If shipments of grapes to markets outside California were regulated while those within the State were unregulated, growers and handlers would likely attempt to market within the State all the lower quality grapes which could not be shipped under regulation. This would depress the price of Ruby Seedless grapes in California markets to a level below that prevailing in markets outside the State. The existence of a lower price level for grapes marketed within California would tend to depress the price for such grapes sold in interstate markets. Buyers generally have ready access to market information and knowledge of prices in one market is used in bargaining for the same commodity to be shipped into other markets, including markets outside California. Some grapes are initially shipped to larger markets, such as Los Angeles, and later reshipped from there to markets located outside California. Thus, it is concluded that the shipment and sale of Ruby Seedless grapes, whether to a market within the State of California or outside thereof, affect the price of all such grapes grown in the production area. Therefore, it is found that the handling of this variety of grapes grown in the production area is either in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce. Hence, except as hereinafter otherwise provided, all handling of Ruby Seedless grapes grown in the production area should be subject to the authority of the act and the order.

(2) Ruby Seedless grapes were first produced on a commercial basis in 1968. Currently there are about 1,000 acres planted. All of this acreage is not in full production, however, it is expected that it will be within the next two years. During the hearing, it was indicated that 500 to 600 acres of new Rudy Seedless grape vineyards would be planted in early 1979. The records indicates that there is sufficient rootstock available to plant an additional 5,000 acres; thus, the potential exists to increase the acreage of this variety at a rapid rate.

This grape has a number of characteristics that make it desirable as a fresh market table grape. It is seedless, and has the red color of the Emperor, a fresh market seeded variety. The absence of seeds is a desirable quality in grapes for fresh market. The berries are firm, and have good storage quality. The vines are vigorous and more productive than the Emperor variety. Ruby Seedless grapes can be harvested over a relatively longer period than other varieties of table grapes. However, this variety may produce fruit which fails to have desirable fresh market quality attributes unless proper cultural and packing practices are followed. In recent marketing efforts, growers and handlers found that shipment of grapes manifesting desirable berry and bunch sizes, color and types of pack could be marketed most advantageously. As greater numbers of growers and handlers become involved in producing and marketing the Rudy Seedless variety, quality control on a voluntary basis would be extremely difficult if not impossible.

It is particularly important in view of the prospective increase in production which will have to be absorbed by the market, that demand not be adversely affected by the marketing of poor quality grapes. The use of authority to establish quality requirements could be used to assure consumers that the grapes offered in the market place are of satisfactory quality. In the absence of such regulation, grapes of low quality, lacking in flavor, small in size, and off-color could be marketed. Marketing of such grapes would tend to destroy the reputation of the variety with consumers and with wholesalers, retailers, and others at all levels in the marketing channel. Shipment of unsatisfactory grapes tends to depress prices, demoralize the market, and reduce grower returns. The establishment of regulations with respect to grade, quality, size, and maturity such as are contemplated under the order would provide a method whereby orderly marketing could be promoted. Also authority to establish minimum standards of quality or maturity, or both, as permitted by the act, during any period when prices are above the parity level could promote orderly marketing in the public interest. All such actions would tend to effectuate the declared policy of the act.

The containers used in the shipment of Rudy Seedless grapes are mainly those which have been developed for the shipment of other varieties of table grapes. Concern was expressed that, in the absence of authority to regulate containers, containers closely resembling the standard containers could be used. A multiplicity of containers with different dimensions and capacities could result in buyer confusion and in a loss of trade confidence. Regulation of the size, capacity, dimensions, markings, and pack of containers used in the marketing of Rudy Seedless grapes could provide a means of enabling buyers and handlers alike to know the quantity of grapes covered by prices quoted, thereby tending to increase trade confidence and stability in the marketing of the fruit. The order should include authority to regulate markings on containers. The record indicates that such regulation could be used to assure that containers are properly marked as to weight of contents and the name of the variety. Weight is an important consideration in the sale of grapes. The requirement for marking the variety name on the containers would discourage improper identification of any container of Ruby Seedless grapes as a possible means of circumventing order requirements. It is not intended that any such regulation be used to exercise any control over proprietary brand labels, or the content

or design of any such labels. Furthermore, container regulations are not intended to discourage experimental use, under research authority, of new containers of superior design, construction, or material. The order provides for such contingency in § .45.

The proposed order would not prevent any person from planting the Rudy Seedless variety or from increasing existing acreage. Similarly, the order would not prevent any person from becoming a handler of the fruit.

The hearing record includes information on production and packing costs for Ruby Seedless grapes illustrating the substantial investment involved in vineyard establishment and in producing and marketing these grapes. In addition to the establishment of the vineyard, production demands sizable annual outlays for pruning, thinning, disease and pest control, and soil and water management. Hence, growers and handlers have a substantial interest in the establishment and maintenance of stable markets.

Exercise of the authority to regulate the quality of shipments and to establish uniform containers for such shipments could assure that unsatisfactory, low quality fruit would not undermine the market; this should encourage production of this variety of grape. Consumers would benefit by having an additional seedless table grape of uniform quality in the marketplace which, due to its storage qualities, would be available to them over a longer portion of the year.

In view of the foregoing, it is concluded that the proposed order could be used to establish orderly marketing conditions for Ruby Seedless grapes which, consistent with the declared policy of the act, would be in the public interest.

(3) The term "grapes" should be defined in the order to identify the commodity to be regulated. The term, as used in the order, means Rudy Seedless grapes. This variety of grape was originally developed at the University of California at Davis, California, in 1939. The commercial introduction and application of the name Ruby Seedless occurred in 1968. The grape is seedless with a distinctive red color, and is easily distinguished from other varieties of grapes. A representative of the Federal-State Inspection Service testified that the characteristics of Ruby Seedless grapes are different from those of any other variety of grape and there is no problem in identifying this variety.

The term "production area" should be defined in the order to mean the State of California. The evidence of record indicates that Ruby Seedless grapes are now produced in five California counties, but that they could be grown throughout most of the State. Other varieties of table grapes are grown in at least 26 of California's 57 counties and when wine and raisin variety grapes are included, grapes are grown in at least 42 of the 57 counties. In the future Ruby Seedless grapes may be grown in any of the areas suitable for production of grapes. Moreover, grapes are transported freely from one area to another and could be packed and handled at a location remote from that in which they were produced. Consequently, the production area should encompass the entire State. Therefore, it is concluded that the State of California is the smallest regional production area that is practicable consistently with carrying out the declared policy of the act.

(4) The term "handler" is synonymous with "shipper" and should be defined, as hereinafter set forth in the order, to identify the persons who would be subject to regulation under the program. Such term should apply to any person, except a common or contract carrier transporting grapes owned by another person, who performs any of the activities within the scope of the term as hereinafter defined. It should also apply to any person who causes such activities to be performed. Thus, any person who is responsible for the sale, consignment, delivery, transportation, or in any other way places Ruby Seedless grapes in the current of commerce should be a handler under the proposed order.

The term "handle" is defined in the proposed order to identify specific marketing functions which place Ruby Seedless grapes in the current of commerce within the production area or from within the production area to any point outside such area.

Specifically, the term should be defined as follows: "Handle" and "ship" are synonymous and mean to sell, consign, deliver, or transport grapes or cause grapes to be sold, consigned, delivered, or transported in the current of commerce between any point within the production area and any point outside thereof, or within the production area: *Provided*, That the term handle shall not include the sale of grapes on the vine, or the transportation or delivery of grapes from the vineyard where grown to a packing facility located within such area for preparation for market.

Principally, three methods are employed in packing grapes. Grapes may be "field packed" directly from the vine into the container (a lug holding approximately 23 pounds) which is secured to the top of a portable pack stand and carried through the vineyard from vine to vine by the harvest worker. The worker selects and harvests mature grapes from the vine, trims each bunch with a scissors type of shear to remove immature and defective berries, and places the bunches directly into the lug, or in some instances first places the bunches into plastic bags each of which hold about two pounds, and then places the bags (11 to 12) into the lug. To complete the packing process, a "paper curtain" is placed over the grapes and a wooden slatted lid is placed on the lug. Field packed fruit is delivered to a cooling or cold storage facility where it is precooled or stored until shipped.

Another method of packing grapes utilizes a portable packing shed, moveable from site to site, consisting of an arrangement of scales and roller conveyors built on wheels. In the vineyard grapes are harvested and placed in "pick boxes". Packers at the packing shed remove the grapes from these boxes, trim them to remove undesirable berries and place them into the 23 pound lug shipping containers. Thus, the packing crew is in one location which is an advantage from the standpoint of supervision. This method also enables the salvage of cull fruit which may have economic value. A disadvantage is the expense of the extra labor involved in placing the fruit into and removing it from the pick boxes. After packing at the portable packing shed, the grapes are shipped to market or to cold storage facilities for precooling or holding for shipment.

The third packing method involves the use of a central packinghouse, a permanent installation. Grapes are harvested and placed stem up into pick boxes which contain 20 to 40 pounds, then moved by truck to the packinghouse. There, packers are located at individual stations equipped with a pack stand, scales, and packing supplies such as lug boxes, bags, and curtains. Each packer packs from a pick box, removing the bunches, trimming each to remove undesirable berries, and placing the bunches into 23 pound lugs. The lugs then move down a conveyor for lidding. After lidding, the lug is ready for shipment to market, or to cold storage facilities for cooling or holding.

Basically the foregoing describes the manner in which grapes are prepared for market. It is during these stages of preparation that grapes can be most conveniently graded, sized, and otherwise packed to meet any requirements of the order. It is therefore

concluded that grapes should meet any such requirements before being handled as the term "handle" is herein defined. However, it would be impractical to require grapes to meet regulatory requirements prior to the time they have been prepared for market. Hence, the activities and the movement which are necessary to facilitate such preparation should be exempt from the definition. Thus, the sale of grapes on the vine, and the transportation or delivery from the vineyard where the grapes are grown to a packing facility located within the production area for preparation for market should be excluded from the term.

The record indicates that grapes often are precooled or stored in cold storages prior to being placed in marketing channels. Hence, precooling and storage, if performed, should be considered as being a part of preparation for market of the grapes involved.

Although the record indicates that prior to being placed in the channels of commerce most grapes are prepared for market as heretofore described, some grapes may be shipped directly to market from the vineyard by the producer. In the event a producer transports grapes from the vineyard directly to the market, he would be placing the grapes in the current of commerce. In such instances, it is incumbent upon the producer to see that the grapes comply with all applicable requirements prior to such handling. Persons who purchase grapes on the vine and have them harvested and place them in maket channels likewise are performing the handling function and are responsible for compliance with all order requirements.

It was indicated that in many instances grapes are sold through commission merchants. In such cases, the commission merchants should make certain that the grapes meet the requirements of the order prior to their movement into marketing channels. However, the fact that the person with the proprietary interest in the grapes employs a commission merchant to sell such grapes would not absolve such person of responsibility for seeing to it that the grapes meet applicable requirements as the commission merchant may only be acting as agent of the person who holds proprietary interest. Persons with the proprietary interest in the grapes under whose direction preparation for market takes place normally are in the best position to assure that packed grapes meet any regulatory requirements prescribed under an order. Shipment of grapes which have by-passed any stage of normal preparation should nonetheless be required to comply with requirements of the order. Persons who ship an grapes which do not meet regulatory requirements should be accountable for the violation. It is necessary that persons who sell, consign, deliver, or transport or who cause grapes to be sold, consigned, delivered, or transported in the channels of commerce be responsible for compliance with order requirements to assure its effectiveness.

(5)(a) Certain terms and provisions of the proposed order should be defined and explained for the purpose of designating specifically their applicability and limitations whenever they are used.

"Secretary" should be defined to mean not only the Secretary of Agriculture of the United States, the official charged by law with the responsibility for programs of this nature, but also, to recognize the fact that it is physically impossible for the Secretary to perform personally all functions and duties imposed upon him by law, any other officer or employee of the United States Department of Agriculture who is, or who may hereafter be, authorized to act for the Secretary.

"Act" should be defined to provide the correct legal citation for the Agricultural Marketing Agreement Act of 1937, as amended. This is the statute under which the proposed regulatory program is to be operative and avoids the need for referring to the citation throughout the order.

The definition of "person" should follow the definition of that term as set forth in the act. This will insure that the term will have the same meaning in the order as it has in the act.

"Producer" is synonymous with "grower" and should be defined to mean any person engaged in a proprietary capacity in the production of Ruby Seedless grapes for market. This definition is necessary for such purposes as determining eligibility of persons to vote for, and to serve as, members or alternate members of the Ruby Seedless Grape Committee, and to identify those eligible to vote in any referendum.

The term "fiscal year" should be synonymous with "crop year" and should be defined to mean the period with respect to which financial records of the Ruby Seedless Grape Committee—the agency which would administer the program locally—are to be maintained. The period should fix the beginning of each fiscal year at such time as would afford the committee time to plan and recommend any needed regulations for a crop year and encompass a period during which all of the production of any given season is likely to be handled. Furthermore, the period should allow sufficient time prior to harvest each year for the committee to organize and develop information necessary to its functioning during the fiscal year. The evidence of record indicates that at present such fiscal year should be the 12 month period beginning April 1 of a year and ending March 31 of the following year. However, it may develop that for reasons not now apparent, it would be desirable to establish a fiscal year other than the one beginning April 1. Therefore, authority should be included in the order to provide that the committee may prescribe a different fiscal period, subject to the approval of the Secretary. It should be recognized that if at some future dates there is a change in the fiscal year, such change could result in a transition year being more or less than 12 months. Also, since the order, if issued, will be issued after April 1, 1979, and the initial fiscal year would end on March 31, 1980, the initial fiscal year will be less than a full 12 month period.

The term "committee" should be defined to identify the administrative agency—the Ruby Seedless Grape Committee—established under the provisions of the order. Such a committee is authorized by the act, and the definition thereof, as hereinafter set forth, is merely to avoid the necessity of repeating the full name each time it is used.

"District" should be defined in the order to mean the State of California. Such a definition forms a basis for nomination and selection of committee members. At present, the production of Ruby Seedless grapes is located in a relatively compact area in five counties in the central Joaquin Valley in California, with most of that production coming from two counties. However, this variety of grape eventually may be produced over a much wider area within the State. In such event, the order should provide for redistricting the production area into a number of smaller districts if this is deemed necessary to achieve proper and equitable representation among producers.

The term "pack" should be defined in the order to mean the placement of grapes into containers for shipment as fresh grapes, or the specific arrangement of grapes within a particular type and size of container by size of grape, weight, grade, or any combination thereof, for shipment as fresh grapes. A

definition of pack is needed in conjunction with proposed authority to facilitate description of regulations and to assist inspection and certification.

"Container" should be defined in the order as follows: "Container means any box, lug, crate, carton, or any other receptacle used in the packing of grapes for shipment as fresh grapes, and includes the dimensions, capacity, weight, markings, and any pads, liners, lids, and any or all appurtenances thereto or parts thereof. The term also applies, in the case of grapes packed in consumer packages, to the master receptacle and to any and all packages therein". A definition of this term is needed to serve as a basis for differentiation among the various shipping receptacles in which grapes are shipped to the fresh market. The evidence of record indicates that the committee will likely adopt those container regulations currently effective under California law. However, the order should provide for establishment of different regulations applicable to containers or packages within a container as recommended by the committee and approved by the Secretary if it is found that any such regulations would tend to effectuate the declared policy of the act.

"Part" and "subpart" should be defined in the order to make clear the meaning of such terms whenever they are used throughout the order. Consistent with the Code of Federal Regulations, "part" should mean collectively the order regulating Ruby Seedless grapes grown in California and all rules and regulations issued thereunder. Likewise, the recommended order and the various subdivisions of the rules and regulations would each be referred to as subparts of the part.

(b) It is desirable to establish an agency to administer the order locally as an aid to the Secretary in carrying out the purposes of the order and of the act. A committee consisting of nine members would be appropriate and the term "Ruby Seedless Grape Committee" would be a proper identification of the agency and reflect its character. The committee should be composed of eight producer members and one public member, with an alternate for each member. At present, the Ruby Seedless grape industry is located in a relatively compact area. Some of the growers are also handlers of grapes. Under provisions of the proposed order, a grower who performs handler functions does not lose the grower status. Hence, the record indicates it is unnecessary to provide for handlers as such on the committee. It was testified without opposition that changes in the industry may make it desirable to enlarge the committee at some future time and the order should provide for this. It is therefore concluded that authority should be included whereby the Secretary could, upon recommendation of the committee, change the number of producer member positions on the committee. In the event any such change is made, the order should allow appropriate changes in the quorum requirements contained in § 22.

In addition to the eight grower members on the committee, there should be an individual to serve as a public member. A public member could bring the viewpoint of the general public into committee deliberations. This could be particularly valuable in helping the committee to plan, implement, and evaluate marketing objectives. In addition, a public member could act as an intermediary and improve the understanding of the grape industry by the general public. The public member would thus serve an important purpose beneficial to the industry and the general public. Hence, the authority to change the number of committee members is not to be used to abolish the position of public member. It was testified by the proponent group that should the Ruby Seedless grape industry increase as anticipated, there are likely to be handlers of grapes who are not growers. It was advanced that it might be appropriate to provide that through rulemaking procedures the committee could be restructured to include such persons. However, no basis for qualificiations, nominating procedure and allocation of handler membership is provided in the record. It is therefore concluded that if in the future a need for such restructuring is manifest, this need would be more appropriately dealt with by an amendatory proceeding. Thus, authority to restructure the committee to include handler members is not included in the recommended order.

It is appropriate to specify in the order a term of office for members (and alternates) of the committee. The record indicates that a desirable term would be two fiscal years beginning April 1 of an odd numbered year and ending on the second succeeding March 31. In the event that the recommended order becomes effective, the term of office of the initial committee members should commence on the date such members are selected by the Secretary and end March 31, 1981.

So that there will be a committee at all times, members and alternates, after selection and qualification should continue to serve until their respective successors are selected and have qualified and the order should so provide. A term of office beginning April 1 would begin sufficiently in advance of the time when grape harvesting begins (about four months) to permit the committee to meet and organize; consider the prospective crop and marketing situation; develop an appropriate marketing policy; and consider the need for any administrative changes.

Each person selected to serve on the committee as a producer member should be an individual who is a producer, or an officer or employee of a corporate producer or other type of business unit engaged in the production of grapes. The public member should be a resident of the production area and should not be engaged in or have a financial interest in the production, processing, financing, or marketing (except as a consumer) of Ruby Seedless, or any other variety of grapes.

The order should provide for submission of the names of nominees for initial members of the Ruby Seedless Grape Committee by the group responsible for initiating the request for the order. This group was the "Proponents for Ruby Seedless Marketing Order." The record indicates that this group intends to secure such names by conducting nomination meetings among all known Ruby Seedless grape producers. Any nominations resulting from such meeting should be filed with the Secretary no later than the effective date of the order, should the order be promulgated. In the event no such nominations are made, the Secretary should be authorized to select the initial committee members from among qualified persons. A meeting for the purpose of nominating successors for poroducer members of the committee should be held, or caused to be held, by the committee not later than February 15 of each odd numbered year. Such meeting should be held at such time and place as will result in maximum grower participation. If the production area is divided into districts at some future date, the committee should consider whether or not meetings should be held in each district and act accordingly. The order should provide that only growers, including duly authorized representatives of growers, who are present at nomination meetings may participate in nominations. Each grower should be entitled to cast one vote for each nominee regardless of the number of business units in which that grower may be involved. A grower, including officers, or employees of such a grower, should be eligible to fill only

one position on the committee. The order should provide that the committee may appoint a subcommittee to locate prospective nominees for the public member and alternate member positions for consideration by the committee. While the subcommittee should function to identify possible candidates for the public member position, the committee should make the final nominations.

The order should provide that the members of the committee shall be selected by the Secretary from those nominated or from among other qualified persons. It should also provide that in the event nominations are not made within the time and in the manner hereinafter specified, the Secretary may select members and alternates without regard to nominations. Such selection should, of course, be from qualified persons as provided in the order.

The order should require that any person selected by the Secretary as a member or alternate shall qualify by promptly filing a written acceptance after being notified of selection.

The order should provide a method of filling any vacancies on the committee, including selection by the Secretary if nominations to fill any vacancies are not made as hereinafter provided. There may be vacancies caused by the death, removal, resignation, or disqualification of a member or alternate. It is important to maintain full membership on the committee, thus the order should require the committee to nominate a person to fill a vacancy on the committee within a reasonable time after such vacancy occurs. In the event the committee should fail to so nominate, the order should authorize the Secretary to fill such vacancy without regard to nominations.

The order should provide that an alternate member shall be selected for each member of the committee. Each alternate selected should have the same qualifications for membership as the member. There could be occasions when a committee member is unable to attend a meeting or meetings. Provisions for alternates would help assure a quorum at meetings, and thus permit the committee to conduct business when members are absent. Moreover, in the event of death, removal, resignation, or disqualification of a member, the alternate should act until a new member is nominated and selected. The order should provide that, in the event a producer member and that member's alternate are both unable to attend a committee meeting, such member or the committee members present at the meeting should be permitted to designate any other producer alternate to serve in such member's place in the event such action may be necessary to secure the required quorum.

The chairman of the committee, or the committee should be authorized under the order to request attendance at meetings by any alternate without regard to the expected or actual attendance of the member. Likewise, the chairman or committee should be authorized to request any alternate to perform other necessary duties in conjunction with the order.

The committee should be given those specific powers which are set forth in Section 8c(7)(C) of the act. Such powers are necessary to enable an administrative agency of this character to function.

The committee's duties, as set forth in the recommended order, are necessary for the discharge of its responsibilities. These duties are generally similar to those specified for administrative agencies under other programs of this character. It should be recognized that these specified duties are not necessarily all-inclusive, and it may develop that there are other appropriate duties the committee may need to perform.

The order should provide that at least six members of the committee or alternates acting for members, are necessary to constitute a quorum and any action by the committee shall require the concurring vote of a majority of the members present. However, any committee actions relative to expenses and assessments or recomendations for regulations pursuant to §§ .50 through .55 should require at least six concurring votes. This requirement would insure that actions pertaining to committee expenses and regulations have substantial industry support. The record indicates there may be occasions where action should be taken but such action does not warrant the expense of an assembled meeting and the inconvenience to committee members of the travel involved. In such cases, it would be appropriate to authorize the committee to vote by telephone, telegraph, or by other means of communication. To enable this, the order should authorize such voting. However, actions so taken should require at least eight votes of which not less than six shall be affirmative. Any action relative to regulations pursuant to §§ .50 through .55 or assessments pursuant to § .41 should be taken at assembled meetings.

The order should provide that members of the committee, and alternates when acting as members, shall be reimbursed for out-of-pocket reasonable expenses incurred in performing committee business. It would be unfair to expect members to personally cover such expenses incurred on behalf of the industry. Primarily, most expenses would be incurred in attending committee meetings; however, there may be instances when a member or alternate would be assigned specific duties by the committee, and incur expenses in performance of such duties. In any such case, the member or alternate should be reimbursed for any reasonable expenses involved in performing such duties.

The order should include a provision whereby the committee may prepare and submit to the Secretary an annual report as soon as practicable after the end of each crop year. Any such report should be made available to any grower, handler, or any other person who requests a copy. The report should review the administrative, financial, regulatory and research activities of the committee. It should also include information on shipments, prices, available marketing information, and any other appropriate information that is available.

(c) The committee should be authorized under the order to incur such expenses as the Secretary finds are reasonable and likely to be incurred by it during each fiscal year. Such a provision is necessary to assure the maintenance and functioning of the committee and should include the funding of any committee activities as the Secretary may determine to be appropriate. Necessary expenses include such items as salaries for administrative employees, travel expenses, rent, utilities, equipment and supplies. These are expenses ordinarily associated with the operation of a business entity and are likely to be incurred in the operation and functioning of the committee. The comittee should be required to prepare a budget showing estimates of income and expenditures necessary for the administration of the order during a fiscal year. Such budget, including an analysis of its components, should be submitted to the Secretary for approval prior to or near the beginning of each fiscal year. Any such budget should also include a recommendation to the Secretary of a rate of assessment designed to secure the income required for such fiscal year. The order should provide for assessment of handlers for maintenance and functioning of the committee throughout the period the order is in effect irrespective of whether particular provisions thereof are suspended or are inoperative. The act

authorizes the Secretary to approve the incurring of expenses by the administrative agency established under an order and requires the order to contain provisions requiring handlers to pay their pro rata shares of such expenses.

The rate of assessment should be established by the Secretary on the basis of the committee's recommendation, and other available information. In the event that an assessment rate is established which does not generate sufficient income to pay the approved expenses, the Secretary should be authorized to increase such assessment rate in order to secure sufficient funds. Any such increase should be applicable to all grapes handled during the applicable fiscal year.

While the order should require each handler to pay to the committee a pro rata share of the expenses as the Secretary finds are reasonable and likely to be incurred by the committee during each fiscal year, provision should be made for financing previous to the time assessment income is available from assessments to defray expenses. Since the recommended fiscal year begins on April 1 and any assessment revenue would not be received by the committee until after grapes are handled (mid-August), the committee should be authorized to accept advance payment of assessments or to borrow money to pay expenses due before assessment income is received. In addition, the committee should be authorized to carry over any excess assessment funds, with the approval of the Secretary, into subsequent fiscal years, as a reserve. If excess assessment funds collected from handlers during a fiscal year are not carried over as a reserve, handlers should be entitled to a proportionate refund of any such excess funds. Such refund may be made by direct payment to a handler or by crediting such amount against such handler's assessment in the subsequent fiscal year. However, the order should provide that any such refund can be applied to offset any outstanding obligation due the committee from such handler. Funds carried in such reserve should not be allowed to exceed approximately one fiscal year's expense. Such funds should be available for all approved expenses during any fiscal year including those falling due prior to the time assessment income from that year is available; to cover any deficit in a fiscal year when assessment income is less than expenses; to defray expenses during any period when any or all of the provisions of the order may be suspended or are inoperative; and to cover necessary liquidation expenses in the event the order is terminated. Upon termination of the order, handlers would be entitled to a refund of their equities. However, should the order be terminated after many years of operation, it may be difficult to determine handler equities with precision. Therefore, the order should provide that in such event, the funds may be disposed of in such manner as the Secretary determines to be appropriate, but to the extent practicable any such funds shall be returned pro rata to the handlers from whom such funds were collected.

The order should provide authority to permit the committee, with the approval of the Secretary, to levy a late payment charge or interest, or both, on assessments that are not paid by the time specified by the committee. Nonpayment of assessments can have an adverse effect on the operation of the committee and may require it to borrow money and pay interest to continue operation. It is not fair for one handler to pay assessments on time while another does not. Delinquent accounts are costly to collect and time consuming and should be avoided if at all possible. By paying the obligation when due, handlers would not be subject to either the late payment charge or interest. The record indicates that any late payment charge and/or interest rate applicable to delinquent assessments should be established by issuance of appropriate rules and regulations recommended by the committee and approved by the Secretary.

All funds received by the committee under the order should be used solely for the purposes of the order. The Secretary should be authorized to require the committee, at any time, to account for all receipts and disbursements. Also, when any person ceases to be a member or alternate of the committee, such person should be required to account for all funds, property and other assets for which such person is responsible and to deliver to the committee any such funds, property, and assets. Such person should execute appropriate assignments and other instruments as may be appropriate to vest in the committee the right to all such funds and property and all claims vested in such person.

(d) The order should provide authority, as hereinafter set forth, for the establishment of production research and marketing research and development projects designed to assist, improve, or promote the marketing, distribution, and consumption or efficient production of Ruby Seedless grapes. This authority is intended to permit research into propagation and cultural practices as well as marketing and distribution. It does not authorize any form of paid advertising because such advertising for Ruby Seedless grapes is not authorized by the act. Since the Ruby Seedless grape is a relatively new variety of grape and its production is expected to increase rapidly in the immediate future, research relative to pruning, fertilization, cultivation and pest control would be appropriate areas for research. With respect to research on marketing and distribution of such grapes, container and other packaging research should be included.

The foregoing are merely examples of the kinds of research that the committee may wish to undertake. They are not intended to be all inclusive. It is not possible to anticipate all the problems that may arise which may require research. Hence, it is desirable for the order to contain all the authority of the act so the committee may engage in any research projects relative to production and marketing designed to assist, improve, or promote the marketing, distribution, consumption, or efficient production of Ruby Seedless grapes.

The Committee should be empowered to engage in or contract for such projects, to spend funds for such purposes and to consult and cooperate with other agencies in the conduct of research projects. Approval by the Secretary would be required prior to engaging in any research project.

A representative of the California Table Grape Commission testified in opposition to inclusion in the proposed order of authorization for the committee to engage in marketing research and development projects. The Commission conducts advertising and research under the authority of the California Agricultural Code. The funds for such projects are obtained through assessments levied on grape producers. Under section 65501 of this code, if (a marketing agreement or) a marketing order under the jurisdiction of the United States Department of Agriculture contains provisions substantially similar to those in the California code, the code is inapplicable to any producer, shipper, or other person covered under the Federal marketing agreement or order.

Section 608c(6)(I) of the Agricultural Marketing Agreement Act of 1937, as amended, provides, in part, that inclusion in a Federal marketing order of provisions for research and marketing promotion shall not be deemed to preclude, preempt, or supersede any

such provisions in any State program covering the same commodity.

The evidence of record indicates that the proponent group have no objection to payment of assessments to the California Table Grape Commission. It was suggested at the hearing that the California Table Grape Commission and the Ruby Seedless grape industry could effect a memorandum of understanding to assure the Commission that the Federal order was not intended to preempt the provisions relative to production and market research and promotion. Since as heretofore noted, the wording of the act relative to this subject clearly indicates there is no preemption, any agreement between the Commission and the Ruby Seedless grape industry would be outside the authority and scope of the marketing order.

(e) The declared policy of the act is to establish and maintain such orderly marketing conditions for Ruby Seedless grapes, among other commodities, as will tend to establish parity prices to growers and be in the public interest. The regulation of the handling of Ruby Seedless grapes, as proposed to be authorized in the order, would provide a means for carrying out such policy.

To facilitate the operation of the program each year the committee should submit a marketing policy report to the Secretary. The report should be for the ensuing season and should be submitted by the committee prior to making any recommendations relative to regulations for such season. In developing its marketing policy, the committee should give consideration to factors which affect the production and marketing of Ruby Seedless grapes. Any such policy should be announced prior to the beginning of the harvesting period. The reason for such timely announcement is so growers and handlers will be apprised of the grade, maturity, color, size, pack, or container regulations that are likely to be in effect for the upcoming season and can plan accordingly.

The factors set forth in the recommended order which the committee should consider in developing its marketing policy are those that are appropriate and necessary for a proper evaluation of the overall supply and market outlook.

In considering its marketing policy, the committee needs to know the expected quantity and quality of the forthcoming crop. The committee should also have similar information about other varieties of table grapes. At present, almost all of the Ruby Seedless grapes produced are sold in the fresh market. However, in the future, quantities of these grapes may be sold for freezing or canning, dried into raisins, or sold to the wineries, therefore the expected demand conditions for such grapes should include an appraisal of the current and prospective conditions in all outlets. Information relative to the trend and level of consumer income and supplies of competing commodities should be included because of the influence such factors might exert on shipments of grapes. Since certain regulations are permitted only when the price to growers is below parity, the committee should indicate in its marketing policy the expected price for Ruby Seedless grapes and the relationship of any such price to the parity price. In addition to the foregoing information, the committee should include in its marketing policy report any other factors likely to have a bearing on the marketing of grapes.

The Ruby Seedless Grape Committee, as the local administrative agency under the proposed order, should be authorized to recommend regulations designed to effectuate the declared policy of the act and as provided in the order. As previously mentioned, authority for regulations should include grade, size, quality (including color), maturity, or any combination thereof, for grapes grown in the production area. The committee should also be authorized by the order to recommend regulations relative to the size, capacity, weight, dimensions, markings, or pack of any container or containers used in the handling of such grapes. In addition, the committee should have the authority to recommend such other terms and conditions as may be incidental to, and not inconsistent with, the regulatory authority, as hereinafter set forth, which may be necessary to effectuate the provisions of the order. It is appropriate that the committee should have the responsibility for recommending regulations to be considered by the Secretary and that the Secretary look to the committee for such recommendations.

The regulation of the grade, size, quality (including color), and maturity of grapes is a basic function of the proposed marketing order. The shipment of low grade, small size, and otherwise poor quality grapes destroys consumer confidence and depresses financial returns to growers.

The evidence of record indicates that the U.S. Standards for Grades of Table Grapes could serve as a basis for regulation under the order. It is intended that any minimum grade and quality standard could be made effective regardless of whether the price for Ruby Seedless grapes is above or below parity.

A number of attributes are related to quality in grapes. Maturity of grapes is an important element in palatability and may be determined by measuring the soluble solids. Color is an important factor because consumer selection of grapes is likely to be influenced by the "eye appeal" of the fruit. Uniformity of size of the individual grapes in a bunch is a significant factor in a consumer's decision to buy or not to buy. Small berries, referred to in the trade as "water berries" or "shot berries", are often immature and either sour or completely lacking in flavor. It is in the public interest to establish quality and maturity standards to prohibit the marketing of grapes that are materially disfigured, decayed, improperly colored and otherwise unacceptable.

Section 608c(6)(I) of the act authorizes inclusion in a marketing order of terms and conditions to fix size, capacity, weight, dimensions, or pack of the container or containers used in the handling of grapes. The Ruby Seedless grape industry is expected to increase substantially in the future. Marketing the increased production will demand trade confidence. Suitable containers, the different sizes of which are readily distinguishable one from another, could be mandated by regulation. Hence, authority should be included to regulate containers to the extent necessary as permitted by the act to maintain trade confidence, establish orderly marketing and improve returns to growers.

The recommended order should provide for modification, suspension, or termination of any regulation whenever such action would tend to advance the objectives of the act and the order. The order should authorize such based upon a recommendation of the committee, or other information available to the Secretary. The need for this authority is obvious in that there likely will be times when due to changes in circumstances, a given regulation would not tend to effectuate the declared policy of the act and thus should be modified, suspended, or terminated, as applicable.

The evidence of record indicates that the order should exempt grapes for certain uses from payment of assessments, quality, and container regulations, and inspection and certification requirements. Specifically, shipment of grapes for consumption by charitable institutions, for distribution by relief agencies or for commercial processing into products do not affect the marketing of grapes in commercial fresh fruit market channels.

Consequently, such shipments should be exempt from order requirements. At the present time, minor quantities of Ruby Seedless grapes are processed into raisins, frozen, or used in the production of wine. The order should also include discretionary authority to exempt the handling of grapes for such specified purposes or in such minimum quantities as may be found consistent with good administration. Grapes handled in gift packages, sold by a producer at his own roadside stand, or those shipped for use in conjunction with marketing research and development projects, are examples of handling which should be eligible for exemption from assessments, quality and container regulations, or inspection and certification requirements or a combination thereof. However, to prevent possible abuse of the exemption provisions, the committee should have authority to prescribe approriate rules, regulations, and safeguards to prevent grapes handled under exemptions from entering the channels of commerce for fresh grapes or for some purpose other than the specific purpose authorized, if such action is necessary.

The record indicates that there may be times when grapes held in storage will deteriorate and no longer meet the minimum quality requirements. It is likely that such grapes would be disposed of for commercial processing into products under the exemption provisions. In addition, in any grape packing operation there often is a quantity of cull fruit remaining after packing. Any such cull fruit may be disposed of to exempt uses under the exemption provisions. However, should abuses occur, such as diversion to non-exempt channels, the committee should have authority to establish appropriate controls. Such controls may include a requirement that handlers agree to observe specified requirements and comply with established safeguards to handle grapes under any such exemption.

(f) Inspection and certification of shipments are necessary to assure that the handling of grapes complies with regulations effective under the proposed order. The Federal-State Inspection Service has inspectors in the production area. At the hearing, a representative of this agency indicated that the agency is in a position to provide any necessary inspection and certification.

Responsibility for obtaining inspection would fall upon the handlers. All grapes should be inspected prior to handling. However, there may be some occasions when inspectors are not available in a reasonable time to perform the required inspection. Consequently, the order should provide that in such cases the inspection requirement may be waived. Subject to approval of the Secretary, the committee should prescribe rules and regulations governing the issuance of waivers of inspection to prevent the abuse of such provision. Moreover, any such waiver should not release the handler from complying fully with any other order requirements.

Grapes are perishable and may deteriorate over time, particularly if preventive steps are not taken. Therefore, the order should authorize establishment of a maximum time an inspection certificate is valid. Such authority could be used as necessary to require that grapes be inspected within a specified time prior to shipment, and if the grapes are not shipped within such time would be subject to reinspection.

The order should require that handlers furnish the committee a copy of the inspection certificate applicable to each lot of grapes. The certificates contain considerable data of value to the committee in conducting program operations which would otherwise have to be obtained by requiring reports from handlers. The certificates also can be used as a basis for assesement billing. This requirement may be accomplished by having the Federal-State Inspection Service forward to the committee a copy of each inspection certificate issued on Ruby Seedless grapes. The order should authorize the committee to enter into an agreement with the Federal-State Inspection Service for the required inspection and collect from handlers their respective pro rata share of inspection costs. The benefits of the order, including inspection, will accrue to the industry generally. Under a committee contract, it is contemplated that the inspection fee would be set as a uniform fee per carton or lug regardless of where or how many cartons or lugs are inspected at a particular time.

(g) The committee should have authority, with the approval of the Secretary, to require that handlers submit to the committee such reports and information as it may need to perform its functions and fulfill its responsibilities under the order. Handlers have the necessary information in their possession and the requirement that they furnish it to the committee in the form of reports should not constitute an undue burden.

Reports are needed by the committee for such purposes as determining whether handlers are complying with order requirements; to aid in determining and collecting program assessments; and to enable computations of statistical data for use in marketing policy development and recommendations for regulations.

It is anticipated that information needed may include: the name of the shipper and the shipping point; identification of the carrier; date and time of shipment; number of containers in a shipment; destination of shipment; and inspection certificate or waiver of inspection applicable to the shipment. The foregoing, however, should not be construed as a complete list of information the committee might require. It is not possible at this time to anticipate every type of report or kind of information which the committee may find necessary for the proper conduct of operations under the order. Therefore, the order should authorize the committee, with the approval of the Secretary, to require each handler to furnish such information as it finds necessary for it to perform its duties under the order.

The order should require each handler to maintain such records of the grapes received and disposed of as may be necessary to verify the reports such handler submits to the committee. All such records should be maintained for two fiscal years after the fiscal year in which the transactions occurred.

The record indicates that the inspection certificate and shipping manifest applicable to each shipment of grapes would likely contain most of the information the committee would need, in the ordinary course of operations. Thus, the submission of reports directly by handlers should be kept to a minimum. As hereinafter specified in the order, all reports and records submitted by handlers for committee use should be kept confidential in the custody of a committee employee and the contents disclosed to no person other than the Secretary and persons authorized by the Secretary. Under certain circumstances, release of information compiled from reports may be helpful to the committee and to the industry generally in planning operations under the order. However, any information released should be on a composite basis, and such release of information should disclose neither the identity of the person furnishing the information nor such person's individual operations. This is necessary to prevent disclosure of information that may affect the trade or financial position or business operations of individual handlers.

(h) Except as provided in the recommended order, no handler should be permitted to handle Ruby Seedless grapes, the handling of which is prohibited by such order or prohibited

by any regulations issued under such order. If the program is to operate effectively, compliance with its requirements is essential and no handler should be permitted to evade any of its provisions. Any such evasion on the part of even one handler could be demoralizing to those handlers who are in compliance and could impair the effective operation of the program.

(i) The provisions of §§ —.62 through —.71 as contained in the notice of hearing published in the Federal Register on November 30, 1978, (43 FR 56045) and hereinafter set forth in the recommended order, are common to marketing agreements and orders now operating. All such provisions are incidental to and not inconsistent with the act and are necessary to effectuate the other provisions of the recommended marketing order and marketing agreement and to effectuate the declared policy of the act. The evidence of record supports inclusion of each such provision. Those provisions which are applicable to both the marketing agreement and the marketing order, identified by section numbers and heading are as follows: § —.62 Right of the Secretary; § —.63 Effective time; § —.64 Termination; § —.65 Proceedings after termination; § —.66 Effect of termination or amendment; § —.67 Duration of immunities; § —.68 Agents; § —.69 Derogation; § —.70 Personal liability; and § —.71 Separability. Those provisions applicable to the marketing agreement only are: § —.72 Counterparts; § —.73 Additional parties; and § —.74 Order with marketing agreement.

Rulings on briefs of interested parties. At the conclusion of the hearing the Administrative Law Judge fixed March 12, 1979, as the final date for interested persons to file proposed findings and conclusions and written arguments or briefs based upon the evidence received at the hearing.

Two briefs were filed, both by the "Proponents For Ruby Seedless Marketing Order", the group that requested the hearing. One brief urged that the provision of the order authorize container regulations to the full extent permitted by the Act. Specific reference was made to the industry practice of packaging grapes in poly (film) bags, and to the testimony of an opposition witness who maintained that the regulation under the California State code applicable to packaging of table grapes would be sufficient. A review of the evidence of record with respect to container regulation is found to support petitioners position and provisions of the proposed order reflect such conclusion. This brief also urges that the order include to the extent possible, all the authority permitted by the Act for production and marketing research and development. Reference was made to the testimony of a representative of the California Table Grape Commission who testified that § —.45 should be stricken from the proposed order as it would negate the Commission's authority to collect research assessments on Ruby Seedless grapes. The record indicates that proponents of the order do not object to payments of Commission assessments and the Agriculture marketing Agreement Act of 1937, as amended, under which the order would be effective, specifically provides that the inclusion in a Federal marketing order of provisions for research and marketing development shall not be deemed to preclude, preempt or supersede any State program covering the same commodity. A review of the record supports a finding that authority for production research and marketing research and development should be included in the order, and the order reflects that conclusion.

The other brief contends that persons who were producers on April 3, 1979, should be entitled to participate in the voting for nominees to fill member and alternate positions on the committee. It also suggests that such date could be used as a guide in establishing the date of planting for eligibility or producers to vote in a referendum. The term "producer" is defined in the order and those who qualify as a producer under that definition at the time the voting occurs would be eligibile to vote for nominees to fill producer positions on the committee. As to the suggestion that April 3, 1979, be used to determine eligibility of producers for voting in any referendum on the proposed order, the conduct of referenda is governed by "Subpart—Procedures for the Conduct of Referenda in Connection with Marketing Orders for Fruits, Vegetables, and Nuts Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended" (7 CFR 900.400–900.407). Under such procedure persons eligibile to vote would be those who at the time of the referendum qualify as producers in terms of the definition of "producer" contained in the order and also were producers of the commodity during a "representative period" specified by the Secretary in a referendum order. The record ontains no evidence supporting any particular date or dates determining a representative period. In the event the proposed order is presented to producers in a referendum, the referendum order which would be published with the Secretary's Decision will specify beginning and ending dates determining the "representative period" for purposes of that referendum. The Secretary may, if he so chooses, observe the suggested date in establishing the representative period.

General Findings. Upon the basis of the evidence introduced at such hearing, and the record thereof, it is found that:

(1) The marketing agreement and order, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The said marketing agreement and order regulate the handling of Ruby Seedless grapes grown in the production area in the same manner as, and are applicable only to persons in the respective classes of commercial or industrial activity specified in, a proposed marketing agreement and order upon which a hearing has been held;

(3) The said marketing agreement and order are limited in their applicability to the smallest regional production area which is practicable, consistenly with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the peoduction area would not effectively carry out the declared policy of the act;

(4) There are no differences in the production and marketing of Ruby seedless grapes grown in the production area which make necessary different terms and provisions applicable to different parts of such area; and

(5) All handling of Ruby Seedless grapes grown in the production area, as defined in said marketing agreement and order, is in the current of interstate of foreign commerce or directly burdens, obstructs, or affects such commerce.

Recommended marketing agreement and order. The following marketing agreement and order [1] are recommended as the detailed means by which the foregoing conclusions may be carried out.

Definitions

§ —.1 Secretary.

"Secretary" means the Secretary of Agriculture of the United States or any officer or employee of the Department who is or who may hereafter be authorized to exercise the powers or to perform the duties of the Secretary of Agriculture.

§ —.2 Act.

"Act" means Public Act No. 10, 73rd Congress (May 12, 1933) as amended

[1] The provisions identified with asterisks (***) apply only to the proposed marketing agreement and not to the proposed marketing order.

and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U.S.C. 601 *et seq.*).

§ —.3 Person.

"Person" means any individual, partnership, corporation, association or any other business unit.

§ —.4 Production area.

"Production area" means the State of California.

§ —.5 Grapes.

"Grapes" means all strains of Ruby seedless grapes grown in the production area.

§ —.6 Producer.

"Producer" is synonymous with "grower" and means any person engaged in a proprietary capacity in the production of grapes for the fresh market.

§ —.7 Handle.

"Handle" and "ship" are synonymous and mean to sell, consign, deliver, or transport grapes or cause grapes to be sold, consigned, delivered, or transported in the current of commerce between any point within the production area and any point outside thereof, or within the production area: *Provided*, That, the term handle shall not include the sale of grapes on the vine or the transportation or delivery of grapes from the vineyard where grown to a packing facility located within such area for preparation for market.

§ —.8 Handler.

"Handler" and "shipper" are synonymous and mean any person (except a common or contract carrier transporting grapes owned by another person) who handles grapes.

§ —.9 Fiscal year.

"Fiscal year" is synonymous with "crop year" and means the 12 month period beginning April 1 of any year and ending on March 31 of the following year, both dates inclusive, or such other period as the committee, with the approval of the Secretary, may prescribe.

§ —.10 Committee.

"Committee" means the Ruby seedless Grape Committee established pursuant to § —.20.

§—.11 District.

"District" means the State of California, or such other districts as may be prescribed pursuant to § .21(1).

§—.12 Pack.

"Pack" means (a) the placement of grapes into a container for shipment to market as fresh grapes, or (b) the specific arrangement of grapes within a particular type and size of container by size of grape, weight, grade, or any combination thereof, for shipment as fresh grapes.

§—.13 Container.

"Container" means a box, lug, crate, carton, or any other receptacle used in packing grapes for shipment as fresh grapes and includes the dimensions, capacity, weight, markings, and any pads, liners, lids, and any or all appurtenances thereto or parts thereof. The term applies, in the case of grapes packed in consumer packages, to the master receptacle and to any and all packages therein.

§—.14 Part and subpart.

"Part" means the Order Regulating the Handling of Ruby Seedless Grapes Grown in California and all rules and regulations and supplementary orders issued thereto. The aforesaid Order Regulating the Handling of Ruby Seedless Grapes Grown in California shall be in a "subpart" of such part.

Administrative Body

§—.20 Establishment and membership.

There is hereby established a Ruby Seedless Grape Committee consisting of nine members, each of whom shall have an alternate who shall have the same qualifications as the member. Eight members shall be growers (producer members), and one shall be a public member. Producer members and their alternates shall be growers or employees of growers. Each member and alternate shall meet the eligibility requirements set forth in § .22. The Secretary, on recommendation of the committee, may change the number of members on the committee.

§—.21 Term of office.

The term of office of each member and alternate member of the committee shall be for two fiscal years beginning on April 1 of an odd numbered year and ending on March 31 of an odd numbered year. Members and alternate members shall serve in such capacities for that portion of the term of office for which they are selected and have qualified and until their respective successors are selected and have qualified.

§—.22 Eligibility.

Each producer member of the committee shall, at the time of selection and during the term of office, be a producer in the district for which selected. The public member of the committee, at the time of selection and during the term of office, shall not have a financial interest in or be associated with the production, processing, financing or marketing (except as consumers) of Ruby Seedless or any other variety of grapes.

§—.23 Nominations.

(a) *Initial members.* Nominations for each of the initial members, together with nominations for the initial alternate members for each position, may be submitted to the Secretary by the committee responsible for promulgation of this part. Such nominations may be made by means of a meeting or meetings of the growers in the production area. Such nominations, if made, shall be filed with the Secretary no later than the effective date of this part. In the event nominations for initial members and alternate members of the committee are not filed pursuant to, and within the time specified in this section, the Secretary may select such initial members and alternate members without regard to nominations, but selections shall be on the basis of the representation provided in § .20.

(b) *Successor members.* (1) The committee shall hold or cause to be held, not later than February 15 of each odd numbered year, a meeting or meetings of growers in each district for the purpose of designating nominees for successor producer members and alternate members of the committee. These meetings shall be supervised by the committee which shall prescribe such procedure as shall be reasonable and fair to all persons concerned.

(2) Only growers who are present at each such nomination meeting, or who are represented by duly authorized representatives approved by the committee, may participate in the nomination and election of nominees for producer members and their alternates. Each grower in attendance, or authorized representative of a grower, shall be entitled to cast only one vote, regardless of the number of business units the grower may represent, for each nominee to be selected.

(3) A particular grower, including officers or employees of such grower, shall be eligible for membership as member or alternate to fill only one position on the committee.

(4) Nominations for public member and alternate shall be made by the committee. The committee may appoint a subcommittee to select prospective nominees for the public member and alternate member positions on the

committee. The committee shall prescribe such procedure for the selection and voting for each candidate as shall be fair to all persons concerned.

§ —.24 Selection.

From the nominations made pursuant to § .23, or from other qualified persons, the Secretary shall select the nine members of the committee and an alternate for each such member.

§ —.25 Failure to nominate.

If nominations are not made within the time and in the manner prescribed in § .23, the Secretary may, without regard to nominations, select the members and alternate members of the committee on the basis of the representation provided for in § .20.

§ —.26 Acceptance.

Any person selected by the Secretary as a member or as an alternate member of the committee shall qualify by filing a written acceptance with the Secretary promptly after being notified of such selection.

§ —.27 Vacancies.

To fill any vacancy occasioned by the failure of any person selected as a member or as an alternate member of the committee to qualify, or in the event of the death, removal, resignation, or disqualification of any member or alternate member of the committee, a successor for the unexpired term of such member or alternate member of the committee shall be nominated and selected in the manner specified in § .23 and § .24. If the names of the nominees to fill any such vacancy are not made available to the Secretary within a reasonable time after such vacancy occurs, the Secretary may fill such vacancy without regard to nominations, which selection shall be made on the basis of the representation provided for in § .20.

§ —.28 Alternate members.

An alternate member shall act in the place of the member during such member's absence and may be assigned other program duties by the chairman or the committee. In the event of the death, removal, resignation, or disqualification of a member, the alternate shall act for the member until a successor for such member is selected and has qualified. In the event that both a producer member and that member's alternate are unable to attend a committee meeting, the member or committee members present may designate any other alternate to serve in such member's place at that meeting provided such action is necessary to secure a quorum.

§ —.30 Powers.

The committee shall have the following powers:

(a) To administer the provisions of this part in accordance with its terms;

(b) To receive, investigate, and report to the Secretary complaints of violations of the provisions of this part;

(c) To make and adopt rules and regulations to effectuate the terms and provisions of this part; and

(d) To recommend to the Secretary amendments to this part.

§ —.31 Duties.

The committee shall have, among others, the following duties:

(a) To select a chairman and such other officers as may be necessary, and to define the duties of such officers;

(b) To appoint such employees, agents, and representatives as it may deem necessary, and to determine compensation and to define the duties of each;

(c) To submit to the Secretary as soon as practicable after the beginning of each fiscal period a budget for such fiscal year, including a report in explanation of the items appearing therein and a recommendation as to the rate of assessment for such year;

(d) To keep minutes, books, and records which will reflect all of the acts and transactions of the committee and which shall be subject to examination by the Secretary;

(e) To prepare periodic statements of the financial operations of the committee and to make copies of each such statement available to growers and handlers for examination at the office of the committee;

(f) To cause its books to be audited by a competent public accountant at least once each fiscal year and at such times as the Secretary may request;

(g) To act as intermediary between the Secretary and any grower or handler;

(h) To investigate and assemble data on the growing, handling, and marketing conditions with respect to grapes;

(i) To submit to the Secretary the same notice of meetings of the committee as is given to its members;

(j) To submit to the Secretary such available information as he may request;

(k) To investigate compliance with the provisions of this part; and

(l) With the approval of the Secretary, to divide the production area into districts, and to redefine such districts, and, further, to apportion the representation on the committee among the districts or to reapportion such representation among the districts.

§ —.32 Procedure.

(a) Six members of the committee, or alternates acting for members, shall constitute a quorum and any action of the committee shall require the concurring vote of the majority of those present: *Provided,* That actions of the committee with respect to expenses and assessments, or recommendations for regulations pursuant to §§ .50 through .54 shall require at least six concurring votes.

(b) The committee may vote by telephone, telegraph, or other means of communication, and any vote cast by telephone shall be confirmed promptly in writing: *Provided,* That voting other than in an assembled meeting shall require two-thirds affirmative vote of the committee in order to constitute approval and at least eight votes must be cast. If an assembled meeting is held, all votes shall be cast in person. Recommendations for regulation pursuant to § .51 and recommendations for assessments pursuant to § .41 may be made only at an assembled meeting.

§ —.33 Expenses and compensation.

The members of the committee, and alternates when acting as members, shall serve without compensation but shall be reimbursed for expenses necessarily incurred by them in the performance of their duties under this part: *Provided,* That the committee at its discretion may request the attendance of one or more alternates at any or all meetings notwithstanding the expected or actual presence of the respective members and may pay expenses as aforesaid.

§ —.34 Annual report.

The committee may, as soon as is practicable after the close of each crop year, prepare and mail an annual report to the Secretary and make a copy available to each grower and handler who requests a copy of the report.

Expenses and Assessments

§ —.40 Expenses.

The committee is authorized to incur such expenses as the Secretary finds are reasonable and likely to be incurred by the committee for its maintenance and functioning and to enable it to exercise its powers and perform its duties in accordance with the provisions of this part. The funds to cover such expenses shall be acquired in the manner prescribed in § .41.

§ —.41 Assessments.

(a) Each person who first handles grapes shall pay to the committee, upon

demand, such handler's pro rata share of the expenses which the Secretary finds are reasonable and likely to be incurred by the committee during a fiscal year. The payment of assessments for the maintenance and functioning of the committee may be required under this part throughout the period it is in effect irrespective of whether particular provisions thereof are suspended or become inoperative.

(b) The Secretary shall fix the rate of assessment to be paid by each such person during a fiscal year in an amount designed to secure sufficient funds to cover the expenses which may be incurred during such year and to accumulate and maintain a reserve fund equal to approximately one fiscal year's expenses. At any time during or after a fiscal year, the Secretary may increase the rate of assessment in order to secure sufficient funds to cover any later findings by the Secretary relative to the expenses which may be incurred. Such increase shall be applied to all grapes handled during the applicable fiscal year. In order to provide funds for the administration of the provisions of this part during the first part of a fiscal year before sufficient operating income is available from assessments on the current year's shipments, the committee may accept the payment of assessments in advance, and may also borrow money for such purpose.

(c) Any assessment not paid by a handler within a period of time prescribed by the committee may be subject to an interest or late payment charge, or both. The period of time, rate of interest, and late payment charge shall be as recommended by the committee and approved by the Secretary. Subsequent to such approval, all assessments not paid within the period of time prescribed shall be subject to the interest or late payment charge, or both.

§ —.42 Accounting.

(a) If, at the end of a fiscal year, the assessments collected are in excess of expenses incurred, such excess shall be accounted for in accordance with one of the following:

(1) If such excess is not retained in a reserve, as provided in subparagraph (2) of this paragraph, it shall be refunded proportionately to the persons from whom it was collected: *Provided,* That any sum paid by a person in excess of his pro rata share of the expenses during any fiscal year may be applied by the committee at the end of such fiscal period to any outstanding obligations due the committee from such person.

(2) The committee, with the approval of the Secretary, may carry over such excess into subsequent fiscal years as a reserve: *Provided,* That funds in the reserve shall not exceed approximately one fiscal year's expenses. Such reserve funds may be used (i) to defray expenses, during any fiscal year, prior to the time assessment income is sufficient to cover such expenses, (ii) to cover deficits incurred during any fiscal year when assessment income is less than expenses, (iii) to defray expenses incurred during any period when any or all provisions of this part are suspended or are inoperative, or (iv) to cover necessary expenses of liquidation in the event of termination of this part. Upon such termination, any funds not required to defray the necessary expenses of liquidation shall be diposed of in such manner as the Secretary may determine to be appropriate: *Provided,* That to the extent practical, such funds shall be returned pro rata to the persons from whom such funds were collected.

(b) All funds received by the committee under this part shall be used solely for the purpose specified and shall be accounted for in the manner provided in this part. The Secretary may at any time require the committee and its members to account for all receipts and disbursements.

(c) Upon the removal or expiration of the term of office of any member of the committee, such member shall account for all receipts and disbursements and deliver all property and funds in his possession to the committee, and shall execute such assignments and other instruments as may be necessary or appropirate to vest in the committee full title to all of the property, funds, and claims vested in such member pursuant to this part.

Research and Market Development

§ —.45 Production research, marketing research and market development.

The committee, with the approval of the Secretary, may establish or provide for the establishment of production research, marketing research and development projects designed to assist, improve, or promote the marketing, distribution, and consumption or efficient production of grapes. The expense of such projects shall be paid by funds collected pursuant to § .41.

Regulations

§ —.50 Marketing policy.

Each season prior to making any recommendations pursuant to § .51, the committee shall submit to the Secretary a report setting forth its marketing policy for the ensuing marketing season. Such marketing policy report shall contain information relative to:

(a) The estimated total production of grapes within the production area;

(b) The expected general quality of grapes in the production area;

(c) The expected demand conditions for grapes;

(d) The expected shipments of grapes produced in the production area;

(e) The probable prices for grapes;

(f) Supplies of competing commodities;

(g) Trend and level of consumer income;

(h) Other factors having a bearing on the marketing of grapes; and

(i) The type of regulations expected to be recommended during the marketing season.

§ —.51 Recommendation of committee.

(a) Whenever the committee deems it advisable to regulate the handling of grapes in the manner provided in § .52, it shall so recommend to the Secretary.

(b) In arriving at its recommendations for regulation pursuant to paragraph (a) of this section, the committee shall give consideration to current information with respect to the factors affecting the supply and demand for Ruby Seedless grapes during the period or periods when it is proposed that such regulation should be made effective. With each such recommendation for regulation, the committee shall submit to the Secretary the data and information on which such recommendation is predicated and such other available information as the Secretary may request. The committee shall promptly give adequate notice to the handlers and growers of any such recommendation submitted to the Secretary.

§ —.52 Establishment of regulations.

(a) The Secretary shall regulate, in the manner specified in this section, the handling of grapes whenever the Secretary finds, from the recommendation and information submitted by the committee, or from other available information, that such regulations will tend to effectuate the declared policy of the act. Such regulations may:

(1) Limit during any period or periods the handling of any particular grade, size, quality, maturity, or any combination thereof, of grapes grown in the production area;

(2) Limit the handling of grapes by establishing in terms of grades, sizes, or both, minimum standards of quality or

maturity, or any combination thereof, during any period when season average prices are expected to exceed the parity level;

(3) Fix the size, capacity, weight, dimensions, markings, or pack of any container, or containers, which may be used in the handling of grapes.

(b) The committee shall be informed immediately of any such regulation issued by the Secretary and the committee shall promptly give notice thereof to handlers.

§ —.53 Modification, suspension, or termination of regulations.

(a) In the event the committee at any time finds that, by reason of changed conditions, any regulations issued pursuant to § —.52 should be modified, suspended, or terminated, it shall so recommend to the Secretary.

(b) Whenever the Secretary finds from the recommendations and information submitted by the committee, or from other available information, that a regulation should be modified, suspended, or terminated with respect to any or all shipments of grapes in order to effectuate the declared policy of the act, he shall modify, suspend, or terminate such regulation. On the same basis and in like manner the Secretary may terminate any such modification or suspension.

§ —.54 Special purpose shipment.

(a) Except as otherwise provided in this section, any person may without regard to the provisions of §§ —.41, —.51, —.52, and —.54 and the regulations issued thereunder, handle grapes (1) for consumption by charitable institutions; (2) for distribution by relief agencies; or (3) for commercial processing into products.

(b) Upon the basis of recommendations and information submitted by the committee, or from other available information, the Secretary may relieve from any or all requirements, under or established pursuant to §§ —.41, —.51, —.52, and —.54, the handling of grapes for such specified purposes (including shipments to facilitate the conduct of marketing research and development projects established pursuant to § —.45), or in such minimum quantities or types of shipments, as may be prescribed.

(c) The committee shall, with the approval of the Secretary, prescribe such rules, regulations, and safeguards as it may deem necessary to prevent grapes handled under provisions of this section from entering the channels of trade for other than the specific purposes authorized by this section. Such rules, regulations, and safeguards may include the requirements that handlers shall file applications and receive approval from the committee for authorization to handle grapes pursuant to this section, and that such application be accompanied by a certification by the intended purchaser or receiver that the grapes will not be used for any purpose not authorized by this section.

§ —.55 Inspection and certification.

(a) Whenever the handling of any variety of grapes is regulated pursuant to §§ —.52 or —.53, each handler who handles grapes shall, prior thereto, cause such grapes to be inspected by the Federal or Federal-State Inspection Service and certified as meeting the applicable requirements of such regulation: *Provided,* That inspection and certification shall not be required for grapes which previously have been so inspected and certified if such prior inspection was performed within such period as may be established pursuant to paragraph (b) of this section. Promptly after inspection and certification, each such handler shall submit or cause to be submitted, to the committee a copy of the certificate of inspection issued with respect to such grapes.

The committee may, with the approval of the Secretary, prescribe rules and regulations waiving the inspection requirements of this section where it is determined that inspection is not available: *Provided,* That all shipments made under such waiver shall comply with all regulations in effect.

(b) The committee may, with the approval of the Secretary, establish a period prior to shipment during which the inspection required by this section must be performed.

(c) The committee may enter into an agreement with the Federal and Federal-State Inspection Services with respect to the costs of the inspection required by paragraph (a) of this section, and may collect from handlers their respective pro rata share of such costs.

Reports

§ —.60 Reports.

(a) Each handler shall furnish to the committee at such times and for such periods as the committee may designate certified reports covering, to the extent necessary for the committee to perform its functions, each shipment of grapes as follows:

(1) The name of the shipper and the shipping point;

(2) The car or truck license number (or name of the trucker), and identification of the carrier;

(3) The date and time of departure;

(4) The number and type of containers in the shipment;

(5) The destination;

(6) Identification of the inspection certificate or waiver pursuant to which the fruit was handled.

(b) Upon request of the committee, made with the approval of the Secretary, each handler shall furnish to the committee, in such manner and at such times as it may prescribe, such other information as may be necessary to enable the committee to perform its duties under this part.

(c) Each handler shall maintain for at least two succeeding fiscal years after the end of the fiscal year in which the transactions occurred, such records of the grapes received and disposed of by such handler as may be necessary to verify the reports such handler submits to the committee pursuant to this section.

(d) All reports and records submitted by handlers pursuant to the provisions of this section shall be received by, and at all times be in custody of one or more designated employees of the committee. No such employee shall disclose to any person, other than the Secretary upon request therefor, data or information obtained or extracted from such reports and records which might affect the trade position, financial condition, or business operation of the particular handler from whom received: *Provided,* That such data and information may be combined, and made available to any person, in the form of general reports in which the identities of the individual handler furnishing the information is not disclosed and may be revealed to any extent necessary to effect compliance with the provisions of this part and the regulations issued thereunder.

Miscellaneous Provisions

§ —.61 Compliance.

Except as provided in this part, no person shall handle grapes, the shipment of which has been prohibited by the Secretary in accordance with the provisions of this part; and no person shall handle grapes except in conformity with the provisions of this part and the regulations issued under this part.

§ —.62 Right of the Secretary.

The members of the committee (including successors and alternates) and any agents, employees, or representatives thereof, shall be subject to removal or suspension by the Secretary at any time. Each and every regulation, decision, determination, or other act of the committee shall be subject ot the continuing right of the

Secretary to disapprove of the same at any time. Upon such disapproval, the disapproved action of the committee shall be deemed null and void, except as to acts done in reliance thereon or in accordance therewith prior to such disapproval by the Secretary.

§ —.83 Effective time.

The provisions of this part, and of any amendment thereto, shall become effective at such time as the Secretary may declare above his signature and shall continue in force until terminated in one of the ways specified in § .84.

§ —.84 Termination.

(a) The Secretary shall terminate or suspend the operation of any and all of the provisions of this part whenever he finds that such provisions do not tend to effectuate the declared policy of the act.

(b) The Secretary shall terminate the provisions of this part whenever he finds by referendum or otherwise that such termination is favored by a majority of the growers: *Provided,* That such majority has, during the current marketing season, produced more than 50 percent of the volume of grapes which were produced within the production area for shipment in fresh form. Such termination shall become effective on the first day of April subsequent to the announcement thereof by the Secretary.

(c) The provisions of this part shall, in any event, terminate whenever the provisions of the act authorizing them cease to be in effect.

§ —.85 Proceedings after termination.

(a) Upon the termination of the provisions of this part, the committee shall, for the purpose of liquidating the affairs of the committee, continue as trustee of all the funds and property then in its possession, or under its control, including claims for any funds unpaid or property not delivered at the time of such termination.

(b) The said trustees shall:

(1) Continue in such capacity until dischanged by the Secretary;

(2) From time to time account for all receipts and disbursements and deliver all property on hand, together with all books and records of the committee and of the trustees, to such persons as the Secretary may direct; and

(3) Upon the request of the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such person, full title and right to all of the funds, property, and claims vested in the committee or the trustees pursuant thereto.

(c) Any person to whom funds, property, or claims have been transferred or delivered, pursuant to this section, shall be subject to the same obligation imposed upon the committee and upon the trustees.

§ —.86 Effect of termination or amendment.

Unless otherwise expressly provided by the Secretary, the termination of this part or any regulation issued pursuant to this part, or the issuance of any amendment to either thereof, shall not:

(a) Affect or waive any right, duty, obligation, or liability which shall have arisen or which may thereafter arise in connection with any provision of this part or any regulation issued under this part; or

(b) Release or extinguish any violation of this part; or

(c) Affect or impair any rights or remedies of the Secretary or any other person with respect to any such violation.

§ —.87 Duration of immunities.

The benefits, privileges, and immunities conferred upon any person by virtue of this part shall cease upon its termination, except with respect to acts done under and during the existence of this part.

§ —.88 Agents.

The Secretary may, by designation in writing, name any officer or employee of the United States, or name any agency or division in the United States Department of Agriculture, to act as agent or representative in connection with any of the provisions of this part.

§ —.89 Derogation.

Nothing contained in this part is, or shall be construed to be, in derogation or in modification of the rights of the Secretary or of the United States:

(a) To exercise any powers granted by the act or otherwise; or

(b) In accordance with such powers, to act in the premises whenever such action is deemed advisable.

§ —.70 Personal liability.

No member or alternate member of the committee and no employee or agent of the committee shall be held personally responsible, either individually or jointly with others, in any way whatsoever, to any person for errors in judgment, mistakes, or other acts, either of commission or omission, as such member, alternate, employee, or agent, except for acts of dishonesty, willful misconduct, or gross negligence.

§ —.71 Separability.

If any provisions of this part is declared invalid or the applicability thereof to any person, circumstance, or thing is held invalid, the validity of the remainder of this part or the applicability thereof to any other person, circumstance, or thing shall not be affected thereby.

§ —.72 Counterparts.

This agreement may be executed in multiple counterparts and when one counterpart is signed by the Secretary, all such counterparts shall constitute, when taken together, one and the same instrument as if all signatures were contained in one original.

§ —.73 Additional parties.

After the effective date hereof, any handler may become a party to this agreement if a counterpart is executed by such handler and delivered to the Secretary. This agreement shall take effect as to such new contracting party at the time such counterpart is delivered to the Secretary and the benefits, privileges, and immunities conferred by this agreement shall then be effective as to such new contracting party.

§ —.74 Order with marketing agreement.

Each signatory handler hereby requests the Secretary to issue, pursuant to the act, an order providing for regulating the handling of Ruby Seedless grapes in the same manner as is provided for in this agreement.

A Draft Impact Analysis is available from Malvin E. McGaha, Fruit Branch, Fruit and Vegetable Divison, AMS, U.S. Department of Agriculture, Washington, D.C. 20250, Phone: (202) 447-5975.

BILLING CODE 1505-01-M

[14 CFR Ch. I]

[Summary Notice No. PR-79-6]

Petitions for Rule Making; Summary of Petitions Received and Dispositions of Petitions Denied

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for rule making and of dispositions of petitions denied.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for rule making (14 CFR Part 11), this notice contains a summary of certain petitions requesting the initiation of rule making procedures for the amendment of specified provisions of the Federal Aviation Regulations and of denials of certain petitions previously received. The purpose of this notice is to improve the public's awareness of this aspect of FAA's regulatory activities. Publication of this notice and any information it contains or omits is not intended to affect the legal status of any petition or its final disposition.

DATES: Comments on petitions received must identify the petition docket number involved and be received on or before: August 14, 1979.

ADDRESSES: Send comments on the petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-24), Petition Docket No. ———, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION: The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-24), Room 916, FAA Headquarters Building (FOB 10A), Federal Aviation Administration, 800 Independence Avenue SW, Washington, D.C. 20591; telephone (202) 426-3644.

This notice is published pursuant to paragraghs (b) and (f) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, D.C., on June 8, 1979.

Carl B. Schellenberg,

Assistant Chief Counsel Regulations and Enforcement Division.

Petitions for Rulemaking

Docket No.	Petitioner	Description of the rule requested
176	Aircraft Owners and Pilots Association.	DESCRIPTION OF RULE To amend FAR 61.23 to extend the duration of a third class medical certificate from 24 months to 36 months for operations requiring a private or student pilot certificate. PETITIONERS' REASON FOR RULE Such a change would not abrogate aviation safety, but would save general aviation pilots some two and a half million dollars per year as well as ease FAA's workload in processing medical applications.

Petitions for Rulemaking: Denied

None during the period from June 1 through June 8, 1979.

[Airspace Docket No. 79-CE-9]

Transition Area—New Madrid, Mo.; Proposed Alteration

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rule Making (NPRM).

SUMMARY: This notice proposes to alter the 700-foot transition area at New Madrid, Missouri, to provide additional airspace for aircraft executing a new instrument approach procedure to the County Memorial Airport, New Madrid, Missouri, which is based on a nondirectional radio beacon (NDB), a navigational aid, being installed on the airport.

DATES: Comments must be received on or before July 20, 1979.

ADDRESSEES: Send comments on the proposal to: Federal Aviation Administration, Chief, Operations, Procedures and Airspace Branch, Air Traffic Division, ACE—530, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 374-3408.

The official docket may be examined at the Office of the Regional Counsel, Central Region, Federal Aviation Administration, Room 1558, 601 East 12th Street, Kansas City, Missouri.

An informal docket may be examined at the Office of the Chief, Operations, Procedures and Airspace Branch, Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Dwaine E. Hiland, Airspace Specialist, Operations, Procedures, and Airspace Branch, Air Traffic Division, ACE-537, FAA, Central Region, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 374-3408.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number, and be submitted in duplicate to the Operations, Procedures and Airspace Branch, Air Traffic Division, Federal Aviation Administration, 601 East 12th Street, Kansas City, Missouri 64106. All communications received on or before July 20, 1979, will be considered before action is taken on the proposed amendment. The proposal contained in this Notice may be changed in light of the comments received. All comments received will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Operations, Procedures and Airspace

Branch, 601 East 12th Street, Kansas City, Missouri 64106 or by calling (816) 374–3408. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for further NPRMs should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to Subpart G, § 71.181 of the Federal Aviation Regulations (14 CFR 71.181) by altering the 700-foot transition area at New Madrid, Missouri. To enhance airport usage a new instrument approach procedure is being developed for the County Memorial Airport, New Madrid, Missouri, utilizing an NDB being installed on the airport as a navigational aid. The establishment of an instrument approach procedure based on this navigational aid entails alteration of the transition area at New Madrid, Missouri, at and above 700 feet above ground level (AGL) within which aircraft are provided additional air traffic control service. The intended effect of this action is to ensure segregation of aircraft using the new approach procedure under Instrument Flight Rules (IFR) and other aircraft operating under Visual Flight Rules (VFR).

Accordingly, Federal Aviation Administration proposes to amend Subpart G, § 71.181 of the Federal Aviation Regulations (14 CFR 71.181) as republished on January 2, 1979, (44 FR 442) by altering the following transition area:

New Madrid, Missouri

That airspace extending upward from 700 feet above the surface within a 5-mile radius of County Memorial Airport (latitude 36°32'10"N, longitude 89°35'50"W); and within 2 miles each side of the Malden, MO, VOR 95° radial, extending from the 5-mile radius area to 8 miles east of the VOR, excluding the portion which overlies the Malden, MO, 700-foot floor transition area; and within 2.5 miles each side of the 360° bearing from the airport, extending from the 5-mile radius area to 6 miles north of the airport.

(Sec. 307(a), Federal Aviation Act of 1958 as amended (49 U.S.C. 1348); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); Sec. 11.65 of the Federal Aviation Regulations (14 CFR 11.65)).

Note.—The FAA has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Kansas City, Missouri, on June 1, 1979.

John E. Shaw,

Acting Director, Central Region.

[Airspace Docket No. 79-CE-11]

Transition Area—Albia, Iowa; Proposed Designation

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rule Making (NPRM).

SUMMARY: This notice proposes to designate a 700-foot transition area at Albia, Iowa, to provide controlled airspace for aircraft executing a new instrument approach procedure to the Albia, Iowa, Municipal Airport utilizing the Ottumwa, Iowa, VORTAC as a navigational aid.

DATE: Comments must be received on or before July 20, 1979.

ADDRESSES: Send comments on the proposal to: Federal Aviation Administration, Chief, Operations, Procedures and Airspace Branch, Air Traffic Division, ACE–530, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 374–3408.

The official docket may be examined at the Office of the Regional Counsel, Central Region, Federal Aviation Administration, Room 1558, 601 East 12th Street, Kansas City, Missouri.

An informal docket may be examined at the Office of the Chief, Operations, Procedures and Airspace Branch, Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Dwaine E. Hiland, Airspace Specialist, Operations, Procedures, and Airspace Branch, Air Traffic Division, ACE–537, FAA, Central Region, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 374–3408.

SUPPLEMENTARY INFORMATION:

Comments Invited.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number, and be submitted in duplicate to the Operations, Procedures and Airspace Branch, Air Traffic Division, Federal Aviation Administration, 601 East 12th Street, Kansas City, Missouri 64106. All communications received on or before July 20, 1979, will be considered before action is taken on the proposed amendment. The proposal contained in this Notice may be changed in light of the comments received. All comments received will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Operations, Procedures and Airspace Branch, 601 East 12th Street, Kansas City, Missouri 64106 or by calling (816) 374–3408. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for further NPRMs should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to Subpart G, § 71.181 of the Federal Aviation Regulations (14 CFR, § 71.181) by designating a 700-foot transition area at Albia, Iowa. To enhance airport usage a new instrument approach procedure to the Albia, Iowa, Municipal Airport is being established utilizing the Ottumwa, Iowa, VORTAC as a navigational aid. The establishment of a new instrument approach procedure based on this navigational aid entails designation of a transition area at Albia, Iowa, at and above 700 feet above ground level (AGL) within which aircraft are provided air traffic control service. The intended effect of this action is to ensure segregation of aircraft using the approach procedure under Instrument Flight Rules (IFR) and other aircraft operating under Visual Flight Rules (VFR).

Accordingly, Federal Aviation Administration proposes to amend Subpart G, § 71.181 of the Federal Aviation Regulations (14 CFR 71.181) as republished on January 2, 1979, (44 FR 442) by adding the following new transition area:

Albia, Iowa

That airspace extending upward from 700 feet above the surface, within a six (6) mile radius of the Albia Municipal Airport (latitude 40°59'40" N, longitude 92°45'46" W).

(Sec. 307(a), Federal Aviation Act of 1958 as amended (49 U.S.C. 1348); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); Sec. 11.65 of the Federal Aviation Regulations (14 CFR 11.65)).

Note.—The FAA has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

All communications received on or before July 20, 1979, will be considered before action is taken on the proposed amendment. The proposal contained in this Notice may be changed in light of the comments received. All comments received will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons.

Availability fo NPRM

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Operations, Procedrues and Airspace Branch, 601 East 12th Street, Kansas City, Missouri 64106 or by calling (816) 374-3408. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for further NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to Subpart G, § 71.181 of the Federal Aviation Regulations (14 CFR 71.181) by designating a 700-foot transition area at Maryville, Missouri. To enhance airport usage a new instrument approach procedure to the Maryville, Missouri, Memorial Airport is being established utilizing the St. Joseph VORTAC as a navigational aid. The establishment of a new instrument approach procedure based on this navigational aid entails designation of a transition area at Maryville, Missouri, at and above 700 feet above ground level (AGL) within which aircraft are provided air traffic control service. The intended effect of this action is to ensure segregation of aircraft using the approach procedure under Instrument Flight Rules (IRF) and other aircraft operating under Visual Flight Rules (VFR).

Accordingly, Federal Aviation Administration proposes to amend Subpart G, § 71.181 of the Federal Aviation Regulations (14 CFR 71.181) as republished on January 2, 1979 (44 FR 442) by adding the following new transition area:

Maryville, Missouri

That airspace extending upards from 700 feet above the surface, within a 51—mile radius of the Maryville Memorial Airport (latitude 40°21'00"N., longitude 94°54'45"W.)

(Sec. 307(a), Federal Aviation Act of 1958 as amended (49 U.S.C. 1348); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); Sec. 11.65 of the Federal Aviation Regulations (14 CFR 11.65).)

Note.— The FAA has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant perparation of a regulatory evaluation.

BILLING CODE 4910-13-M

[14 CFR Part 71]

[Airspace Docket No. 79-ASW-16]

Proposed Alteration of Transition Area: Wichita Falls, Tex.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rule Making.

SUMMARY: The nature of the action being taken is to propose alteration of the transition area at Wichita Falls, Tex. The intended effect of the proposed action is to provide additional controlled airspace for aircraft executing a new instrument approach procedure to the Kickapoo Downtown Airpark. The circumstance which created the need for the action is the proposed establishment of a nondirectional radio beacon (NDB) 3.8 miles south of the airport.

DATES: Comments must be received by July 16, 1979.

ADDRESSES: Send comments on the proposal to: Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101.

The official docket may be examined at the following location: Office of the Regional Counsel, Southwest Region,

Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Texas.

An informal docket may be examined at the Office of the Chief, Airpace and Procedures Branch, Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Manuel R. Hugonnett, Airspace and Procedures Branch, ASW-536, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101; telephone: (817) 624-4911, extension 302.

SUPPLEMENTARY INFORMATION: Subpart G § 71.181 (44 FR 442) of FAR Part 71 contains the description of transition areas designated to provide controlled airspace for the benefit of aircraft conducting IFR activity. Alteration of the transition area at Wichita Falls, Tex., will necessitate an amendment to this subpart

Comments Invited

Interested persons may submit such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101. All communications received on or before July 16, 1979, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views or arguments presented during such conferences must be also submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rule making (NPRM) by submitting a request to the Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101, or by calling (817) 624-4911, extension 302. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMS should contact the office listed above.

The Proposal

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the transition area at Wichita Falls, Tex. The FAA believes this action will enhance IRF operations at the Kickapoo Downtown Airpark by providing controlled airspace for aircraft executing proposed instrument approach procedures using the proposed NDB located 3.8 miles south of the airport. Subpart G of Part 71 was republished in the Federal Register on January 2, 1979 (44 FR 44).

The Proposed amendment

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (44 FR 442) by altering the Wichita Falls, Tex., transition area by adding the following:

Wichita Falls, Tex.

* * * and 3 miles each side of the 177° bearing from the Scotland RBN (latitude 33°47'24"N., longitude 98°29'10"W.) extending from the 20-mile radius area to 8.5 miles south of the RBN.

Note.—The FAA has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979.) Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation and a comment period of less than 45 days is appropriate.

Issued in Fort Worth, Texas, on June 4, 1979.

Henry N. Stewart,

Acting Director, Southwest Region.

[FR Doc. 79-18680 Filed 6-13-79; 8:45 am]

BILLING CODE 4910-13-M

[14 CFR Part 75]

[Airspace Docket No. 79-WA-2]

Realignment of Jet Route; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction to Notice of proposed rulemaking.

SUMMARY: in a Notice of Proposed Rule Making (NPRM), published in the Federal Register of May 21, 1979, Vol. 44, page 29485, under the Proposed Amendment on page 29486 the substitution of "Des Moines, Iowa;" should have been "Kansas City, Mo.; Des Moines, Iowa;" as explained in the Summary and in the Proposal. This correction reflects the correct proposed amendment.

EFFECTIVE DATE: June 14, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-3715.

SUPPLEMENTARY INFORMATION: Federal Register Document 79-15717 was published on May 21, 1979 (44 FR 29485) and proposed to realign Jet Route No. J-25 between Tulsa, Oklahoma, and Des Moines, Iowa, via Kansas City, Mo. The amendatory language under the heading of the Proposed Amendment should have contained the words "Kansas City, Mo." This action corrects that omission.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration, Federal Register Document 79-15717 as published in the Federal Register on May 21, 1979, starting on page 29485 is amended in the center column of page 29486 by deleting the first line (is deleted and "Des Moines, Iowa;" is) and substituting (is deleted and "Kansas City, Mo.; Des Moines, Iowa;" is) therefor.

(Secs. 307(a), 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Issued in Washington, D.C., on June 7, 1979.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

BILLING CODE 4910-13-M

FEDERAL TRADE COMMISSION

[16 CFR Part 433]

Amendment to Preservation of Consumers' Claims and Defenses

AGENCY: Federal Trade Commission.

ACTION: Placement of a staff summary of post-record comments and the final recommendations of the rulemaking staff and the Director of the Bureau of Consumer Protection on the Rulemaking Record, and announcement of the setting of a date for oral presentations before the Commission.

SUMMARY: The Federal Trade Commission has placed on the Rulemaking Record in the Amendment to the Preservation of Consumers' Claims and Defenses Trade Regulation Rule a summary of the comments filed by the public on the final reports of the staff and the presiding officer. In addition, the Commission has placed on the rulemaking record the final recommendations of the rulemaking staff and the Director of the Bureau of Consumer Protection on the rulemaking proceeding.

The Federal Trade Commission has also decided to afford interested parties the opportunity to make oral presentations before the Commission. Six prior participants have been invited to appear before the Commission. In addition, the Commission will consider requests from other interested parties. The participants in this meeting will be limited to persons who have participated in earlier stages of this proceeding.

DATES: Requests to participate in this oral presentation before the Commission at the meeting at 1 p.m. on July 10, 1979, must be received no later than June 29, 1979.

ADDRESSES: Send requests to participate in this oral presentation to: Secretary, Federal Trade Commission, 6th Street and Pennsylvania Avenue, N.W., Washington, D.C. 20580.

The meeting will be held in Room 432, Federal Trade Commission, 6th Street and Pennsylvania Avenue, N.W., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: David H. Williams or Sarah Jane Hughes Federal Trade Commission (202) 724–1100.

SUPPLEMENTAL INFORMATION: Pursuant to § 1.13(h) of the Commission's Rules of Practice, comments were invited from the public on the final reports of the staff and the presiding officer in the rulemaking proceeding concerning the Amendment to the Preservation of Consumers' Claims and Defenses Rule.

The Commission has directed the rulemaking staff to prepare a summary of those comments. That summary has been placed on the rulemaking record in this proceeding for public inspection.

The Federal Trade Commission has also directed that the final recommendations of the rulemaking staff and the Director of the Bureau of Consumer Protection submitted to the Commission on the proposed rule after the conclusion of the post-record comment period specified in § 1.13(h) of the Commission's Rules of Practice be placed on the rulemaking record in this proceeding for public inspection.

The Federal Trade Commission has decided to allow interested parties to make oral presentations. Participation in this meeting before the Commission shall be restricted to persons who have participated in the proceeding to date. Participants will be permitted no more than thirty minutes to address comments to the Commission. The Commission reserves the right to limit the number of persons who may participate, as well as the amount of time allotted for comment, should such a need develop.

The prior participants in the proceeding who have been invited to appear include: (1) the American Bankers Association, Consumer Bankers Association, and Independent Bankers Association of America; (2) National Consumer Finance Association; (3) National Consumer Law Center; (4) Division of Consumer Affairs, Board of Governors of the Federal Reserve System; (5) National Credit Union Administration; and (6) Credit Union National Association. Other interested persons will have an opportunity to present their views.

Persons who desire to make such oral presentations to the Commission should submit a written request to the Secretary, Federal Trade Commission, 6th Street and Pennsylvania Avenue, N.W., Washington, D.C. 20580 no later than June 29, 1979. If feasible and not burdensome, persons filing requests to participate should submit 3 copies of their requests. Each request must state the extent and the nature of the prior participation in this proceeding by the person seeking to address the Commission.

No additional written comments may be submitted to the Commission. Oral presentation at the meeting must be restricted to the evidence already in the Rulemaking Record in this proceeding.

The meeting before the Commission will commence on July 10, 1979 in Room 432, Federal Trade Commission, 6th Street and Pennsylvania Avenue, N.W., Washington, D.C. 20580, at 1:00 p.m.

By direction of the Commission.

Carol M. Thomas,

Secretary.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[24 CFR Part 1917]

[Docket No. FI-5636]

Proposed Flood Elevation Determinations for the Town of Redcliff, Eagle County, Colo., Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Town of Redcliff, Eagle County, Colorado.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program [NFIP].

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at City Hall, Redcliff, Colorado.

Send comments to: Mr. Carlos Miranda, City Manager, Town of Redcliff, Box 100, Vail, Colorado 81657.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Town of Redcliff, Colorado, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the

[1] The functions of the Federal Insurance Administration, Department of Housing and Urban Development, were transferred to the newly established Federal Emergency Management Agency by Reorganization Plan No. 3 of 1978 (43 FR 41943, September 19, 1978) and Executive Order 12127 (44 FR 19367, April 3, 1979).

Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Eagle River	Denver and Rio Grande Western Railroad (40 feet*).	8573
	Colorado State Highway 293 (20 feet*).	8580
	Railroad Access Road (20 feet*).	8597

BILLING CODE 4210-23-M

[24 CFR Part 1917]

[Docket No. FI-8539]

Proposed Flood Elevation Determinations for the Groton Long Point Association, New London County, Conn.; Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Groton Long Point Association, New London County, Connecticut.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Fire House, Groton Long Point, Connecticut.

Send comments to: Mr. Joseph Devine, President of the Groton Long Point Association, 69 Atlantic Avenue, Groton Long Point, Connecticut 06340.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755-5581 or Toll Free Line (800) 424-8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Groton Long Point Association, New London County, Connecticut in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Fishers Island Sound	Atlantic Avenue and Bridge Street.	11
	Shore avenue South and Sound Breeze Avenue.	11
	Shore Avenue and Sound Breeze Avenue.	11

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001-4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator 44 FR 20963.

Issued: June 1, 1979.

Footnotes continued on next page

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Town of Southbury, New Haven County, Connecticut.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Town Hall, 360 Main Street, Southbury, Connecticut.

Send comments to: Mr. Michael Kenney, First Selectman, Town of Southbury, Town Hall, 360 Main Street, Southbury, Connecticut 06488.

FOR FURTHER INFORMATION CONTACT: Mr. Richard W. Krimm, National Flood Insurance Program, (202 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determination of base (100-year) flood elevations for the Town of Southbury, New Haven County, Connecticut, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.4 (a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinaces that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Housatonic River	Downstream corporate limits	109
	Just downstream Shepaug Dam.	109
Pomperaug River	Just downstream River Road.	109
	Just upstream Old Railroad Embankment.	111
	About .8 mile upstream Old Railroad Embankment.	112
	About 1.2 miles downstream Dam.	136
	Just downstream Dam	143
	Just upstream Dam	153
	Just downstream Flood Bridge Road.	170
	About 0.29 mile upstream Flood Bridge Road.	175
	Just upstream Poverty Road	185
	Just Upstream Route 67	195
	Upstream corporate limits	206

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); Executive Order 12127, 44 Fr 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963)

Issued: June 1, 1979.

Proposed Flood Elevation Determinations for the City of Altamonte Springs, Seminole County, Fla., Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Altamonte Springs, Seminole County, Florida.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at City Hall, 225 Newburyport Avenue, Altamonte Springs, Florida.

Send comments to: Mayor Norman C. Floyd, Sr., 225 Newburyport Avenue, Altamonte Springs, Florida 32701.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of Altamonte Springs, Seminole County, Florida in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a)).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Proposed Flood Elevation Determinations for the City of Frostproof, Polk County, Fla., Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Frostproof, Polk County, Florida.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at City Hall, 47 West Wall Street, Frostproof, Florida.

Send comments to: Mr. Dan H. Ruhl, Jr., City Manager, City of Frostproof, City Hall, 47 West Wall Street, Frostproof, Florida 33843.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of Frostproof, Florida, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Reedy Lake-Lake IDA	1000 Feet East of the Intersection of Old State Highway 600 and State Highway 600.	81
	250 feet east of the Intersection of Chesney Boulevard and Lake Reedy Boulevard.	81
Lake Clinch	Charles Street Between Grace Street and Lelia Street.	110
	200 feet west of the Intersection of Palm Avenue and 1st Street.	110

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 26, 1968), as amended; (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963.

[Docket No. FI-6543]

Proposed Flood Elevation Determinations for the Village of Fairmont City, St. Clair County, Ill. Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA. [1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Village of Fairmont City, St. Clair County, Illinois.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Village Hall, 2601 North 41st Street, Fairmont City, Illinois.

Send comments to: Mr. John Wyrostek, Sr., Village President, Village of Fairmont City, Fairmont City Village Hall, 2601 North 41st Street, Fairmont City, Illinois 62201.

[1] The functions of the Federal Insurance Administration, Department of Housing and Urban Development, were transferred to the newly established Federal Emergency Management Agency by Reorganization Plan No. 3 of 1978 (43 FR 41943, September 19, 1978) and Executive Order 12127 (44 FR 19367, April 3, 1979).

FOR FURTHER INFORMATION CONTACT:
Mr. Richard W. Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determination of base (100-year) flood elevations for the Village of Fairmont City, St. Clair County, Illinois, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968) (Pub. L. 90-448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.4 (a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Local runoff and ponding.	Area beginning 900 feet North of the Intersection of Kings Highway (Route 111) and Maryland Avenue; East of said intersection approximately 1,400 feet; South of said intersection along Kings Highway (Route 111) 3, 270 feet; West of intersection 1,500.	421
	Area located in the extreme Southeastern section of the Village of Fairmont City, South of the Tailing Pond.	421
	Area located North of the Township of East St. Louis; South of Fairmont Avenue (Route 40) and Railroad Avenue; West of 31st Street.	417

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963)

Issued: June 1, 1979.

Proposed Flood Elevation Determinations for the Village of Mettawa, Lake County, Ill.; Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Village of Mettawa, Lake County, Illinois.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Village Hall, 850 River Woods Road, P.O. Box 847, Lake Forest, Illinois. Send comments to: Mr. James Getz, 850 River Woods Road, P.O. Box 847, Lake Forest, Illinois 60045.

FOR FURTHER INFORMATION CONTACT:
Mr. Richard W. Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determination of base (100-year) flood elevations for the Village of Mettawa, Lake County, Illinois, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968) (Pub. L. 90-448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.4 (a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Des Plaines River	Downstream corporate limits	659
	Just upstream of State Highway 60.	661
	Upstream corporate limits near Libertyville.	668

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963)

Revision of proposed Flood Elevation Determinations for the Town of Georgetown, Floyd County, Ind. Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Harard Mitigation, FEMA.[1]

[1] The functions of the Federal Insurance Administration, Department of Housing and Urban Development, were transferred to the newly established Federal Emergency Management Agency by Reorganization Plan No. 3 of 1978 (43 FR 41943, September 19, 1978) and Executive Order 12127 (44 FR 19367, April 3, 1979).

[1] The functions of the Federal Insurance Administration, Department of Housing and Urban Development, were transferred to the newly established Federal Emergency Management Agency by Reorganization Plan No. 3 of 1978 (43 FR 41943, September 19, 1978) and Executive Order 12127 (44 FR 19367, April 3, 1979).

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Town of Georgetown, Floyd County, Indiana.

Due to recent engineering analysis, this proposed rule revises the proposed determinations of base (100-year) flood elevations published in 44 FR 10082 on February 16, 1979, and in the *New Albany Tribune* published on or about March 4, 1979 and March 11, 1979, and hence supersedes those previously published rules.

DATES: The period for comment will be ninety (90) days following the second publication of this notice in a newspaper of local circulation in the above named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood base (100-year) elevations are available for review at the Town Hall, Georgetown, Indiana. Send comments to: Mr. Kennith Lone, President, Town of Georgetown, Town Hall, Georgetown, Indiana 47122. Attention: Mr. Larry Wetzel, Vice President.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: Proposed base (100-year) flood elevations are listed below for selected locations in the Town of Georgetown, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR 1917.4 (a)).

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to quality or remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevations in feet, national geodetic vertical datum
Georgetown Creek	Downstream corporate limits	694
	Just upstream of Main Street	698
	Just downstream of Georgetown-Lanesville Road	894
	Just upstream of Wells Road	708
	Just upstream of Baylor-Wiseman Road	728
	About 1,500 feet upstream from Baylor-Wiseman Road	738

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963)

Dated: June 1, 1979.

Gloria M. Jimenez,
Federal Insurance Administrator.

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Unincorporated Areas of Johnson County, Kansas.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the County Court House, Olathe, Kansas. Send comments to: Mr. John J. Frankie, Chairman of the County Commissioners, Johnson County, County Court House, Olathe, Kansas 66061.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determination of base (100-year) flood elevations for the Unincorporated Areas of Johnson County, Kansas, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, (national geodetic vertical datum)
Kansas River	Downstream county boundary	766
	About 0.5 mile downstream of the Atchison, Topeka & Santa Fe Railway	772
	About 0.9 mile upstream of the Atchison, Topeka & Santa Fe Railway	778
	Just downstream of Wyandotte Street bridge	780
	About 3.0 miles upstream of Wyandotte Street bridge	786
	Upstream county boundary	788
Kill Creek	Just upstream of Old State Highway 10	790
	At City of DeSoto southern corporate limits	792

[1] The functions of the Federal Insurance Administration, Department of Housing and Urban Development, were transferred to the newly established Federal Emergency Management Agency by Reorganization Plan No. 3 of 1978 (43 FR 41943, September 19, 1978) and Executive Order 12127 (44 FR 19367, April 3, 1979).

Source of flooding	Location	Elevation in feet, (national geodetic vertical datum)
Blue River	About 1.3 miles downstream of Kenneth Road.	867
	Just upstream of Kenneth Road.	874
	About 1.9 miles upstream of Kenneth Road.	881
	Just upstream of Missouri Pacific Railroad.	886
	Just downstream of Metcalf Avenue.	897
	Just downstream of U.S. Highway 69.	901

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963.

Issued: June 1, 1979.

Proposed Flood Elevation Determinations for the Unincorporated Areas of McCracken County, Ky. Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the unincorporated areas of McCracken County, Kentucky.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at Mr. Buddy J. Smith, County Engineer's Office, McCracken County courthouse, Paducah, Kentucky. Send comments to: Mr. Buddy J. Smith, County Engineer or Mr. Raymond Schultz, County Judge Executive, County Courthouse, Paducah, Kentucky, 42001.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, SW, Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the unincorporated areas of McCracken County, Kentucky, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat, 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Black Branch	Just downstream of Mayfield Metropolis Road (KY. 780).	354
	Just downstream of New Hinkleville Road (US HWY 60).	362
	Approximately 250 feet upstream of Lightfoot Road.	376
Camp Creek	Just downstream of Harmoney Road.	349
	Approximately 100 feet upstream of Old Mayfield Road.	361
	Just downstream of Illinois Central Gulf Railroad.	369
	Approximately 180 feet downstream of Old Houser Road (Davis Road).	396
Champion Creek	Approximately 40 feet upstream of Illinois Central Gulf Railroad.	334
	Just downstream of Old Mayfield Road.	343
	Approximately 120 feet upstream of Clark Line Road.	362
Crooked Creek	Approximately 30 feet upstream of Buckner Lane.	372
	Just upstream of Pecan Drive	384
	Approximately 200 feet upstream of Interstate 24.	396
Island Creek	Lane Road	330
	Just downstream of Husbands Road.	330
Massac Creek	Approximately 500 feet upstream of Illinois Central Gulf Railroad.	336
	Approximately 300 feet downstream of Hinkleville Road (US 60).	344
	Confluence of Middle Fork Massac Creek.	351
	Approximately 150 feet upstream of Blandville Road (US 62).	361
	Just downstream of Lovelaceville Road.	379
	Approximately 50 feet upstream of Clinton Road.	390
Middle Fork, Massac Creek	Approximately 150 feet upstream of Blandville Road.	360
	Approximately 120 feet upstream of Hines Road.	381
	Approximately 130 feet upstream of Lovelaceville Road.	389
	Approximately 50 feet downstream of New Hope Church Road.	415
West Fork, Massac Creek	Approximately 100 feet upstream of Steel Road.	349
	Approximately 180 feet upstream of Woodville Road.	358
	Just upstream of Hinkleville Road (US 60).	377
	Just upstream of Old Hinkleville Road.	397
	Approximately 70 feet downstream of the upstream crossing of Biggs Road.	412
Ohio River	At the Western County Limits (River Mile 956.2).	331
	Approximately 600 feet upstream of Illinois Central Gulf Railroad at Interstate 24.	336

[Docket No. FI-5550]

Proposed Flood Elevation Determinations for the Town of Buckland, Franklin County, Mass. Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Town of Buckland, Franklin County, Massachusetts.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

[1] The functions of the Federal Insurance Administration, Department of Housing and Urban Development, were transferred to the newly established Federal Emergency Management Agency by Reorganization Plan No. 3 of 1978 (43 FR 41943, September 19, 1978) and Executive Order 12127 (44 FR 19367, April 3, 1979).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Town Office, 17 State Street, Buckland, Massachusetts. Send comments to: Mr. Norman Sessions, Chairman, Board of Selectmen, Town of Buckland, Town Office, 17 State Street, Buckland, Massachusetts 01370.

FOR FURTHER INFORMATION CONTACT: Mr. Richard W. Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determination of base (100-year) flood elevations for the Town of Buckland, Franklin County, Massachusetts, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.4 (a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of Flooding	Location	Elevation in feet, national geodetic vertical datum
Clesson Brook	Confluence with Deerfield River.	405
	Just downstream of Ashfield Road (near Depot Road).	408
	Just downstream of Ashfield Road (north of confluence of Maynard Brook).	543
	Just upstream of Upper Road	598
Deerfield River	Just above New England Power Company Dam No. 8.	411
	Just upstream of Bridge of Flowers.	415
	Just upstream of U.S. Route 2.	428
	Just above New England Power Company Dam No. 4.	460
	Approximately 3,500 feet upstream of Clesson Brook.	469
	Upstream corporate limit	518

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963)

Issued: June 1, 1979.

[Docket No. FI-5551]

Proposed Flood Elevation Determinations for the Town of Millis, Norfolk County, Mass. Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Town of Millis, Norfolk County, Massachusetts.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Office of the Town Clerk, Millis, Massachusetts. Send comments to: Mr. Charles Levine, Chairman of the Board of Selectmen of

[1] The functions of the Federal Insurance Administration, Department of Housing and Urban Development, were transferred to the newly established Federal Emergency Management Agency by Reorganization Plan No. 3 of 1978 (43 FR 41943, September 18, 1978) and Executive Order 12127 (44 FR 19367, April 3, 1979).

Millis, Town Office, 64 Exchange Street, Millis, Massachusetts 02154.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Town of Millis, Norfolk County, Massachusetts in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Charles River	Downstream Corporate Limits.	123
	Norfold Road (Upstream)	127
	Myrtle Road (Upstream)	136
	Upstream Corporate Limits	138

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963).

Issued: June 1, 1979.

Gloria M. Jimenez,

Federal Insurance Administrator.

Proposed Flood Elevation Determinations for the City of Flint, Genesee County, Mich. Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Flint, Genesee County, Michigan.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the City Hall, Department of Community Development, 1101 South Saganaw Street, Flint, Michigan. Send comments to: The Honorable James W. Rutorford, Mayor, City of Flint, City Hall, 1101 South Saganaw Street, Flint, Michigan 48502.

FOR FURTHER INFORMATION CONTACT: Mr. Richard W. Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determination of base (100-year) flood elevations for the City of Flint, Genesee County, Michigan, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

[1] The functions of the Federal Insurance Administration, Department of Housing and Urban Development, were transferred to the newly established Federal Emergency Management Agency by Reorganization Plan No. 3 of 1978 (43 FR 41943, September 19, 1978) and Executive Order 12127 (44 FR 19367, April 3, 1979).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet national Geodetic Vertical datum
Flint River	Downstream corporate limit	702
	About 1,000 feet upstream from Stephenson Street.	706
	Just downstream of Hamilton Dam.	708
	About 300 feet upstream of Stevens Street.	710
	Just above Utah Dam	716
	Upstream corporate limit	719
Swartz Creek	Mouth of Flint River	706
	Just upstream of Second Street.	708
	Just upstream of Court Street	710
	Just upstream of Lower Circle Road.	718
	Just upstream of Circle Road	725
	Just downstream of Bellenger Road.	737
	Just upstream of Bristol Road.	753
	Just upstream of private road located 1,100 feet upstream of Bristol Road.	756
	At upstream corporate limits	769
Gilkey Creek	Mouth of Flint River	713
	Just upstream of Lewis Street.	718
	Just downstream of Kearsley Park Boulevard.	718
	Just upstream of Longway Boulevard.	727
	About 1,150 feet upstream of Longway Boulevard.	729
	About 1,900 feet upstream of Longway Boulevard.	736
	Just upstream of Vernon Drive.	744
	Just upstream of Kelso Street.	750
	Just upstream of Chesole System.	752
	Upstream corporate limits	754
Kearsley Creek	Mouth at Flint River	717
	Just downstream of Kearsley Reservoir Dam.	718
	Above Kearsley Reservoir Dam.	736
	Upstream corporate limits	737
Thread Creek	Mouth at Swartz Creek	711
	Just upstream of Fenton Street.	715
	About 600 feet upstream of Grand Trunk Western Railroad.	723
	Just downstream of Twelfth Street.	728
	Just upstream of Grand Traverse Street.	732

Source of flooding	Location	Elevation in feet (national Geodetic Vertical datum
	Just upstream of Barton Street.	740
	Just downstream of Thread Lake Dam.	747
	Above Thread Lake Dam	751
	Just upstream of Dort Highway.	758
	Just upstream of Chambers Road.	769
	Upstream corporate limit	782
Crampton Drain	Confluence with Kearsley Reservoir.	738
	Upstream corporate limits	788
Robinson Drain	Mouth at Gilkey Creek	740
	Just upstream of Golf Course Bridge.	746
	About 1,300 feet upstream of State Highway 21.	769
West Branch Swartz Creek.	Downstream corporate limits	752
	Upstream corporate limits	753
Carman Creek	Confluence with Swartz Creek.	728
	Just downstream of State Highway 21.	730
	Just upstream of Grand Trunk Western Railroad.	736
	Just downstream of Crestbrook Lane.	742
	Just upstream of Crestbrook Lane.	747
	Just upstream of Hammerberg Road.	751
	Upstream corporate limits	753

[Docket No. FI-5195]

Revision of Proposed Flood Elevation Determinations for the City of Cambridge, Furnas County, Nebr., Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Cambridge, Furnas County, Nebraska.

Due to recent engineering analysis, this proposed rule revises the proposed determinations of base (100-year) flood elevations published in 44 FR 7163 on February 6, 1979, and in the *Cambridge Clarion* published on or about February 15, 1979 and February 22, 1979, and hence supersedes those previously published rules.

DATES: The period for comment will be ninety (90) days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood (100-year) elevations are available for review at the City Hall, Cambridge, Nebraska. Send comments to: The Honorable Charles B. Mousel, Mayor, City of Cambridge, City Hall, Cambridge, Nebraska 69022.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: Proposed base (100-year) flood elevations are list below for selected location in the City of Cambridge, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a)).

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevations in feet, national geodetic vertical datum
Republican River	About 0.91 mile downstream of State Highway 47.	2,255
	Just downstream of State Highway 47.	2,282
	Just upstream of State Highway 47.	2,294
	About 0.93 mile upstream of State Highway 47.	2,270

[1] The functions of the Federal Insurance Administration, Department of Housing and Urban Development, were transferred to the newly established Federal Emergency Management Agency by Reorganization Plan No. 3 of 1978 (43 FR 41943, September 20, 1978) and Executive Order 12127 (44 FR 19367, April 3, 1979).

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963.)

Dated: June 1, 1979.

Gloria M. Jimenez,

Federal Insurance Administrator.

Proposed Flood Elevation Determinations for the City of Concord, Merrimack County, N.H. Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Concord, Merrimack County, New Hampshire.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at Office of Planning and Engineering, City Hall, 41 Green Street, Concord, New Hampshire 03301. Send comments to: Mayor Gross or Mr. James Smith, City Manager, City Hall, 41 Green Street, Concord, New Hampshire.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, SW, Washington, D.C. 20410.

[1] The functions of the Federal Insurance Administration, Department of Housing and Urban Development, were transferred to the newly established Federal Emergency Management Agency by Reorganization Plan No. 3 of 1978 (43 FR 41943, September 20, 1978) and Executive Order 12127 (44 FR 19367, April 3, 1979).

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of Concord, Merrimack County, New Hampshire, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Merrimack River	Northeastern Corporate Limits (confluence with Soucook River).	204
	Just upstream of Manchester Street.	233
	Just upstream of Bridge Street.	235
	Just upstream of Seawall Falls Road.	252
Contoocook River	Just upstream of South Main Street.	310
	Just downstream of Contoocook Park Dam.	340
	Just upstream of Contoocook Park Dam.	363
	Just upstream of Horse Hill Road.	366
Soucook River	Just upstream of Pembroke Street.	230
	Approximately 250 feet upstream of Sheep Davis Road.	280
	Just downstream of Pittsfield Road.	304
The Outlet	Approximately 100 feet upstream Old Washington Street Bridge.	320
	Just downstream of New Washington Street Bridge.	336
	Just downstream of Island Road.	348
	Approximately 25 feet upstream of Island Road.	350

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator 44 FR 20963)

Proposed Flood Elevation Determinations for the Unincorporated Areas of Watauga County, N.C. Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the unincorporated areas of Watauga County, North Carolina.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Planning and Inspection Department, Basement Level, Watauga County Courthouse, Boone, North Carolina. Send comments to: Mr. Gary McGee, County Manager, or Mr. H. Neal Blair, Subdivision Coordinator, Watauga County Courthouse, Boone, North Carolina 28607.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the unincorporated areas of Watauga County, North Carolina.

In accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of Flooding	Location	Elevation in feet, national geodetic vertical datum
East Fork	Just downstream of Secondary Road 1522.	3102
	Just upstream of Secondary Road 1524.	3121
Middle Fork	Just upstream of Secondary road 1522.	3104
	Just upstream of US 221–421.	3127
	Just upstream of Secondary Road 1542.	3146
Brushy Fork	Just upstream of Secondary Road 1117.	2683
	Just upstream of US 421	2728
	Just upstream of Secondary Road 1511.	2764
	Just downstream of Secondary Road 1375.	2870
	Just upstream of Secondary Road 1375.	2875
Cove Creek	Just downstream of Secondary Road 1149.	2841
	Just upstream of US Highway 321.	2869
	Just upstream of Secondary Road 1215.	2896
	100 feet downstream of Secondary Road 1217.	2723
Gap Creek	Just upstream of US Highway 421–221.	2990
	Just downstream of Secondary Road 1507.	3004
	100 feet upstream of Secondary Road 1507.	3027
Howard Creek	Just downstream of Secondary Road 1368.	3164
Watauga River	Just upstream of Secondary road 1557.	2919
	Just upstream of Secondary Road 1569.	2938
	Just upstream of Mill Ridge Road.	2990
South Fork New River	Just upstream of US 221–421.	3066

[1] The functions of the Federal Insurance Administration, Department of Housing and Urban Development, were transferred to the newly established Federal Emergency Management Agency by Reorganization Plan No. 3 of 1978 (43 FR 41943, September 19, 1978) and Executive Order 12127 (44 FR 19367, April 3, 1979).

Source of Flooding	Location	Elevation in feet, national geodetic vertical datum
	Just upstream of paved road near confluence of Webber Creek.	3102
Mutton Creek	Approximately 40 feet downstream of Secondary route 1014.	3097
Webber Creek	Approximately 15 feet downstream of State Farm Road.	3103
	Just upstream of confluence with South Fork New River.	3102

Note.—This document originally appeared in the Federal Register for June 12, 1979. It is reprinted in this issue to meet requirements for publication on an assigned day of the week. (See OFR notice 41 FR 32914, August 6, 1976.)

In FR Doc. 79-17355 appearing on page 32004 in the issue of Monday, June 4, 1979, make the following correction:

The formula appearing at the top of the first column of page 32005 now given as "V-F/KD" should have been given as "V-$\sqrt{}$KD."

BILLING CODE 1505-01-M

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 762]

[FRL 1233-4; OTS-060005]

Toxic Substances Control Act; Fully Halogenated Chlorofluorocarbons

AGENCY: Environmental Protection Agency.

ACTION: Proposed Rule.

SUMMARY: On March 17, 1978 the Environmental Protection Agency promulgated a rule (40 CFR Part 762; 43 FR 11318) which prohibited almost all of the manufacture and processing of fully halogenated chlorofluoroalkanes (hereinafter referred to as chlorofluorocarbons) for those aerosol propellant uses which are subject to the Toxic Substances Control Act (TSCA) (15 U.S.C. 2601 *et. seq.*). This action proposes an amendment to the essential use exemption for mold release agents (40 CFR 762.21 (b)) in order to specifically exclude spinnerette release agents.

DATES: Comments on the proposed amendments must be received by the Record and Hearing Clerk by September 12, 1979. An informal public hearing will not be held unless an interested party requests one. Request for a public hearing must be received by the Record and Hearing Clerk by September 12, 1979. Please include the referrence number OTS-060005 on all comments.

ADDRESS: Joni T. Repasch is the Record and Hearing Clerk for this rulemaking. For sending comments the official record of rulemaking is located in room 447 WSME, 401 M Street, S.W., Washington, D.C. 20460. Telephone: 202-755-0322. The record is available for viewing and copying from 9 a.m. to 4 p.m., Monday through Friday, excluding holidays.

FOR FURTHER INFORMATION CONTACT: James D. Silverman, Control Action Division, Office of Toxic Substances (TS-794), U.S. Environmental Protection Agency, 401, M Street, S.W., Washington, D.C. 20460. Telephone: 202-755-9024.

SUPPLEMENTARY INFORMATION: The chlorofluorocarbon rule contains an essential use exemption (§ 762.21 (b)) for: Release agent for molds used in the production of plastic and elastomeric materials. Because questions have arisen about whether this exemption was intended to include spinnerette release agents, EPA has recently determined that such agents are exempted by the rule. However EPA is today proposing to revoke that exemption.

Since promulgation of the rule two companies have notified EPA that they produce spinnerette release agents which do not use chlorofluorocarbon aerosol propellants. According to one company, preliminary test results indicate that nonchlorofluorocarbon spinnerette release agents generally function as effectively as those containing chlorofluorocarbon propellants. If there is an alternative product available, there is no basis for maintaining the essential use exemption.

Accordingly, EPA is now proposing to amend the current rule to eliminate the exemption for spinnerette release agents. EPA specifically invites comments concerning the effectiveness, cost, and suitability of nonchlorofluorocarbon products as spinnerette release agents. Unless there is evidence that such alternatives are unsuitable EPA will eliminate the essential use exemption for spinnerette release agents propelled by chlorofluorocarbons.

The comment period for this rulemaking is 90 days instead of the usual 30 days for specialized amendments. This 90 day period will allow industry time to conduct additional tests of substitute products.

Under Executive Order 12044 EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or whether it may follow other specialized development procedures. EPA labels these other regulations "specialized". I have reviewed this regulation and determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

Dated: June 7, 1979.

Douglas M. Costle,

Administrator.

EPA proposes to amend 40 CFR by amending Part 762 as follows:

PART 762—FULLY HALOGENATED CHLOROFLUOROALKANES

By amending § 762.21 (b) to read as follows:

§ 762.21 Essential use exemptions.

* * * * *

(b) Release agent for molds used in the production of plastic and elastomeric materials except for spinnerette release agents.

(Toxic Substances Control Act, Section 6, Pub. L. 94-469, 90 Stat. 2020 (15 U.S.C. 2605))

BILLING CODE 6560-01-M

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Part 116a]

Title I, Elementary and Secondary Education Act; Awarding of Special Grants to Local Educational Agencies

AGENCY: Office of Education, HEW.

ACTION: Proposed regulations.

SUMMARY: The Commissioner proposes regulations to govern the awarding of special grants to local educational agencies (LEAs) with especially high

concentrations of children from low-income families. These special grants are authorized under the Education Amendments of 1978.

The primary purpose of these proposed regulations is to provide methods for the allocation of remaining special grant funds after all eligible counties in a State have received funds according to the statutory formula.

These proposed sections will be incorporated into the new proposed regulations that will be published in the near future for Title I of the Elementary and Secondary Education Act of 1965.

DATES: All comments on these proposed regulations must be received on or before August 13, 1979.

ADDRESSES: Written comments should be addressed to Ms. Carolyn Horner, Division of Education for the Disadvantaged, U.S. Office of Education, 400 Maryland Avenue, SW (Room 3642D, ROB-3), Washington, D.C. 20202.

All comments that are submitted will be available for public inspection at this address during and after the comment period between 8:30 a.m. and 4:00 p.m., Mondays through Fridays, except for Federal holidays.

FOR FURTHER INFORMATION CONTACT: Ms. Carolyn Horner, (202) 245-2638.

SUPPLEMENTARY INFORMATION:

A. Background

As amended by the Education Amendments of 1978 (Pub. L. 95-561), Section 117 of Title I of the Elementary and Secondary Education Act of 1965 ("the Act") authorizes special title I grants for local educational agencies (LEAs) in counties with especially high concentrations of children from low-income families (sec. 117; 20 U.S.C. 2722).

Section 117(b)(1) of the Act provides that each county—in a State other than Guam, American Samoa, the Virgin Islands, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands—that is eligible for a grant under title I of the Act for any fiscal year is entitled to an additional grant under section 117 for that fiscal year if—

(a) The number of children counted under section 111(c) of the Act for LEAs in the county exceeds five thousand; or

(b) The number of children counted under section 111(c) exceeds 20 percent of the total number of children aged five through seventeen in school districts of LEAs in the county.

In addition to the above criteria for determining whether a county is entitled to a special grant, section 117(b) provides that no State—other than Guam, American Samoa, the Virgin Islands, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands—shall receive less than one-quarter of 1 percent of the funds appropriated for special grants under section 117. However, the statute does not specify how those grant funds are to be allocated to counties in States in which there are no counties that meet the eligibility criteria in section 117(b)(1).

Similarly, the statute does not specify a method for allocating any remaining special grant funds after all eligible counties in a State have received the amount of special grant funds to which they are entitled under the formula in section 117(b)(3).

B. Overview of the Proposed Regulations

The proposed regulations specify—

(a) Which States are entitled to special grant funds under section 117 of the Act;

(b) The method for determining the amount of special grant funds that each State receives;

(c) The methods for allocating special grant funds to counties within each State that receives these funds;

(d) The method of making the special grants to LEAs; and

(e) The conditions that govern the use of special grant funds.

Sections 116a.34 and 116a.35 of the proposed regulations specify methods for allocating remaining special grant funds in a State after all eligible counties in that State have received the special grant funds to which they are entitled under the statutory formula.

In essence, these sections provide that, after each eligible county is allocated the amount of special grant funds to which it is entitled, the Commissioner allocates any remaining special grant funds on the basis of a plan that is—

(a) Proposed by the State educational agency (SEA); and

(b) Approved by the Commissioner.

Under the SEA plan these funds may be allocated to some otherwise ineligible counties, as well as to some or all of that State's eligible counties already funded under the statutory formula.

If the SEA and the Commissioner cannot agree on an allocation plan, the Commissioner allocates the remaining special grant funds to the counties in the State that are receiving a basic grant under part A of the title I statute. The Commissioner makes this allocation on the basis of the basic grant allocation method in the Act.

We would like to point out that the new proposed title I regulations describing evaluation requirements for title I programs, that were published in the Federal Register on February 7, 1979, used some of the same section numbers that are used in these proposed regulations. This problem will be solved by changing the section numbers for the title I evaluation requirements when they are published in final form.

C. Public Comments and Participation

While the Commissioner invites and encourages all interested persons to submit comments, suggestions, and recommendations concerning these proposed regulations, the Commissioner is particularly interested in receiving comments from people in the States that would be most affected by the allocation methods that are proposed in §§ 116a.34 and 116a.35. Those States are likely to include New Hampshire (which has no counties that meet the eligibility criteria in section 117(b)(1) of the Act) and Alaska, Delaware, Idaho, Iowa, Kansas, Maine, Montana, Nebraska, Nevada, North Dakota, South Dakota, Utah, Vermont and Wyoming (which will have special grant funds left over after all counties in the State that meet the statutory eligibility criteria have received the amount of special grant funds to which they are entitled under the formula in section 117(b)(3)).

Comments may be sent to the address in this notice.

D. Citations of Authority

As required by section 431(a) of the General Education Provisions Act (20 U.S.C. 1232(a)), a citation of statutory authority for each section of the proposed regulations has been placed in parentheses on the line following the text of each section. References to "Sec." in these citations of authority relate to sections of the Elementary and Secondary Education Act of 1965, as amended by several public laws including the Education Amendments of 1978 (Pub. L. 95-561).

Dated: March 16, 1979.

Ernest L. Boyer,

U.S. Commissioner of Education.

Approved: May 10, 1979.

Hale Champion,

Acting Secretary of Health, Education, and Welfare.

(Catalog of Federal Domestic Assistance No. 13.428 Educationally Deprived Children Local Educational Agencies)

It is proposed that Title 45 of the Code of Federal Regulations be amended by

adding new §§ 116a.32 through 116a.39 to Part 116a to read as follows:

Sec.
116a.32 States entitled to special grant funds under section 117 of the Act.
116a.33 Amount of special grant funds that each State receives.
116a.34 Allocation of special grant funds to counties within a State in which at least one county meets the statutory eligibility criteria.
116a.35 Allocation of special grant founds to counties within a State in which no country meets the statutory eligibility criteria.
116a.36 Submission of allocation plans.
116a.37 Commissioner's standard for approval of allocation plans.
116a.38 Method of making special grants.
116a.39 Use of special grant funds.

Authority: Section 117 of the Elementary and Secondary Education Act of 1965, as amended by the Education Amendments of 1978 (Pub. L. 95-561).

§ 116a.32 States entitled to special grant funds under section 117 of the Act.

Section 117(b) of the Act provides the each State—other than Guam, American Samoa, the Virgin Islands, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands—that is eligible for a grant under title I of the Act for any fiscal year is entitled to special grant funds from the amount appropriated under section 117(d) of the Act for the fiscal year.

(Sec. 117(b)(1); 20 U.S.C. 2722(b)(1))

§ 116a.33 Amount of special grant funds that each State receives.

The Commissioner determines the amount of special grant funds that a State receives under section 117 of the Act on the basis of the formula in section 117(b)(3) of the Act. However, each State that is entitled to special grant funds receives at least one-quarter of 1 percent of the funds appropriated under section 117(d) of the Act for that fiscal year.

(Sec. 117(b)(1), (2) amd (3); 20 U.S.C. 2722(b)(1), (2) and (3))

§ 116a.34 Allocation of special grant funds to counties within a State in which at least one county meets the statutory eligibility criteria.

(a) *General Rule.* Expect as provided in paragraph (b) of this section, special grant funds that are awarded to a State in which at least one county meets the eligibility criteria in section 117(b)(1) of the Act are allocated to the eligible counties within the State by the Commissioner in accordance with the formula in section 117(b)(3) of the Act.

(b) *Exceptions.* (1) Except as provided in subparagraph (2) of this paragraph, any special grant funds that remain unallocated—after all the counties in the State have been allocated the amount of special grant funds to which they are entitled under the statutory formula—are allocated to counties within the State by the Commissioner according to an allocation plan. This allocation plan must—

(1) Be submitted to the Commissioner by the SEA, according to the procedures described in § 116a.36; and

(2) Have the approval of the Commissioner, using the standards described in § 116a.37.

(2) If the SEA does not submit an allocation plan, or the Commissioner does not approve the plan that has been submitted, the Commissioner allocates the remaning special grant funds within the State to those counties that are receiving a basic grant under part A of title I of the Act. The Commissioner makes this allocation on the basis of the basic grant allocation method in section 111(a)(2) of the Act.

(Sec. 117(a) and (b); 20 U.S.C. 2722(a) and (b))

§ 116a.35 Allocation of special grant funds to counties within a State in which no county meets the statutory eligibility criteria.

(a) *General Rule.* Except as provided in paragraph (b) of this section, special grant funds that are awarded to a State in which no county meets the eligibility criteria in section 117(b)(1) of the Act are allocated to counties within the State by the Commissioner according to an allocation plan. This allocation plan must—

(1) Be submitted to the Commissioner by the SEA, according to the procedures described in § 116a.36; and

(2) Have the approval of the Commissioner, using the standards described in § 116a.37.

(b) *Exception.* If the SEA does not submit an allocation plan or the Commissioner does not approve the plan that has been submitted, the Commissioner allocates the special grant funds within the State to those counties that are receiving a basic grant under part A of title I of the Act. The Commissioner makes this allocation on the basis of the basic grant allocation method in section 111(a)(2) of the Act.

(Sec. 117(a) and (b); 20 U.S.C. 2722(a) and (b))

§ 116a.36 Submission of allocation plans.

(a) *States that may submit an allocation plan.* Each State for which special grant funds remain unallocated—after all the eligible counties in the State have been allocated the amount of special grant funds to which they are entitled under the statutory formula—may submit, for the Commissioner's consideration, a plan for allocation of these unallocated funds to counties within the State.

(b) *Submission through State educational agency.* Each State that chooses to submit an allocation plan shall do so through its SEA.

(c) *Elements of an allocation plan.* In order to be assured of consideration by the Commissioner, an allocation plan must include—

(1) A list of all counties in the State that meet the eligibility criteria in section 117(b)(1) of the Act, and the amount of special grant funds that each of those counties receives under the formula in section 117(b)(3) of the Act;

(2) A list of all counties in the State, and the amount of special grant funds—if any—that each county would receive under the proposed allocation plan; and

(3) A description of the proposed method for allocating the special grant funds to the counties in the State. This description must include—

(i) The reasons why this method is being proposed; and

(ii) How this method meets the statutory purpose of providing special grant funds to those counties with espically high concentrations of children from low-income families.

(Sec. 117(a) and (b); 20 U.S.C. 2722(a) and (b))

§ 116a.37 Commissioner's standards for approval of allocation plans.

In deciding whether to approve a proposed allocation plan the Commissioner considers the extent to which the proposed plan—

(a) Meets the requirements in § 116a.36;

(b) Would result in an allocation of special grant funds that meets the statutory purpose of providing special grant funds to those counties with especially high concentrations of children from low-income families; and

(c) Is reasonable in terms of local circumstances, including the distribution of children from low-income families within counties.

(Sec. 117(a) and (b); 20 U.S.C. 2722(a) and (b))

§ 116a.38 Method of making special grants.

(a) The Commissioner includes the amount of special grant funds that a State is entitled to for a particular fiscal year, as determined under § 116a.33, in the amount paid to that State under section 191 of the Act for that fiscal year.

(b) Under § 116a.34 or § 116a.35 the Commissioner allocated that special grant funds to counties within each State that receives special grant funds.

(c) Under the formula in section 117(b)(5) of the Act, the SEA shall distribute the special grant funds to LEAs in each county to which the Commissioner allocates special grant funds.

(Sec. 117(b)(5) and (c)(1); 20 U.S.C. 2722(b)(5) and (c)(1))

§ 116a.39 Use of special grant funds.

Each LEA that receives special grant funds under section 117 of the Act shall use those funds—

(a) To carry out activities that are described in the approved project application for title I basic grant funds that the LEA submitted under section 121 of the Act; and

(b) In accordance with the program requirements for title I basic grants in subpart 3 of title I of the Act.

(Sec. 117(c)(2); 20 U.S.C. 2722(c)(2)

BILLING CODE 4110-02-M

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[BC Docket No. 79-136; RM-3170]

Television Broadcast Station in Oklahoma City, Okla.; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of Proposed Rule Making.

SUMMARY: Comments invited on a proposal to assign television Channel 52 to Oklahoma City, Oklahoma. This would also make the channel available for use at Edmond, Oklahoma, as proposed by Satellite Outreach Ministries, Inc.

DATE: Comments must be filed on or before July 30, 1979, and reply comments must be filed on or before August 20, 1979.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Louis C. Stephens, Broadcast Bureau, (202) 632-6302.

SUPPLEMENTARY INFORMATION:

Adopted: May 31, 1979.

Released: June 6, 1979.

By the Chief, Broadcast Bureau:

In the Matter of Amendment of Section 73.606(b), Table of Assignments, Television Broadcast Stations, (Oklahoma City, Oklahoma); BC Docket No. 79-136, RM-3170.

1. Satellite Outreach Ministries, Inc. has requested the assignment of Channel 52 to Edmond, Oklahoma, and states its intention to apply for a construction permit to build a television station there if this assignment is granted.

2. No television channels are now assigned to the small community of Edmond (1970 population of 16,633) which is located in Oklahoma County (pop. 527,717), near Oklahoma City. Petitioner has offered no real showing of the need for a television channel for Edmond, but there does appear to be a possible need for another channel at Oklahoma City. Moreover, if Channel 52 were assigned to Oklahoma City, petitioner could apply for it at Edmond under the "15-mile" rule (Section 73.607(b)).

3. The proposed assignment would meet all mileage separation requirements, and a station on Channel 52 at Oklahoma City would be subject to no site restrictions for separation purposes.

4. The eight television channels now assigned to Oklahoma City (pop. 366,481) include the five on which stations now operate (4, 5, 9, *13, and 25), one for which applications are pending but are "cut-off" (Channel 14) and two for which construction permits have been granted (Channels 34 and 43). If Channel 52 were assigned, there would remain two possible additional channel assignments for Oklahoma City or elsewhere in the area.

5. Consideration of the proposed assignment of Channel 52 to Oklahoma City appearing warranted in these circumstances, comments are invited on the following proposed amendment to Section 73.606(b), Table of Television Assignments:

City	Channel No.	
	Present	Proposed
Oklahoma City, Okla	4-, 5, 9-, *13+, 14-, 25-, 34-, 43+.	4-, 5, 9-, *13+, 14-, 25-, 34-, 43+, 52

6. Authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

7. For further information concerning this proceeding, contact Louis C. Stephens, Broadcast Bureau, (202) 632-6302. However, members of the public should note that from the time a notice of proposed rule making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission.

Federal Communications Commission.

Philip L. Verveer,

Chief, Broadcast Bureau.

Appendix

1. Pursuant to authority found in Sections, 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and Section 0.281(b)(6) of the Commission's Rules, IT IS PROPOSED TO AMEND the TV Table of Assignments, Section 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in Sections 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission Rules.)

5. *Number of copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

[Docket No. HM-126A; Notice No. 79-9]

Display of Hazardous Materials Identification Numbers; Improved Emergency Response Capability

Correction

In FR Doc. 79-16984 appearing at page 32972 in the issue for Thursday, June 7, 1979, a portion of the comments of the Association of American Railroads (AAR) was reproduced on pages 32973-32975. These comments were printed in the same type size and style as the rest of the document preamble. Consequently, the comments of the AAR might be mistaken as representing the official views of the Materials Transportation Bureau. Users should be advised that the text beginning in the middle column on page 32973, from the heading "The Basic Requirements of a Hazard Information System" through the text in the middle column on page 32975, ending with the line "emergency units on the scene." is a partial quotation taken from the comments of the AAR.

National Oceanic and Atmospheric Administration

[50 CFR Part 652]

Mid-Atlantic Fishery Management Council; Public Hearings

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Public hearings on amendment to the Fishery Management Plan for the Surf Clam and Ocean Quahog Fisheries.

SUMMARY: The Mid-Atlantic Fishery Management Council prepared an amendment to the Fishery Management Plan for the Surf Clam and Ocean Quahog Fisheries that proposes major changes to the plan. Public hearings are announced for consideration of the changes.

DATES: The hearings will be held on the following dates: July 10, 11, 12, 17, 18, and 19, 1979.

ADDRESSES: The hearings will be at the following locations:

July 10—Holiday Inn, 300 Hathaway Road, New Bedford, MA 02710, (617) 997-1231.
July 11—Dutch Inn, Great Island Road, (Galilee) Narragansett, RI 02882, (401) 789-9341.
July 12—Stockton State College, Pomona, NJ 08240, (609) 652-1776.
July 17—Golden Eagle, Philadelphia Avenue on the Beach, Cape May, NJ 08204, (609) 884-5611.
July 18—Sheraton Fountainbleau Inn, 10100 Ocean Highway, Ocean City, MD 21842, (301) 524-3535.
July 19—Quality Inn Lake Wright, 6280 Northampton Blvd., Box 2048, Norfolk, VA 23502, (804) 461-6251.

All of the above public hearings will begin promptly at 7:00 p.m.

FOR FURTHER INFORMATION CONTACT: Mr. John C. Bryson, Executive Director, Mid-Atlantic Fishery Management Council, Room 2115, Federal Building, North and New Streets, Dover, Delaware 19901, Telephone: 302-674-2331.

SUPPLEMENTAL INFORMATION: The Fishery Management Plan for the Surf Clam and Ocean Quahog Fisheries was approved by the Secretary of Commerce in November, 1977, for the period through September, 1979. The Council adopted an amendment to the plan that would extend it through December 1979. This amendment is being reviewed by the Secretary of Commerce. The Council adopted another amendment that would extend the plan through calendar year 1980 with the following changes:

1. The annual surf clam quota of 1.8 million bushels (approximately 90 million pounds of meats) would be continued as would be the provisions to allocate the quota by quarters and regulate fishing effort by restricting days fished. However, the amendment would revise the quarterly quotas for surf clams to be 400,000 bushels for October through December and January through March, and 500,000 bushels for April through June and July through September. A fishing week of no more than four days, Monday through Thursday, will be continued. To help spread the quarterly catch evenly throughout the entire quarter, each vessel will be restricted to 24 hours of fishing per week at the beginning of each quarter. If the Regional Director of the National Marine Fisheries Service determines that the quarterly quota will not be harvested, the weekly hours of fishing may be increased. The Regional Director may prohibit fishing if it is likely that the quarterly quota will be exceeded. Vessels would be required to start and stop fishing at uniform hours. A make-up day for bad weather would be permitted on the fishing day following the fishing day which the bad weather condition existed. The make-up day provision would be in effect only during the months of December, February, and March.

2. The amendment would continue the provisions of the plan regarding ocean quahogs except that the annual quota for ocean quahogs would be increased to 4.0 million bushels (approximately 40 million pounds of meats).

3. The prohibition on the entry of additional vessels into the surf clam fishery would be continued. The moratorium would not preclude replacement of vessels involuntarily leaving the fishery during the time when the moratorium is in effect.

4. The provision to close surf clam beds to fishing wherein over 60 percent of the clams are under 4⅛ inches in length and less than 15 percent are over 5⅛ inches in length would be continued. It is recommended that special measures be instituted to manage such closed areas when they are reopened to insure that such openings do not lead to premature closures in the fishery and to prevent overfishing of the newly opened beds.

5. Dredge size and number would be limited by the amendment to such

equipment on board and in use on the effective date of implementation. A minimum surf clam size limit of 4½ inches would be imposed, at least during 1980. The primary reason for these measures is to take into account the possible impacts of using 1980 as a base year for measuring harvesting sector performance upon which to base, at least in part, a possible future direct allocation system for the surf clam fishery. The dredge freeze was recommended by the Council's Surf Clam and Ocean Quahog Advisory Subpanel primarily to minimize changes from historical relative harvesting capacity during the base period. The surf clam size was recommended by the Subpanel in order to minimize the harvest of pre-recruit surf clams during the base period when there would be a great incentive to harvest the maximum volume of clams in order to improve harvesting performance. Council may amend the plan by removing the moratorium on the entry of new vessels into the surf clam fishery and replacing it with some type of vessel allocation system beginning with calendar year 1981. In the event that such a system is instituted, and, to the extent that an allocation formula could be based on performance, 1980 would be the base period for at least a portion of such calculations.

6. The licensing provisions of the plan would be continued. The reporting requirements would be continued with minor revisions.

In addition to the management measures summarized above that are related to extending the plan through 1980, the Council has been considering the recommendation of the New England Fishery Management Council that a special regime be established for the surf clam fishery in New England. There has been much discussion since the plan was developed relative to the New England surf clam fishery, whether it differed enough from the Mid-Atlantic fishery to warrant a separate regime, and if so, what form that separate regime should take. After much consideration, the Mid-Atlantic Council has developed an alternative for the management of the surf clam fishery in New England. The alternative provides for the establishment of a separate management regime in New England, that is, the area north of the dividing line between the Mid-Atlantic and New England Fishery Management Councils. In the northern area the moratorium on entry of vessels into the surf clam fishery and the effort and gear restrictions would not be in effect. A quota of 200,000 pounds of surf clams would be set for that area. The New England quota would be in addition to the quota for approximately 30 million pounds of surf clams set in the amended plan in the Mid-Atlantic. When half of that quota would be caught, the effort restrictions operating in the Mid-Atlantic area would be imposed. Any harvest of surf clams from the northern area would not be charged against the Mid-Atlantic surf clam quota. Vessels entering the New England fishery under this special provision would not be entitled to fish in the Mid-Atlantic area and would not accrue any rights to a future direct allocation system that might be established. Vessels with permits issued pursuant to the moratorium established by the original plan would be permitted to fish in the northern area, but their landings would be reported separate from their Mid-Atlantic landings and would not count toward any possible future direct allocation system base calculation. The Mid-Atlantic Council is interested in receiving comments on this alternative during the review process on this amendment so that this issue may be resolved when this amendment has been finalized.

Another combination of management measures has been proposed for consideration during public review process for this amendment by the Council's Surf Clam and Ocean Quahog Advisory Subpanel. That alternative would extend the plan to the end of 1981 with annual and quarterly quotas for surf clams and an annual quota for ocean quahogs identical to those in the Council's recommended alternative. Dredge size and number would be limited to that on board and in use as of January 1, 1980. The bad weather make-up day provisions are the same in the Subpanel's alternative as those in the Council's recommended alternative, except that the make-up day would be limited to one twelve hour period per week. The moratorium on entry of vessels into the surf clam fishery would also be extended.

The objectives of the plan and the management unit, all surf clams (*Spisula solidissima*) and all ocean quahogs (*Arctica islandica*) in the Atlantic fishery conservation zone, would remain unchanged. Hearings will be tape recorded and the tapes filed as an official formal transcript of proceedings. Summary minutes will be prepared on each hearing. Written comments should be submitted to the contact person listed above by July 27, 1979, to receive full consideration in the plan amendment process.

Dated: June 11, 1979.

Winfred H. Meibohm,

Executive Director, National Marine Fisheries Service.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Marketing Agreement 146]

Peanuts; 1979 Crop; Incoming and Outgoing Quality Regulations and Indemnification

Pursuant to the provisions of sections 5, 31, 32, 34 and 36 of the marketing agreement regulating the quality of domestically produced peanuts heretofore entered into between the Secretary of Agriculture and various handlers of peanuts [30 FR 9402] and upon recommendation of the Peanut Administrative Committee established pursuant to such agreement and other information it is hereby found that the appended "Incoming Quality Regulation—1979 Crop Peanuts", "Outgoing Quality Regulation—1979 Crop Peanuts", and the "Terms and Conditions of Indemnification—1979 Crop Peanuts", which modify or are in addition to the provisions of sections 5, 31, 32 and 36 of said agreement will tend to effectuate the objectives of the Agricultural Marketing Agreement Act of 1937, as amended, and of such agreement and should be issued.

The Peanut Administrative Committee has recommended that the appended "Incoming Quality Regulation—1979 Crop Peanuts" "Outgoing Quality Regulation—1979 Crop Peanuts" and the "Terms and conditions of Indeminafication—1979 Crop Peanuts", be issued to implement and effectuate the provisions of the aforementioned sections of the marketing agreement. The 1979 peanut crop year begins July 1 and procedures and regulations for operations under the agreement should be established thereby affording handlers maximum time to plan their operations accordingly. The handlers of peanuts who will be affected hereby have signed the marketing agreement authorizing the issuance hereof, they are represented on the Committee which has prepared and recommended these quality regulations and terms and conditions of indemnification for approval.

Upon consideration of the Committee recommendation and other available information the appended "Incoming Quality Regulation—1979 Crop Peanuts", "Outgoing Quality Regulation—1979 Crop Peanuts", and the "Terms and Conditions of Indemnification—1979 Crop Peanuts" are hereby approved.

This regulation has not been determined significant under the Department's criteria implementing Executive Order 12044.

Dated: June 8, 1979.

D. S. Kuryloski,
Acting Deputy Director, Fruit and Vegetable Division.

Incoming Quality Regulation—1979 Crop Peanuts

The following modify section 5 of the peanut marketing agreement and modify or are in addition to the restrictions of section 31 on handler receipts or acquisitions of 1979 crop peanuts:

(a) *Modification of section 5, paragraphs (b), (c), and (d).* Paragraphs (b), (c), and (d) of section 5 of the peanut marketing agreement are modified as to 1979 crop farmers stocks peanuts to read respectively as follows:

(b) *Segregation 1.* "Segregation 1 peanuts" means farmers stock peanuts with not more than 2 percent damaged kernels nor more than 1.00 percent concealed damage caused by rancidity, mold or decay and which are free from visible *Aspergillus flavus.*

(c) *Segregation 2.* "Segregation 2 peanuts" means farmers stock peanuts with more than 2 percent damaged kernels or more than 1.00 percent concealed damage caused by rancidity, mold or decay and which are free from visible *Aspergillus flavus.*

(d) *Segregation 3.* "Segregation 3 peanuts" means farmers stocks peanuts with visible *Aspergillus flavus.*

(b) *Moisture.* Except as provided under paragraph (e) *Seed peanuts,* no handler shall receive or acquire peanuts containing more than 10 percent moisture: *Provided,* That peanuts of a higher moisture content may be received and dried to not more than 10 percent moisture prior to storing or milling. On farmers stock, such moisture determinations shall be rounded to the nearest whole number; on shelled peanuts, the determinations shall be carried to the hundredths place and shall not be rounded to the nearest whole number.

(c) *Damage.* For the purpose of determining damage, other than concealed damage, on farmers stock peanuts, all percentage determinations shall be rounded to the nearest whole number.

(d) *Loose shelled kernels.* Handlers may separate from the loose shelled kernels received with farmers stock peanuts, those sizes of kernels which ride screens with the following slot openings: Runner—$^{13}/_{64}$ x $^{3}/_{4}$ inch; Spanish and Valencia—$^{13}/_{64}$ x $^{3}/_{4}$ inch; Virginia—$^{13}/_{64}$ x 1 inch. If so separated, those loose shelled kernels which do not ride such screens, shall be removed from the farmers stock peanuts and shall be held separate and apart from other peanuts and disposed of for inedible use as provided in paragraph (g) of the Outgoing Quality Regulation. If the kernels which ride the prescribed screen are not separated, the entire amount of loose shelled kernels shall be removed from farmers stock peanuts and shall be so held and so delivered or disposed of. The loose shelled kernels which ride the screens may be included with shelled peanuts prepared by the handler for inspection and sale for human consumption. For the purpose of this regulation, the term "loose shelled kernels" means peanut kernels or portions of kernels completely free of their hulls and found in deliveries of farmers stock peanuts.

(e) *Seed peanuts.* A handler may acquire and deliver for seed purposes farmers stock peanuts which meet the requirements of Segregation 1 peanuts. If the seed peanuts are produced under the auspices of a State agency which regulates or controls the production of seed peanuts, they may contain up to 3 percent damaged kernels and have visible *Aspergillus flavus,* and, in addition, the following moisture content, as applicable:

(1) for seed peanuts produced in the Southeastern and Virginia-Carolina areas, they may contain up to 11 percent moisture except Virginia type peanuts which are not stacked at harvest time may contain up to 12 percent moisture; and (2) for seed peanuts produced in the

Southwestern area, they may contain up to 10 percent moisture.

However, any such seed peanuts with visible *Aspergillus flavus* shall be stored and shelled separate from other peanuts, and any residual not used for seed shall not be used or disposed of for human consumption unless it is determined to be wholesome by chemical assay for aflatoxin. A handler whose operations may include custom seed shelling, may receive, custom shell, and deliver for seed purposes farmers stock peanuts and such peanuts shall be exempt from the Incoming Quality Regulation requirements and therefore shall not be required to be inspected and certified as meeting the Incoming Quality Regulation requirements and the handler shall report to the Committee as requested the weight of each lot of farmers stock peanuts received on such basis on a form furnished by the Committee. However, handlers who acquire seed peanut residuals from their custom shelling of uninspected (farmers stock) seed peanuts, or from another sheller or producer who has or has not signed the marketing agreement shall hold and/or mill such residuals separate and apart from other receipts or acquisitions of the handler and such residuals which meet Outgoing Quality Regulation requirements may be disposed of by sale to human consumption outlets and any portion not meeting such requirements shall be disposed of by sale as peanuts failing to meet human consumption requirements pursuant to paragraph (i) of the Outgoing Quality Regulation.

(f) *Oilstock.* Handlers may acquire for disposition to domestic crushing or export, to countries other than Canada and Mexico, farmers stock peanuts of a lower quality than Segregation 1 or grades or sizes of shelled peanuts or cleaned inshell peanuts which fail to meet the requirements for human consumption. The provision of section 31 of the marketing agreement restricting acquisitions of such peanuts to handlers who are crushers is hereby modified to authorize all handlers to act as accumulators and acquire, from other handlers or non-handlers, Segregation 2 or 3 farmers stock peanuts. Handlers may also acquire from other handlers shelled or fragmented peanuts originating from Segregation 2 or 3 farmers stock, or the entire mill production of shelled or fragmented peanuts from Segregation 1 farmers stock, or lots of shelled peanuts, originating from Segregation 1 peanuts and which have been positive lot identified as specified in paragraph (d) of the Outgoing Quality Regulation, which failed to meet the requirements for human consumption pursuant to paragraph (a) of the Outgoing Quality Regulation: *Provided,* That all such acquisitions are held separate from Segregation 1 peanuts acquired for milling or from edible grades of shelled or milled peanuts. Handlers may commingle the Segregation 2 and 3 peanuts or keep them separate and apart as provided in paragraph (j) of the Outgoing Quality Regulation. Further disposition or commingling of such peanuts shall be only as provided in paragraph (1) of the Outgoing Quality Regulation. Handlers who acquire farmers stock peanuts of a lower quality than Segregation 1 or grades or sizes of shelled peanuts or cleaned inshell peanuts which fail to meet the requirements for human consumption shall report such acquisitions as prescribed by the Committee. To be eligible to receive or acquire Segregation 2 or 3 farmers stock peanuts and shelled or "fragmented" peanuts originating therefrom, a handler shall pay to the Area Association a fee for the purpose of covering cost of supervision of the disposition of such peanuts.

(g) *Segregation 2 and 3 control.* To assure the removal from edible outlets of any lot of peanuts determined by Federal or Federal-State Inspection Service to be Segregation 2 or Segregation 3, each handler shall inform each employee, country buyer, commission buyer or like person through whom he receives peanuts, of the need to receive and withhold all lots of Segregation 2 and Segregation 3 peanuts from milling for edible use. If any lot of Segregation 2 or Segregation 3 farmers stock peanuts is not withheld but returned to the producer, the handler shall cause the Inspection Service to forward immediately a copy of the inspection certificate on the lot to the designated office of the handler and a copy to the Committee which shall be used only for information purposes.

(h) *Farmers Stock Storage and Handling Facilities.* Handlers shall report to the Committee, on a form furnished by the Committee, all storage facilities or contract storage facilities which they will use to store acquisitions of 1979 crop Segregation 1 farmers stock peanuts and all such storage facilities must be reported prior to storing of any such handler acquisitions. Handlers shall also report to the Committee, the locations at which they will receive or acquire 1979 crop farmers stock peanuts. All such storage facilities shall have reasonable and safe access to allow for inspection of the facility and its contents. All such storage facilities must be of sound construction, in good repair, built and equipped so as to provide suitable storage and sufficient safeguards to prevent moisture condensation and provide adequate protection for farmers stock peanuts. All breaks or openings in the walls, floors or roofs of the facilities shall have been repaired so as to keep out moisture. Elevator pits and wells must be kept dry and free of moisture at all times. Insect control procedures must be carried out in such a manner as to prevent undesirable moisture in the storage facilities. Any conditions in warehouses, elevators, pits, and other farmers stock handling equipment conducive to the growth or spread of *Aspergillus flavus* mold shall be corrected to the satisfaction of the Committee. The Committee may make periodic inspections of farmers stock storage and handling facilities and farmers stock peanuts stored in such facilities to determine if handlers are adhering to these requirements.

(i) *Shelled peanuts.* Handlers may acquire from other handlers, for remilling and subsequent disposition to human consumption outlets, shelled peanuts (which originated from "Segregation 1 peanuts") that fail to meet the requirements specified for human consumption in paragraph (a) of the Outgoing Quality Regulation. Any lot of such peanuts must be accompanied by a valid inspection certificate for grade factors, an aflatoxin assay certificate and must be positive lot identified. Transactions made in this manner shall be reported to the Committee by both the buyer and seller on a form provided by the Committee. Peanuts acquired pursuant to this paragraph shall be held and milled separate and apart from other receipts or acquisitions of the receiving handler and further disposition shall be regulated by paragraph (h)(1) of the Outgoing Quality Regulation.

Outgoing Quality Regulation—1979 Crop Peanuts

The following modify or are in addition to the peanut marketing agreement restrictions of section 32 on handler disposition of 1979 crop peanuts:

(a) *Shelled peanuts.* No handler shall ship or otherwise dispose of shelled peanuts for human consumption unless appropriate samples for pretesting have been drawn in accordance with paragraph (c) of this regulation, or which if of a category not eligible for indemnification are not certified "negative" as to aflatoxin, or which contain more than (1) a total of 1.50

percent unshelled peanuts and damaged kernels; (2) a total of 3.00 percent unshelled peanuts and damaged kernels and minor defects; (3) 9.00 percent moisture in the Southeastern and Southwestern areas; or 10.00 percent moisture in the Virginia-Carolina area; or (4) 0.10 percent foreign material in peanuts "with splits" and peanuts of U.S. grade, other than U.S. splits, or 0.20 percent foreign material in U.S. splits and other edible quality peanuts not of U.S. grade. The lot size of such peanuts in bulk or bags shall not exceed 200,000 pounds. Fall through in such peanuts shall not exceed 4 percent except that in peanuts other than "No. Two Virginia" fall through consisting of either split and broken kernels or whole kernels shall not exceed 3 percent and fall through of whole kernels in Runners or Virginias "with splits" shall not exceed 3 percent or 2 percent on Spanish "with splits". The term through" as used herein, shall mean sound split and broken kernels and whole kernels which pass through specified screens. Screens used for determining fall through in peanuts covered by this paragraph (a) shall be as follow:

Type	Screen openings	
	Split and broken kernels	Whole kernels
Runners	1 13/64 inch round	1 13/64 x ¾ inch slot
Spanish and Valencia	1 13/64 inch round	1 13/64 x ¾ inch slot
Virginia except "No. 2 Virginia"	1 13/64 inch round	1 13/64 x 1 inch slot
"No. 2 Virginia"	1 13/64 inch round only for split, broken and whole kernels.	

("No. Two Virginia" means Virginia type peanuts that meet requirements of U.S. No. 2 Virginia grade peanuts except for tolerances for: (1) damage or unshelled peanuts and minor defects; and (2) sound peanuts and portions of peanuts which pass through the prescribed screen. Such tolerances shall be the same as those listed heretofore in this paragraph. Runners, Spanish or Virginia "with splits" means shelled peanuts which do not contain more than (a) 15 percent splits, (b) for Spanish 2.00 percent whole kernels which will pass through 1 13/64 x ¾ slot screen; for Runners 3.00 percent whole kernels which will pass through 1 13/64 x ¾ inch slot screen; and for Virginias 3.00 percent whole kernels which will pass through 1 13/64 x 1 inch slot screen, and (c) otherwise meet specification of U.S. No. 1 grade).

(b) *Cleaned inshell peanuts.* No handler shall ship or otherwise dispose of cleaned inshell peanuts for human consumption: (1) with more than 1.00 percent kernels with mold present unless a sample of such peanuts, drawn by an inspector of the Federal or Federal-State Inspection Service, was analyzed chemically by laboratories approved by the Committee or by a U.S. Department of Agriculture laboratory (hereinafter referred to as "USDA laboratory") and found to be wholesome relative to aflatoxin; (2) with more than 2.00 percent peanuts with damaged kernels; (3) with more than 10.00 percent moisture; or (4) with more than 0.50 percent foreign material. The lot size of such peanuts in bags or bulk shall not exceed 200,000 pounds.

(c) *Pretesting shelled peanuts.* Each handler shall cause appropriate samples of each lot of edible quality shelled peanuts to be drawn by an inspector of the Federal or Federal-State Inspection Service. The gross amount of peanuts drawn shall be large enough to provide for a grade analysis, for a grading check-sample, and for three 48-pound samples for aflatoxin assay. The three 48-pound samples shall be designated by the Federal or Federal-State Inspection Service as "Sample No. 1", "Sample No. 2" and "Sample No. 3" and each sample shall be place in a suitable container and "positive lot identified" by means acceptable to the Inspection Service and the Committee. Sample No. 1 may be prepared for immediate testing or Sample No. 1, Sample No. 2, and Sample No. 3 may be returned to the handler for testing at a later date. However, before shipment of the lot to the buyer (receiver), the handler shall cause Sample No. 1 to be ground by the Federal or Federal-State Inspection Service or a USDA or designated laboratory in a "subsampling mill" approved by the Committee.

The resultant ground subsample from Sample No. 1 shall be of a size specified by the Committee and be designated as "Subsample 1–AB" and at the handler's or buyer's option, a second subsample may also be extracted from Sample No. 1. It shall be designated as "Subsample 1–CD". Subsample 1–CD may be sent as requested by the handler or buyer, for aflatoxin assay, to a laborator listed on the most recent Committee list of approved laboratories that can provide analyses results on such samples in 36 hours. Subsample 1–AB shall be analyzed only in USDA or designated laboratories. But Subsamples 1—AB and 1–CD shall be accompanied by a notice of sampling signed by the inspector containing, at least, identifying information as to the handler (shipper), the buyer (receiver) if known, and the positive lot identification of the shelled peanuts. A copy of such notice covering each lot shall be sent to the Committee office.

The samples designated as Sample No. 2 and Sample No. 3 shall be held as aflation check-samples by the Inspection Service or the handler and shall not be included in the shipment to the buyer until the analyses results from Sample No. 1 are known. Upon call from the USDA or designated laboratory or the Committee, the handler shall cause Sample No. 2 to be ground by the Inspection Service in a "subsampling mill". The resultant ground Subsample from Sample No. 2 shall be of the size specified by the Committee and it shall be designated as "Subsample 2–AB". Upon call from the USDA or designated laboratory or the Committee, the handler shall cause Sample No. 3 to be ground by the Inspection Service in a "subsampling mill". The resultant ground subsample from Sample No. 3 shall be of the size specified by the Committee and it shall be designated as "Subsample 3–AB". Subsamples 2–AB and 3–AB shall be analyzed only in USDA or designated laboratories and each shall be accompanied by a notice of sampling. A copy of each such notice shall be sent to the Committee office and the cost of delivery of Subsamples 2–AB and 3–AB to the laboratory and the cost of assay on them shall be at the Committee's expense.

All cost involved in sampling and testing Subsample 1–CD shall be for the account of the buyer of the lot and at his expense. The cost of assay on Subsample 1–AB and a portion of the cost (specified by the Committee) of drawing the three 48-pound samples, grinding of Sample No. 1 and preparation and delivery of Subsample 1–AB to the laboratory shall be for the account of the buyer. However, if the handler elects to pay for these costs, he shall charge the buyer the amount

specified by the Committee when he invoices the peanuts and, if more than one buyer, on a pro rata basis. Any remaining costs of drawing the three 48-pound samples, grinding of Sample No. 1 and preparation and delivery of Subsample 1–AB shall be for the account of the handler and shall be shown on the grade analysis certificate covering the lot. When any of the samples or subsamples have been lost, misplace, or spoiled and replacement samples are needed, the entire cost of drawing the replacement samples shall be for the account of the handler. The results of each assay shall be reported to the buyer listed on the notice of sampling and, if the handler desires, to the handler. If a buyer is not listed on the notice of sampling, the results of the assay shall be reported to the handler who shall promptly cause notice to be given to the buyer, of the contents thereof, and such handler shall not be required to furnish additional samples for assay.

(d) *Identification.* Each lot of shelled or cleaned inshell peanuts shipped or otherwise disposed of for human consumption shall be identified by positive lot identification procedures. For the purpose of this regulation, "positive lot identification" of a lot of shelled or inshell peanuts is a means of relating the inspection certificate to the lot covered so that there can be no doubt that the peanuts delivered are the same ones described on the inspection certificate. The crop year that is shown on the positive lot identification tags, or other means of positive lot identification, shall accurately describe the crop year in which the peanuts in the lot were produced. Such procedure on bagged peanuts shall consist of attaching a lot numbered tag bearing the official stamp of the Federal or Federal-State Inspection Service to each filled bag in the lot. The tag shall be sewed (machine sewed if shelled peanuts) into the closure of the bag except that in plastic bags the tag shall be inserted prior to sealing so that the official stamp is visible. Any peanuts moved in bulk or bulk bins shall have their lot identity maintained by sealing the conveyance and if in other containers by other means acceptable to the Federal or Federal-State Inspection Service and to the Committee. All lots of shelled or cleaned inshell peanuts shall be handled, stored, and shipped under positive lot identification procedures.

(e) *Reinspection.* Whenever the Committee has reason to believe that peanuts may have been damaged or deteriorated while in storage, the Committee may reject the then effective inspection certificate and may require the owner of the peanuts to have a reinspection to establish whether or not such peanuts may be disposed of for human consumption.

(f) *Inter-plant transfer.* Any handler may transfer peanuts from one plant owned by him to another of his plants or to commercial storage, without having such peanuts positive lot identified and certified as meeting quality requirements, but such transfer shall be only to points within the same production area and ownership shall have been retained by the handler. Upon any transferred peanuts being disposed of for human consumption, they shall meet all the requirements applicable to such peanuts.

(g) *Loose shelled kernels, fall through and pickouts.* (1) Loose shelled kernels which do not ride screens with the following slot openings: Runner—$^{13}/_{64}$ x $^{3}/_{4}$ inch; Spanish and Valencia—$^{13}/_{64}$ x $^{3}/_{4}$ inch; Virginia—$^{13}/_{64}$ x 1 inch; and fall through and pickouts shall be disposed of only by sale as domestic oil stock, by crushing, or as specified in paragraph (g)(3) hereinafter. For the purpose of this regulation: the term "non-edible quality peanuts" described in this paragraph means loose shelled kernels, fall through, and pickouts; the term "loose shelled kernels" means peanut kernels or portions of kernels completely free of their hulls, either as found in deliveries of farmers stock peanuts or those which fail to ride the screens (U.S. No. 1 screens) in removing whole kernels; the term "fall through" has the same meaning as in paragraph (a) of this regulation; and the term "pickouts" means those peanuts removed at the picking table, by electronic equipment, or otherwise during the milling process.

(2) All loose shelled kernels, fall through, and pickouts shall be kept separate and apart from other milled peanuts that are to be shipped into edible channels. Such categories may be kept separate or be commingled in the same lot and shall be bagged in suitable new or clean, used bags or placed in bulk containers acceptable to the Committee. Such peanuts shall be identified by positive lot identification procedures set forth in paragraph (d) but using a red tag, and such peanuts shall be inspected by the Federal or Federal-State Inspection Service and a certification made on each lot as to moisture and foreign material content. Such lot size, whether in bags or bulk, shall not exceed 200,000 pounds.

(3) In addition to disposition outlets specified in paragraph (g)(1), fall through that has been sampled and determined negative as to aflatoxin content may be disposed of for use as wild-life feed or bait for rodents in labeled containers approved by the Committee. Each category of non-edible quality peanuts described in paragraph (g)(1) and identified as prescribed in paragraph (g)(2) may be exported in bulk or bags to countries other than Mexico or Canada pursuant to the provisions prescribed for such disposition in paragraph (l)(1) or (l)(2) of this regulation or they may be moved to another handler for such disposition. Such peanuts may be disposed of to domestic crushing as "unrestricted" if they are certified negative as to aflatoxin content and may be commingled at the crusher with any other category of peanuts determined by paragraph (l)(1) of this regulation to be eligible for such "unrestricted" crushing. Non-edible quality peanuts described in paragraph (g)(1) which have not been certified negative as to aflatoxin are not eligible for "unrestricted" crushing but may be disposed of to domestic crushing as "restricted" and may be commingled at the crusher with any other category of peanuts described in paragraph (l)(2). Such non-edible quality peanuts may be disposed of to domestic crushing or export without supervision by the Area Association if they are held separate and apart from peanuts on which supervision is required. However, if non-edible quality peanuts described in paragraph (g)(1) are exported or crushed in commingle whith peanuts on which supervision is required, the handler shall cause the Area Association to supervise the commingling and fragmenting for disposition to export and the commingling and domestic crushing on all categories of peanuts included in such commingling. All movement and disposition of such inedible quality peanuts shall be reported by the handler as prescribed by the Committee.

Meal produced from peanuts which were disposed of to crushing as "restricted" shall be used or disposed of as fertilizer or other non-feed use. To prevent use of restricted meal for feed, handlers shall either denature it or restrict its sale to licensed or registered U.S. fertilizer manufacturers or firms engaged in exporting who will export such meal for non-feed use or sell it to the aforesaid fertilizer manufacturers. However, loose shelled kernels, fall through and pickouts and meal from such peanuts, in specifically identified lots not exceeding 200,000 pounds may be sampled by Federal or Federal-State Inspection Service or by the Area Association if authorized by the Committee, and tested for aflatoxin by laboratories approved by the Committee

or by a USDA laboratory, at handler's or crusher's expense, and if such meet Committee standards, the meals may be disposed of for feed use.

(4) Notwithstanding any other provisions of this regulation or of the Incoming Quality Regulation applicable to 1979 crop peanuts, a handler may transfer non-edible quality peanuts described in paragraph (g)(1) to another plant within his own organization or transfer or sell such peanuts to a crusher for crushing. Sales or transfer of restricted peanuts to domestic crushers who are not handlers under the agreement shall be made only on the condition that they agree to comply with the terms of this paragraph (g) and all other applicable requirements of this regulation, including the reporting requirements.

(h) *Peanuts failing quality requirements.*

(1) Handlers may sell to or contract with other handlers, for further handling, shelled peanuts (which originated from Segregation 1 peanuts) that fail to meet the requirements for disposition to human consumption outlets heretofore specified in paragraph (a). Lots of peanuts disposed of in this manner must be accompanied by a valid grade inspection certificate, an aflatoxin assay certificate and must be positive lot identified. Transactions made in this manner shall be reported to the Committee by both the seller and buyer on a form provided by the Committee. Any such peanuts acquired by handlers pursuant to paragraph (i) of the Incoming Quality Regulation shall be held and milled separate and apart from other receipts or acquisitions of the receiving handler and further disposition shall be regulated by the requirements specified heretofore or pursuant to paragraph (h)(3) hereinafter.

(2) Handlers may blanch or cause to have blanched positive identified shelled peanuts (which originated from Segregation 1 peanuts) that fail to meet the requirements of paragraph (a) of this regulation because of excessive damage, minor defects, moisture, or foreign material or are positive as to aflatoxin. Handlers who move such peanuts to a blancher shall report, to the Committee on a form furnished by the Committee, movement of each such lot and the title shall be retained by the handler until the peanuts are blanched and certified by an inspector of the Federal or Federal-State Inspection Service as meeting the requirements for disposal into human consumption outlets. To be eligible for disposal into human consumption outlets, such peanuts after blanching, must meet specifications for unshelled peanuts, damaged kernels, minor defects, moisture, and foreign material as listed in paragraph (a) of this regulation and be accompanied by an aflatoxin certificate determined to be negative by the Committee. Blanching under the provisions of this paragraph shall be performed only by those firms who agree to procedures acceptable to the Committee and who are approved by the Committee to do such blanching.

(3) Handlers may dispose of positive identified shelled peanuts (which originated from "Segregation 1 peanuts") which fail to meet the requirements of paragraph (a) of the Outgoing Quality Regulation: (a) to domestic crushing, (b) to export to countries other than Canada and Mexico, provided they meet fragmented requirements, (c) to crushers who are not handlers but are approved by the Committee, or (d) to other handlers for crushing or fragmenting and exportation. Each lot of such peanuts shall have been positive lot lot identified as prescribed in paragraph (d). Handlers may dispose of such peanuts as "unrestricted": *Provided*, That each lot has been sampled and assayed for aflatoxin as specified in paragraph (c) and determined to be negative as to aflatoxin by the Committee. Handlers who have acquired any such unrestricted peanuts from another handler or from their own operations may commingle such peanuts with those from their own operations at the crusher, or during the fragmenting operation or after fragmenting for further disposition as "unrestricted" pursuant to the provisions of paragraph (l)(1) of this regulation. Lots of peanuts covered by the provisions of this paragraph (h)(3), which have not been assayed for aflatoxin content or which have been assayed and determined to be unwholesome as to aflatoxin by the Committee, are not eligible for disposition as "unrestricted". Therefore, the disposition of such peanuts to export or domestic crushing shall be as "restricted". However, handlers who have acquired such restricted peanuts from another handler may commingle such peanuts with those from his own operations at the crusher, or during the fragmenting operation, or after fragmenting for further disposition as restricted pursuant to the provisions of paragraph (l)(2). Peanuts regulated by this paragraph (h)(3) may be disposed of to domestic crushing or export without supervision by the Area Association if they are held separate and apart from peanuts on which supervision is required. However, if any such peanuts are commingled with peanuts on which supervision is required, the handler shall cause the Area Association to supervise the commingling and fragmenting for disposition to export and the commingling and domestic crushing on all categories of peanuts included in such commingling. All movement and disposition of peanuts covered by the provisions of this paragraph shall be reported by the handler as prescribed by the Committee.

(4) Handlers may contract with PAC approved remillers for remilling shelled peanuts (which originated from Segregation 1 peanuts) that fail to meet the requirements for disposition to human consumption outlets heretofore specified in paragraph (a) of the Outgoing Quality Regulation. Lots of peanuts moved under these provisions must be accompanied by a valid grade inspection certificate and an aflatoxin assay certificate and must be positive lot identified. Handlers who move such peanuts to an approved remiller shall report to the Committee, on a form furnished by the Committee, the movement of each such lot. The title of such peanuts shall be retained by the handler until the peanuts have been remilled and certified by the Federal or Federal-State Inspection Service as meeting the requirements for disposition to human consumption outlets specified in paragraph (a), and be accompanied by an aflatoxin certificate determined to be negative by the Committee. Remilling under these provisions may include composite remilling of more than one such lot of peanuts owned by the same handler. However, such peanuts owned by one handler shall be held and remilled separate and apart from all other peanuts. The residual peanuts resulting from remilling under these provisions shall be bagged and red-tagged and disposed of to domestic crushing by the approved remiller or they may be returned to the handler for disposition under the provisions of paragraph (g)(3) of the Outgoing Quality Regulation. Remilling under the provisions of this paragraph shall be performed only by those firms who agree to procedures acceptable to the Committee and who are approved by the Committee to do such remilling.

(i) *Residuals from seed peanuts.* Handlers who receive and custom shell for seed purposes farmers stock peanuts (which have not been inspected and certified as meeting the Incoming Quality Regulation) shall hold and mill peanuts acquired as residuals from such operations separate and apart from peanuts acquired as Segregation 1 farmers stock. Likewise, any such residuals received or acquired from a

handler or non-handler, shall be held and milled separate and apart in the same manner. Residuals that meet requirements of the Outgoing Quality Regulation may be disposed of by sale to human consumption outlets or to another handler and any portion in positive identifed lots not meeting such requirements: (1) may be handled and disposed of pursuant to the provisions of paragraph (h) of this regulation, Or; (2) shall be disposed of to domestic crushing or export pursuant to the provisions of paragraph (g).

(j) *Segregation 2 and 3 farmers stock disposition.*

(1) Handlers who have acquired Segregation 2 and 3 farmers stock peanuts pursuant to paragraph (f) of the Incoming Quality Regulation may commingle such peanuts or keep them separate and apart. The Segregation 3 farmers stock peanuts or commingled Segregation 2 and 3 farmers stock peanuts may be moved or disposed of in bags or bulk: (a) to other handlers for shelling, fragmenting, or crushing, or (b) to crushers who are not handlers but are approved by the Committee. Handlers may shell such peanuts and move or dispose of the shelled peanuts in bulk or bags: (a) to other handlers for fragmenting or crushing, or (b) to crushers who are not handlers but are approved by the Committee and further disposition shall be as provided hereinafter in paragraph (1)(2) for "restricted" export to countries other than Canada and Mexico, or for "restricted" domestic crushing. Prior to exportation, the shelled peanuts shall be certified by a Federal or Federal-State Inspection Service as meeting the requirements specified for "fragmented" peanuts in paragraph (1)(1) and shall be assayed for aflatoxin by a USDA laboratory approved by the Committee. Shelling, fragmenting, and crushing of Segregation 3 peanuts or commingled Segregation 2 and 3 peanuts shall be done only under the supervision of the area Associations and any such peanuts may be commingled with other categories of shelled peanuts for disposition to export or domestic crushing. However, if such further commingling occurs, the handler shall cause the Area Association to supervise the further commingling and fragmenting for disposition to export or the further commingling and domestic crushing. All movement and dispostion of Segragation 3 peanuts or commingled Segregation 2 and 3 peanuts and shelled or fragmented peanuts originating therefrom shall be reported by the handler as prescribed by the Committee.

(2) Handlers who have acquired Segregation 2 farmers stock peanuts pursuant to paragraph (f) of the Incoming Quality Regulation and held them separate and apart from Segregation 3 peanuts may commingle the Segregation 2 farmers stock with Segregation 1 farmers stock for disposition to domestic crushing or export as inedibles. The Segregation 2 farmers stock peanuts or commingled Segregation 1 and 2 farmers stock peanuts may be moved or disposed of in bulk or bags: (a) to other handlers for shelling, fragmenting, or crushing, or (b) to crushers who are not handlers but are approved by the Committee. Handlers may shell the Segregation 2 or commingled Segregation 1 and 2 peanuts and move or dispose of the shelled peanuts: (a) to another handler for fragmenting or crushing; or (b) to crushers who are not handlers but are approved by the Committee and further disposition shall be as provided in paragraph (1)(1) of this regulation. Prior to exportation the shelled peanuts shall be certified by a Federal or Federal-State Inspection Service as meeting the requirements specified for fragmented peanuts also in paragraph (1)(1). If the shelled peanuts from Segregation 2 peanuts or commingled Segregation 1 and 2 peanuts are held separate and apart from Segregation 3 peanuts and any restricted categories of shelled peanuts, no aflatoxin assay shall be required. Shelling, fragmenting, and crushing of Segregation 2 peanuts or commingled Segregation 1 and 2 peanuts shall be done only under the supervision of the Area Association. The shelled peanuts from Segregration 2 peanuts or commingled Segregation 1 and 2 peanuts may be further commingled with other categories of shelled peanuts for disposition to export or domestic crushing. However, if such further commingling occurs, the handler shall cause the Area Association to supervise the further commingling and fragmenting. All movement and disposition of Segregation 2 peanuts or commingled Segregation 1 and 2 peanuts and shelled or fragmented peanuts originating therefrom shall be reported by the handler as prescribed by the Committee.

(k) *Segregation 1 farmers stock disposition.* (1) In addition to milling (shelling, cleaning etc.) Segregation 1 farmers stock peanuts for disposition to human consumption or seed outlets, handlers may dispose of Segregation 1 farmers stock peanuts to export or to other handlers for such disposition. All such dispositions to export shall be reported by the handler as requested by the Committee.

(2) In addition to the disposition outlets specified in paragraph (k)(1), handlers may dispose of Segregation 1 farmers stock peanuts in bags or bulk to other handlers for shelling, fragmenting, or crushing. Such peanuts may also be disposed of to crushers who are not handlers but are approved by the Committee. Handlers may commingle Segregation 1 farmers stock peanuts with Segregation 2 farmers stock peanuts or keep them separate and apart, and may shell such peanuts and move or dispose of the shelled peanuts in bulk or bags to other handlers for fragmenting or crushing. Such peanuts may also be disposed of to crushers who are not handlers but are approved by the Committee. However, the shelling, fragmenting and disposition of such Segregation 1 farmers stock peanuts shall be done only under the supervision of the Committee and the Area Association and all peanuts handled under the provisions of this paragraph (k)(2), for disposition to export or domestic crushing, shall be milled and disposed or pursuant to paragraph (j)(2) in lieu of the provisions specified in paragraphs (a), (b), (c), (d), (g), (h), and (i) of this regulation. The movement and disposition of all peanuts handled under the provisions of this paragraph (k)(2), shall be reported by the handler as prescribed by the Committee.

(l) *Handling, commingling, and disposition of shelled peanuts not meeting quality requirements for human consumption.* (1) The following categories of shelled peanuts may be disposed of to domestic crushing or to export as "unrestricted":

(a) The entire mill production of shelled peanuts from Segregation 1 farmers stock; pursuant to paragraph (k)(2).

(b) The entire mill production of shelled peanuts from Segregation 2, or commingled Segregation 1 and 2 farmers stock pursuant to paragraph (j)(2).

(c) Positive Lot Identified lots of shelled "peanuts failing quality requirements" determined negative as to aflatoxin pursuant to parargraph (h)(3).

(d) Positive Lot Identified Lots of loose shelled Kernels, fall through, or pickouts determined negative as to aflatoxin pursuant to paragraph (g) (1), (2), and (3).

(e) Positive Lot Identified lots of loose shelled kernels, fall through and pickouts commingled and determined negative as to aflatoxin pursuant to paragraphs (g) (2) and (3).

(f) Positive Lot Identified lots of seed peanut residuals determined negative as to aflatoxin pursuant to paragraph (i).

Handlers who acquire from other handlers or from their own operations any of the categories of shelled peanuts described heretofore in this paragraph may commingle such peanuts while fragmenting them or after they have been fragmented: (1) with any other category of peanuts described in this paragraph, and (2) with any category of "unrestricted" shelled peanuts acquired from CCC and determined by CCC to be eligible for such commingling for disposition to export to countries other than Canada and Mexico. However, such peanuts, prior to exportation, shall be certified as meeting fragmented requirements. For the purpose of this regulation, the term "fragmented" means that not more than 20 percent of the peanuts shall be whole kernels that ride the following screens, by type: Spanish 1⅝₄ x ¾ inch slot; Runner 1⅝₄ x ¾ inch slot; and Virginia 1⅝₄ x 1 inch slot. Handlers who acquire from other handlers or from their own operations any of the categories of shelled peanuts described heretofore in this paragraph may commingle such peanuts at the crusher: (1) with any other category of peanuts described in this paragraph, and (2) with any category of unrestricted shelled peanuts acquired from CCC and determined by CCC to be eligible for such commingling and the resultant meal may be disposed of without restriction. To be eligible for such unrestricted dispositions (crushing or export), such peanuts, before commingling and after commingling, shall be kept separate and apart from all "restricted" peanuts. Shelling, fragmenting, and crushing of Segregation 2 peanuts or commingled Segregation 1 and 2 peanuts shall be done only under the supervision of the Area Association and if any shelled peanuts originating therefrom are commingled with any of the other categories of shelled peanuts described heretofore in this paragraph, the handler shall cause the Area Association to supervise the commingling and fragmenting and the commingling and crushing on all categories of peanuts included in such commingling. All movement and disposition of the categories of peanuts described heretofore in this paragraph shall be reported by the handler as prescribed by the Committee.

(2) The following categories of shelled peanuts may be disposed of to domestic crushing or to export as "restricted":

(a) The entire mill production of shelled peanuts from Segregation 1 farmers stock pursuant to paragraph (k)(2) of the Outgoing Quality Regulation.

(b) The entire mill production of shelled peanuts from Segregation 2 or commingled Segregation 1 and 2 farmers stock pursuant to paragraph (j)(2).

(c) The entire mill production of shelled peanuts from Segregation 3 or commingled Segregation 2 and 3 farmers stock pursuant to paragraph (j)(1).

(d) Postitive Lot Identified lots of shelled "peanuts failing quality requirements" pursuant to paragraph (h)(3).

(e) Postitive Lot Identified lots of loose shelled kernels, fall through, or pickouts pursuant to paragraphs (g) (1), (2), and (3).

(f) Positive Lot Identified lots of loose shelled kernels, fall through and pickouts commingled pursuant to paragraphs (g) (2) and (3).

(g) Positive Lot Identified lots of seed peanut residuals pursuant to paragraph (i).

Handlers who acquire, from other handlers or from their own operations, any of the categories of shelled peanuts described heretofore in this paragraph (1) (2) may commingle such peanuts while fragmenting them or after they have been fragmented with any other category of peanuts described in this paragraph and with any category of shelled peanuts acquired from CCC and determined by CCC to be eligible for such commingling with disposition to export to countries other than Canada and Mexico as "restricted". Prior to such exportation, the peanuts shall be certified as meeting the fragmented requirements and shall be assayed for aflatoxin by a USDA laboratory or a laboratory approved by the Committee. The handler's "in-land" bill of lading and his invoice covering the shipment shall include the following statement: "The peanuts covered by this bill of lading (or invoice) are limited to crushing only and may contain aflatoxin". Handlers who acquire, from other handlers or from their own operations, any of the categories of shelled peanuts described heretofore in this paragraph may commingle such peanuts at the crusher with any other category of peanuts described in this paragraph (1) (2) and with any category of shelled peanuts acquired from CCC and determined by CCC to be eligible for such commingling for "restricted" domestic crushing. Meal produced from peanuts disposed of to crushing as "restricted" shall be used or disposed of as fertilizer or other non-feed use, pursuant to the provisions of paragraph (g)(3). Shelling, fragmenting, and crushing of Segregation 2 peanuts, Segregation 3 peanuts and the entire mill production of Segregation 1 peanuts handled pursuant to paragraph (k), shall be done only under supervision of the Area Association and if any of such categories of peanuts are commingled with any of the other categories of shelled peanuts described heretofore in this paragraph, the handler shall cause the Area Association to supervise the commingling and fragmenting on all categories of peanuts included in such commingling. All movement and disposition of the categories of peanuts described heretofore in this paragraph shall be reported by the handler as prescribed by the Committee.

Terms and Conditions of Indemnification—1979 Crop Peanuts

For the purpose of paying indemnities on a uniform basis pursuant to section 36 of the peanut marketing agreement effective July 12, 1965, each handler shall promptly notify or arrange for the buyer to notify the Manager, Peanut Administrative Committee, of any lot of cleaned inshell or shelled peanuts, milled to the outgoing quality requirements and into one of the categories listed in the final paragraph of these terms and conditions, on which the handler has withheld shipment or storage or the buyer, including the user division of a handler, has withheld usage due to a finding as to aflatoxin content as shown by the results of chemical assay. To be eligible for indemnification, such a lot of peanuts shall have been inspected and certified as meeting the quality requirements of the agreement, shall have met all other applicable regulations issued pursuant thereto, including the pretesting requirements in (a) and (c) of the "Outgoing Quality Regulation—1979 Crop Peanuts", and the lot identification shall have been maintained. If the Committee concludes, based on assays to date or further assays, that the lot is so high in aflatoxin that it should be handled pursuant to these Terms and Conditions and such is concurred in by the Agricultural Marketing Service, the lot shall be accepted for indemnification. If the lot is covered by a sales contract, the lot may be rejected to the handler.

In an effort to make such eligible peanuts suitable for human consumption, and to minimize indemnification costs, the Committee and the Agricultural Marketing Service shall, prior to disposition for crushing cause all suitable lots to be remilled or custom blanched or both.

"Custom blanching" means the process which involves blanching

peanuts, and the subsequent removal of damaged peanuts for the purpose of eliminating aflatoxin from the lot. The process may be applied to either an original lot or the new lot which results from remilling. Custom blanching shall be performed only by those firms determined by the Committee to have the capability to remove the aflatoxin and who agree to such terms, conditions and rates of payment as the Committee may find to be acceptable.

If the Committee and the Agricultural Marketing Service conclude that such lot is not suitable for remilling or custom blanching, the lot shall be declared to crushing and shall be disposed of by delivery to the Committee at such point as it may designate. The indemnification payment for peanuts in such a lot shall be the indemnification value of the peanuts, as hereinafter provided. Transportation expenses (excluding demurrage) from the handler's plant or storage to the point within the Continental United States or Canade where the rejection occurred and from such point to a delivery point specified by the Committee shall be included in the indemnification payment if the lot is found by the Committee to be unwholesome as to aflatoxin after such lot had been certified negative as to aflatoxin prior to being shipped or otherwise disposed of for human consumption by the handler pursuant to requirements of the "Outgoing Quality Regulation—1979 Crop Peanuts". Payment shall be made to the handler as soon as practicable after delivery of the peanuts to the Committee. The salvage value for peanuts declared for crushing shall be paid to, and retained by, the Committee to offset indemnification expenses.

If it is concluded that the lot should be remilled or custom blanched, expenses shall be paid by the Committee on those lots which, on the basis of the inspection occurring prior to shipment, contained not more than 1.00 percent damaged kernels other than minor defects. Lots with damage in excess of 1.00 percent on such inspection shall be remilled without reimbursement from the Committee for milling or freight, but otherwise shall be indemnifiable the same as lots with not more than 1.00 percent damage.

The indemnification value of peanuts delivered to the Committee for indemnification shall be as listed in the next to last indemnification shall be as listed in the next to last paragraph of these terms and conditions.

The indemnification payment on peanuts declared for remilling, and which contain not more than 1.00 percent damaged kernels other than minor defects, shall be the indemnification value referable to the weights of peanuts lost in the remilling process and not cleared for human consumption, plus an allowance for remilling of two and one-half cents per pound on the original weight. Transportation expenses (excluding demurrage) from the handler's plant or storage to the point within the Continental United States or Canada where the rejection occurred and from such point to a delivery point specified by the Committee shall be included in the indemnification payment if the lot is found by the Committee to be unwholesome as to aflatoxin after such lot had been certified negative as to aflatoxin prior to being shipped or otherwise disposed of for human consumption by the handler pursuant to requirement of the "Outgoing Quality Regulation-1979 Crop Peanuts". On lots on which the remilling is not successful in making the lot wholesome as to aflatoxin and such lots of peanuts are declared for custom blanching after remilling, the indemnification payment shall be the blanching cost, plus the transportation costs from origin (whether handler or buyer premises) to point of blanching and on unsold lots from point of blanching to handler's premises and the indemnification value of the weight of reject peanuts removed from the lot. On lots which are custom blanched without remilling, the indemnification payment shall be determined in the same manner. However, no indemnification payments shall be paid on any lot of peanuts where the Committee determines that the custom blanched peanuts from such a lot have been sold at a price lower than the indemnification value on the original red skin lot at the time the indemnification claim was filed with the Committee.

Claims for indemnification of 1979 crop peanuts may be filed by any handler sustaining a loss as a result of a buyer withholding from human consumption a portion or all the product made from a lot of peanuts which has been determined to be unwholesome due to aflatoxin. The Committee shall pay, to the extent of the raw peanut equivalent value of the peanuts used in the product so withheld, such claims as it determines to be valid.

Payment shall be made to the handler claiming indemnification or receiving the rejected lot as soon as practicable after receipt by the Committee of such evidence of remilling or custom blanching and clearance of the lot for human consumption as the Committee may require and the delivery of the peanuts not cleared for human consumption to the delivery point designated by the Committee. If a suitable reduction in the aflatoxin content is not achieved on any lot which is remilled or custom blanched or both, the Committee shall declare the entire lot for indemnification. However, the Committee shall refuse to pay indemnification on any lot(s) where it has reason to believe that the rejection of the peanuts arises from failure of the handler to use reasonable measures to receive and withhold from milling for edible use those Segregation 3 peanuts tendered to him either directly by a producer or by a country buyer, commission buyer or other like person. Furthermore, any misrepresentation by a handler in reporting acquisition, composition or disposition of any lot or lots of peanuts by such handler shall cause indemnification payments with respect to any such claim filed with the Committee by the handler on 1979 crop peanuts to be withheld unless the Committee finds that such action was inadvertent.

Remilling may occur on the premises of any handler signatory to the marketing agreement or at such other plant as the Committee may determine. However, if the Committee orders remilling of a lot which has been found to contain aflatoxin prior to shipment from the locality of original milling, the Committee shall not pay freight costs should the handler move said lot to another locality for remilling.

Notice of claims for indemnification on peanuts of the 1979 crop shall be filed with the Committee no later than November 1, 1980.

Each handler shall include, directly or by reference, in his sales contract the following provisions:

Should buyer find peanuts subject to indemnification under this contract to be so high in aflatoxin as to provide possible cause for rejection, he shall promptly notify the seller and Manager, Peanut Administrative Committee, Atlanta, Georgia. Upon a determination of the Peanut Administrative Committee, confirmed by the Agricultural Marketing Service, authorizing rejection, such peanuts, and title thereto, if passed to the buyer, shall be returned to the seller and such peanuts shall be reoffered to the buyer to satisfy the covering contract, pending successful remilling and/or blanching. Or, if the buyer's or receiver's name is shown on the certificates covering a lot which, upon the pretesting sampling procedure prescribed in paragraph (c) of the outgoing quality regulation, exceeds Committee requirements for wholesomeness as to aflatoxin, such peanuts shall be offered to the buyer to satisfy the existing applicable contract, pending successful remilling and/or

blanching. Alternatively, seller may replace any rejected lot of peanuts with another lot, if he elects to do so.

Seller shall, prior to shipment of a lot of shelled peanuts covered by this sales contract, cause appropriate samples to be drawn by the Federal or Federal-State Inspection Service from such lot, shall cause the sample(s) to be sent to a USDA laboratory or if designated by the buyer, a laboratory listed on the most recent Committee list of approved laboratories to conduct such assay, for an aflatoxin assay and cause the laboratory, if other than the buyer's to send one copy of the results of the assay to the buyer. The laboratory costs shall be for the account of the buyer and buyer agrees to pay them when invoiced by the laboratory or, in the event the seller has paid them, by the seller.

Any handler who fails to include such provisions in his sales contract shall be ineligible for indemnification payments with respect to any claim filed with the Committee of 1979 crop peanuts covered by the sales contract.

In addition, should any handler enter into any oral or written sales contract which fixes the level of aflatoxin at which rejection may be made and hence conflicts with these terms and conditions, the handler doing so will not be eligible for indemnification payments with respect to any claim filed with the Committee on 1979 crop peanuts on or after the filing date of a claim under such contract, except upon the Committee's finding that acceptance of such contract was inadvertent; and for purposes of this provision a claim shall be deemed to be filed when notice of possible rejection is first given to the Committee.

Any handler who fails to conform to the requirements of paragraph (h) of the "Incoming Quality Regulation—1979 Crop Peanuts" shall be ineligible for any indemnification payments until such condition or conditions are corrected to the satisfaction of the Committee. Also any handler who fails to cause positive lot identification on any lot of peanuts to accurately reflect the crop year in which such peanuts were produced, pursuant to paragraph (d) of the Outgoing Quality Regulation, shall be ineligible for any indemnification payments until such violation is corrected to the satisfaction of the Committee.

Categories eligible for indemnification are as follows:

Cleaned Inshell Peanuts—

(1) U.S. Jumbos
(2) U.S. Fancy Handpicks
(3) Valencia—Roasting Stock [1]

[1] Inshell peanuts with not more than 25 percent having shells damaged by discoloration, which are cracked or broken, or both.

U.S. Grade Shelled Peanuts—

(1) U.S. No. 1
(2) U.S. Splits
(3) U.S. Virginia Extra-Large
(4) U.S. Virginia Medium

Shelled Peanuts With Splits—

(1) Runners with splits which do not contain more than 15 percent splits or 3 percent whole kernels which will pass through a 15/64 x ¾ slot screen.

(2) Spanish with splits which do not contain more than 15 percent splits or 2 percent whole kernels which will pass through a 15/64 x ¾ slot screen.

(3) Virginias with splits which do not contain more than 15 percent splits or 3 percent whole kernels which will pass through a 15/64 x 1 slot screen.

However, peanuts in any of the above categories shall not be eligible for indemnification if such peanuts: (1) were milled from seed peanut residuals as referred to in the last sentence of paragraph (e) of the Incoming Quality Regulation and paragraph (i) of the Outgoing Quality Regulation for 1979 Crop Peanuts; (2) failed the Outgoing Quality Regulation for 1979 Crop Peanuts due to excessive damage and minor defects and such peanuts were subsequently blanched or remove such excess damage and minor defects pursuant to paragraph (h) of such regulation; (3) when shipped for human consumption outlets contained more than a total of 1.25 percent unshelled peanuts and damaged kernels or a total of 2.00 percent unshelled peanuts, damaged kernels and minor defects; (4) were received or acquired from another handler pursuant to paragraph (i) of the Incoming Quality Regulation and were milled to meet requirements of the Outgoing Quality Regulation pursuant to paragraph (h) of such regulation.

For the purpose of paying indemnification, beginning August 1, 1979, the domestic market price for each category of peanuts shall be determined by averaging the price listed in the Peanut Market News, per category, each week on an accumulative season-to-date basis. Such weekly price calculations shall extend to March 31, 1980. After March 31, the season average price per category shall be applied during the remainder of the crop year.

The indemnification value for each category of peanuts eligible for indemnification shall be the domestic market price, less two cents per pound (on the pounds indemnified) except that the minimum indemnification value on all indemnifiable categories shall be 30 cents per pound.

The grade categories to which the indemnification values shall be applied are as follows:

Runners*	Virginias	Spanish
Jumbo	U.S. Extra Large	U.S. No. 1 (or larger)
Medium	U.S. Medium	Spanish with Splits
Select	U.S. No. 1	U.S. Splits
No. 1 [—18+16 screens]	Virginias with Splits	
Mill run with or without Splits	U.S. Splits	
U.S. Splits		

*Southeastern Peanut Association grades.

Forest Service

Forest Land and Resource Management Plan; Mt. Baker-Snoqualmie National Forest Whatcom, Skagit, Snohomish, King, and Pierce Counties, Washington; Intent To Prepare an Environmental Impact Statement

Pursuant to the National Environmental Policy Act of 1969 and the Forest and Rangeland Renewable Resource Planning Act of 1974, as amended by the National Forest Management Act of 1976, the Forest Service, Department of Agriculture, will prepare an Environmental Impact Statement for a Forest Land and Resource Management Plan for the Mt. Baker-Snoqualmie National Forest.

The Forest Plan will be prepared according to regulations being promulgated by the Secretary of Agriculture. The regulations will implement Section 6 of the National Forest Management Act of 1976.

A completed Land Use Plan for the Alpine Lakes Management Unit and subsequent legislation established the Alpine Lakes Wilderness and Intended Wilderness in July 1976. A planning

team is now in the process of developing a Wilderness Management Plan for the Alpine Lakes Wilderness and Intended Wildernesses and specific management direction for the nonwilderness lands. A Final Environmental Statement is planned to be filed with the EPA in June 1980 with implementation by September 1980. A Draft Environmental Statement on the Naches-Tieton-White River Land Management Plan was filed with the EPA in August 1977. This Plan will be carried through to completion as part of the Forest Plan.

The Forest Plan will replace all previous Plans and provide direction for all lands on the Mt. Baker-Snoqualmie National Forest.

The Forest Plan will be coordinated with local, county, State and other Federal agencies. Public involvement will be encouraged and sought throughout the planning process. Currently, the following public workshops are scheduled to help the Forest identify issues, concerns, and opportunities:

June 25, 1979, 7:00 p.m., Holiday Inn, 714 Lakeway Drive, Bellingham, Washington.
June 26, 1979, 7:00 p.m., Sherwood Inn, 400 N.E. 45th, Seattle, Washington.
June 27, 1979, 7:00 p.m., Town & Country Inn, 2009 Riverside Drive, Mt. Vernon, Washington.
June 28, 1979, 7:00 p.m., Holiday Inn, 3518, Pacific Hwy E., Tacoma, Washington.

Alternatives will be displayed in an Environmental Impact Statement and will include, at the minimum: (1) A no-action alternatives; (2) one or more alternatives which will result in eliminating all backlogs of needed treatment for the restoration of renewable resources; (3) an alternative which approximates the level of goods and services assigned by the Regional Plan; and (4) one or more alternatives formulated to resolve the major public issues or concerns.

R. E. Worthington, Regional Forester, Pacific Northwest Region, is the responsible official. Questions about the proposed action and Environmental Impact Statement should be directed to Don Culver, Land Management Specialist, Mt. Baker-Snoqualmie National Forest, (Phone 206-442-4888).

A Draft Environmental Impact Statement on the Forest Plan is scheduled to be filed by December 1981. The Final Environmental Impact Statement will be filed by December 1982.

Comments on this Notice of Intent for the Forest Plan should be sent to Don R. Campbell, Forest Supervisor, Mt. Baker-Snoqualmie National Forest, 1601 Second Avenue Building, Seattle, Washington 98101.

Frank J. Koppeky,
Acting Regional Forester.
June 6, 1979.

CIVIL AERONAUTICS BOARD

[Docket 33712]

Tiger International-Seaboard World Airlines, Inc. Acquisition Case; Postponement of Hearing and Date for Submission of Rebuttal Exhibits

Notice is hereby given, pursuant to the provisions of the Federal Aviation Act of 1958, as amended, that the hearing in the above-entitled matter originally scheduled to begin on June 19, 1979 (44 FR 28959, May 8, 1979), will now be held beginning on July 9, 1979, at 9:30 a.m. (local time) in Room 1003, Hearing Room D, 1875 Connecticut Avenue, N.W., Washington, D.C. 20428.

The date for submission of rebuttal exhibits is accordingly extended until June 25, 1979.

Dated at Washington, D.C., June 8, 1979.

John J. Mathieu,
Administrative Law Judge.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket No. 6-79]

Port of Portland, Oreg.; Application for a Foreign-Trade Subzone at the Beall Pipe and Tank Corporation Facility in Portland

Notice is hereby given that an application has been submitted to the Foreign-Trade Zones Board (the Board) by the Port of Portland (the Port), an Oregon public corporation and grantee of Foreign-Trade Zone No. 45, requesting a grant of authority to establish a special-purpose subzone at the Beall Pipe and Tank Corporation (Beall) facility, within the Columbia River Customs port of entry, some 4 miles south of the Port's recently approved general-purpose zone. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act of 1934, as amended (19 U.S.C. 81) and the regulations of the Board (15 CFR Part 400). It was formally filed on May 30, 1979. The Port is authorized to make the application under § 307.850 of the Oregon Revised Statutes.

The proposal calls for the establishment of a special-purpose foreign-trade subzone, under the sponsorship of the Port, at Beall's steel pipe manufacturing facility at 12005 North Burgard Road, in Portland. The subzone would encompass the firm's entire plant facility, including two straight-seam and four spiral weld mills, on a 27-acre site near Terminal 4 on the Willamette River in northwest Portland.

The applicant indicates that the reason for requesting subzone status is to make the company, a subsidiary of the L. B. Foster Co., more competitive with foreign pipe manufacturers, allowing them to enter the export market and create additional employment at their Portland plant. Beall currently imports foreign coiled steel it states is of a thickness or quality unavailable in the western United States. Under subzone status, the firm intends to import foreign coiled steel of a thickness of .125 to .156 inches for the manufacture of pipe with a ten or more inch diameter, a product it states is currently unavailable from major West Coast pipe mills and presently being imported from foreign suppliers. Subzone procedures would provide the company with Customs cost savings that would help them in bidding on overseas projects. It expects a resulting increase in production initially calling for an additional 30 jobs at its plant.

In accordance with the Board's regulations, an Examiners Committee has been appointed to investigate the application and report thereon to the Board. The committee consists of Hugh J. Dolan (Chairman), Office of the Secretary, U.S. Department of Commerce, Washington, D.C. 20230; David J. Radcliffe, Assistant District Director for Inspection and Control, U.S. Customs Service, Federal Bldg., Room 193, 511 Northwest Broadway, Portland, Oregon 97209; and Colonel Terence J. Connell, District Engineer, U.S. Army Engineer District Portland, P.O. Box 2946, Portland, Oregon 97204.

Comments concerning the proposed subzone are invited in writing from interested persons and organizations. Comments may address § 400.807 of the Board's regulations, which gives the Board authority to exclude from zones operations detrimental to the public interest. This section would apply to cases in which zone activity is claimed to have an adverse impact on domestic industry. Comments should be addressed to the Board's Executive Secretary at the address below and be postmarked on or before July 6, 1979.

A copy of the Port's application is available for public inspection at each of the following locations:

Office of the Director, U.S. Dept. of Commerce District Office, 1220 S. W. 3rd Avenue, Room 618, Portland, Oregon 97204.
Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Dept. of Commerce, Room 6628–B, 14th and E Streets NW., Washington, D.C. 20230.

Dated: May 30, 1979.

John J. Da Ponte, Jr.,
Executive Secretary, Foreign-Trade Zones Board.

BILLING CODE 3510-25-M

Maritime Administration

[Docket No. S-642]

Aeron Marine Shipping Co., et al.; Application

In the matter of Aeron Marine Shipping Company, Aries Marine Shipping Company, Aquarius Marine Company, Atlas Marine Company, American Shipping, Inc., Pacific Shipping, Inc., and Worth Oil Transport Company.

The foregoing companies (herein referred to as the Berger Group) are holders of long-term operating-differential subsidy contracts. By letter of June 1, 1979, attorneys for the Berger Group advised that Leo V. Berger and Peter Constas, principals in each company of the Berger Group, and Aeron Marine Shipping Company, will form with other companies and individuals an affiliated limited partnership to be named Ariadne Company. Ariadne Company will operate a products tanker of 39,700 DWT in the U.S. coastwise and intercoastal trade, among other trades. A construction contract for the tanker has been entered into and delivery of the vessel is anticipated in 1981.

In view of the foregoing, the companies of the Berger Group request written permission of the Maritime Administration under section 805(a) of the Merchant Marine Act, 1936, as amended, for Ariadne Company to operate the above-described tanker in the domestic trade.

Any person, firm, or corporation having any interest (within the meaning of section 805(a)) in such application and desiring to be heard on issues pertinent to section 805(a) and desiring to submit comments or views concerning the application must, by close of business on June 22, 1979 file same with the Secretary, Maritime Administration, in writing, in triplicate, together with petition for leave to intervene which shall state clearly and concisely the grounds of interest, and the alleged facts relied on for relief.

If no petitions for leave to intervene are received within the specified time or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing will be held, the purpose of which will be to receive evidence under section 805(a) relative to whether the proposed operations (a) could result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or intercoastal service, or (b) would be prejudicial to the objects and policy of the Act relative to domestic trade operations.

(Catalog of Federal Domestic Assistance Program No. 11.504 Operating-Differential Subsidies (ODS))

By Order of the Assistant Secretary for Maritime Affairs.

Dated: June 8, 1979.

James S. Dawson, Jr.,
Secretary.

BILLING CODE 3510-15-M

Availability of Standard Specifications for Merchant Ship Construction

The Maritime Administration announces the publication of the latest edition of its Standard Specifications under the title, "Standard Specifications for Merchant Ship Construction", dated January 1979.

This document supersedes the previous issue dated December 1972. It has been updated to reflect changes in regulations, materials and technology that have affected the shipbuilding industry. It now shows all units of measurement in both the SI-Metric and English systems as a first step in the eventual transition to the SI-Metric system by the U.S. maritime industry.

The purpose of the Maritime Administration Standard Specifications is to provide guidance to the maritime industry in the preparation of detail ship specifications, especially where Construction-Differential Subsidy is involved. They are complete in all aspects of required contract work and embody the following pertinent features:

—Establish levels of quality as a bench mark for Construction-Differential Subsidy.

—Include standard text to reflect legal aspects of contract work.

—Indicate measures of standardization to encourage mass production techniques.

—Introduce the SI-Metric system of measurement to the U.S. shipbuilding industry.

It is intended to further update the Maritime Administration Standard Specifications periodically to reflect continuing technological developments and pertinent results of research and development efforts.

Copies of these latest Specifications are available from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22161. (Refer to Publication No. PB 290400). Purchase price is $19.00 per copy ($38.00 to a foreign address).

Dated: June 8, 1979.

By Order of the Maritime Subsidy Board/ Maritime Administration.

James S. Dawson, Jr.,
Secretary.

National Bureau of Standards

National Conference on Weights and Measures; Meeting

Notice is hereby given that the 64th annual meeting of the National Conference on Weights and Measures will be held on July 22–27, 1979, at the Red Lion Motor Inn in Portland, Oregon.

The National Conference on Weights and Measures is an organization of weights and measures enforcement officials of the States, counties, and cities of the United States. The annual meeting of the Conference brings together the enforcement officials, other government officials, and representatives of business, industry, trade associations, and consumer organizations for the purpose of hearing and discussing subjects that relate to the fields of weights and measures technology and administration.

Pursuant to authority in its Organic Act (15 U.S.C. 272(5)), the National Bureau of Standards acts as a sponsor of the National Conference on Weights and Measures in order to promote uniformity among the States in the complex of laws, regulations, methods, and testing equipment that comprises regulatory control by the States of commercial weighing and measuring.

The public is invited to attend. A registration fee of $30 per person has been established by the Conference Executive Committee to pay for

expenses of the meeting. Additional information concerning the Conference program and arrangements may be obtained from Mr. Harold F. Wollin, Executive Secretary, National Conference on Weights and Measures, National Bureau of Standards, Washington, DC 20234; telephone (301) 921–3677.

Dated: June 8, 1979.

Ernest Ambler,

Director.

BILLING CODE 3510-13-M

National Oceanic and Atmospheric Administration

North Pacific Fishery Management Council and Scientific and Statistical Committee and Advisory Panel; Amended Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

SUMMARY: The North Pacific Fishery Management Council, established by Section 302 of the Fishery Conservation and Management Act of 1976 (Pub. L. 94–265), will conduct meetings on June 28 and 29, 1979. Two additional agenda items to be discussed are: (1) Partial disapproval of Council's FMP for the High Seas Salmon Fishery off the Coast of Alaska East of 175° Longitude. Action needed to replace the ban on hand trolling in the Fisheries Conservation Zone, and (2) First consideration of amendment to FMP's for Gulf of Alaska Groundfish Fishery and Tanner Crab off Alaska to extend provisions through 1980.

FOR FURTHER INFORMATION CONTACT: North Pacific Fishery Management Council, P.O. Box 3136DT, Anchorage, Alaska 99510, Telephone: (907) 274–4563.

Dated: June 8, 1979.

Jack W. Gehringer,

Deputy Assistant Administrator for Fisheries.

BILLING CODE 3510-22-M

DEPARTMENT OF DEFENSE

Department of the Army

Installation Environmental Impact Statement; Hawaii; Filing of Environmental Impact Statement

In compliance with the National Environmental Policy Act of 1969, the Army, on June 11, 1979 provided the Environmental Protection Agency a draft Environmental Impact Statement (EIS) concerning the ongoing missions at 35 separate Army installations located in the State of Hawaii. The alternatives of relocating the 25th Infantry Division from the Island of Oahu to the Island of Hawaii, eliminating live ordinance firing on Oahu, transferring all training to the Pohakuloa Training Area on the Island of Hawaii, and closing Army installations and relocating their missions are also analyzed.

Copies of the statement have been forwarded to concerned Federal, State, local and private agencies. Interested organizations or individuals may obtain copies from the Commander, U.S. Army Support Command, Hawaii, ATTN: Director of Engineering and Housing, Fort Shafter, Hawaii 96858.

In the Washington area, inspection copies may be seen, during normal duty hours, in the Environmental Office, Office of Assistant Chief of Engineers, Room 1E676, Pentagon, Washington, D.C. 20310, telephone: (202) 694–3434.

Bruce A. Hildebrand,

Deputy for Environment, Safety and Occupational Health OASA (IL&FM).

BILLING CODE 3710-08-M

Corps of Engineers

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for a Proposed Channel Maintenance Project at Ogdensburg Harbor, N.Y., St. Lawrence County, N.Y.

AGENCY: U.S. Army Corps of Engineers, Buffalo District, DOD.

ACTION: Notice of Intent to Prepare a Draft Environmental Impact Statement (DEIS).

PROPOSED ACTION: Ogdensburg Harbor is a Federally maintained project with channel depths of 19 feet and a lower basin depth of 21 feet, which was authorized and completed in 1935 except for a hard shoal area. Since then, the size of cargo vessels has increased in size requiring deeper channels to accommodate these larger ships. Currently, the accepted depth in the St. Lawrence Seaway is 27 feet. Therefore, the purpose of this study is to determine the feasibility of deepening the existing Federal channels, hard shoal area, and other non-Federal channels.

Alternatives Considered: a. The following alternatives have been considered to date.

(1) No action.—A no action alternative indicates no Corps participation in any improvements to the harbor.

(2) Removal of the Hard Shoal Area.—The authorized project depth in the lower basin is 21 feet, except for a hard shoal area in the southwest corner of the lower basin which has depths of from 18 to 21 feet. Plan 2 would dredge this area to the authorized depth of 21 feet. Removing the hard shoal area would benefit the Ogdensburg Bridge and Port Authority (OB&PA) by allowing existing bulk salt vessels to enter the lower basin with 18½-foot drafts for unloading and storage.

(3) Dredge Lower Basin to Seaway Depth.—This plan would involve dredging the lower basin area to 27 feet. This plan would give the OB&PA additional berthing space at their dock and provide unlimited access for seaway depth vessels along the lower basin shoreline.

(4) Dredge Lower Basin and Dike Hard Shoal Area.—The hard shoal area would be diked and the rest of the lower basin would be dredged to 27 feet. The dredged material would be dumped into a diked area.

(5) Dredge City Front Channel to 25 feet.—This plan would involve dredging the city front from 19 feet to 25 feet from the west end of the Augsbury Dock to the Port Authority 27-foot depth and widen the OB&PA channel from 250 feet to 350 feet.

(6) Dredge City Front Channel to 27 Feet.—This plan would involve dredging the city front channel from 19 feet to 27 feet actual depth. This plan would allow most of the petroleum tankers to dock plus deeper draft vessels carrying salt.

(7) Federal Maintenance of Seaway Depth at OB&PA.—The authorized project depth at the OB&PA channel area is 19 feet. In 1970, with the aid of New York State and the Economic Development Administration, the Port Authority improved their port facilities and dredged the 19-foot Federal channel to 27 feet from their dock to the main navigation channel in the St. Lawrence River. This plan would involve incorporation of this 27-foot depth into the Federal maintenance program.

(8) Extend OB&PS Seaway Depth Around Dock.—This plan would also involve dredging a 27-foot deep berthing channel, about 200 feet wide, along the north and east sides of the OB&PA dock. The hard shoal area would be diked as necessary to contain the dredged material.

(9) Extend OB&PA Channel 1,000 Feet Southerly.—This plan would involve extending OB&PA's 27-foot deep channel 1,000 feet southerly along the city front channel. A diked disposal area would be constructed in the hard shoal

area of the lower basin to contain the dredged material.

Public Involvement: A Public Meeting was held by the Corps in May 1976 to initiate the study and find who the study participants would be and what their interests are. Twenty-two persons were in attendance representing the following interests:

The Ogdensburg Bridge and Port Authority (OB&PA).
Local Longshoremen's Union.
Augsbury Corporation.
Black River-St. Lawrence Economic Development Commission.
St. Lawrence Chamber of Commerce.
Sea Grant Institute.
City of Ogdensburg.
Corps of Engineers.

The OB&PA is the primary proponent for the harbor improvements, as is the Augsbury Corporation. The longshoremen are interested in any improvements to the harbor that will attract more trade, hence, more job security. Because St. Lawrence County, of which Ogdensburg is a part, is an economically depressed area, the Black River-St. Lawrence Economic Development Commission, the St. Lawrence Chamber of Commerce, and the city of Ogdensburg have a keen interest in any improvements in the area that may give an uplift to the economy.

a. Meetings and Representatives—Since the inception of this study, numerous small meetings have been held to obtain information. The organizations and interested parties that participated in the meetings were selected on the basis of their interest, involvement and relation to the study.

b. Issues—Significant issues to be analyzed in the DEIS will include a determination of the extent, in degree and kind, to which the selected plan and any reasonable alternatives might positively or negatively impact upon the human and natural environments, to include fish and wildlife habitat areas, plants, water quality, aesthetic quality of the area, cultural resources, and the equitable distribution and stability of income.

c. Scoping Meeting—Due to extensive coordination and planning with other governmental agencies and concerned public already conducted, a scoping meeting will not be held.

d. Availability—This Draft Environmental Impact Statement will be made available to the public on or about 30 June 1979.

ADDRESS: Questions about the proposed action and the DEIS can be answered by: Philip E. Berkeley, U.S. Army Engineer District, Buffalo, 1776 Niagara Street, Buffalo, NY 14207 716-876-5454.

Dated: June 6, 1979.

Thomas R. Rheaume,

LTC, Corps of Engineers, Deputy District Engineer.

BILLING CODE 3710-GF-M

Intent To Prepare a Revised Draft Environmental Statement (RDES) for a Recreation Complex on the Snyder and Winnebago Oxbow Lakes, Woodbury, County, Iowa

AGENCY: U.S. Army Corps of Engineers, Omaha District.

ACTION: Notice of Intent to Prepare a RDES.

SUMMARY: 1. The proposed recreation complex is located along and adjacent to the Missouri River between river miles 709.0 and 716.5 (1960 mileage). Two oxbow lakes, Snyder and Winnebago Lakes, which are abandoned Missouri River channels resulting from navigation channel construction, will be developed into a public recreation complex. The proposed recreation complex will feature typical water oriented types of recreation including fishing, power boating, water skiing, and swimming. Other nonwater types of recreation will include picnicking, camping, outdoor games; hunting, bird watching, nature study and sightseeing. The local sponsor for the project is the State of Iowa.

2. Reasonable alternatives include varying levels of recreational development and no action.

3. Any agency, organization, or individual desiring to participate in the RDES process is encouraged to do so by contacting the individual identified later in this notice. Public involvement to date has been limited to discussions with affected public bodies. No public meetings will be held prior to the filing of the RDES. A public meeting may, however, be scheduled subsequent to publication of the RDES if public interest indicates such a need. There are no significant issues which have been identified. The project is also subject to the Historic Preservation Act; the Endangered Species Act; the Fish and Wildlife Coordination Act; Executive Order 11988 on Flood Plains; and Executive Order 11990 on Wetlands.

4. There will be no scoping meeting.

5. The RDES should be available for public review in July 1979.

ADDRESS: Questions about the proposed action and RDES can be answered by: Richard Gorton; Chief, Environmental Analysis Branch; Omaha District, CE; 6014 United States Post Office and Courthouse; Omaha, Nebraska 68102.

Dated: June 8, 1979.

John E. Veleknadsky,

Chief, Planning Division, Omaha, District, CE.

[FR Doc. 79-18648 Filed 6-13-79; 8:45 am]

BILLING CODE 3710-GW-M

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for the Sims Bayou, Texas Civil Works Flood Protection Project

AGENCY: Galveston District, U.S. Army Corps of Engineers, DOD.

ACTION: Notice of Intent to Prepare a DEIS.

SUMMARY: 1. The proposed action to be addressed in the DEIS is flood protection for Sims Bayou in southeast Texas. The proposed project would provide improved flood protection to the watershed area including a portion of the City of Houston.

2. Alternatives to be considered in the DEIS include structural and nonstructural measures with two or more structural flood damage reduction plans, and no action.

3.a. Coordination of the project has included a public meeting, local public workshop sessions, and a preliminary evaluation by the U.S. Fish and Wildlife Service. The initial public meeting was held in Houston, Texas on 1 March 1975, to obtain public views and preferences. Alternative plans will be developed in accordance with Corps of Engineers' regulations, considering the views expressed by the public and agencies of the local, State, and Federal governments. Alternative solutions will be presented at another public meeting. The selected plan of improvement will be coordinated with all concerned prior to completion of a Feasibility Report.

b. Some important environmental considerations to be analyzed as a result of past coordination and participation include: (1) Archeological survey, (2) erosion control.

c. Coordination and consultation will continue with appropriate local, State, and Federal agencies and the interested public.

d. Other environmental consultation and review will be conducted in accordance with various laws and regulations.

4. A public meeting specifically to determine the scope of the DEIS is not planned at this time. However, the scoping process will be accomplished in conjunction with future public meetings and workshops and through all previous

and future input to studies for the project.

5. The DEIS is scheduled to be available to the public in October 1980.

ADDRESS: Questions about the proposed action and DEIS can be answered by Mr. C. R. Harbaugh, Chief, Environmental Resources Branch, Galveston District, Corps of Engineers, P.O. Box 1229, Galveston, Texas 77553, (713) 763–1211, extension 492.

Dated: June 7, 1979.

Hinton Y. Crockett, Jr.,

Major, Corps of Engineers Acting District Engineer.

[FR Doc. 79-18615 Filed 6-13-79; 8:45 am]

BILLING CODE 3710-GX-M

Intent To Prepare Draft Environmental Impact Statement for a Proposed Flood Control Project, Haikey Creek, Tulsa County, Okla.

AGENCY: U.S. Army Corps of Engineers, DOD Tulsa District.

ACTION: Notice of Intent to Prepare a Draft Environment Impact Statement (DEIS).

SUMMARY: The primary purpose for this project is to provide standard project flood protection to 39 single family residents in the Haikey Creek Watershed, Tulsa County, Oklahoma.

2. Reasonable Alternatives. The alternatives evaluated include: no action, flood plain evacuation, flood-proofing existing structures, upstream flood retarding dams, levees plus flowage easements, levee plus evacuation, levee plus channel, channel modifications, diversion and combination levees, channel and flowage assesments.

3. Scoping Process. a. Public Involvement. A comprehensive public involvement program was developed as a means of disseminating information and soliciting public involvement. A variety of techniques including formal public meetings, public hearings, public workshops, advisory committees and periodic statements to the local news media were employed to involve organizations, Federal, State, and local agencies, citizen committees, and the interested public in the planning studies.

b. Significant Issues Requiring Indepth Analysis. None.

c. Assisgnments. U.S. Fish and Wildlife Service is preparing a Coordination Act Report.

d. Environmental Review and Consultation Requirements. The draft statement will be circulated for review, and all comments will be incorporated into the final environmental statement.

4. Scoping meeting will not be held.

5. Estimated date when the DEIS will be available.

ADDRESS: Mr. Buell O. Atkins, Chief, Environmental Resources Branch, U.S Army Corps of Engineers, Tulsa District, PO Box 61, Tulsa OK 74121, (918) 581–7857.

Dated: June 6, 1979.

Richard W. Mattes,

Acting District Engineer.

BILLING CODE 3710-39-M

DEPARTMENT OF ENERGY

National Petroleum Council, Task Group of the Committee on Unconventional Gas Sources; Meeting

Notice is hereby given that a task group of the Committee on Unconventional Gas Sources will meet in June 1979. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Committee on Unconventional Gas Sources will analyze the potential constraints in these areas which may inhibit future production and will report its findings to the National Petroleum Council. Its analysis and findings will be based on information and data to be gathered by the various task groups. The task group scheduling a meeting is the Devonian Shale Task Group. The time, location and agenda of the meeting follows:

The third meeting of the Devonian Shale Task Group will be held on Thursday, June 21, 1979, starting at 9:00 a.m., Conference Room, Continental Inn, 801 New Circle Road, N.W., Lexington, Kentucky.

The tentative agenda for the meeting follows:

1. Introductory remarks by Chairman and Government Cochairman.
2. Discussion of the report outline of the Devonian Shale Task Group.
3. Review of preliminary results of the Devonian Shale Task Group.
4. Review of the Devonian Shale Task Group's assignments.
5. Discussion of any other metters pertinent to the overall assignment of the Devonian Shale Task Group.

The meeting is open to the public. The chairman of the task group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the task group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Lucio A. D'Andrea, Office of Resource Applications, 202/633-8482, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room GA 152, DOE, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C. on June 7, 1979.

R. Dobie Langenkamp,

Deputy Assistant Secretary, Oil, Natural Gas and Shale Resources, Resource Applications.

June 7, 1979.

BILLING CODE 6450-01-M

Economic Regulatory Administration

Refiners Crude Oil Allocation Program; Supplemental Notice of Allocation Period of April 1, 1979, Through Sept. 30, 1979

The notice specified in 10 CFR 211.65(g) of the refiners' crude oil allocation (buy/sell) program for the allocation period of April 1, 1979, through September 30, 1979, was issued March 30, 1979 (44 FR 21062, April 9, 1979). Subsequent to the publication of this Notice, the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) assigned emergency allocations for the months of April, May, and June 1979, pursuant to 10 CFR 211.65(c)(2) to a number of refiner-buyers and issued supplemental buy/sell lists on April 11, 1979, (44 FR 24336, April 25, 1979) and May 16, 1979, (44 FR 29955, May 23, 1979). The ERA hereby issues a third supplemental buy/sell list for the allocation period of April 1, 1979, through September 30, 1979, which sets forth an emergency allocation for the months of June and July 1979, assigned pursuant to 10 CFR 211.65(c)(2), as amended on April 27, 1979, (44 FR 26060, May 4, 1979).

The supplemental buy/sell list for the allocation period April 1, 1979, through September 30, 1979, is set forth as an appendix to this notice. The list includes the name of the small refiner granted an emergency allocation for the months of June and July 1979 and its eligible refinery; the quantity of crude oil the refiner is eligible to purchase; the fixed percentage share for each refiner-seller; the quantity of crude oil that each

refiner-seller is obligated to offer for sale to refiner-buyers pursuant to the supplemental buy/sell notice for the April 1, 1979, through September 30, 1979, allocation period issued May 16, 1979; the new total sales obligation of each refiner-seller, which reflects each refiner-seller's obligation to sell to the refiner-buyer for the emergency allocation listed herein; and the total sales obligation for all refiner-sellers.

The allocation for the small refiner on the supplemental buy/sell list was determined in accordance with 10 CFR 211.65(c)(2). Sales obligations for refiner-sellers were determined in accordance with 10 CFR 211.65 (e) and (f).

The buy/sell list covers PAD Districts I through V, and amounts shown are in barrels of 42 gallons each, for the specified period. Pursuant to 10 CFR 211.65(f), each refiner-sellers shall offer for sale during an allocation period, directly or through exchanges to refiner-buyers, a quantity of crude oil equal to that refiner-seller's sales obligation plus any volume that the ERA directs the refiner-seller to sell pursuant to 10 CFR Section 21.65(j).

Pursuant to 10 CFR 211.65(h), each refiner-buyer and refiner-seller is required to report to ERA in writing or by telegram the details of each transaction under the buy/sell list within forty-eight hours of the completion of arrangements therefor. Each report must identify the refiner-seller, the refiner-buyer, the refineries to which the crude oil is to be delivered, the volumes of crude oil sold or purchased, and the period over which the delivery is expected to take place.

The procedures of 10 CFR 211.65(j) provide that if a sale is not agreed upon subsequent to the date of publication of this notice, a refiner-buyer that has not been able to negotiate a contract to purchase crude oil may request that the ERA direct one or more refiner-sellers to sell a suitable type of crude oil to such refiner-buyer. Such request must be received by the ERA no later than 20 days after the publication date of this supplemental buy/sell notice. Upon such request, the ERA may direct one or more refiner-sellers that have not completed their required sales to sell crude oil to the refiner-buyer.

In directing refiner-sellers to make such sales, ERA will consider the percentage of each refiner-seller's sales obligation for the allocation period that has been sold as reported pursuant to Section 211.65(h), as well as the refiner-seller or sellers that can best be expected to consummate a particular directed sale. If, in ERA's opinion, a valid directed sale request cannot reasonably be expected to be consummated by a refiner-seller that has not completed all or substantially all of its sales obligation for the allocation period, the ERA may issue one or more directed sales orders that would result in one or more refiner-sellers selling more than their published sales obligations for that allocation period. In such cases, the refiner-seller or sellers will receive a barrel-for-barrel reduction in their sales obligations for the next allocation period pursuant to 10 CFR 211.65(f)(3)(ii).

If the refiner-buyer declines to purchase the crude oil specified by ERA, the rights of that refiner-buyer to purchase that volume of crude oil are forfeited during this allocation period, provided that the refiner-seller or refiner-sellers have fully complied with the provision of 10 CFR 211.65.

Refiner-buyers making requests for directed sales must document their inability to purchase crude oil from refiner-sellers by supplying the following information to EPA:

(i) Name of the refiner-buyer and of the person authorized to act for the refiner-buyer in buy/sell program transactions.

(ii) Name and location of the refineries for which crude oil has been sought, the amount of crude oil sought for each refinery, and the technical specifications of crude oils that have historically been processed in each refinery.

(iii) Statement of any restrictions, limitations, or constraints on the refiner-buyer's purchases of crude oil, particularly concerning the manner or time of deliveries.

(iv) Names and locations of all refiner-sellers from which crude oil has been sought under the buy/sell notice, the refineries for which crude oil has been sought, and the volume and specifications of the crude oil sought from each refiner-seller.

(v) The response of each refiner-seller to which a request to purchase crude oil has been made, and the name and telephone number of the individual contacted at each such refiner-seller.

(vi) Such other pertinent information as ERA may request.

All reports and applications made under this notice should be addressed to: Chief, Crude Oil Allocation Branch, 20th Street Postal Station, P.O. Box 19028, Washington, D.C. 20036.

Copies of the decisions and orders assigning the emergency allocations listed herein, as well as the applications, may be obtained from: Economic Regulatory Administration, Public Information Office, 2000 M Street, N.W., Rm. B110, Washington, D.C. 20461 (202) 6344–2170.

The ERA Public Information Office also has available copies of pending applications for emergency allocations under the buy/sell program.

ERA requires each applicant for an emergency allocation to serve all refiner-sellers with a copy of its application. Comments on such application will be accepted by ERA if filed within eight days of service of the application.

This notice is issued pursuant to Subpart G of DOE's regulations governing its administrative procedures and sanctions, 10 CFR Part 205. Any person aggrieved hereby may file an appeal with DOE's Office of Hearings and Appeals in accordance with Subpart H of 10 CFR Part 205. Any such appeal shall be filed on or before July 16, 1979.

Issued in Washington, D.C. June 8, 1979.

Doris J. Dewton,

Acting Assistant Administrator, Fuels Regulation, Economic Regulatory Administration.

Appendix

The Buy/Sell list for the period April 1, 1979, through September 30, 1979, is hereby amended to reflect an emergency allocation for the months of June and July 1979, reductions in allocations previously issued and the resulting changes in sales obligations of refiner-sellers. The amended list sets forth the name of each refiner-seller, the volumes of crude oil that each such refiner-seller is required to offer for sale to refiner-buyers, emergency allocations for the months of June and July 1979, and reductions in allocations previously issued. The amended list does not reflect volumes sold by refiner-sellers for the April 1, 1979, through September 30, 1979, allocation period.

Crude Oil Allocation Program Sales Obligations for the Period Apr. 1, 1979–Sept. 30, 1979

Refiner-seller	Share*	Sales obligation as of May 16, 1979 (barrels)	New total (barrels)

Emergency Allocation for June and July 1979

Refiner	Refinery location	June 1979 allocation (barrels)	July 1979 allocation (barrels)
CRA, Inc	Coffeyville, Kans	542,880	498,932

REDUCTIONS IN ALLOCATIONS

ERA has been notified by three small refiners with June 1979 allocations (issued with the supplemental notice of May 16, 1979) that they have been able to purchase additional crude oil outside the Buy/Sell Program. This oil was not considered in determining these refiners' emergency allocations. Therefore, the June allocations for the three refiners will be reduced as follows:

Refiner	Original June allocation	Amended June allocation
National Cooperative Refinery Association	352,350	294,568
Southern Union Refining Company	114,330	0
Gulf States Oil and Refining Company	95,820	0

	(Barrels)
Total previously published allocations	22,431,369
Emergency allocation (June)	542,880
Emergency allocation (July)	498,932
Less:	
NCRA	117,782
Southern Union	114,330
Gulf States	95,820
	(327,932)
Total allocations	23,135,229

Action Taken on Consent Orders

AGENCY: Economic Regulatory Administration.

ACTION: Notice of Settlements.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives Notice that Consent Orders were entered into between the ERA and the firms listed below during the month of May 1979.

The Consent Orders represents a settlement between the DOE and the firms involving a sum of less than $500,000 in the aggregate, excluding any penalties and interest. For Consent Orders involving sums of $500,000 or more, Notice will be separately published in the **Federal Register**. These Consent Orders are concerned exclusively with payment of the settlement amounts to injured parties for overcharges made by the specified companies during the time periods indicated below, through direct refunds or rollbacks of prices.

For further information regarding this Consent Order, please contact James C. Easterday, District Manager of Enforcement, Southeast District, Economic Regulatory Administration, 1655 Peachtree Street, NE, Atlanta, Georgia 30309, telephone number (404) 881–2661.

Firm name and address	Settlement amount	Product	Period Covered	Recipients of settlement
Wholesale LP Gas, Inc., Columbus, MS 39701.	65,000.02	Propane	11/1/73–3/31/74	Lampton Love, Lotten Butane, Northeast Butane, Amory Butane, United Propane, Borden Butane, Mann Propane, Gulf States Ceramic, Baker Gas & Oil, Putnam Gas, Tree Temper, Bell Liquified Petroleum, Benske Corp., Southern Gas, Aligas Service, Hadley Butane, Coombs Gas, Nanabee Gas, Hinton Oil, Sartain Gas, Kerr-McGee Chemical, Alcoa, Covington Propane, Ackerman Butane
Herrington LP Gas Co., Olive Branch, MS 38654.	22,017.20	Propane	11/1/73–4/30/78	Mid-South Galvanizing, B. F. Goodrich, Holiday Inn University, Modern Plastics, Holiday Inn Airport, Keene Corporation, Uniggers Corp., Residential Customers, Farm Customers
Super Oil Co., Johnson City, TN 37601.	152,911.43	Gasoline, Middle Distillates	11/1/73–10/31/74	Large Volume Jobbers, Tennessee Transport Resellers, Va. Transport Resellers, Tankwagon Resellers, North Caroline Transport Resellers, Super Outlets—Full Service, Mack Hopson, Tankwagon Consumers, Transport Consumers, Tankwagon Reseller/Retailer
Masson Operating Co., Natchez, MS 39120.	82,109.27	Crude Oil	9/1/73–3/31/77	Escrowed to ERA direct and through Ashland Oil, Inc. for distribution in a just and equitable manner in accordance with applicable laws and regulations.

Issued in Atlanta, Georgia on the 4th day of June 1979.

James C. Easterday,
District Manager.

Approved as to Legal Form:

Action Taken on Consent Orders

AGENCY: Economic Regulatory Administration.

ACTION: Notice of Agreements.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives Notice that Consent Orders were entered into between the ERA and the firms listed below during the months of April and May 1979. The Consent Orders represent agreements between the DOE and the firms which involve a reduction of the selling prices for gasoline to be in compliance with the Federal Energy pricing regulations. These Consent Orders are concerned exclusively with the consenting firm's current compliance with the Mandatory Petroleum Allocation and Price Regulations and do not address the possible non-compliance with these regulations prior to the date of the audit. These Consent Orders require consenting firms to come into compliance with legal requirements by reducing selling prices to established lawful level for each grade of gasoline sold, to properly post maximum lawful selling prices and to properly maintain required records. All consenting firms are retailers of gasoline as defined in 10 CFR Section 212.31 of the Federal Energy guidelines.

For further information regarding these Consent Orders, please contact James C. Easterday, District Manager of Enforcement, 1655 Peachtree Street, NE, Atlanta, Georgia 30309, telephone number 404–881–2661.

BILLING CODE 6450-01-M

Century Oil Management, Inc.; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of action taken and opportunity for comment on Consent Order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department

of Energy (DOE) announces action taken to execute a Consent Order and provides an opportunity for public comment on the Consent Order and on potential claims against the refunds deposited in an escrow account established pursuant to the Consent Order.

EFFECTIVE DATE: May 29, 1979.

COMMENTS BY: July 16, 1979.

ADDRESS: Send comments to: Jack L. Wood, District Manager of Enforcement, 111 Pine Street, San Francisco, CA 94111.

FOR FURTHER INFORMATION CONTACT: Jack L. Wood, District Manager of Enforcement, 111 Pine Street, San Francisco, CA 94111, phone: (415) 556–7200.

SUPPLEMENTARY INFORMATION: On May 29, 1979, the Office of Enforcement of the ERA executed a Consent Order with Century Oil Management, Inc., (COM) of Santa Ana, California. Under 10 CFR 205.199J(b), a Consent Order which involves a sum of less than $500,000 in the aggregate, excluding penalties and interest, becomes effective upon its execution.

The Consent Order

COM, with its home office located in Santa Ana, California, is a firm engaged in the production and sale of crude oil, and is subject to the Mandatory Petroleum Price and Allocation Regulations at 10 CFR, Parts 210, 211, 212. To resolve certain civil actions which could be brought by the Office of Enforcement of the Economic Regulatory Administration as a result of its audit of COM, the Office of Enforcement, ERA, and COM entered into a Consent Order, the significant terms of which are as follows:

1. COM is the operator of the Judkins lease and Sentinal A Lease in Kern County, California.

2. COM produced 212,768 barrels of crude oil from the Judkins Lease during the period September 1, 1976 through April 30, 1978, which amount was sold to Coastal Independent Refining and Sebring Associates at exempt oil prices based upon certification of the lease as a stripper well property.

3. The DOE contends that the lease was not eligible for the stripper well exemption for any period prior to November 1, 1978 and that COM should not have received payments in excess of the lower and upper tier ceiling prices as prescribed by 10 CFR 212.73 and 212.74 during the period in question.

4. Payments received by COM from Coastal Independent Refining and Sebring Associates in excess of the applicable lower and upper tier ceiling price during the period September 1, 1976 through April 30, 1978 totaled $229,667.66 and $2,767.01, respectively.

5. COM produced approximately 26,105 barrels of crude oil from Sentinal A during the period January 1, 1976 through April 30, 1978 at upper tier prices based upon their BPCL certification of the lease.

6. The DOE contends that COM used an incorrect BPCL for the Sentinal A lease until May 1978 when the lease qualified for the stripper well exemption. Therefore, COM should not have received payments in excess of the lower tier ceiling price as prescribed by 10 CFR 212.73 during the period in question for the number of barrels stated in paragraph 5.

7. Payments received by COM in excess of the applicable lower tier ceiling price during January 1, 1976 through April 30, 1978 were from the following companies in the amounts shown: Witco Chemical—$2,196.55; San Joaquin Refining—$470.90; Coastal Independent Refining—$12,707.29; Century Resources Development—$2,579.90; and Hydrocarbons, Ltd.—$3,928.58.

8. COM, without admitting that it has violated any regulation or overcharged any customer, is willing to enter into the Consent Order and refund $324,315.89 plus interest at the rate set by DOE as a means of settling this dispute.

9. The provisions of 10 CFR 205.199J, including the publication of this Notice are applicable to the Consent Order.

II. Disposition of Refunded Overcharges

In this Consent Order, COM agreed to refund, in full settlement of any civil liability with respect to actions which might be brought by the Office of Enforcement, ERA, arising out of the transactions specified above, the sum of $324,315.89 plus interest in certified checks made payable to the United States Department of Energy. These funds will remain in a suitable account pending the determination of their proper disposition.

The DOE intends to distribute the refunded amount in a just and equitable manner in accordance with applicable laws and regulations. Accordingly, distribution of such refunded overcharges requires that only those "persons" (as defined at 10 CFR 205.2) who actually suffered a loss as a result of the transactions described in the Consent Order receive appropriate refunds. Because of the petroleum industry's complex marketing system, it is likely that overcharges have either been passed through as higher prices to subsequent purchasers of offset through devices such as the Old Oil Allocation (Entitlements) Program, 10 CFR 211.67. In fact, the adverse effects of the overcharges may have become so diffused that it is a practical impossibility to identify specific, adversely affected persons, in which case disposition of the refunds will be made in the general public interest by an appropriate means such as payment to the Treasury of the United States pursuant to 10 CFR 205.199I(a).

III. Submission of Written Comments.

A. *Potential Claimants:* Interested persons who believe that they have a claim to all or a portion of the refund amount should provide written notification of the claim to the ERA at this time. Proof of claims is not now being required. Written notification to the ERA at this time is requested primarily for the purpose of indentifying valid potential claims to the refund amount. After potential claims are identified, procedures for the making of proof of claims may be established. Failure by a person to provide written notification of a potential claim within the comment period for this Notice may result in the DOE irrevocably disbursing the funds to other claimants or to the general public interest.

5. *Other Comments.* The ERA invites interested persons to comment on the terms, conditions, or procedural aspects of this Consent Order.

You should send your comments or written notificaion of a claim to Jack L. Wood, District Manager of Enforcement, 111 Pine Street, San Francisco, California 94111. You may obtain a free copy of this Consent Order by writing to the same address or by calling 415–556–7200.

You should identify your comments or written notification of a claim on the outside of your envelope and on the documents you submit with the designation, "Comments on Century Oil Management, Inc. Consent Order." We will consider all comments we receive by 4:30 p.m., local time, on July 16, 1979. You should identify any information or data which, in your opinion, is confidential and submit it in accordance with the procedures in 10 CFR 205.9(f).

Issued in Los Angeles on the 5th day of June 1979.

Jack L. Wood,

District Manager of Enforcement.

BILLING CODE 6450-01-M

J. R. Cone; Proposed Remedial Order

Pursuant to 10 C.F.R. § 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of a Proposed Remedial Order which was issued to J. R. Cone, P.O. Box 871, Lubbock, Texas 79408. This Proposed Remedial Order charges J. R. Cone with pricing violations in the amount of $1,870,403.11, connected with the sale of crude oil at prices in excess of those permitted by 10 C.F.R. 212, Subpart D during calendar years 1973, 1974, 1975, 1976 and 1977.

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from Wayne I. Tucker, District Manager, Southwest District Enforcement, Department of Energy, Economic Regulatory Administration, P.O. Box 35228, Dallas, Texas 75235, or by calling (214) 749–7626. On or before June 29, 1979, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, 2000 M Street, N.W., Washington, D.C. 20461, in accordance with 10 C.F.R. § 205.193.

Issued in Dallas, Texas, on the 5th day of June, 1979.

Wayne I. Tucker,

District Manager, Southwest District Enforcement.

Henry Petroleum Corp.; Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of a Proposed Remedial Order which was issued to Henry Petroleum Corporation, 801 Petroleum Building, Midland, Texas 79701. This Proposed Remedial Order charges Henry Petroleum Corporation with the sale of crude oil at prices in excess of those permitted by 10 CFR 212 Subpart D in an amount of $138,056.41 during the period December 1, 1973 through May 31, 1979 in the states of Texas and New Mexico.

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from Wayne I. Tucker, District Manager, Southwest District Enforcement, Department of Energy, Economic Regulatory administration, P.O. Box 35228, Dallas, Texas 75235, or by calling (214) 749–7626. On or before June 29, 1979, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, 2000 M Street, N.W., Washington, D.C. 20461, in accordance with 10 CFR 205.193.

Issued in Dallas, Texas, on the 5th day of June, 1979.

BILLING CODE 6450-01-M

Shell Oil Co.; Issuance of Final Decision and Order

On April 10, 1979 we issued a Proposed Decision and Order to Shell Oil Company that would permit, pursuant to the provisions of 10 CFR 212.78, market prices for the incremental crude oil from the Olinda Fee Four Enhanced Recovery Project in the Yorba Linda Field of Orange County, California (44 FR 22506, April 16, 1979). No comments or objections have been received with respect to this Proposed Decision and Order. Accordingly, on June 7, 1979, we issued a Decision and Order that permits market prices for incremental crude oil from the Olinda Fee Four Project.

A copy of the Decision and Order is available in the Public Docket Room, Room B–120, 2000 M Street, N.W., Washington, D.C., between 1:00 p.m. and 5:00 p.m., Monday through Friday, and in the Department of Energy Reading Room, Room GA–152, James Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday.

Issued in Washington, D.C., June 8, 1979.

Doris J. Dewton,

Acting Assistant Administrator, Office of Fuels Regulation, Economic Regulatory Administration.

Office of Energy Research

University Coal Research Laboratories Program; Availability of Program Announcement for University Coal Research Laboratories Program

AGENCY: Department of Energy.

ACTION: Notice of availability of program announcement, reference No. ER 1006.

BACKGROUND: On May 1, 1979 the final rule covering the University Coal Research Laboratory Program of the Department of Energy was published in the **Federal Register**. This rule established the policies and procedures to be followed in the selection and designation of thirteen university coal research laboratories as authorized by Title VIII of Pub. L. 95–87, the Surface Mining Control and Reclamation Act of 1977, as amended by Section 604 of Pub. L. 95–617, the Public Utilities Regulatory Policies Act of 1978. The university coal research laboritories are established for the purpose of carrying out advanced research and training related to one or more problems of coal energy resources and conversion. At least one of the coal laboratories so designated must be located within each of the major coal provinces of the United States, including Alaska, but no more than one per State. Ten of the thirteen laboratories authorized must be located in states with abundant coal reserves and all the laboratories must be administered by institutions of higher education with experience and expertise in coal research and currently or potentially outstanding coal research programs with the capacity to establish and operate the coal laboratory.

The program announcement details the program objectives, eligibility requirements, the required content of the proposals, and the evaluation and selection criteria and procedures.

EFFECTIVE DATE: June 13, 1979.

POINT OF CONTACT: Copies of the program announcement are available by writing or telephoning: Mr. A. H. Frost, Jr., Contracting Officer, Contracts Division, Oak Ridge Operations Office, Post Office Box E, Oak Ridge, Tennessee 37830, 615–576–0642.

Dated at Washington, D.C., this 8th of June, 1979.

For the Department of Energy.

John M. Deutch,

Director of Energy Research.

BILLING CODE 6450-01-M

Western Area Power Administration

Parker-Davis Project; Proposed Power Rate Adjustment

AGENCY: Western Area Power Administration (WAPA), Department of Energy.

ACTION: Notice of Proposed Power Rate Adjustment for Parker-Davis Project.

SUMMARY: The Western Area Power Administration is proposing an increase in Parker-Davis Project wholesale firm power rates and transmission service charges in order that project costs will be repaid within the time periods established by law. Proposed increases are as follows:

1. *Wholesale Firm Power Rate.* Increase the monthly capacity charge from $1.39 to $1.82 per kilowatt and the energy charge from 3.5 to 4.15 mills per kilowatthour. At 60 percent monthly load factor, the proposed rate will increase the average annual composite yield from 6.67 to 8.3 mills per kilowatthour, a 24 percent increase. For contract violations involving unauthorized overruns, the rate will be 10 times the aforementioned basic rate which is the same multiplier now in effect.

2. *Transmission Service.*—a. *Parker-Davis Project Electric Service Contract Commitments.* For firm transmission service, increase the annual transmission service charge 28 percent, from $5.30 to $6.80 per kilowatt of contract obligation, to the extent and at the times permitted under the terms of individual contracts. For nonfirm transmission service increase rates from 1.0 to 1.3 mills per kilowatthour.

b. *Colorado River Storage Project Southern Division Transmission System Commitments.* Implement a seasonal transmission service charge of $3.67 per kilowatt of contract rate of delivery. No charge has been made previously for such service.

A brochure explaining in detail the need for the proposed rate will be distributed to Parker-Davis contractors and other interested parties. Public Information and Comment Forums will then be held in accordance with the current WAPA procedures for public participation in general rate adjustments.

During the Public Information and Comment Forums, the standards as set forth in Title I of the Public Utility Regulatory Policies Act of 1978 (PURPA) (16 U.S.C. 2601 *et seq.*), will be discussed. Subsequent to the discussion of the standards set forth in Title I of PURPA, the WAPA will consider and made a determination concerning whether or not it is appropriate to implement each such standard to carry out the purposes of Title I. The determination shall be in writing, based on the findings included in such determination and upon the evidence presented at the forums, and available to the public.

DATES: The proposed rate is needed commencing October 1, 1979. However, in view of the time needed to properly accomplish procedural aspects, the effective date of the proposed rate is now estimated to be March 1, 1980. A Public Information Forum, at which the WAPA will outline the reasons for the rate increase, will be held in Las Vegas, Nevada on July 9, 1979. A Public Comment Forum, at which the public may comment on the proposed rate increase, will be held in Phoenix, Arizona on August 31, 1979. Written comments concerning this proposed rate adjustment, if they are to be considered, shall be received by the addresses below by no later than September 18, 1979.

ADDRESSES: Interested persons wishing to submit written comments pertaining to the proposed rate adjustment on the Parker-Davis Project shall mail three (3) copies of such comments to each of the following:

Mr. Robert A. Olson, Area Manager, Western Area Power Administration, Boulder City Area Office, 1600 Nevada Highway, P.O. Box 200, Boulder City, NV 89005.

Mr. Robert L. McPhail, Administrator, Western Area Power Administration, Department of Energy, P.O. Box 3402, Golden, CO 80401.

Mr. George S. Melsaac, Assistant Secretary for Resource Applications, Office of Resource Applications, Department of Energy, 12th and Pennsylvania Ave., NW., Washington, DC 20461.

FOR FURTHER INFORMATION CONTACT: Mr. Robert A. Olson, Area Manager, Western Area Power Administration, Boulder City Area Office, 1600 Nevada Highway, P.O. Box 200, Boulder City, NV 89005, Telephone: (702) 293–8475.

SUPPLEMENTARY INFORMATION: Power rates for the Parker-Davis Project are established pursuant to the Department of Energy Organization Act of August 4, 1977 (42 U.S.C. 7101 *et seq.*); the Reclamation Act of 1902 (43 U.S.C. 372 *et seq.*), as amended and supplemented by subsequent enactments, particularly Section 9(c) of the Reclamation Project Act of 1939 (43 U.S.C. 485h(c)); and the Consolidated Parker Dam Power Project and Davis Dam Project Act (P.L. 373, May 28, 1954).

The Secretary of Energy delegated to the Assistant Secretary for Resource

Applications, by Delegation Order No. 0204–33, effective January 1, 1979 (43 F.R. 60636 (December 28, 1978)), the authority to develop, acting by and through the Administrator, and to confirm, approve, and place in effect on an interim basis, power and transmission rates; and to the Federal Energy Regulatory Commission, the authority to confirm and approve, on a final basis, or to disapprove such rates. This Order replaced Delegation Order No. 0204–4 (October 1, 1977), which had given certain authority to the Economic Regulatory Administration to confirm and approve or to establish rates.

Procedures for public participation in rate adjustments for power marketed by the WAPA were published in the Federal Register on March 23, 1978 (43 FR 12060 (March 23, 1978)). Subsequently, however, these procedures were amended on February 7, 1979, to accord with the Delegation Order No. 0204–33. These amendatory procedures titled, "Amendments to Procedures for Public Participation in General Adjustments in Rates for Power Marketed by the Western Area Power Administration," were published at 44 F.R. 7797 (February 7, 1979).

Issued at Golden, Colorado, June 7, 1979.

Robert L. McPhail,

Administrator.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL 1247–1]

Approval of Alternate Water Pollutant Testing Procedure; Total Manganese

In accordance with § 136.5, 40 CFR Part 136, "Guidelines for Test Procedures for the Analysis of Pollutants" (Federal Register, Vol. 41, No. 232, Wednesday, December 1, 1976, pp. 52780–52786), the Hach Chemical Company applied for approval of a new test procedure for the measurement of manganese. The new Hach procedure is a colorimetric procedure using prepackaged reagents based upon the same chemical reactions involved in the approved colorimetric procedure referenced in 40 CFR Part 136.

After a thorough review and evaluation by the Environmental Protection Agency (EPA) of the results of a comparability testing study, and other information submitted by the applicant in accordance with § 136.5, the EPA has designated the Hach procedure as an approved alternate procedure for nationwide use. All information submitted by the applicant is on file and available for public inspection to the extent consistent with 40 CFR Part 2 (EPA's regulation implementing the Freedom of Information Act), at the Environmental Monitoring and Support Laboratory, 26 West St. Clair Street, Cincinnati, Ohio 45268.

As an approved alternate test procedure, the Hach procedure is acceptable for use by any person required to use approved procedures under § 304(h) of the Clean Water Act Amendments of 1977. For such use, the procedure must be used in strict accordance with the method descriptions for manganese, periodate oxidation method, "Wastewater Analysis Handbook," Hach Chemical Company, p. 275 and p. 281.

For the analysis of total manganese, addition of acid and digestion as indicated in Footnote 15 of Federal Register, Vol. 41, No. 232, Wednesday, December 1, 1976, p. 52785, and § 4.1.4, p. 83 of "Methods for Chemical Analysis of Water and Waste," USEPA, 1974, is the required sample pretreatment. This approved alternate test procedure for total manganese is approved also for the determination of dissolved manganese after sample filtration through a 0.45 micron filter.

The approved method description and prepackaged reagents are available from the Director of Technical Information, Hach Chemical Company, P.O. Box 389, Loveland, Colorado 80537.

Dated: June 4, 1979.

Tom Murphy,

Acting Assistant Administrator for Research and Development.

BILLING CODE 6560-01-M

[FRL 1209–6]

Air Pollution Prevention and Control; Addition to the List of Categories of Stationary Sources

Section 111 of the Clean Air Act (42 U.S.C. 1857c–6) directs the Administrator of the Environmental Protection Agency to publish, and from time to time revise, a list of categories of stationary sources which he determines may contribute significantly to air pollution which causes or contributes to the endangerment of public health or welfare. Within 120 days after the inclusion of a category of stationary sources in such list, the Administrator is required to propose regulations establishing standards of performance for new and modified sources within such category. At present, standards of performance for 27 categories of sources have been promulgated.

The Administrator, after evaluating available information, has determined that glass manufacturing plants are an additional category of stationary sources which meets the above requirements. The basis for this determination is discussed in the preamble to the proposed regulation that is published elsewhere in this issue of the Federal Register. Evaluation of other stationary source categories is in progress, and the list will be revised from time to time as the Administrator deems appropriate. Glass manufacturing plants are included on the proposed NSPS priority list published August 31, 1978, in the Federal Register, required by section 111(f)(1). But since the priority list is not final, glass manufacturing plants are also being listed as indicated below at this time. Once the priority list is promulgated, all source categories on the promulgated list are considered listed under section 111(b)(1)(A), and separate listings such as this will not be made for those source categories. Accordingly, notice is given that the Administrator, pursuant to section 111(b)(1)(A) of the Act, and after consultation with appropriate advisory committees, experts, and Federal departments and agencies in accordance with section 117(f) of the Act, effective June 14, 1979, amends the list of categories of stationary sources to read as follows:

List of Categories of Stationary Sources and Corresponding Affected Facilities

* * * * *

Source Category

26. Glass manufacturing plants

* * * * *

Affected Facilities—Glass melting furnaces.

Proposed standards of performance applicable to the above source category appear elsewhere in this issue of the Federal Register.

Dated: May 22, 1979.

Douglas M. Costle,

Administrator.

BILLING CODE 6560-01-M

[PP 8G2052/T210; FRL 1247–5]

Pesticide Programs; Establishment of a Temporary Tolerance

American Cyanamid Co., PO Box 400, Princeton, NJ 08540, submitted a pesticide petition (PP 8G2052) to the

Environmental Protection Agency (EPA). This petition requested that a temporary tolerance be established for combined residues of the herbicide 2-chloro-*N*-(2,3-dimethylphenyl)-*N*-(1-methylethyl) acetamide and its metabolite *N*-isopropyl-2,3-dimethyloxanilic acid in or on the raw agricultural commodity corn grain at 0.15 part per million (ppm). This temporary tolerance will permit the marketing of the above raw agricultural commodity when treated in accordance with an experimental use permit (241-EUP-90) that has been issued under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136).

An evaluation of the scientific data reported and other material showed that the requested tolerance was adequate to cover residues resulting from the proposed experimental use, and it was determined that the temporary tolerance would protect the public health. The temporary tolerance has been established for the pesticide, therefore, with the following provisions:

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permit.

2. American Cyanamid Co. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance, and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This temporary tolerance expires May 22, 1980. Residues not in excess of 0.15 ppm remaining in or on corn grain after this expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary tolerance. This temporary tolerance may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicates such revocation is necessary to protect the public health. Inquiries concerning this notice may be directed to Ms. Willa Garner, Product Manager 23, Registration Division (TS–767), Office of Pesticide Programs, 401 M St., SW, Washington, DC 20460 (202/755–1397).

(Sec. 408(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(j)))

Dated: June 7, 1979.

Douglas D. Campt,

Director, Registration Division.

BILLING CODE 6560–01–M

[PF–134; FRL 1247–3]

Pesticide Programs; Filing of Food/Feed Additive Petitions

Pursuant to section 409(b)(5) of the Federal Food, Drug, and Cosmetic Act, the Environmental Protection Agency (EPA) gives notice that the following petitions have been submitted to the Agency for consideration.

FAP 9H5217. ICI Americas Inc., Concord Pike and New Murphy Road, Wilmington, DE 19897. Proposes that 21 CFR 561 be amended by permitting residues of the insecticide pirimiphos-methyl [*O*-[2-(diethyl-amino)-6-methyl-4-pyrimidinyl] *O,O*-dimethyl phosphorothioate] in or on the feed commodity wheat screenings at 50 parts per million (ppm). PM12–Mr. Frank Sanders, Rm. E–335, 202/426–2635.

FAP 9H5221. Environmental Chemicals, Inc., 703 N. Lake Shore Drive, Barrington, IL 60010. Proposes that 21 CFR 193 be amended by permitting the combined residues of the insecticide *O,O,O',O'*-tetramethyl *O,O'*-thiodi-p-phenylene phosphorothioate and its metabolite *O,O,O',O'*-tetramethyl *O,O'*-sulfinyldi-p-phenylene phosphorothioate on the commodity potable water at 0.1 ppm. PM16–Mr. William Miller, Rm. E–343, 202/426–9458.

Interested persons are invited to submit written comments on these petitions. Comments may be submitted, and inquiries directed, to the designated Product Manager (PM), Registration Division (TS–767), Office of Pesticide Programs, EPA, 401 M St., SW, Washington, DC 20460, or by telephone at the numbers cited. Written comments should bear a notation indicating the petition number to which the comments pertain. Comments may be made at any time while a petition is pending before the Agency. All written comments filed pursuant to this notice will be available for public inspection in the Product Manager's office from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Dated: June 7, 1979.

Douglas D. Campt,

Director, Registration Division.

BILLING CODE 6560–01–M

[OTS–630002; FRL 1247–2]

Premanufacture Notices; Status Report for May 1979

AGENCY: Environmental Protection Agency (EPA).

ACTION: Monthly Summary of Premanufacture Notices.

SUMMARY: Section 5(d)(3) of the Toxic Subetances Control Act (TSCA) requires that EPA publish a list in the Federal Register at the beginning of each month reporting the premanufacture notices (PMN's) pending before the Agency and PMN's for which the review period has expired since publication of the last monthly summary. This is the report for May, 1979.

DATE: Interested parties wishing to file written comments on a specific chemical substance should submit those comments no later than 30 days before the expiration of the applicable review period.

ADDRESS: Written comments should bear the PMN number of the particular substance and should be addressed to the Document Control Officer (TS793), Office of Toxic Substances, EPA, 401 M St., SW., Washington, DC 20460.

Nonconfidential portions of the PMN's and other documents in the public record are available for public inspection from 8:00 a.m. to 4:00 p.m., Monday through Friday (excluding holidays), in Room E–447 at the address above.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Smith, Premanufacture Review Division (TS–794), Office of Toxic Substances, EPA, Washington, DC 20460, 202/426–8816.

SUPPLEMENTARY INFORMATION: Under section 5 of TSCA, any person who intends to manufacture or import a new chemical substance for commercial purposes in the United States must submit a notice to EPA at least 90 days before he begins manufacture or import. A new chemical substance is any chemical substance that is not on the inventory of existing chemical substances compiled by EPA under Section 8(b) of TSCA. On May 15, 1979, the Agency announced the availability of this inventory in the Federal Register (44 FR 28558), and set June 1, 1979 as the publication date of this inventory. Therefore, the section 5 requirements are effective for all new chemical substances manufactured or imported for a commercial purpose after July 1, 1979. Once EPA receives a PMN, the Agency normally has 90 days to review it. However, under section 5(c) of TSCA, EPA may, for good cause, extend the review period for up to an additional 90 days. If EPA determines that such an extension is necessary, the Agency will publish the reasons for the extension in the Federal Register.

The monthly status report required under section 5(d)(3) will identify (a) each chemical substance for which a PMN has been received and for which the review period has not expired; (b) each chemical substance for which the premanufacture review has expired since publication of the last monthly summary; and (c) each "new" chemical substance which has been in the review process for less than 30 days. Eventually the report will also identify each chemical which has been added to the inventory since the last monthly report.

(Sec. 5 of the Toxic Substances Control Act (90 Stat. 2012; 15 U.S.C. 2604).)

Dated: June 7, 1979.

Steven D. Jellinek,

Assistant Administrator for Toxic Substances.

Premanufacture Notices; Status Report for May 1979

I. Premanufacture Notices Received During Month: None.

II. Premanufacture Notices Still Under Review at the Beginning of the Month for Which Period Has Not Expired:

PMN Number	Identity/Generic Name	FR Citation	Expiration Date
5AH00478-0002-1	Isobutyric acid carbomonocyclic ester	44 FR 22310 (4/19/79).	July 4, 1979
5AH00478-0002-2	Propiophenone, ring substitute-2-methyl	do	Do.

BILLING CODE 6560-01-M

EXECUTIVE OFFICE OF THE PRESIDENT

Office of Administration

Advisory Committee on Information Network Structure and Functions for the Executive Office of the President; Establishment

In accordance with the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I (1976)) and Office of Management and Budget Circular A-63 of March 1974, and after consultation with the General Services Administration, it has been determined that the establishment of the Advisory Committee on Information Network and Functions for the Executive Office of the President is in the public interest in connection with the performance of duties imposed on the Executive Office of the President by law.

The Committee will advise the Director, through the Director for Information Systems Facilities, on matters pertinent to the Office of Administration's plans for the establishment of a Communications Network for the Executive Office of the President.

The Committee will consist of not more than eleven members, with representation from both the public and private sector.

The Committee will function solely as an advisory body, and in compliance with the provisions of the Federal Advisory Committee Act. Its charter will be filed under the act with the appropriate congressional committees and the Library of Congress.

Interested persons are invited to submit comments regarding the establishment of the Advisory Committee on Information Network and Functions for the Executive Office of the President. Comments should be addressed to Director for Information Systems Facilities, Office of Administration, Executive Office of the President, Washington, D.C. 20500, telephone (202-395-3096).

Dated: May 7, 1979

Richard M. Hardin,

Director, Office of Administration.

BILLING CODE 3195-01-M

FEDERAL MARITIME COMMISSION

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for review and approval, if required, pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, NW., Room 10423; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before June 25, 1979. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Agreement No.: 10372.

Filing party: Russell T. Weil, Kirlin, Campbell & Keating, 1150 Connecticut Avenue, N.W., Suite 800, Washington, D.C. 20036.

Summary: Agreement No. 10372, between United States Lines, Inc. (USL) and Matson Navigation Company (Matson), is a Transportation and Transshipment Agreement whereby the parties, in response to Matson's intention to withdraw from direct service between California ports and the Territory of Guam, contemplate carriage under joint through rates and through bills of lading from California ports to Guam and from Honolulu, Hawaii to the Atlantic Coast of the U.S. and to Europe. Carriage between California ports and the Port of Honolulu will be performed by Matson and all other carriage will be performed by USL. Shipments destined to Guam will be transshipped at Honolulu and shipments destined to the Atlantic Coast of the U.S. and to Europe will be transshipped at California ports. The Agreement covers and is restricted to the transportation of (a) cargo moving in 40-foot non-refrigerated containers on chassis under through bills of lading issued by USL in the trade from (1) U.S. Pacific Coast ports to Guam, with transhipment at Honolulu, Hawaii; (2)

Honolulu, Hawaii, to U.S. Atlantic Coast ports, with transshipment at Oakland or Los Angeles, California, and (3) Honolulu, Hawaii, to ports in Europe with transshipment at Oakland or Los Angeles, California, and (b) empty 40-foot non-refrigerated containers on chassis from Honolulu to Oakland or Los Angeles, California. Matson shall concur in and shall comply with all the terms, conditions, rates, rules, regulations and transshipment routes of USL's Freight Tariff No. 64, FMC–F No. 64, Freight Tariff FMC–F No. 65, and Freight Tariff No. 1, FMC No. 37, except that when cargo is in Matson's possession pursuant to this agreement, it shall be subject to the provisions of Matson's Freight Tariff No. 16–D, FMC–F No. 171, and USL shall concur in the said Tariff No. 16–D. The through rates shall be apportioned as set forth in the agreement. The interchange of containers and chassis from USL to Matson and liability connected therewith shall be governed by the terms of FMC approved Agreement No. DC–66, as amended, except that no per diem shall be charged or paid on any equipment moved under this Agreement.

By Order of the Federal Maritime Commission.

Dated: June 11, 1979.

Francis C. Hurney,

Secretary.

FEDERAL RESERVE SYSTEM

Bank Holding Companies; Proposed De Novo Nonbank Activities

The bank holding companies listed in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to each appliction, interested persons may expersa their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration or resources, decreased on unfair competition, conflicts of interest, or unsound banking practices." Any comment on an appliction that requests a hearing must include a statement of the reasons a written presentation would not sufficie in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

Each application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for that application. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than July 9, 1979.

A. *Federal Reserve Bank of Chicago,* 230 South LaSalle Street, Chicago, Illinois 60690:

1. American Fletcher Corporation, Indianapolis, Indiana (consumer finance and insurance activities; Indiana): to engage, through a subsidiary, Local Finance Corporation, in making or acquiring loans or other extensions of credit for personal, family, or household purposes; purchasing consumer installment sales finance contracts; and acting as agent with respect to life and disability insurance directly related to its extensions of credit and insurance which protects property taken as collateral in connection with such extensions of credit. These activities would be conducted from an office in Indianapolis, Indiana, serving an area within a three-mile radius of that office.

2. First Chicago Corporation, Chicago, Illinois (finance and leasing activities; Illinois): to engage, through a subsidiary, First Chicago Credit Corporation, in making full payout leases of personal property in accordance with the Board's Regulation Y; making or acquiring loans and other extensions of credit such as would be made by a finance company; and servicing such loans and other extensions of credit. These activities would be conducted from offices in Chicago, Skokie, Schaumburg, and Oak Brook, Illinois, serving the Chicago SMSA.

3. Northern Trust Corporation, Chicago, Illinois (trust company and investment advisory activities; Florida): to engage, through a subsidiary, Security Trust Company of Palm Beach, in performing or carrying on any one or more functions or activities that may be performed or carried on by a trust company (including activities of a fidiciary, agency, or custodial nature, and acting as investment or financial advisor) as authorized by Florida law, but without the power to accept deposits or make commercial loans. These activities would be conducted from an office in Palm Beach Florida, serving Palm Beach County, Florida, and the southern half of the Martin County, Florida, coastal area.

B. *Other Federal Reserve Banks:* None.

Board of Governors of the Federal Reserve System, June 8, 1979.

Edward T. Mulrenin,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

First Security Corp.; Acquisition of Bank

First Security Corporation, Salt Lake City, Utah, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 80 per cent of the voting shares of First Security Bank of Richfield, N.A., Richfield, Utah. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of San Francisco. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than July 9, 1979. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, June 8, 1979.

Edward T. Mulrenin,

Assistant Secretary of the Board.

GENERAL ACCOUNTING OFFICE

Regulatory Reports Review; Receipt of Report Proposals

The following requests for clearance of reports intended for use in collecting information from the public were received by the Regulatory Reports Review Staff, GAO, on June 8, 1979. See 44 U.S.C. 3512(c) and (d). The purpose of publishing this notice in the Federal Register is to inform the public of such receipts.

The notice includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed OSM requests are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed requests, comments (in triplicate) must be received on or before July 2, 1979, and should be addressed to Mr. John M. Lovelady, Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5106, 441 G Street, NW, Washington, DC 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

Department of the Interior

Office of Surface Mining

The Office of Surface Mining (OSM), Department of the Interior, requests clearance of additional recordkeeping and reporting requirements contained in 30 CFR Parts 776, 779, 784, 785, 786, 807, 816, 817 and 843. These additional recordkeeping and reporting requirements were identified by respondents and the General Accounting Office (GAO) staff during GAO's review for clearance of OSM's Permanent Regulatory Program. The Office of Surface Mining has determined that such information is necessary to perform its responsibilities under the Surface Mining Control and Reclamation Act of 1977, 33 U.S.C. 1201 et seq. and must be collected, submitted or retained. On March 13, 1979, the OSM published these requirements, subject only to review by GAO to assure that a minimum burden is imposed in the manner in which such information is proposed to be obtained. The requirements contained in each part are as follows:

30 CFR Part 776

Section 776.13(b) sets forth criteria by which 27 regulatory authorities shall review for approval or disapproval 2,000 applications for exploration of more than 250 tons of coal. OSM estimates 6 person hours per application for a total of 12,000 person hours. Section 776.17(b) requires persons submitting information to the regulatory authority that should be held in confidence, to request in writing, at the time of submission that such information not be disclosed. Such information is not to be made available to the public until after notice and a hearing has been afforded persons seeking or opposing disclosure of the information. OSM estimates 2,250 coal exploration operations will submit such a request and preparation of each request will take one person hour for a total of 2,250 person hours.

30 CFR Part 779

Section 779.21 requires 3,800 surface coal mine operations to submit to the regulatory authority, with the permit application, descriptions of the soil resources of the mine plan area and results of analysis, trials and tests where selected overburden materials will be used instead of or as a supplement to topsoil in the reclamation process. OSM estimates approximately 16 person hours per operation for a total of 60,800 person hours. Section 779.22 requires 3,800 surface coal mine operations to file maps and supporting narrative describing the conditions, capability, and productivity of the land within the proposed permit area. OSM estimates approximately 49 person hours per operation for a total of 186,200 person hours. These requirements will have to be met approximately once every five years.

30 CFR Part 784

Section 784.26 establishes permit application requirements so that the regulatory authority is provided with comprehensive and reliable information on the air quality impact. Plans for fugitive dust control are required on approximately 2,300 underground operations. OSM estimates 16 hours per plan, for a total of 36,800 hours. The provisions of this section must be satisfied by underground operations approximately once every five years.

30 CFR Part 785

Section 785.17(b)(3)(5) and (7) sets forth the information that permit applications must include if the area proposed to be mined contains prime farmlands. Approximately 1,000 permit applications will be on prime farmlands. OSM estimates approximately 40 hours per permit for a total of 40,000 person hours. This requirement must be met by affected applicants at least once every five years in most cases.

30 CFR Part 786

Section 786.15 implements the requirements that all information contained in a permit application, filed with the regulatory authority, be made

available to the public. OSM estimates one hour per 27 regulatory authorities and four hours per 6,100 coal mine operators, for a total of 24,427 hours. This requirement must be met only once. Section 786.25(b)(2) sets forth provisions by which the regulatory authority may grant reasonable extensions of time for commencement of surface coal mining and reclamation operation. Approximately 305 surface coal mining and reclamation operations will be affected. OSM estimates 8 hours per extension request for a total of 2,440 hours. An extension request is only required once a year. Section 786.25(b)(4) requires the operator to set forth in the permit extension time granted under § 786.25(b)(2) and give notice of such extension to the public. Approximately 305 surface coal mining and reclamation operations will be affected. OSM estimates 2 hours per notice, for a total of 610 hours. A notice for each operation is required only once after receiving extension from regulatory authority.

30 CFR Part 807

Section 807.11(d) requires 27 regulatory authorities to give approximately 1,830 notices of inspection of reclamation work for evaluation and to inspect such work annually. OSM estimates approximately 40 person hours per notice and inspection for a total of 73,200 person hours. Section 807.11(h)(ii) sets forth the procedures that approximately 27 State regulatory authorities must follow in conducting public hearings on performance bonds. OSM estimates approximately 4 person hours per hearing for a total of 108 person hours per year.

30 CFR Part 816

Section 816.49(i) requires the surface coal mine operation to submit to the regulatory authority, annually, modification plans of dams and impoundments. OSM estimates approximately 1,000 surface mine operations must submit such plans and that it will take each operation from 2 to 40 person hours per plan for a total of 2,000 to 40,000 person hours. Sections 816.52(a)(1) and (2) set forth the requirements that 3,040 surface coal mine operations must follow in ground water monitoring programs. OSM estimates 16 person hours per operation for a total of 48,640 person hours per year. Section 816.52(b)(1)(ii) requires approximately 3,040 surface coal mine operations to notify the regulatory authority and forward analytical results of sample collections where there are cases of noncompliance with the permit conditions or applicable standards and where NPDES permit effluent limitations have exceeded. OSM estimates 4 person hours per operation for a total of 12,160 person hours a year. Section 816.95 requires approximately 3,800 surface coal mine operations to submit an annual plan for fugitive dust control as an integral part of site preparation, coal mining and reclamation operations and specifies what measures should be included in the plan. OSM estimates 8 person hours per operation for a total of 30,400 person hours. Section 816.116 requires approximately 27 State regulatory authorities to develop measurement techniques for successful revegetatiion after consulting with appropriate State and Federal agencies and requires approximately 3,040 surface coal mie operations to conduct managment paractices and periodic revegetation measurements along the guidelines or techniques developed by the regulatory authority. OSM estimates 6 person hours per regulatory authority and 24 person hours per operation for a total of 73,176 person hours a year.

30 CFR Part 817

Section 817.49(i) requires the underground mine operation to submit to the regulatory authority, annually, modification plans of dams and impoundments. OSM estimates approximately 600 underground mine operations must submit such plans and that it will take each operation from 2 to 40 person hours per plan for a total of 1,200 to 24,000 person hours. Section 817.52(a)(1) and (2) set forth the requirements that 1,840 underground mine operations must follow in ground water monitoring programs. OSM estimates 16 person hours per operation for a total of 29,440 person hours per year. Section 817.52(b)(1)(ii) requires approximately 1,840 underground mine operations to notify the regulatory authority and forward analytical results of sample collection where there are cases of noncompliance with the permit conditions or applicable standards and where NPDES permit effluent limitations have been exceeded. OSM estimates 4 person hours per operation for a total of 7,360 person hours a year. Section 817.95 requires approximately 2,300 underground mine operations to submit an annual plan for fugitive dust control as an intergral part of site preparation operations, coal mining and reclamation operations and specifies what measures should be included in that plan. OSM estimates 8 person hours per operation for a total of 18,400 person hours a year. Section 817.116 requires approximately 27 State regulatory authorities to develop measurement techniques for successful revegetation, after consultation with appropriate State and Federal agencies, and requires approximately 1,840 underground mine operations to conduct managment practices and periodic revegetation measurements along the guidelines or techniques developed by the regulatory authority. OSM estimates 6 person hours per regulatory authority and 24 person hours per underground mine operation for a total of 44,376 person hours a year.

30 CFR Part 843

Section 843.14(c) allows the coal mine operator to designate an agent for service of notices or orders and to notify OSM's regional district or field office of such designation, in writing. OSM estimates approximately 2,000 coal mine operations must comply with this requirement and will take about one person hour to prepare such notice for a total of 2,000 person hours annually.

John M. Lovelady,

Assistant Director, Regulatory Reports Review.

Advisory Committees to the National Cancer Institute; Meetings for the Review of Contract Proposals and Grant Applications

Pursuant to Public Law 92-463, notice is hereby given of the meetings of committees advisory to the National Cancer Institute.

These meetings will be open to the public to discuss administrative details or other issues relating to committee business as indicated in the notice. Attendance by the public will be limited to space available.

These meetings will be closed to the public as indicated below in accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Public Law 92-463, for the review, discussion and evaluation of individual contract proposals and grant applications, as indicated. These proposals and applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the proposals and applications, the disclosure of which would constitute a

clearly unwarranted invasion of personal privacy.

Mrs. Marjorie F. Early, Committee Management Officer, NCI, Building 31, Room 4B43, National Institutes of Health, Bethesda, Maryland 20205 (301/496–5708) will furnish summaries of the meetings and rosters of committee members, upon request. Other information pertaining to the meeting can be obtained from the Executive Secretary indicated. Meetings will be held at the National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20205, unless otherwise stated.

Name of Committee: Clinical Trials Committee.
Dates: July 10, 1979.
Place: Building 31C, Conference Room 4, National Institutes of Health.
Times: Open: July 10, 8:30 a.m.–9:00 a.m. Closed: July 10, 9:00 a.m.–adjournment.
Closure Reason: To review research contract proposals.
Executive Secretary: Dr. Gerald U. Liddel. Address: Westwood Building, Room 820, National Institutes of Health. Phone: 301/496–7575.
(Catalog of Federal Domestic Assistance Number 13.395 National Institutes of Health)

Name of Committee: Large Bowel and Pancreatic Cancer Review Committee (Pancreatic Subcommittee).
Date: July 19, 1979.

Guidelines for the Laboratory Use of Chemical Substances Posing a Potential Occupational Carcinogenic Risk; Open Meeting

A public meeting was held on September 25 and 26, 1978, to discuss a working draft of a document being developed for the HEW Committee to Coordinate Environmental and Related Programs. As a result of this meeting and written comments received, this document has been revised. The revised draft document contains proposals to provide an approach for protecting laboratory workers and their work environment from chemical substances that may pose a carcinogenic risk. This approach is based on the implementation of specific work practices and engineering controls that are applicable to the laboratory workplace. To this end, the meeting objective is to answer questions or receive comments regarding the revised draft document. Written comments will also be considered if received by August 14, 1979.

The open meeting will be held on Tuesday, July 24, from 9:00 a.m. to 5:00 p.m. in Masur Auditorium, Building 10, National Institutes of Health, Bethesda, Maryland. Attendance by the public will be limited to space available. It is requested that individuals wishing to attend give advance notice to:

Ms. Ronda Rice, National Institute of Environmental Health Sciences, P.O. Box 12233, Research Triangle Park, NC 27709. Telephone: (919) 541–3506/FTS 629–3506.

A copy of the draft document and any additional information regarding the meeting may be requested from Ms. Rice.

Dated: May 29, 1979.

Bureau of Land Management

Butte District Grazing Advisory Board; Meeting

Notice is hereby given, in accordance with Pub. L. 92-463, that a meeting of the Butte District Grazing Advisory Board will be held on Monday, July 16, 1979.

The meeting will begin at 9 a.m. in the meeting room of the Capri Motel, 220 North Wyoming Street, Butte, Montana.

The agenda for the meeting will include: (1) A review of proposed District range improvement projects for fiscal year 1980; (2) a discussion of the current status of allotment management planning in the Mountain Foothills Range Environmental Statement area; (3) a discussion of range betterment fund utilization for range improvements; (4) a discussion of range improvement funding under Sec. 5(a) of the Public Rangelands Improvement Act of 1978; (5) an update on the District's wilderness review program and its impact on AMP development; (6) arrangements for the next meeting.

The meeting is open to the public. Interested persons may make oral statements to the board between 1 and 2 p.m. on July 16, or file written statements for the board's consideration. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, P.O. Box 908, Butte, Montana 59701 by July 12, 1979. Depending on the number of persons wishing to make oral statements, a per person time limit may be established by the District Manager.

Summary minutes of the board meeting will be maintained in the District Office and will be available for public inspection and reproduction, during regular business hours, within 30 days following the meeting.

Dated: June 7, 1979.

Jack A. McIntosh,
District Manager.

Northwest Pipeline Corp.; Pipeline Application

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (41 Stat. 449), as amended (30 U.S.C. 185), Northwest Pipeline Corporation, P.O. Box 1526, Salt Lake City, Utah 84110, has applied for rights-of-way crossing approximately 11.2 miles of public land in Mesa County, Colorado. The rights-of-way are for the Coors Gathering System and are comprised of 4½" and 8 ⅝" o.d. natural gas lateral pipelines and well ties. The lands affected are described as:

T. 9 S., R. 98 W., 6th P. M.
Sec. 27: S½SW¼
Sec. 28: E½, NW¼
Sec. 29: NW¼, SW¼SW¼
Sec. 30: Lots 8, 12, S½NE¼, NW¼SE¼
Sec. 31: Lot 7
Sec. 32: W½NW¼, N½SW¼
Sec. 33: Lot 2
T. 10 S., R. 98 W., 6th P. M.
Sec. 5: SW¼
Sec. 28: SE¼SE¼
T. 8 S., R. 97 W., 6th P. M.
Sec. 28: SE¼
Sec. 35: SE¼NW¼, NW¼SW¼
T. 9 S., R. 97 W., 6th P. M.
Sec. 2: SW¼SW¼
Sec. 3: Lot 1, SE¼NE¼
Sec. 11: W½NW¼
Sec. 15: S½NE¼, N½SE¼, SE¼SE¼
Sec. 22: SW¼SW¼
Sec. 23: SE¼, SE¼NW¼
Sec. 26: W½SW¼
Sec. 29: E½
Sec. 33: N½NW¼
SEc. 35: NW¼NE¼, SE¼NW¼
Sec. 36: NW¼, E½SE¼
T. 10 S., R. 97 W., 6th P. M.
Sec. 1: Lots 1, 2, SE¼NW¼

The proposed pipelines will enable the applicant to convey natural gas from wellheads in the Roberts Canyon-Shire Gulch Field.

The purposes of this notice are: To inform the public that the Bureau of Land Management will be proceeding with the preparation of environmental and other analyses necessary for determining whether the application should be approved and, if so, under what terms and conditions; to allow interested parties to comment on the application, and allow any persons asserting a claim to the lands or having bona fide objections to the proposed natural gas pipeline right-of-way to file their objections in this office. Any person asserting a claim to the lands or having bona fide objections must include evidence that a copy thereof has been served on the applicant.

Any comment, claim, or objection must be filed with the Team Leader, Canon City-Grand Junction Team, Branch of Adjudication, Bureau of Land Management, Colorado State Office, Room 700, Colorado State Bank Building, 1600 Broadway, Denver Colorado 80202, as promptly as possible after publication of this notice.

Rodney A. Roberts,
Leader Canon City-Grand Junction Team, Branch of Adjudication.

BILLING CODE 4310-84-M

[NM 30841]

New Mexico; Application

June 5, 1979.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Gas Company of New Mexico has applied for one 4-inch natural gas pipeline right-of-way across the following land:

New Mexico Principal Meridian, New Mexico
T. 20 S., R. 33 E.,
Sec. 27, SW¼NE¼ and E½NW¼.

This pipeline will convey natural gas across .237 of a mile of public land in Lea County, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, New Mexico 88201.

Fred E. Padilla,
Chief, Branch of Lands and Minerals Operations.

New Mexico; Applications

June 6, 1979.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Company has applied for seven 4½-inch natural gas pipeline rights-of-way across the following lands:

New Mexico Principal Meridian, New Mexico
T. 28 N., R. 8 W.,
Sec. 20, SW¼SW¼;
Sec. 28, NW¼NW¼.
T. 30 N., R. 8 W.,
Sec. 18, SE¼SE¼;
Sec. 29, lot 4;
Sec. 30, lot 5.

T. 31 N., R. 9 W.,
Sec. 17, lots 3, 4, 5 and 6.
T. 30 N., R. 10 W.,
Sec. 22, lot 1;
Sec. 23, lots 3 and 4.
T. 31 N., R. 10 W.,
Sec. 27, lots 9 and 10.
T. 28 N., 11 W.,
Sec. 26, NE¼SW¼;
Sec. 29, W½NE¼, SE¼NE¼ and N½NW¼.

These pipelines will convey natural gas across 2.540 miles of public lands in San Juan County, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 6770, Albuquerque, New Mexico 87107.

Fred E. Padilla,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-84-M

Roswell District Grazing Advisory Board; Meeting

In accordance with Section 403 of Pub. L. 94–579, the Federal Land Policy and Management Act, notice is given of the following Board meeting.

Name: Roswell District Grazing Advisory Board.

Date: July 19, 1979.

Place: Roswell District Office, 1717 West Second Stret, Roswell, New Mexico.

Time: 9 a.m. to 2 p.m.

Proposed Agenda:

9:00 to 9:30 a.m.—Election of Officers.
9:30 to 10:30 a.m.—Use of Range Betterment Funds.
10:30 to 12:00 noon—AMP development in the East Roswell Environmental Statement area.
1:00 to 1:30 p.m.—Public comment period.
1:30 to 2:00 p.m.—Agenda and time of next meeting.

This is the second meeting of the Board which shall serve to offer advice and make recommendations regarding commercial livestock grazing in the development of allotment management plans (AMP's) and the utilization of range-betterment funds with respect to commercial livestock grazing within the Roswell District.

June 6, 1979.

James H. O'Connor,

District Manager.

BILLING CODE 4310-84-M

[U–42733]

Utah; Application

Notice is hereby given that pursuant to Section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), TCP

Gathering Co. has applied for an 8⅝ inch natural gas pipeline right-of-way across the following lands:

Salt Lake Meridian, Utah

T. 30 S., R. 25 E.,
Secs. 15, 16, 22, 23, 25, 26, and 36.
T. 30 S., R. 26 E.,
Sec. 31.
T. 31 S., R. 26 E.,
Secs. 5, 6, 8, 9, 10, and 11.

The right-of-way is needed for the applicant's gas gathering system located in San Juan County, Utah.

The purpose of this notice is to inform the public that the Bureau will be proceeding with the preparation of environmental and other analyses necessary for determining whether the application should be approved, and if so, under what terms and conditions.

Interested persons should express their interest and views to the Moab District Manager, Bureau of Land Management, P.O. Box 970, Moab, Utah, 84532.

Dell T. Waddoups,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-84-M

Utah, Allen Warner Valley Environmental Statement; Intent to Prepare an Environmental Statement and Conduct Scoping Meetings

Notice is hereby given that, in accordance with the National Environmental Policy Act of 1969, the Bureau of Land Management (BLM) Department of the Interior, plans to prepare a draft environmental statement (ES) on Nevada Power Company's proposed 2,500 megawatt (MW) Allen Warner Valley Energy System. The proposed energy system would involve: Development of the Alton Coal field (addressed in the Final Southern Utah Regional Coal ES); a coal processing facility; two coal slurry pipelines; a 55,000 acres-feet reservoir near St. George, Utah; a 500 MW power plant in Warner Valley, Utah; a 2,000 MW power plant east of Las Vegas, Nevada; and an electrical transmission system to California. Public lands within the states of Utah, Arizona, Nevada and California would be involved.

In accordance with the Council on Environmental Quality's regulations, a series of scoping meetings are scheduled. The purpose of these meetings it to identify the significant issues and alternatives to be analyzed in the ES. Meetings will be held as follows: July 25, 1979 in room A–3, Meeting Room Annex, Las Vegas Convention Center, 350 South Paradise Road, Las Vegas, Nevada; July 26, 1979 in room 220, Salt Palace, 100 South West Temple, Salt Lake City, Utah; and July 27, 1979 in the Auditorium of the Washington County Courthouse, 197 East Tabernacle, St. George, Utah. All meetings will begin at 7:00 p.m.

All interested agencies, organizations or persons desiring to assist in the scoping process should familiarize themselves with the proposed project and attend at least one of the scheduled meetings. Information on the proposed project may be obtained from the Cedar City District Office as noted below or from the applicant, Nevada Power Company, P.O. Box 230, Las Vegas, Nevada 89151. Those desiring to participate in the ES scoping process but unable to attend one of the above meetings should contact Mr. Jerry Meredith for further information at the following address:

Bureau of Land Management, Post Office Box 724, Cedar City, Utah 84720, Area Code 801–586–2401.

Dated: June 7, 1979.

William G. Leavell,

Associate State Director, Utah State Office.

Wyoming; Application

June 7, 1979.

Notice is hereby given that pursuant to Sec. 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Colorado Interstate Gas Company of Colorado Springs, Colorado filed an application for a right-of-way to construct a 4½" O.D. pipeline, a 4' by 6' meter house and related metering and dehydration facilities for the purpose of transporting natural gas across the following described public lands:

Sixth Principal Meridian, Wyoming

T. 20 N., R. 92 W.,
Sec. 32, N½SW¼ and SW¼SW¼.

The proposed pipeline will transport natural gas from the Federal #1–32 Well located in the SW¼ of section 32, to a point of connection with an existing pipeline located in the N½ of section 31, all located within T. 20 N., R. 92 W., Sweetwater County, Wyoming. The proposed 4' by 6' meter house and related metering and dehydration facilities are to be located entirely within the proposed 50' right-of-way in the SW¼ of section 32, T. 20 N., R. 92 W., Sweetwater County, Wyoming.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1300 Third Street, P.O. Box 670, Rawlins, Wyoming 82301.

Harold G. Stinchcomb,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-84-M

[W-68239]

Wyoming; Application

June 8, 1979.

Notice is hereby given that pursuant to Sec. 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Colorado Interstate Gas Company of Colorado Springs, Colorado filed an application for a right-of-way to construct a 6⅝ O.D. natural gas pipeline for the purpose of transporting natural gas across the following described public lands:

Sixth Principal Meridian, Wyoming

T. 18 N., R. 98 W.,
Sec. 28, N½SW¼ and SE¼SW¼.

The proposed pipeline will transport natural gas from the Higgins Unit #12A Well located in the N½ of section 33, to a point of connection with an existing pipeline in the SW¼ of section 28, all within T. 18 N., R. 98 W., Sweetwater County, Wyoming.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, Highway 187 N., P.O. Box 1869, Rock Springs, Wyoming 82901.

Harold G. Stinchcomb,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-84-M

[Wyoming 67876]

Wyoming; Application

June 5, 1979.

Notice is hereby given that pursuant to Section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Northwest Pipeline Corporation of Salt Lake City, Utah filed an application for a right-of-way to construct nineteen 4½ inch O.D. pipelines for the purpose of transporting natural gas across the following described public lands:

Sixth Principal Meridian, Wyoming

T. 18 N., R. 111 W.,
Sec. 18.
T. 21 N., R. 111 W.,
Secs. 8 and 18.
T. 18 N., R. 112 W.,
Secs. 12, 14 and 30.
T. 19 N., R. 112 W.,
Secs. 2, 20 and 28.
T. 20 N., R. 112 W.,
Secs. 16, 24 and 36.
T. 21 N., R. 112 W.,
Secs. 20, 24 and 28.
T. 19 N., R. 113 W.,
Secs. 12 and 24.

The proposed pipelines will transport natural gas from the Wilson Ranch Well Numbers 5, 12, 17; Whiskey Butte Well Numbers 23, 25, 32, 33, 34; champlin 285 F-1, 206 C#1, 358 C#1, 358 G-1, 206 D-1; 7 Mile Gulch Well Numbers 9 and 11; Fabian Ditch 2-2 Well; Federal #1-24; Lansdale Fed. #28-1 Well; and the Bruff #1-14 Well to points of connection with Northwest Pipelines Moxa Arch gathering system all within Tps. 18 and 21 N., R. 111 W., and Tps. 18 and 19 N., R. 112 W., Sweetwater County, T. 18 N., R. 112 W., Uinta County, and Tps. 19 and 21 N., R. 112 W., and T. 19 N., R. 113 W., Lincoln County, Wyoming.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, Highway 187 North, P.O. Box 1869, Rock Springs, Wyoming 82901.

Harold G. Stinchcomb,
Chief, Branch of Lands and Minerals Operations.

[FR Doc. 79-18680 Filed 6-13-79; 8:45 am]
BILLING CODE 4310-84-M

[W-85822 Amendment]

Wyoming; Application

June 6, 1979.

Notice is hereby given that pursuant to Sec. 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Colorado Interstate Gas Company of Colorado Springs, Colorado filed an application to amend their pending right-of-way to construct addition 4½" O.D. pipelines and related facilities consisting of three 4'x6' meter houses and dehydrators for the purpose of transporting natural gas across the following described public lands:

Sixth Principal Meridian, Wyoming

T. 18 N., R. 93 W.,
Sec. 10, SW¼NE¼, NE¼SW¼, S½SW¼ and NW¼SE¼;
Sec. 18, NE¼NE¼, S½NE¼, NE¼SW¼, S½SW¼ and NW¼SE¼;
Sec. 20, NE¼NE¼, S½NE¼, E½SW¼ and NE¼SE¼.

The proposed additional pipeline will transport natural gas from the Federal #20-18-93 well located in the SW¼SW¼ of section 20, the Marathon #3-16 well located in the SW¼SW¼ of section 16, and the Federal #2-10 well located in the SW¼SW¼ of section 10 to points of connection with Colorado Interstate Gas Company's extension of their proposed F-56 line extending from a point located in the SW¼ of section 2, all within T. 18 N., R. 93 W., Carbon County, Wyoming.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1300 Third Steet, P.O. Box 670, Rawlins, Wyoming 82301.

Harold G. Stinchcomb,
Chief, Branch of Lands and Minerals Operations.

[FR Doc. 79-18680 Filed 6-13-79; 8:45 am]
BILLING CODE 4310-84-M

[Wyoming 67937]

Wyoming; Application

June 5, 1979.

Notice is hereby given that pursuant to Section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Panhandle Eastern Pipe Line Company of Brighton, Colorado filed an application for a right-of-way to construct a 4", 6" and 8" natural gas pipelines, and dehydration, launching and receiving facilities, and associated valve settings for pipeline junctions for the purpose of transporting natural gas across the following described public lands:

Sixth Principal Meridian, Wyoming

T. 26 N., R. 96 W.,
Sec. 18, lot 8;
Sec. 19, lots 2 and 5.
T. 22 N., R. 97 W.,
Sec. 26, NE¼SW¼ and N½SE¼.
T. 23 N., R. 97 W.,
Sec. 11, W½SW¼;
Sec. 14, NE¼, W½NW¼ and SE¼NW¼.
T. 25 N., R. 97 W.,
Sec. 14, W½NE¼.
T. 26 N., R. 97 W.,
Sec. 23, NW¼SE¼;
Sec. 24, SE¼NE¼ and N½SE¼.

The proposed pipelines will connect Davis J. T. Federal #1, Davis West Sheep Camp #1, Davis Forbes Federal #1, Davis Pickett Lake #2, Davis Pickett Lake #3, Davis Pickett Lake #4 Wells to expand a gathering system to transport natural gas to Colorado Interstate Gas Company's main transmission line. The dehydration, launching and receiving facilities and associated valve settings for pipeline junctions are all located within the proposed rights-of-way in T. 26 N., R. 96 W., Tps. 22, 23, 25, 26 N., R. 97 W., Sweetwater County, Wyoming.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1300 Third

Street, P.O. Box 670, Rawlins, Wyoming 82301.

Harold G. Stinchcomb,
Chief, Branch of Lands and Minerals Operations.

Utah; Order Providing for Opening of Public Lands

1. The purpose of this order is to restore to the operation of the applicable public land laws those public lands eliminated from the Dinosaur National Monument.

2. By Public Law 86–729, 74 Stat. 857, dated September 8, 1960, the Congress of the United States revised the boundary of the Dinosaur National Monument and eliminated the following described public lands from the Monument:

Salt Lake Meridian, Utah

T. 4 S., R. 23 E.,
Sec. 9, W½;
Sec. 16, W½;
Sec. 21, W½;
Sec. 28, S½NW¼, SW¼.
T. 3 S., R. 24 E.,
Sec. 25, W½;
Sec. 26, all;
Sec. 35, N½.

The area described aggregates 2,480.00 acres in Uintah County.

3. A portion of the above lands, as described in this paragraph, is subject to an existing Reclamation withdrawal as listed and is not open to entry or location but is open to mineral leasing.

Reclamation Withdrawal

T. 4 S., R. 23 E.,
Sec. 28, S½NW¼, SW ¼.
T. 3 S., R. 24 E.,
Sec. 25, W½;
Sec. 35, N½.
Total 880.00 acres.

4. Under the authority delegated by the Bureau of Land Management Order No. 701 dated July 23, 1964 (29 F. R. 10526), as amended, it is ordered that the lands described in paragraph 2 are restored at 10:00 a.m. July 20, 1979 to the operation of the public land laws, subject to valid existing rights, the provision of existing withdrawals, Bureau of Land Management Classification for Multiple Use Management, and the requirements of applicable law. All valid applications received at, or prior to, 10:00 a.m. on July 20, 1979, shall be considered as filed simultaneous at that time. Those received thereafter shall be considered in the order of filing.

Inquires concerning the lands shall be addressed to the State Director, Bureau of Land Management, University Club Building, 136 East South Temple, Salt Lake city, Utah 84111.

Dated: June 8, 1979.

William G. Leavell,

Associate State Director.

BILLING CODE 4310-84-M

Bureau of Reclamation

Meeker Dome Unit, Colorado—Colorado River Water Quality Improvement Program; Intent to Prepare an Environmental Impact Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior proposes to prepare an enviormental assessment or statement on the Meeker Dome Unit. The purposes of the studies to be conducted for the Meeker Dome Unit, which is located in Rio Blanco County, Colorado, are to gain a better understanding of the quantity, sources, and mechanisms by which saline waters enter the White River and then to identify and analyze alternative methods that would eliminate the salt contribution to the river.

Environmental studies and preparation and processing of an environmental impact statement for this proposed project will be in accordance with provisions of the National Environmental Policy Act of 1969, and will be accomplished under the New Council on Environmental Quality (CEQ) regulations published in the Federal Register on November 29, 1978. Pursuant to these new CEQ regulations and in accordance with Office of Management and Budget Circular No. A–95, "Evaluation, Review and Coordination of Federal and Federally Assisted Programs," we are soliciting the active participation of Federal, State, and local agencies, affected private groups, and individuals in a scoping process for the determination of

significant environmental items to be analyzed.

A scoping session will be conducted to solicit information from all interested individuals and organizations to assist planners in determining the scope of issues to be addressed in environmental analyses and to identify the significant issues related to the Meeker Dome study. The scoping session will be held at 7:00 p.m., on June 19, 1979, in the Fairfield Center at 200 Main Street, Meeker, Colorado.

Inquiries should be addressed to J. F. Rinckel, Project Manager, Bureau of Reclamation, 761 Horizon Drive, Grand Junction, Colorado 81501.

Dated: June 8, 1979.

R. Keith Higginson,

Commissioner.

BILLING CODE 4310-09-M

Negotiation of a Water Service Contract With the Shasta Dam Area Public Utility District; Intent To Initiate Negotiations on a Water Service Contract

The Department of the Interior, through the Bureau of Reclamation, intends to negotiate a water service contract with the Shasta Dam Area Public Utility District, Central Valley, California, which is located in the Toyon Pipeline Service Area of the Central Valley Project, California. The district has undergone substantial reorganization through the recent annexation of the entire area formerly served by the Summit City Public Utility District. Both districts have previously executed water service contracts with the United States, and a single water service contract will be negotiated superseding both previous contracts.

Provisions to be negotiated in the new contract will include the water quantity, rates, points of delivery, and transfer to the district of the operation and maintenance of the Toyon Pipeline. Contract terms and conditions will generally be written pursuant to the Reclamation Project Act of 1939 (53 Stat. 1187), as amended.

All meetings scheduled by the Bureau of Reclamation with the Shasta Dam Area Public Utility District for the purpose of discussing terms and conditions of the proposed contract shall be open to the general public as observers. Advance notice of such meetings shall be furnished only to those parties having previously furnished a written request for such notice to the office identified below at least 1 week prior to any meeting. The public is invited to submit written comments on the form of the proposed agreement not later than 30 days after the completed draft is declared to be available to the public. All written correspondence concerning the proposed operating agreement shall be made available to the general public pursuant to the terms and procedures of the Freedom of Information Act (80 Stat. 383), as amended.

For further information, please contact Ms. Cindy Cowden, Repayment Specialist, Division of Water and Power Resources Management, Bureau of Reclamation, 2800 Cottage Way, Sacramento, California 95825, telephone No. (916) 474-4540.

Dated: June 5, 1979.

Orrin Ferris,

Acting Commissioner of Reclamation.

BILLING CODE 4310-09-M

National Park Service

Monocacy National Battlefield; Availability of Assessment of Alternatives and Notice of Public Hearing

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared an assessment of alternatives for the General Management Plan for Monocacy National Battlefield. This assessment of alternatives and General Management Plan have been undertaken to direct future acquisition and development in a manner that will be in full compliance with applicable environmental and historical legislation.

The document includes a description of the environment, description of alternatives developed to answer the needs of an operating park, an assessment of the General Management Plan's impacts on the environment, and a discussion of land acquisition options and formulation of a land acquisition plan.

A public hearing on this issue shall be conducted July 9 at 7:30 p.m. in the Frederick County Council Hearing Room, Winchester Hall, 21 East Church Street, Frederick, Maryland 21701.

Written comments on this assessment of alternatives are invited and will be accepted for a period of 45 days following the publication of this notice. Written comments should be addressed to the Superintendent, Antietam National Battlefield Park, P.O. Box 158, Sharpsburg, Maryland 21782.

Copies of the assessment of alternatives are available from:

Antietam National Battlefield Park, P.O. Box 158, Sharpsburg, Maryland 21782.

National Park Service, National Capital Parks, 1100 Ohio Drive, SW., Washington, D.C. 20242.

Dated: June 11, 1979.

Manus J. Fish, Jr.,

Regional Director, National Capital Region.

DEPARTMENT OF JUSTICE

Antitrust Division

Proposed Final Judgment in United States v. Leviton Manufacturing Co., Inc., et al. and Competitive Impact Statement Thereon

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b) through (h), that a Proposed Final Judgment and Competitive Impact Statement, as set forth below, have been filed with the United States District Court for the District of Connecticut in Civil No. H-77-555, *United States of America v. Leviton Manufacturing Co., Inc., et al.*, (October 27, 1977). The proposed Final Judgment would terminate the Department of the Justice's civil antitrust suit involving the manufacture and sale of residential grade wiring devices throughout the United States.

The complaint alleged that beginning prior to 1962 and continuing thereafter until at least April, 1976 eight corporate and one individual defendant and certain co-conspirators engaged in a combination and conspiracy to restrain interstate commerce in the manufacture and sale of residential grade wiring devices throughout the United States.

The complaint sought a judgment by the court that the defendants had engaged in a combination and conspiracy in restraint of trade in violation of Section 1 of the Sherman Act together with an order by the court to enjoin and restrain the defendants from such conduct in the future.

Proceedings in this case were stayed pending disposition of a companion criminal prosecution, *United States v. Leviton Manufacturing Co., Inc., et al.*, Criminal No. H-77-77 (D. Conn.). Each of the defendants in the criminal case pleaded *nolo contendere* and was sentenced by United States District Judge M. Joseph Blumenfeld. The sentences included fines totalling $920,000 and periods of incarceration ranging from 30 to 90 days for 9 of the individual defendants.

Entry by the court of the proposed Final Judgment will terminate the civil

case, except insofar as the court will retain jurisdiction for such further proceedings as may be necessary or appropriate to interpret, modify or enforce the Judgment, or to punish violations thereof.

The proposed Final Judgment enjoins the defendants for a period of ten years from (1) directly or indirectly entering into any contract, or conspiracy with any other person engaged in the production or sale of wiring devices to raise, fix, maintain or stabilize prices, discounts or terms or conditions of sale of wiring devices to any third person; (2) communicating to or requesting from any manufacturer of wiring devices any information concerning past, present or future prices, price differentials, terms or conditions of sale, discounts, and actual or proposed pricing policies for the sale of wiring devices; and (3) continuing, maintaining, reviving or belonging to the Wiring Device Association or any other trade association consisting primarily of residential grade wiring device manufacturers.

The only exception to the broad prohibitions of the Judgment concern necessary communications in connection with (1) bona fide contemplated or actual purchase or sales transactions between the parties to such communications; and (2) a bona fide transaction involving the actual or proposed acquisition of any manufacturer of wiring devices.

The proposed Final Judgment also enjoins and restrains defendants George P. Byrne, Jr. and George P. Byrne, Inc., for a period of ten years, from directly or indirectly organizing, holding office in, or being employed by a trade association of wiring device manufacturers.

In addition to the prohibitions described above, the proposed Final Judgment requires certain affirmative actions designed to insure compliance with the Judgment and competitive prices in the future.

The proposed Final Judgment shall terminate ten years from the date of its entry.

In accordance with the Antitrust Procedures and Penalties Act of 1974, the Competitive Impact Statement describes the violations involved, explains the provisions of the proposed Final Judgement, discusses the remedies available to private litigants, outlines the procedures available for the modification of the Judgment and evaluates alternative relief proposals considered by the Goverment.

The proposed Final Judgment, a Stipulation and the Competitive Impact Statement are available for inspection and copying on request in the Legal Procedure Unit of the Antitrust Division, Room 7416, Department of Justice, Washington, D.C., 20530. They are also available for inspection in the Office of the Clerk of the United States District Court for the District of Connecticut, 450 Main Street, Hartford, Connecticut 06103.

Comments concerning the proposed Final Judgment are invited from members of the public within the 60 day statutory time period. Such comments should be directed to Joseph H. Widmar, Chief, Trial Section, Antitrust Division, United States Department of Justice, Washington, D.C. 20530.

Dated: June 1, 1979.

Charles F. B. McAleer,

Special Assistant for Judgment Negotiations.

U.S. District Court for the District of Connecticut

United States of America, Plaintiff, v. *Leviton Manufacturing Co., Inc.; Eagle Electric Manufacturing Co., Inc.; Slater Electric, Inc.; Circle F Industries, Inc.; Bell Electric Company, Inc.; John I. Paulding, Inc.; Triboro Electric Corp.; George P. Byrne, Inc.; and George P. Byrne, Jr.*, Defendants.

Civil Action No.: H–77–555.

Filed: June 1, 1979.

Stipulation

It is hereby stipulated by and between the plaintiff, United States of America, and each of the above-named defendants, by their respective attorneys, that:

1. The parties consent that a Final Judgment in the form attached hereto may be filed and entered by the Court, upon the motion of any party or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act, 15 U.S.C. 16, and without further notice to any party or other proceedings, provided that plaintiff has not withdrawn its consent, which it may do at any time before the entry of the proposed Final Judgment by serving notice thereof on the defendants and filing that notice with the Court.

2. In the event plaintiff withdraws its consent hereto, or if the proposed Final Judgment is not entered pursuant to this Stipulation, this Stipulation shall have no effect whatever and the making of this Stipulation shall be without prejudice to any consenting party in this or any other proceedings.

Dated: June 1, 1979.

For the Plaintiff: John H. Shenefield, *Assistant Attorney General;* William E. Swope, Charles F. B. McAleer, Joseph H. Widmar, and Peter A. Mullin, *Attorneys, United States Department of Justice.*

For the Defendants: Malcolm A. Hoffmann, *Attorney for Leviton Manufacturing Co., Inc.*, Gilbert S. Edelson, *Attorney for Eagle Electric Manufacturing Co., Inc.*, Lawrence Greenwald, *Attorney for Slater Electric, Inc.*, Sidney S. Rosdeitcher, *Attorney for Circle F Industries, Inc.*, Howard W. Fogt, Jr., *Attorney for Bell Electric Company, Inc.*, Laurence T. Sorkin, *Attorney for John I. Paulding, Inc.*, Bernard M. Elber, *Attorney for Triboro Electric Corp.*, John A. Sullivan, *Attorney for George P. Byrne, Inc. and George P. Byrne, Jr.*

U.S. District Court for the District of Connecticut

United States of America, Plaintiff, v. *Leviton Manufacturing Co., Inc.; Eagle Electric Manufacturing Co., Inc.; Slater Electric, Inc.; Circle F Industries, Inc.; Bell Electric Company, Inc.; John I. Paulding, Inc.; Triboro Electric Corp.; George P. Byrne, Inc.; and George P. Byrne, Jr.*, Defendants.

Civil Action No.: H–77–555.

Filed: June 1, 1979.

Final Judgment

Plaintiff, United States of America, having filed its complaint herein on October 27, 1977, and the plaintiff and the defendants, by their respective attorneys, having consented to the entry of this Final Judgment, without trial or adjudication of any issue of fact or law herein and without this Final Judgment constituting any evidence against or admission by any party with respect to any issue of fact or law herein:

Now, therefore, without any testimony being taken herein, and without trial or adjudication of any issue of fact or law herein, and upon the consent of all parties hereto, it is hereby

Ordered, adjudged and decreed:

I

This Court has jurisdiction of the subject matter herein and of the parties hereto. The complaint states a claim upon which relief may be granted against the defendants under Section 1 of the Sherman Act, 15 U.S.C. 1.

II

As used in this Final Judgment:

(A) "Person" means any individual, corporation, partnership, firm, association or other business or legal entity;

(B) "Manufacturing defendants" means all the corporate defendants named in the complaint except George P. Byrne, Inc.; and

(C) "Wiring devices" means current carrying electrical products that serve primarily as a connection or control point for an electrical circuit and certain products commonly used therewith which do not themselves carry an electrical current, including but not limited to, switches, receptacles, power outlets, caps, connectors, incandescent lampholders, wallplates, weatherproof boxes an covers, and combination devices (but not including fluorescent lampholders and dimmers), said products being sometimes known in the trade as residential grade wiring devices, as distinguished form a heavy-duty grade of wiring device sometimes known as specification grade wiring devices.

III

The provisions of this Final Judgment are applicable to all defendants herein and shall also apply to each of the corporate

defendants' officers, directors, agents, employees, domestic subsidiaries, successors and assigns, and to those persons in active concert or participation with any of them who shall have received actual notice of this Final Judgment by personal service or otherwise. The provisions of this Final Judgment shall not apply to any activities between a defendant corporation and a parent or subsidiary thereof.

IV

Each defendant is enjoined and restrained from:

(A) directly or indirectly entering into, adhering to, maintaining or furthering any contract, agreement, understanding, plan, program, combination or conspiracy with any other person engaged in the production or sale of wiring devices to raise, fix, stabilize or maintain prices, discounts or terms or conditions of sale of wiring devices to any third person;

(B) communicating to or requesting from any manufacturer of wiring devices any information concerning past, present or future prices, price differentials, terms or conditions of sale, discounts, and actual or proposed pricing policies for the sale of wiring devices, except necessary communications in connection with: (1) a bona fide contemplated or actual purchase or sales transaction between the parties to such communications; or (2) a bona fide transaction involving the actual or proposed acquisition of any manufacturer of wiring devices; and

(C) continuing, maintaining, reviving or belonging to the Wiring Device Association or any other trade association consisting primarily of residential grade wiring device manufacturers.

V

Defendants George P. Byrne, Jr., and George P. Byrne, Inc., are enjoined and restrained from directly or indirectly organizing, holding office in, or being employed by a trade association of wiring device manufactures.

VI

(A) Within sixty (60) days from the date of entry of this Final Judgment, each manufacturing defendant shall file with the Court and serve on the plaintiff an affidavit setting forth the announcement date, effective date, and percentage of change, if included in the announcement letter, of each published price list for wiring devices issued by such defendant during the period from April 1, 1976, to the date of this Final Judgment.

(B) Within sixty (60) days from the date of this Final Judgment, each manufacturing defendant shall: (1) conduct such review of its prices and terms and conditions of sale for wiring devices as is necessary to determine if each such price and term or condition of sale has been independently arrived at; (2) independently review, redetermine and reissue each such price or term or condition of sale not independently arrived at; and (3) file with the Court and serve on the plaintiff an affidavit certifying that each of its prices and terms or conditions of sale for wiring devices has been independently determined.

(C) For the period of five (5) years from the date of the entry of this Final Judgment, each manufacturing defendant shall prepare and maintain an affidavit of one of its officers or directors, within thirty (30) days of each change in its published prices, discounts, or terms or conditions of sale for wiring devices, stating that said officer or director has made reasonable inquiry and that to the best of his knowledge, information and belief said change was individually and independently arrived at and was not the result of any agreement, understanding or communication with any other manufacture of wiring devices.

VII

(A) Within ninety (90) days after the date of entry of this Final Judgment, each corporate defendant shall furnish a copy thereof to each of its officers and directors and to each of its employees having supervisory sales or pricing responsibility for wiring devices, and obtain and retain a written receipt therefor from each such person.

(B) Within one hundred twenty (120) days the date of entry of this Final Judgment each corporate defendant shall file with this Court and serve upon the plaintiff an affidavit as to the fact and manner of its compliance with subsection (A) of this Section VII.

(C) Each corporate defendant shall furnish a copy of this Final Judgment to each new officer or director and to each new employee having supervisory sales or pricing responsibility for wiring devices and shall maintain, for a period of ten (10) years, a written record, bearing the signature of such officer, director or employee, acknowledging receipt of a copy thereof.

(D) Each corporate defendant shall, on an annual basis, take affirmative steps to advise each of its officers and directors and each of its employees with supervisory sales or pricing responsibility for wiring devices of the company's and their personal obligations under this Final Judgment and of the criminal penalities for violation thereof. Such affirmative steps shall include, as a minimum, the distribution of a written directive explaining the antitrust laws and the obligations imposed by this Final Judgment and the holding of a meeting or meetings to review and explain the antitrust laws and this Final Judgment and the obligations imposed thereby.

(E) Each corporate defendant shall maintain a copy of each written directive distributed pursuant to Section VII (D) of this Final Judgment, including the date distributed and to whom sent and a written record of each meeting held pursuant to such section showing the date and place of the meeting, who was present and the agenda for the meeting.

VIII

Each manufacturing defendant shall require, as a condition of the sale or other disposition of all, or substantially all, of its total assets of its wiring devices business, that the acquiring party agree to be bound by the provisions of this Final Judgment. The acquiring party shall file with the Court, and serve upon the plaintiff, its consent to be bound by this Final Judgment.

IX

(A) For the purpose of determining or securing compliance with this Final Judgment, each corporate defendant shall permit duly authorized representatives of the Department of Justice, on written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to the defendant at its principal office, subject to any legally recognized privilege:

(1) to inspect and copy during the regular business hours of such defendant, who may have counsel present, all books, ledgers, accounts, correspondence, memoranda and other records and documents in the possession or under the control of such defendant which relate to any matters contained in this Final Judgment; and

(2) to interview any officer, director or employee of such defendant regarding any matter contained in this Final Judgment, subject to the reasonable convenience of such defendant, and without restraint or interference therefrom, provided that such defendant and such officer, director or employee may have counsel present at any such interview.

(B) For the purpose of determining or securing compliance with this Final Judgment, defendant shall submit such reports in writing, under oath if so requested, with respect to any matter contained in this Final Judgment as may from time to time be requested in writing by the Attorney General or the Assistant Attorney General in charge of the Antitrust Division.

(C) No information obtained by the means provided in this Section IX shall be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the United States is a party, or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

(D) If at any time information or documents are furnished by any defendant to plaintiff pursuant to this Section IX, and such defendant represents and identifies in writing the material in any such information or documents as being the type described in Rule 26(c)(7) of the Federal Rules of Civil Procedure, and said defendant marks each pertinent page of such material, "Subject to claim of protection under Rule 26(c)(7) of the Federal Rules of Civil Procedure," then the plaintiff shall give ten (10) days notice to such defendant prior to divulging such material in any legal proceeding (other than a Grand Jury proceeding) to which the defendant is not a party.

X

Jurisdiction is retained by this Court for the purpose of enabling any of the parties to this Final Judgment to apply to this Court at any time for such further orders and directions as may be necessary or appropriate for the construction or modification of any of the provisions thereof, for the enforcement of

compliance therewith, and for the punishment of violations thereof.

XI

This Final Judgment shall terminate ten (10) years from the date of its entry.

XII

Entry of this Final Judgment is in the public interest.

Dated at Hartford, Connecticut, this ——— day of ———, 1979.

M. Joseph Blumenfeld,
United States District Judge.

U.S. District Court for the District of Connecticut

United States of America, Plaintiff, v. *Leviton Manufacturing Co., Inc.; Eagle Electric Manufacturing Co., Inc.; Slater Electric, Inc.; Circle F Industries, Inc.; Bell Electric Co., Inc.; John I. Paulding, Inc.; Triboro Electric Corp.; George P. Byrne, Inc.; and George P. Byrne, Jr.*; Defendants.

Civil Action No.: H-77-555.

Filed: June 1, 1979.

Competitive Impact Statement

Pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act, 15 U.S.C. 16 (b)-(h), the United States files this Competitive Impact Statement relating to the proposed Final Judgment submitted for entry in this civil antitrust proceeding.

I—*Nature and Purpose of the Proceeding.*

This is a civil antitrust action brought by the United States against the above-named defendants pursuant to Section 4 of the Sherman Act, 15 U.S.C. 4, to enjoin them from continuing violations of Section 1 of the Sherman Act, 15 U.S.C. 1. The Complaint, which was filed on October 27, 1977, alleges that the above-named defendants and certain co-conspirators engaged in a combination and conspiracy beginning sometime prior to 1962 and continuing thereafter until at least April, 1976, to restrain interstate trade and commerce in the manufacture and sale of residential grade wiring devices throughout the United States. The Complaint seeks a judgment by the Court that the defendants have engaged in a combination and conspiracy in restraint of interstate trade and commerce in violation of Section 1 of the Sherman Act, together with an order by the Court to enjoin and restrain the defendants from such conduct in the future.

Proceedings in the case were stayed pending disposition of a companion criminal prosecution, *United States* v. *Leviton Manufacturing Co., Inc., et al.*, Criminal No. H-77-77 (D. Conn.). The criminal prosecution was initiated by a grand jury indictment returned on October 27, 1977 charging eight corporations and eleven individuals, including each of the defendants named in the civil case, with criminal violations of the Sherman Act arising out of the same conspiracy alleged in the civil complaint. Each of the defendants in the criminal case pleaded *nolo contendere* and was sentenced by United States District Judge M. Joseph Blumenfeld. The sentences included fines totalling $220,000 and periods of incarceration ranging from 20 to 90 days for 9 of the individual defendants. The last defendant was sentenced on March 10, 1978. The sentences have been served and the criminal case is now concluded.

II—*The Terms of the Alleged Conspiracy.*

Wiring devices are current carrying electrical products that serve primarily as a connection or control point for an electrical circuit, and certain products commonly used therewith which do not themselves carry an electrical current, including, switches, receptacles, power outlets, caps, connectors, incandescent lampholders, wallplates, weatherproof boxes and covers and combination devices. Wiring devices are sold in three channels of distribution—the distributor/contractor, the consumer, and the original equipment manufacturer (OEM) channels. In the distributor/contractor channel wiring devices are usually sold to electrical wholesale distributors who in turn resell to electrical contractors who install the wiring devices in buildings. In the consumer channel wiring devices are sold to electrical wholesale distributors, hardware wholesalers, buying cooperatives, mass merchandisers, chain stores, and others for eventual resale at the retail level to consumers for repair, replacement, and home improvement purposes. In the OEM channel wiring devices are sold to manufacturers of other products who use the wiring devices as component parts in their manufacturing process. Wiring devices are manufactured in two grades—specification grade and residential grade. In general, specification grade is a heavy-duty, more expensive grade commonly specified by architects for use in high rise residential, commercial and industrial buildings. Residential grade, on the other hand, is a general-use, less expensive grade commonly used in single family homes and light duty uses.

The above named defendants, except George P. Byrne, Jr. and George P. Byrne, Inc., are the principal manufacturers and sellers of residential grade wiring devices in the United States. These defendants sell wiring devices in each of the three channels of distribution described above. During the period charged in the Complaint, these defendants had total sales of wiring devices in excess of $1 billion. During 1975 alone, these defendants had sale of wiring devices totalling approximately $100 million.

George P. Byrne, Jr. is a lawyer who organizes and provides administrative services to trade associations. George P. Byrne, Inc. is a corporation organized by George P. Byrne, Jr. which provided administrative services to the Wiring Device Association (WDA), a now defunct trade association of residential grade wiring device manufacturers.

The Complaint alleges the defendants combined and conspired to unreasonably restrain interstate trade and commerce in the manufacture and sale of residential grade wiring devices in the United States from sometime prior to 1962 until at least April, 1976, in violation of Section 1 of the Sherman Act, 15 U.S.C. 1. The alleged combination and conspiracy consisted of a continuing agreement, understanding and concert of action among the defendants and co-conspirators the substantial terms of which were to (1) raise, fix, maintain and stabilize the prices of residential grade wiring devices in the United States and (2) fix, maintain and stabilize the terms and conditions of sale thereof. In forming and effectuating the combination and conspiracy alleged in the Complaint, the defendants and co-conspirators: (1) agreed upon prices, discounts and terms and conditions of sale for wiring devices; (2) published price lists and adopted policies in accordance with such agreements; (3) organized and maintained the Wiring Device Association (WDA) to further and conceal the combination and conspiracy; (4) scheduled and held rump sessions of the WDA to discuss and agree upon prices, discounts and terms and conditions of sale for wiring devices and to police and enforce agreements regarding the same; (5) met at the offices of certain defendants and elsewhere and telephoned or otherwise contacted one another to discuss, agree upon, and convey agreements regarding, prices, discounts and terms and conditions of sale for wiring devices and to police and enforce such agreements; (6) mailed and otherwise transmitted to one another marked-up and published price lists and other price change information to implement agreements reached; and (7) met with, telephoned, and otherwise communicated with, certain non-conspirator wiring device manufacturers to convey agreements reached, induce subscription thereto and threaten economic reprisals for failure to follow such agreements. As alleged in the Complaint, the combination anc conspiracy had the following effects: (1) prices for wiring devices were raised, fixed, maintained and stabilized at non-competitive levels; (2) terms and conditions of sale for wiring devices were fixed, maintained and stabilized at non-competitive levels; (3) price competition in the sale of wiring devices through out the United States was restrained, suppressed and eliminated; and (4) purchasers of wiring devices were denied the benefits of full and open competition.

III—*Explanation of the Proposed Judgment.*

The United States and the defendants have stipulated that a Final Judgment, in the form filed with the Court, may be entered by the Court at any time after compliance with the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b)-(h). The proposed Final Judgment provides that entry of the Final Judgment shall be without admission by any party with respect to any issue of law or fact. Under the provisions of Section 2(e) of the Antitrust Procedures and Penalties Act entry of the proposed Final Judgment is conditioned upon the Court finding that its entry will be in the public interest.

The proposed Final Judgment enjoins the defendants for a period of ten years from (1) directly or indirectly entering into, adhering to, maintaining or furthering any contract, agreement, understanding, plan, program, combination or conspiracy with any other person engaged in the production or sale of wiring devices to raise, fix, maintain or stabilize prices, discounts or terms or conditions of sale of wiring devices to any

third person; (2) communicating to or requesting from any manufacturer of wiring devices any information concerning past, present or future prices, price differentials, terms or conditions of sale, discounts, and actual or proposed pricing policies for the sale of wiring devices; and (3) continuing, maintaining, reviving or belonging to the Wiring Device Association or any other trade association consisting primarily of residential grade wiring device manufacturers.

The only exception to the broad prohibitions of the Judgment concern necessary commmunications in connection with (1) bona fide contemplated or actual purchase or sales transactions between the parties to such communications; and (2) a bona fide transaction involving the actual or proposed acquisition of any manufacturer of wiring devices.

The proposed Final Judgment also enjoins and restrains defendants George P. Byrne, Jr. and George P. Byrne, Inc., for a period of ten years, from directly or indirectly organizing, holding office in, or being employed by a trade association of wiring device manufacturers.

In addition to the prohibitions described above, the proposed Final Judgment orders each manufacturing defendant (1) to file with the Court and serve on the plaintiff, within sixty days of the entry of the Final Judgment, an affidavit setting forth the announcement date, effective date and percentage of change, if included in the announcement letter, of each published price list for wiring devices issued by it during the period April 1, 1976 to the date of the Final Judment; (2) to conduct such review of its prices and terms and conditions of sale for wiring device as is necessary to determine if each such price and term or condition of sale has been independently arrived at, to independently review, redetermine and reissue each price or term or conditions of sale not independently arrived at, and file with the Court and serve on the Plaintiff within sixty days from the date of the Final Judgment an affidavit certifying that each of its prices and terms or conditions of sale for wiring devices has been independently arrived at; and (3) for a period of five years, prepare and maintain, within thirty days of each change in its published prices, discounts or terms or conditions of sale, an affidavit of one of its officers or directors that such officer or director has made reasonable inquiry and that to the best of his knowledge, information and belief said change was independently arrived at and was not the result of any agreement, understanding or communication with any other wiring device manufacturer.

The proposed Final Judgment also orders each corporate defendant to take certain affirmative steps to insure compliance with its provisions. Each corporate defendant is required to (1) furnish a copy of the Judgment to each of its officers and directors and each of its employees having supervisory sales or pricing responsibility for wiring devices within ninety days of the date of entry thereof; (2) obtain and retain a written receipt therefor from each such person; and (3) file with the Court and serve on the plaintiff an affidavit as to the fact and manner of its compliance with this provision. Thereafter, for a period of ten years, each corporate defendant is required to furnish a copy of the Final Judgment to each new officer and director and each new employee with supervisory sales or pricing responsibility for wiring devices and maintain a written record, bearing the signature of such officer, director or employee, acknowledging receipt thereof. Each corporate defendant is also required, on an annual basis, to take affirmative steps to advise each of its officers and directors and each employee with supervisory sales or pricing responsibility for wiring devices of the company's and their personal obligations under the Final Judgment and the criminal penalties for violation thereof. At a minimum, such affirmative steps shall include the distribution of a written directive explaining the antitrust laws and the obligations imposed by the Final Judgment and the holding of a meeting or meetings to review and explain the antitrust laws and the Final Judgment and the obligations imposed thereby. Each corporate defendant is required to maintain a copy of each such directive and a written record of each such meeting.

The proposed Final Judgment also orders each manufacturing defendant to require as a condition of the sale or other diposition of all or substantially all of its total assets of its wiring devices business that the acquiring party file with the Court and serve on the plaintiff its consent to be bound by the Final Judgment.

The proposed Final Judgment provides that for the purpose of determining or securing compliance therewith, each corporate defendant shall permit duly authorized representatives of the Department of Justice to (1) inspect and copy all books, ledgers, accounts, correspondence, memoranda, and other records and documents in its possession or under its control which relate to any matter contained in the Final Judgment; and (2) interview any officer, director or employee of such defendant regarding any matter contained in the Final Judgment. The defendants are also required to submit such reports in writing, under oath if so requested, with respect to any matter contained in the Final Judgment as may from time to time be requested by the Attorney General or the Assistant Attorney General in charge of the Antitrust Division.

The proposed Final Judgment shall terminate ten years from the date of its entry.

IV—*Remedies Available To Private Litigants.*

Section 4 of the Clayton Act, 15 U.S.C. § 15, provides that any person who has been injured as a result of conduct prohibited by the antitrust laws may bring suit in federal court to recover three times the damages such person has suffered, plus costs and reasonabole attorney's fees, as well as for equitable relief. The United States is informed that certain persons, including certain state Attorneys General have filed suits pursuant to Section 4 of the Clayton Act for money damages and equitable relief based on claims arriving out of the combination and conspiracy alleged in the complaint in this case and that these various suits have been consolidated before the Honorable Jack B. Weinstein, Judge of the United States District Court for the Eastern District of New York, under the caption, *In Re Wiring Device Antitrust Litigation*, M.D.L. No. 341 (E.D.N.Y.) by the Judicial Panel on Multi-District Litigation.

The entry of the proposed Final Judgement will neither impair nor assist any person in bringing or prosecuting any private antitrust claim arising out of the combination and conspiracy alleged in the Complaint. Under the provisions of Section 5(a) of the Clayton Act, 15 U.S.C. 16(a), the proposed Final Judgement, if entered, may not be used by any private plaintiff as *prima facie* evidence of any matter since it will have been entered before any testimony has been taken.

V—*Procedures Available for Modification of the Proposed Final Judgment.*

As provided by the Antitrust Procedures and Penalties Act, any person believing that the proposed Final Judgment should be modified may submit written comments to Joseph H. Widmar, Department of Justice, Antitrust Division, 10th & Constitution Avenue, N.W., Washington, D.C. 20530, within the 60-day period provided by the Act. The comments and the government's responses thereto will be filed with the Court and published in the Federal Register. All comments will be given due consideration by the Department of Justice, which remains free to withdraw its consent to the proposed Final Judgment at any time prior to its entry if it should determine that some modification is appropriate and necessary to the public interest.

The proposed Final Judgment provides that the Court will retain jurisdiction over this action, and that the parties may apply to the Court for such orders as may be necessary or appropriate for its modification or enforcement.

VI—*Alternatives to the Proposed Final Judgment.*

The proposed Final Judgment will completely dispose of the United States' claim for injunctive relief. The only alternative available to the Department of Justice is a full trial of this case on the merits. Such a trial on the merits would require a substantial expenditure of public funds and judicial time. Since the relief obtained in the proposed Final Judgment is substantially similar to the relief the Department of Justice would expect to request and obtain after winning a trial on the merits, the United States believes no substantial purpose would be served by insisting on a trial on the merits and that entry of the proposed Final Judgment is in the public interest.

VII—Determinative Materials

There are no materials or documents which the United States considered determinative in formulating this proposed Final Judgment. Therefore, none are being filed along with this competitive Impact Statement.

Dated: June 1, 1979.

Peter A. Mullin,

Attorney, Department of Justice.

BILLING CODE 4410-01-M

Attorney General

Proposed Consent Decree in Action Involving Discharge of Water Pollutants by Borden Incorporated

In accordance with Departmental Policy, 28 CFR § 50.7, 38 FR 19029, notice is hereby given that a proposed consent decree in *United States of America* v. *Borden, Inc.*, Civil Action No. 79-CV-121, has been lodged with the United States District Court for the Northern District of New York. The proposed consent decree requires Borden to pay a civil penalty of $22,000 for discharges from its Baninbridge, New York facility.

The proposed consent decree may be examined at the office of the United States Attorney, Room 300, U.S. Courthouse and Post Office Building, 100 South Clinton Street, Syracuse, New York 13201; at the Region II office of the Environmental Protection Agency, Enforcement Division, 26 Federal Plaza, New York, New York 10007; and at the Pollution Control Section, Land and Natural Resources Division of the Department of Justice, Room 2645, Ninth and Pennsylvania Avenue, N.W., Washington, D.C. 20530. A copy of the proposed decree may be obtained in person or by mail from the Pollution Control Section, Land and Natural Resources Division of the Department of Justice.

The Department of Justice will receive written comments relating to the proposed consent decree for a period ending July 16, 1979. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States of America* v. *Borden, Inc.*, Civil Action No. 79-CV-121, D. J. Ref. 90-5-1-1-1064.

James W. Moorman,

Assistant Attorney General, Land and Natural Resorces Division.

BILLING CODE 4410-01-M

Proposed Consent Decree in Action to Enjoin Discharge of Water Pollutants

In accordance with Departmental Policy, 28 CFR § 50.7, 38 FR 19028, notice is hereby given that a proposed consent decree in *United States* v. *Copperweld Steel Corporation* has been lodged with the United States District Court for the Northern District of Ohio. The proposed decree would require Copperweld Steel Corporation to construct, by June 1, 1980, and to operate treatment facilities in order to achieve compliance with its NPDES permit and to pay a civil penalty of $30,000 upon entry of the judgment.

The Department of Justice will receive for thirty (30) days from the date of publication of this notice, written comments relating to the proposed judgment. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and refer to *United States* v. *Copperweld Steel Corporation*, D.J. Ref. 90-5-1-1-962.

The proposed consent decree may be examined at the office of the United States Attorney, Room 400, United States Courthouse, Cleveland, Ohio 44114, at the Region V office of the Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604, and at the Pollution Control Section, Land and Natural Resources Division, Department of Justice, (Room 2625), Ninth Street and Pennsylvania Avenue, N.W., Washington, D.C. 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Pollution Control Section, Land and Natural Resources Division, Department of Justice.

James W. Moorman,

Assistant Attorney General, Land and Natural Resources Division.

[FR Doc. 79-18669 Filed 6-13-79; 8:45 am]

BILLING CODE 4410-01-M

Proposed Consent Decree in Action to Enjoin Discharge of Water Pollutants

In accordance with Departmental Policy, 28 CFR § 50.7, 38 FR 1902, a notice is hereby given that on May 30, 1979, a proposed consent decree in *United States* v. *City of Philadelphia*, was lodged with the United States District Court for the Eastern District of Pennsylvania. The proposed decree requires the City to complete its three sewage treatment plants on an expeditious schedule, to expend $2.165 million on water pollution control projects not currently required by law, and to cease ocean dumping of sludge by December 31, 1980.

The Department of Justice will receive for 30 days from the date of publication of this notice written comments relating to the proposed judgment. Comments should be addressed to the Assistant Attorney General for the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and refer to *United States* v. *City of Philadelphia*, D.J. Ref. 90-5-1-1-923.

The proposed consent decree may be examined at the office of the United States Attorney, Eastern District of Pennsylvania, U.S. Courthouse, Philadelphia, Pennsylvania; the Clerk of the District Court, Eastern District of Pennsylvania, U.S. Courthouse, Philadelphia, Pennsylvania; and the Pollution Control Section, Land and Natural Resources Division, Department of Justice, Room 2623, Department of Justice Building, Ninth Street and Pennsylvania Avenue, NW., Washington, D.C. A copy of the proposed consent judgment may be obtained in person or by mail from the Pollution Control Section.

James W. Moorman,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Law Enforcement Assistance Administration

Proposed Change to Guide for Discretionary Grant Programs, M4500.1G, for Fiscal Year 1979

AGENCY: Law Enforcement Assistance Administration, Department of Justice.

ACTION: Publication of draft proposed guideline for the Arson Control Assistance Program.

SUMMARY: This proposed change is a draft addition to M4500.1G, *Guide for Discretionary Grant Programs*, and as such will be subject to the same regulations which govern that manual. It will not in any way impact upon the programs or regulations presently set out in M4500.1G, nor will it effect the eligibility of those individuals applying for previously announced programs.

FOR FURTHER INFORMATION CONTACT: Judith O'Connor, Program Manager, Arson Unit, Office of Criminal Justice Programs, Law Enforcement Assistance Administration, 633 Indiana Avenue, N.W., Washington, D.C. 20531.

SUPPLEMENTARY INFORMATION: The Law Enforcement Assistance Administration (LEAA) is proposing a new program as an addition to the Fiscal Year 1979 *Guide for Discretionary Grant Programs*, M4500.1G, as previously announced in the Federal Register on April 16, 1979. The Office of Criminal Justice Programs, LEAA, under the legislative authority of Title I of the Omnibus Crime Control and Safe Streets Act of 1968, as amended, 42 U.S.C. 3701,

et seq., has developed a draft program announcement for a discretionary grant program for arson control assistance. In order to ensure that interested organizations, agencies, and individuals have an opportunity to review and comment on the draft announcement, this notice and invitation to submit written views, comments, and specific recommendations are being provided. The final program announcement will also be published in the **Federal Register**. All comments, due 30 days from the publication date of this notice, will be considered in the publication of the final program announcement. Comments should be addressed to Judith O'Connor (see address above). The text of the proposed program announcement follows:

Arson Control Assistance Program

a. *Program Objective.* The objective of this program is to assist state, regional, county, and local efforts to reduce the number of deaths, the personal injury, and the economic loss related to arson, and to upgrade current knowledge regarding arson incidence and arson control approaches.

b. *Program Description.* (1) *Problem Addressed.* In terms of lives and property lost and the rate of incidence, arson has become America's fastest growing crime. A definite correlation has been drawn between the present limited capabilities of police, fire, and prosecutorial agencies in dealing with arson and the low deterrence level of the crime. Most police and fire departments lack the resources, expertise and manpower to adequately respond to the growing arson problem in their jurisdiction and prosecutors, for various reasons, are often reluctant to bring arson cases to trial. All too often there is little or no cooperation or coordination between the various agencies dealing with arson and valuable resources such as community groups and the insurance industry are not maximally involved. Extensive needs for training, data collection systems, equipment, manpower, and a framework for a coordinated arson control effort have been identified by and for each of the involved agencies. However, due to lack of funds, many of these needs go unanswered.

(2) *Results Sought.* (a) Improved capabilities of agencies involved with arson control at the state, regional, county, and local levels;

(b) Increased cooperation among those agencies involved with arson detection, investigation, and prosecution;

(c) Increased coordination of anti-arson efforts within the given jurisdiction;

(d) Increased sensitivity on the part of all involved agencies to the problem of arson and to the roles of all those engaged in combatting the crime;

(e) Improved data base and analytical capability regarding arson;

(f) Increased identification of arson fires;

(g) Increased arrest rates for arson cases;

(h) Increased prosecution rates for arson cases;

(i) Increased conviction rates for arson cases;

(j) Increased level of public awareness and participation in arson control efforts;

(k) Increased involvement on the part of the judiciary, the insurance industry, community groups, and others with interest in arson control; and

(l) Increased exchange of information.

c. *Program Strategy.* As part of the overall Department of Justice strategy to combat arson at the state and local levels, the investigative and prosecutorial expertise of federal criminal justice agencies will be integrated with the financial and technical assistance capabilities of LEAA. Grants to improve arson control capabilities will be made to state, regional, county, and local jurisdictions. Arson control in this contest includes but is not limited to such activities as detection, investigation, prosecution, prevention, and public education. Based on the recommendations of numerous studies and reports, it has been determined that a coordinated effort among police, fire, and prosecutorial agencies as well as all others in a given jurisdiction with interest in arson control is required to successfully combat the crime. Funds will be available to support programs constituting such an integrated approach.

Cooperation and coordination are the key words in this effort. Applicants must provide such documentation as letters of commitment and memoranda of agreement indicating involvement and participation on the part of all agencies (including but not limited to police, fire, and prosecution) connected with the overall arson control effort within that jurisdiction.

Particular attention will be paid to those applications demonstrating an innovative approach to dealing with arson.

d. *Application Requirements.* The following elements must be included in each project and described in Part IV of the application form. Selection of grantees will be based in large part on how well each of these elements is addressed.

(1) A detailed description of the arson problem in the area to be served, including such relevant data as incidence figures, dollar value of property loss, and personal injury;

(2) A description of the service area, including but not limited to geographical aspects, population figures, and types and numbers of building structures;

(3) A description of applicable laws, pending legislation, court or executive orders, etc., within or affecting the jurisdiction. In particular, this section should address the specific authorities, responsibilities, and constraints which these laws or orders place on the various agencies involved;

(4) A description of existing anti-arson efforts by police, fire, and prosecutorial agencies and others, including arrest and conviction rates, existing cooperative agreements, arson control-related activities of community groups, available services, gaps in such services, and any other relevant information;

(5) A description of how the planned approach will meet the needs identified in the assessment;

(6) A specific workplan, including timetable, describing the activities of the project and the results expected;

(7) An organization chart and job descriptions for all project personnel. Details concerning specific responsibilities and relevant authority must be provided;

(8) A network chart indicating the relationship between and among all involved agencies;

(9) Documented proof of cooperation and coordination among all involved agencies (including but not limited to police, fire, and prosecution). This should include any and all letters of commitment (to the roles and activities described in the application) and memoranda of agreement;

(10) Listing of past and present arson-related funding received from state or federal sources (in dollars and project type) and their relation to this project;

(11) Evidence that the state and local A–95 clearinghouses, regional planning unit, and state planning agency have received copies of the application. (Note: actual grant award is dependent upon receipt of comments from all of these agencies);

(12) An evaluation component, including a description of the system available to collect relevant data (see Evaluation Requirements section for further detail); and

(13) A detailed assumption-of-cost plan.

e. *Data Collection Effort.* In addition to the pre-award data requested above, grantees will be required to develop and maintain a collection system to gather relevant data from which accurate conclusions regarding overall program program performance can be drawn. Technical assistance will be available to aid in establishing or modifying this system. Use of the system should be directly tied in with the project's evaluation plan. Applicants are also asked to describe existing state and local reporting requirements.

f. *Dollar Range and Number of Grants.* Funds will be made available to arson control programs at the state, regional, county, and local levels. Up to four (4) grants, not to exceed $600,000 each, will be made to support state-level efforts; up to six (6) grants, not to exceed $200,000 each, will go to jurisdictions with populations at or over 100,000; and up to five (5) grants, not to exceed $125,000 each, will be made available to jurisdictions with populations below 100,000.

g. *Eligibility.* All state, regional, county, or local units of government, or sub-units thereof, or a combination of units at the same or different level may apply for funds. Sub-units must apply through their larger unit (i.e., a police department through its city government). In each case, unless the state waives the right, the state planning agency will serve as the grantee and the applicant will be the subgrantee.

h. *Application Deadline and Submission Procedures.* (1) All applications for fiscal year 1979 funds must be received no later than August 29, 1979. No applications will be considered if received after that date; and

(2) In addition to the copies of the application sent to the state and local A–95 clearinghouses, the regional planning unit, and the state planning agency, the original plus two (2) copies of the entire application package should be sent to: The Control Desk, GCMD/FMGAB, Office of the Comptroller, LEAA, 633 Indiana Avenue, N.W., Washington, D.C. 20531.

i. *Criteria for Selection.* (1) Applicants will be rated on the extent to which they respond to the requirements of this program description and, in particular, the Application Requirements section. Applicants must provide evidence of an administrative structure that has the capability and authority to effectively achieve the project's stated objectives;

(2) Applicants demonstrating existing independent efforts in coordinated arson control will receive preference over those which do not; and

(3) Only one grant will be awarded in any urban area (SMSA).

j. *Evaluation Requirements.* The projects funded under the Arson Control Assistance Program have been selected for intensive impact and cost-benefit evaluation. Therefore, each application must contain a separate Evaluation Plan which states the project's objectives in measurable terms, contains a specific evaluation methodology, and nominates for LEAA approval an evaluation subcontractor whose services are obtained in conformity with the requirements of LEAA Guideline Manual M7100.1 (effective edition). The costs of the evaluation shall be included in the project budget, identified as a separate grant activity on the application form, and shall not exceed fifteen (15) percent of the total project cost. Technical assistance will be available from LEAA in the development and conduct of the project evaluations.

In addition, an evaluation of the overall Arson Control Assistance Program is planned for fiscal year 1980. Grantees must attest to their willingness to share their data with the national evaluator as well as providing any other cooperation required to perform such an evaluation.

k. *Contact:* Arson Unit, Office of Criminal Justice Programs, Law Enforcement Assistance Administration, Room 1158, Washington, D.C. 20531 (202) 724–7661 or 724–7662.

Henry S. Dogin,

Administrator, Law Enforcement Assistance Administration.

BILLING CODE 4410-01-M

NATIONAL LABOR RELATIONS BOARD

Revision of Statement of Organization and Functions

AGENCY: National Labor Relations Board.

ACTION: Revision of statement of organization and functions.

SUMMARY: The National Labor Relations Board is revising its descriptions of the central and field organizations of the Board, listing all Board officials and their official job functions. An appendix to this document lists the locations of all regional and subregional offices, as well as the areas served by these offices.

EFFECTIVE DATE: June 14, 1979.

FOR FURTHER INFORMATION CONTACT: George A. Lest, Esquire, Associate Executive Secretary, National Labor Relations Board, 1717 Pennsylvania Avenue, NW., Washington, D.C. 20570.

National Labor Relations Board

*Organization and Functions**

The National Labor Relations Board is an independent agency created by the National Labor Relations Act, enacted July 5, 1935 (49 Stat. 449; 29 U.S.C. 151–166); as amended by the Labor Management Relations Act, 1947, enacted June 23, 1947 (61 Stat. 136; 29 U.S.C. 151–167); amended by an Act of October 21, 1951 (65 Stat. 601; 29 U.S.C. 158, 159, 188); as amended by the Labor-Management Reporting and Disclosure Act of 1959, enacted September 14, 1959 (73 Stat. 519; 29 U.S.C. 141, et seq.); and as amended by an Act of July 26, 1974 (88 Stat. 395–397; 29 U.S.C. 152, et seq.). The responsibilities and functions of the Agency under the statutes are carried out through an organization directed and controlled by the National Labor Relations Board and its General Counsel, who, in addition to independent authority under the statute, exercises other authority by delegation from the Board.

Description of Organization

Description of Central Organization

Sec. 201 *The Board.* The Board, composed of five Members, has its central and principal office in Washington, D.C. Each of the Members is appointed by the President, with the approval of the Senate, for a term of 5 years. One Member is designated by the President to serve as Chairman of the Board. The Board is created by virtue of the provisions of the National Labor Relations Act, 49 Stat. 449, as amended by the Labor Management Relations Act, 1947, 61 Stat. 136, and the Labor-Management Reporting and Disclosure Act, 1959, 73 Stat. 519.

The Board has two principal functions under the National Labor Relations Act, as amended: (1) The prevention of statutory defined unfair labor practices on the part of employers and labor organizations or the agents of either, and (2) the conduct of secret ballot elections among employees in appropriate collective-bargaining units to determine whether or not they desire to be represented by a labor organization.

The Board is further empowered by the Act:

*32 FR 9626, as amended by 37 FR 12826, as further amended by this document.

To conduct secret ballot elections among employees who have been covered by a union-shop agreement, when requested by 30 percent of the employees, to determine whether or not they wish to revoke their union's authority to make such agreements.

To determine in cases involving jurisdictional disputes which of the competing groups of workers is to be assigned the work task involved.

To conduct secret ballot elections among employees in national emergency situations.

The Board exercises full and final authority over the Office of the Executive Secretary, the Office of the Solicitor, and the Division of Information. The Board appoints administrative law judges and, subject to the provisions of the Administrative Procedure Act and section 4(a) of the National Labor Relations Act, as amended, exercises authority over the Division of Judges. Each Board Member exercises full and final authority over a staff of legal counsel, each staff being under the immediate supervision of the chief counsel of the respective Board Member.

The Board, with the General Counsel, approves the budget, opens new offices as deemed necessary, and appoints Regional Directors and Officers-in-Charge.

The Board establishes and publishes the Agency's Rules and Regulations and Statements of Procedure.

Sec. 201.1 *The Board's staff.* The Board's staff consists (in addition to its chief counsel and legal counsel referred to in sec. 201, above) of the Office of the Executive Secretary, the Office of the Solicitor, the Division of Judges, and the Division of Information.

Sec. 201.1.1 *Office of the Executive Secretary.* The Executive Secretary is the chief administrative and judicial management officer of the Board, represents the Board in dealing with parties to cases and communicates on behalf of the Board with labor organizations, employers, employees, Members of Congress, othe agencies, and the public. The Office of the Executive Secretary receives, dockets, and acknowledges all formal documents filed with the Board; issued and serves on the parties to cases all Board Decisions and Orders; and certifies copies of all documents which are a part of the Board's files or records.

Sec. 201.1.2 *Office of the Solicitor.* The Solicitor is the Board's chief legal officer and advises the Board on questions of law and policy; adoption, revision, or rescission of Rules and Regulations and Statements of Procedure; pending legislation amending or affecting the Act; litigation affecting the Board, etc. The Office of the Solicitor drafts advisory opinions and declaratory orders for the Board concerning whether the Board would assert jurisdiction in a particular case.

Sec. 201.1.3 *Division of Judges.* The Chief Administrative Law Judge supervises the operations of this division. Administrative law judges are responsible for the conduct of all hearings and for the preparation of all administrative law judges' decisions in unfair labor practice cases. The Chief Administrative Law Judge has final authority to designate administrative law judges who conduct hearings and make rulings; to assign dates for hearings presided over by administrative law judges; and to rule upon requests for extensions of time within which to file briefs, proposed findings, and conclusions.

Sec. 201.1.4 *Division of Information.* The Director of Information maintains liaison with the press and other communications media and prepares press and other types of public releases. The Director furnishes information to members of the general public who wish to be informed concerning the actions of the Board and the General Counsel and arranges for the distribution of decisions and weekly summaries of decisions.

Sec. 202 *The General Counsel.* The General Counsel is appointed by the President, with the approval of the Senate, for a term of 4 years. The General Counsel derives specific authority for some functions of the office from the provisions of section 3(d) of the National Labor Relations Act, as amended, and derives certain other authority by delegation from the Board (20 FR 2175, as amended at 23 FR 6966, 24 FR 666, and 26 FR 3911). By virtue of these combined authorities, the General Counsel exercises general supervision over attorneys employed by the Board (other than administrative law judges, legal counsel to Board Members, the Executive Secretary, and the Solicitor), and over the officers and employees in the regional offices. The General Counsel has final authority, on behalf of the Board, in respect to the investigation of charges and issuance of complaints under section 10 and in respect to the prosecution of such complaints before the Board; prosecutes, on behalf of the Board, injunction proceedings pursuant to section 10(e) and 10(j) of the Act; handles court of appeals proceedings to enforce or review Board orders, other miscellaneous court litigation, and efforts to obtain compliance with Board orders; and is responsible for the processing by field personnel of representation petitions under section 9 of the Act and jurisdictional dispute cases under section 10(k), and in the conduct of employee referenda under sections 209(b) and 203(c) of the Labor Management Relations Act, 1947.

The Deputy General Counsel is vested with the authority to speak and act for the General Counsel in all phases of the responsibilities of the office to the full extent permitted by law and is responsible for overall coordination of the General Counsel's organization. References to the General Counsel hereinafter may refer to either the General Counsel or Deputy General Counsel collectively.

Sec. 202.1 *The General Counsel's Washington Staff.* The General Counsel's Washington staff, reporting to the General Counsel and the Deputy General Counsel, consists of four main divisions: Division of Operations Management, Division of Advice, Division of Enforcement Litigation, and Division of Administration.

Sec. 202.1.1 *Division of Operations Management.* The Associate General Counsel for Operations Management assists in the coordination and integration of all operations in Washington and of Washington operations with the field offices; develops systematic methods for the integration of case processing activities in all field and Washington operational units and for the implementation of General Counsel and Board policies, including time and quality standards for case processing at all stages; and is responsible for continuing liaison with field offices and for supervising and coordinating both substantive and administrative phases of their operations.

Sec. 202.1.2 *Division of Advice.* The Associate General Counsel for Advice is responsible for legal research on and analysis of broad areas of labor law administration, for legal advice to Regional Directors on all unfair labor practice cases involving novel or difficult legal issues, including questions involving mandatory or discretionary injunction proceedings, for litigating injunction cases on appeal from a district court adjudication, for legal information retrieval systems, and for analyses and digests to be used by both the agency staff and the public.

Sec. 202.1.3 *Division of Enforcement Litigation.* The Associate General Counsel for Enforcement Litigation is responsible for all agency litigation in the United States Courts of Appeals and the Supreme Court of the United States, whether within the General Counsel's

statutory authorization or delegated by the Board, including contempt litigation and enforcement and review of Decisions and Orders of the Board, and is also responsible for miscellaneous litigation in Federal and state courts to protect the Agency's processes and functions.

The Office of Appeals is another principle part of the Division of Litigation. This Office reviews appeals from Regional Directors' refusals to issue complaints in unfair labor practice cases and recommends the action to be taken thereon by the General Counsel. Pursuant to request, the Director of the office may also hear informal oral presentations in Washington of argument by counsel or other representatives of the parties in support of, or in opposition to, the appeals.

Sec. 202.1.4 *Division of Administration.* The Director of Administration is responsible generally for the administrative management, support services, and fiscal functions of the General Counsel. These activities are carried out with the assistance of branches dealing with financial management, personnel, facilities and services, data systems, management and audit, security and safety, and library services. These functions, as applicable, are also performed on behalf of the Board and its Members.

Description of Field Organization

Sec. 203 *Regional offices.* There are 33 regional offices through which the Board conducts its business. Certain of the regions have subregional offices or resident offices in addition to the central regional office. The areas constituting the regions and the location of the regional, subregional, and resident offices are set forth in an appendix hereto. Each regional office staff is headed by a Regional Director appointed by the Board on the recommendation of the General Counsel and includes a Regional Attorney, Assistant to the Regional Director, field attorneys, field examiners, and clerical staff. Each subregional office is headed by an Officer-in-Charge appointed in the same manner as the Regional Directors. Each resident office is headed by a Resident Officer.

Sec. 203.1 *Regional Directors.* Under the general supervision of the Office of the General Counsel, the Regional Directors supervise a staff of attorneys and field examiners in the processing of representation, unfair labor practice, and jurisdictional dispute cases. The Regional Directors are empowered to issue notices of hearing in representation cases; issue complaints in unfair labor practice cases; conduct elections pursuant to agreement of the parties or direct elections pursuant to the decision making authority delegated by the Board to them under section 3(b) of the Act, and issue certification of representatives or certify the results of elections where appropriate; conduct employee referenda under section 209(b) and 203(c) of the Labor Management Relations Act; obtain settlement of unfair labor practice charges; obtain compliance with administrative law judge, Board, and court decisions; investigate and report on, or decide, objections to elections and challenges to determinative ballots; and otherwise act in behalf of the General Counsel in the discharge of the statutory and delegated functions of that office.

In addition, Regional Directors may initiate and prosecute in the district courts injunctions under section 10(1) of the Act. They also have authority to process petitions for unit clarification, for amendment of certification, and for rescission of a labor organization's authority to make an agreement pursuant to the proviso of section 8(a)(3).

Regional Directors are also responsible for the administrative management of their offices and of any subregional and resident offices in their regions and make initial determinations of FOIA requests for materials in their custody.

Sec. 203.2 *Regional Attorneys.* The Regional Attorneys are the principal legal advisers to the Regional Directors and, as the chief legal officers in the regions, exercise supervisory authority over office attorneys and field examiners in various aspects of their work. They may exercise any authority given attorneys and field examiners in the region.

Sec. 203.3 *Assistants to the Regional Directors.* The Assistants to the Regional Directors are responsible for overall supervision and coordination of investigations and compliance, exercise supervisory authority over office attorneys and field examiners in various aspects of their work, and provide assistance to the Regional Director with respect to various administrative functions.

Sec. 203.4 *Field attorneys.* The field attorneys are charged in general with the duty of performing all necessary legal services for the Regional Directors in the regions. They are directly responsible to the Regional Attorneys, and through them to the Regional Directors, for performance of these services. Under the direction of the Regional Attorneys, they:

(a) Investigate petitions concerning the representation of employees (including the taking of secret ballots of employees), in accordance with section 9(c) of the National Labor Relations Act;

(b) Conduct hearings in proceedings under section 9 of the National Labor Relations Act and section 7(b) of the Fair Labor Standards Act;

(c) Investigate charges of unfair labor practices under section 8 of the Act;

(d) Appear and participate as counsel in Board hearings and, when designated, in other Board litigation and proceedings;

(e) Prosecute any inquiry necessary to the functions of the General Counsel, have access to and the right to copy evidence, administer oaths and affirmations, examine witnesses, and receive evidence;

(f) Perform all necessary acts required of them in connection with the foregoing and the published rules and regulations of the Board.

Sec. 203.5 *Field examiners.* The field examiners in the regional offices are directly responsible to the Regional directors and work under their direction. Essentially, they:

(a) Investigate petitions concerning the representation of employees, in accordance with section 9 of the national Labor Relations Act, and conduct secret ballot elections where such procedure is required under the Act;

(b) Investigate charges of unfair labor practices under section 8 of the Act, have access to and the right to copy evidence, administer oaths and affirmations, examine witnesses, and receive evidence;

(c) Conduct hearings in proceedings under section 9 of the national Labor Relations Act and section 7(b) of the Fair Labor Standards Act;

(d) Perform all necessary acts required of them, in connection with the foregoing and the published rules and regulations of the Board.

Sec. 203.6 *Officers-in-Charge and Resident Officers.* The Officer-in-charge of a subregional office or the Resident Office of a resident office is directly responsible to the Regional director and, under their direction, supervises the processing of cases arising within the geographical area of the office. Under special delegation from the General Counsel, an Officer-in-Charge may be authorized to exercise the functions of the Regional director, subject to statutory limitations.

Effective date. This amended Description of organization shall be effective as of June 14, 1979.

Appendix—Regional and Subregional Offices

Alphabetical list of States showing location in relation to regions and subregions. (Note that respective region number follows subregion number to facilitate locating areas services.)

	Region and Subregion Nos.
Alabama	10,15
Alaska	19
Arizona	28
Arkansas	26
California	20, 21, 31, 32
Colorado	27
Connecticut	1, 2
Delaware	4, 5
District of Columbia	5
Florida	12, 15
Georgia	10
Hawaii	S-37 (20)
Idaho	19
Illinois	13, 14, 33
Indiana	9, 13, 25
Iowa	16, 33
Kansas	17
Kentucky	9, 25
Louisiana	15
Maine	1
Maryland	5
Massachusetts	1
Michigan	7, 30
Minnesota	18
Mississippi	15, 26
Missouri	14, 17
Montana	19
Nebraska	17
Nevada	31,32
New Hampshire	1
New Jersey	4, 22
New Mexico	26
New York	2, 3, 29
North Carolina	11
North Dakota	18
Ohio	8, 9
Oklahoma	16
Oregon	S-36 (19)
Pennsylvania	4, 6
Rhode Island	1
South Carolina	11
South Dakota	18
Tennessee	5, 10, 26
Texas	16, 23, 26
Utah	27
Vermont	1
Virginia	5
Washington	19, S-36 (19)
West Virginia	5, 6, 9
Wisconsin	18, 30
Wyoming	27
Puerto Rico	24
U.S. Virgin Islands	24

Areas Served by Regional and Subregional Offices*

(Listed in numerical order except that subregions appear directly under respective regions.)

Region 1. **Boston, Massachusetts. Services Maine, New Hampshire, Vermont, Massachusetts, and Rhode Island, and all Connecticut counties except Fairfield.**

Region 2. **New York, New York. Services Fairfield County in Connecticut and Bronx, New York, Orange, Putnam, Rockland, and Westchester Counties in New York.**

Region 3. **Buffalo, New York. Services all New York State Counties except the metropolitan area counties serviced by Regions 2 and 29.**

Persons may also obtain service at the resident office located in Albany, New York.

Region 4. Philadelphia, Pennsylvania. In Pennsylvania, services Adams, Berks, Bradford, Bucks, Carbon, Chester, Columbia, Cumberland, Dauphin, Delaware, Juniata, Lackawanna, Lancaster, Lebanon, Lehigh, Luzerne, Lycoming, Monroe, Montgomery, Montour, Northampton, Northumberland, Perry, Philadelphia, Pike, Schuylskill, Snyder, Sullivan, Susquehanna, Tioga, Union, Wayne, Wyoming, and York Counties; in New Jersey, services Atlantic, Burlington, Camden, Cape May, Cumberland, Gloucester, Ocean, and Salem Counties; and in Delaware, services New Castle County.

Region 5. Baltimore, Maryland. Services Maryland and Virginia; the District of Columbia; Kent and Sussex Counties in Delaware; the city of Bristol in Sullivan County, Tenn; and, in West Virginia, Berkley, Grant, Hampshire, Hardy, Jefferson, Mineral, Morgan, and Pendleton Counties.

Persons may also obtain service at the resident office located in Washington, D.C.

Region 6. Pittsburgh, Pennsylvania. In Pennsylvania, services Allegheny, Armstrong, Beaver, Bedford, Blair, Butler, Cambria, Cameron, Centre, Clarion, Clearfield, Clinton, Crawford, Elk, Erie, Fayette, Forest, Franklin, Fulton, Greene, Huntingdon, Indiana, Jefferson, Lawrence, McKean, Mercer, Mifflin, Potter, Somerset, Venango, Warren, Washington, and Westmoreland Counties; in West Virginia, Barbour, Brooke, Doddridge, Hancock, Harrison, Lewis, Marion, Marshall, Monongalia, Ohio, Pocahontas, Preston, Randolph, Taylor, Tucker, Upshur, Webster, and Wetzel Counties.

Region 7. Detroit, Michigan. In Michigan, services Alcona, Allegan, Alpena, Antrim, Arenac, Barry, Bay, Benzie, Berrien, Branch, Calhoun, Cass, Charlevoix, Cheboygan, Clare, Clinton, Crawford, Eaton, Emmet, Genesee, Gladwin, Grand Traverse, Gratiot, Hillsdale, Huron, Ingham, Ionia, Iosco, Isabella, Jackson, Kalamazoo, Kalkaska, Kent, Lake, Lapeer, Leelanau, Lenawee, Livingston, Macomb, Mainistee, Mason, Mecosta, Midland, Missaukee, Monroe, Montcalm, Montmorency, Muskegon, Newaygo, Oakland, Oceana, Ogemaw, Osceola, Oscoda, Otsego, Ottawa, Presque Isle, Roscommon, Saginaw, St. Clair, St. Joseph, Sanilac, Shiawassee, Tuscola, Van Buren, Washtenaw, Wayne, and Wexford Countries.

Region 8. Cleveland, Ohio. In Ohio, services Allen, Ashland, Ashtabula, Auglaize, Belmont, Carroll, Champaign, Columbiana, Coshocton, Crawford, Cuyahoga, Darke, Defiance, Delaware, Erie, Fulton, Geauga, Guernsey, Hancock, Hardin, Harrison, Henry, Holmes, Huron, Jefferson, Knox, Lake, Licking, Logan, Lorain, Lucas, Mahoning, Marion, Medina, Mercer, Miami, Morrow, Muskingum, Ottawa, Paulding, Portage, Putnam, Richland, Sandusky, Seneca, Shelby, Stark, Summit, Trumbull, Tuscarawas, Union, Van Wert, Wayne, Williams, Wood, and Wyandot Counties.

Region 9. Cincinnati, Ohio. In Ohio, services Adams, Athens, Brown, Butler, Clark, Clermont, Clinton, Fairfield, Fayette, Franklin, Gallia, Greene, Hamilton, Highland, Hocking, Jackson, Lawrence, Madison, Meigs, Monroe, Montgomery, Morgan, Noble, Perry, Pickaway, Pike, Preble, Ross, Scioto, Vinton, Warren, and Washington Counties; services all counties in Kentucky except Daviess and Henderson; in Indiana, services Clark, Dearborn, and Floyd Counties; and in West Virginia, services Boone, Braxton, Cabell, Calhoun, Clay, Fayette, Gilmer, Greenbrier, Jackson, Kanawha, Lincoln, Logan, McDowell, Mason, Mercer, Mingo, Monroe, Nicholas, Pleasants, Putnam, Raleigh, Ritchie, Roane, Summers, Tyler, Wayne, Wirt, Wood, and Wyoming Counties.

Region 10. Atlanta, Georgia. Services Georgia; in Tennessee, services Anderson, Bledsow, Blount, Bradley, Campbell, Carter, Clairborne, Clay, Cocke, Cumberland, Fentress, Grainger, Greene, Grundy, Hamblen, Hamilton, Hancock, Hawkins, Jackson, Jefferson, Johnson, Knox, Loudon, McMinn, Marion, Meigs, Monroe, Morgan, Overton, Pickett, Polk, Putnam, Rhea, Roane, Scott, Sequatchie, Sevier, Sullivan, Unicoi, Union, Van Buren, Warren, Washington, and White Counties; in Alabama, services Autauga, Bibb, Blount, Calhoun, Chambers, Cherokee, Chilton, Clay, Cleburne, Colbert, Coosa, Cullman, DeKalb, Elmore, Etowah, Fayette, Franklin, Greene, Hale, Jackson, Jefferson, Lamar, Lauderdale, Lawrence, Lee, Limestone, Madison, Marion, Marshall, Morgan, Perry, Pickens, Randolph, St. Clair, Shelby, Sumter, Talladega, Tallapoosa, Tuscaloosa, Walker, and Winston Counties.

Persons may also obtain service at the resident office in Birmingham, Alabama.

Region 11. Winston-Salem, North Carolina. Services North Carolina and South Carolina.

Region 12. Tampa, Florida. In Florida, services Alachua, Baker, Bradford, Brevard, Broward, Charlotte, Citrus, Clay, Collier, Columbia, Dade, DeSoto, Dixie, Duval, Flagler, Gadsden, Gilchrist, Glades, Hamilton, Hardee, Hendry, Hernando, Highlands, Hillsborough, Indian River, Jefferson, Lafayette, Lake, Lee, Leon, Levy, Madison, Manatee, Marion, Martin, Monroe, Nassau, Okeechobee, Orange, Osceola, Palm Beach, Pasco, Pinella, Polk, Putnam, St. Johns, St. Lucie, Sarasota, Seminole, Sumter, Suwanee, Taylor, Union, Volusia, and Wakulla Counties.

Persons may also obtain service at the resident offices in Coral Gables and Jacksonville, Florida.

Region 13. Chicago, Illinois. Services Cook, DuPage, Kane, Lake and Will Counties in Illinois, and Lake County in Indiana.

Region 14. St. Louis, Missouri. In Illinois, services Adams, Alexander, Bond, Brown, Calhoun, Christian, Clark, Clay, Clinton, Coles, Crawford, Cumberland, Edgar, Edwards, Effingham, Fayette, Franklin, Gallatin, Greene, Hamilton, Hardin, Jackson, Jasper, Jefferson, Jersey, Johnson, Lawrence, Macoupin, Madison, Marion, Massac, Monroe, Montgomery, Perry, Pike, Pope, Pulaski, Randolph, Richland, St. Clair, Saline, Scott, Shelby, Union, Wabash, Washington, Wayne, White, and Williamson counties; and in Missouri, services Audrain, Bollinger, Butler, Callaway, Cape Girardeau, Carter, Clark, Crawford, Dent, Dunklin, Franklin, Gasconade, Independent City of St. Louis, Iron, Jefferson, Knox, Lewis, Lincoln, Madison, Maries, Marion, Mississippi,

*Addresses and telephone numbers of the field offices can be found on pp. 329–332.

Monroe, Montgomery, New Madrid, Oregon, Osage, Pemiscot, Perry, Phelps, Pike, Ralls, Reynolds, Ripley, St. Charles, St. Francois, St. Louis, St. Genevieve, Scotland, Scott, Shannon, Shelby, Stoddard, Warren, Washington, and Wayne Counties.

Region 15. New Orleans, Louisiana. Services Louisiana; in Mississippi, services Adams, Amite, Claiborne, Clarke, Copiah, Covington, Forrest, Franklin, George, Greene, Hancock, Harrison, Hinds, Issaquena, Jackson, Jasper, Jefferson, Jefferson Davis, Jones, Kemper, Lamar, Lauderdale, Lawrence, Leake, Lincoln, Madison, Marion, Neshoba, Newton, Pearl River, Perry, Pike, Rankin, Scott, Sharkey, Simpson, Smith, Stone, Walthall, Warren, Wayne, Wilkinson, and Yazoo Counties; in Alabama, services Baldwin, Barbour, Bullock, Butler, Choctaw, Clarke, Coffee, Conecuh, Covington, Crenshaw, Dale, Dallas, Escambia, Geneva, Henry, Houston, Lowndes, Macon, Marengo, Mobile, Monroe, Montgomery, Pike, Russell, Washington, and Wilcox Counties; in the State of Florida, the counties of Bay, Calhoun, Excambia, Franklin, Gulf, Holmes, Jackson, Liberty, Okaloosa, Santa Rosa, Walton, and Washington.

Region 16. Forth Worth, Texas. Services Oklahoma and the following counties in Texas: Anderson, Andrews, Angelina, Archer, Armstrong, Bailey, Baylor, Bell, Bordon, Bosque, Bowie, Brewster, Briscoe, Brown, Burnet, Callahan, Camp, Carson, Cass, Castro, Cherokee, Childress, Clay, Cochran, Coke, Coleman, Collin, Collingsworth, Comanche, Concho, Cooke, Coryell, Cottle, Crane, Crockett, Crosby, Dallam, Dallas, Dawson, Deaf Smith, Delta, Denton, Dickens, Donley, Eastland, Ector, Ellis, Erath, Falls, Fannin, Fisher, Floyd, Foard, Franklin, Freestone, Gaines, Garza, Glasscock, Gray, Grayson, Gregg, Hale, Hall, Hamilton, Hansford, Hardeman, Harrison, Hartley, Haskell, Hemphill, Henderson, Hill, Hockley, Hood, Hopkins, Houston, Howard, Hunt, Hutchinson, Irion, Jack, Jeff Davis, Johnson, Jones, Kaufman, Kent, Kimple, King, Knox, Lamara Lamb, Lampasas, Leon, Limestone, Lipscomb, Llano, Loving, Lubbock, Lynn, Madison, Marion, Martin, Mason, McCulloch, McLennan, Menard, Midland, Milam, Mills, Mitchell, Montague, Moore, Morris, Motley, Nacogdoches, Navarro, Nolan, Ochiltree, Oldham, Palo Pinto, Panola, Parker, Parmer, Pecos, Potter, Presidio, Rains, Randall, Reagan, Red River, Reeves, Roberts, Robertson, Rockwall, Runnels, Rusk, Sabine, San Augustine, San Saba, Schleicher, Scurry, Schackelford, Shelby, Sherman, Smith, Somervell, Stephens, Sterling, Stonewall, Sutton, Swisher, Tarrant, Taylor, Terrell, Terry, Throckmortion, Titus, Tom Green, Trinity, Upshur, Upton, Van Zandt, Ward, Wheeler, Witchita, Wilbarger, Williamson, Winkler, Wise, Wood, Yoakum, and Young.

Persons may also obtain service at the resident office located in Tulsa, Oklahoma.

Region 17. Kansas City, Kansas. Services Nebraska and Kansas and the following counties in Missouri: Adair, Andrew, Atchison, Barry, Barton, Bates, Benton, Boone, Buchanan, Caldwell, Camden, Carroll, Cass, Cedar, Charlton, Christian, Clay, Clinton, Cole, Cooper, Dade, Dallas, Daviess, De Kalb, Douglas, Gentry, Greene, Grundy, Harrison, Henry, Hickory, Holt, Howard, Howell, Jackson, Jasper, Johnson, Laclede, Lafayette, Lawrence, Linn, Livingstone, McDonald, Macon, Mercer, Miller, Moniteau, Morgan, Newton, Nodaway, Ozark, Pettis, Platte, Polk, Pulaski, Putnam, Randolph, Ray, St. Clair, Slaine, Schuyler, Stone, Sullivan, Taney, Texas, Vernon, Webster, Worth, and Wright.

Region 18. Minneapolis, Minnesota. Services North Dakota, South Dakota, and Minnesota and the following counties in Iowa: Adair, Adams, Allamakee, Appanoose, Audubon, Benton, Black Hawk, Boone, Bremer, Buchanan, Buena Vista Butler, Calhoun, Carroll, Cass, Cedar, Cerro Gordo, Cherokee, Chickasaw, Clarke, Clay, Clayton, Crawford, Dallas, Davis, Decatur, Delaware, Dickinson, Emmett, Fayette, Floyd, Franklin, Fremont, Greene, Grundy, Guthrie, Hamilton, Hancock, Hardin, Harrison, Henry, Howard, Humboldt, Ida, Iowa, Jasper, Jefferson, Johnson, Jones, Keokuk, Kossuth, Linn, Lucas, Lyon, Madison, Mahaska, Marion, Marshall, Mills, Mitchell, Monona, Monroe, Montgomery, O'Brien, Osceola, Page, Palo Alton, Plymouth, Pocahontas, Polk, Pottawattamie, Poweshiek, Ringgold, Sac, Shelby, Sioux, Story, Tama, Taylor, Union, Van Buren, Wapello, Warren, Washington, Wayne, Webster, Winnebago, Winneshiek, Woodbury, Worth, and Wright; and the following counties in the State of Wisconsin: Ashland, Barron, Bayfield, Buffalo, Burnett, Chippewa, Clark, Douglas, Dunn, Eau Claire, Iron, Jackson, Pepin, Pierce, Polk, Price, Rusk, St. Croix, Sawyer, Taylor, Trempealeau, and Washburn.

Region 19. Seattle, Washington. Services Alaska, Montana, Idaho, and all counties in Washington except Clark.

Subregion 36. Portland, Oregon. Services Oregon and Clark County in Washington.

Persons may also obtain service at the resident office located in Anchorage, Alaska.

Region 20. San Francisco, California. Services the following counties in California: Butte, Colusa, Del Norte, Glenn, Humboldt, Lake, Lassen, Marin, Mendocino, Modoc, Napa, Nevada, Placer, Plumas, Sacramento, San Francisco, San Mateo, Shasta, Sierra, Siskiyou, Solano, Sonoma, Sutter, Tehama, Trinity, Yolo, and Yuba.

Subregion 37. Honolulu, Hawaii. Services Hawaii.

Region 21. Los Angeles, California. Services the following counties in California: Imperial, Orange, Riverside, and San Diego, and that portion of Los Angeles County lying east of Harbor Freeway and south of Pasadena Freeway (Arroyo Boulevard, U.S. Highway 66).

Persons may also obtain service at the resident office located in San Diego, California.

Region 22. Newark, New Jersey. In New Jersey, services Bergen, Essex, Hudson, Hunterdon, Mercer, Middlesex, Monmouth, Morris, Passaic, Somerset, Sussex, Union, and Warren Counties.

Region 23. Houston, Texas. In Texas, services Aransas, Atascosa, Austin, Bandera, Bastrop, Bee, Bexar, Blanco, Brazoria, Brazos, Brooks, Burleson, Caldwell, Calhoun, Cameron, Chambers, Coloredo, Comal, De Witt, Dimmit, Duval, Edwards, Fayette, Fort Bend, Frio, Galveston, Gillespie, Goliad, Gonzales, Grimes, Guadalupe, Hardin, Harris, Hays, Hidalgo, Jackson, Jasper, Jefferson, Jim Hogg, Jim Wells, Karnes, Kendall, Kenedy, Kerr, Kinney, Kleberg, La Salle, Lavaca, Lee, Liberty, Live Oak, McMullen, Matagorda, Maverick, Medina, Montgomery, Newton, Nueces, Orange, Polk, Real, Refugio, San Jacinto, San Patricio, Starr, Travis, Tyler, Uvalde, Val Verde, Victoria, Walker, Waller, Washington, Webb, Wharton, Willacy, Wilson, Zapata, and Zavala Counties.

Persons may also obtain service at the resident office located in San Antonio, Texas.

Region 24. Hato Rey, Puerto Rico. Services Puerto Rico and the U.S. Virgin Islands.

Region 25. Indianapolis, Indiana. Services Indiana, with the exception of Lake, Clark, Dearborn, and Floyd Counties, and Daviess and Henderson Counties in Kentucky.

Region 26. Memphis, Tennessee. Services Arkansas and the following counties in Tennessee: Bedford, Benton, Cannon, Carroll, Cheathamm, Chester, Coffee, Crockett, Davidson, Decatur, De Kalab, Dickson, Dyer, Fayette, Franklin, Gibson, Giles, Hardeman, Hardin, Haywood, Henderson, Henry, Hickman, Houston, Humphreys, Lake, Lauderdale, Lawrence, Lewis, Lincoln, McNairy, Macon, Madison, Marshall, Maury, Montgomery, Moore, Obion, Perry, Robertson, Rutherford, Shelby, Smith, Stewart, Sumner, Tipton, Trousdale, Wayne, Weakley, Williamson, and Wilson; also services the following counties in Mississippi: Alcorn, Attala, Benton, Bolivar, Calhoun, Carroll, Chickasaw, Choctaw, Clay, Coahoma, De Soto, Grenada, Holmes, Humphreys, Itawamba, Lafayette, Lee, Leflore, Lowndes, Marshall, Monroe, Montgomery, Noxubee, Oktibbeha, Panola, Pontotoc, Prentiss, Quitman, Sunflower, Tallahatchie, Tate, Tippah, Tishomingo, Tunica, Union, Washington, Webster, Winston, and Yalobusha.

Persons may also obtain service at the resident offices in Little Rock, Arkansas, and in Nashville, Tennessee.

Region 27. Denver, Colorado. Services Wyoming, Colorado, and Utah.

Region 28. Phoenix, Arizona. Services Arizona and New Mexico, and Culberson, El Paso, and Hudspeth Counties in Texas.

Persons may also obtain service at the resident offices in Albuquerque, New Mexico, and El Paso, Texas.

Region 29. Brooklyn, New York. In New York, services Kings, Nassau, Queens, Richmond, and Suffolk Counties.

Region 30. Milwaukee, Wisconsin. In Wisconsin, services the following counties: Adams, Brown, Calumet, Columbia, Crawford, Dane, Dodge, Door, Florence, Fond du Lac, Forest, Grant, Green, Green Lake, Iowa, Jefferson, Juneau, Kenosha, Kewaunee, La Crosse, Lafayette, Langlade, Lincoln, Manitowoc, Marathon, Marinette, Marquette, Menominee, Milwaukee, Monroe, Oconto, Oneida, Outagamie, Ozaukee, Portage, Racine, Richland, Rock, Sauk, Shawano, Sheboygan, Vernon, Vilas, Walworth,

Washington, Waukesha, Waupaca, Waushara, Winnebago, and Wood; in Michigan, services the following counties: Alger, Baraga, Chippewa, Delta, Dickinson, Gogebic, Houghton, Iron, Keweenaw, Luce, Mackinac, Marquette, Menominee, Ontonagon, and Schoolcraft.

Region 31. Los Angeles, California. Services the following counties in California: Inyo, Kern, San Bernardino, San Luis Obispo, Santa Barbara, and Ventura; that portion of Los Angeles County lying west of Harbor Freeway and north of Pasadena Freeway (Arroyo Boulevard, U.S. Highway 66); in Nevada, services Nye, Lincoln and Clark Counties.

Persons may also obtain service at the resident office located in Las Vegas, Nevada.

Region 32. Oakland, California. Services the following counties in California: Alameda, Alpine, Amador, Calaveras, Contra Costa, El Dorado, Fresno, Kings, Madera, Mariposa, Merced, Mono, Monterey, San Benito, San Joaquin, Santa Clara, Santa Cruz, Stanislaus, Tulare, Tuolumne; and the following counties in Nevada: Churchill, Douglas, Elko, Esmeralda, Eureka, Humboldt, Lander, Lyon, Mineral, Ormsby, Pershing, Storey, Washoe, and White Pine.

Region 33. Peoria, Illinois. In Illinois, services Boone, Bureau, Carroll, Cass, Champaign, De Kalb, De Witt, Douglas, Ford, Fulton, Grundy, Hancock, Henderson, Henry, Iroquois, Jo Daviess, Kankakee, Kendall, Knox, La Salle, Lee, Livingston, Logan, Macon, Marshall, Mason, McDonough, McHenry, McLean, Menard, Mercer, Morgan, Moultrie, Ogle, Peoria, Piatt, Putnam, Rock Island, Sangamon, Schuyler, Stark, Stephenson, Tazewell, Vermillion, Warren, Whiteside, Winnebago, and Woodford Counties; in Iowa, services Clinton, Des Moines, Dubuque, Jackson, Lee, Muscatine, Scott, and Louisa Counties.

Dated, Washington, D.C., June 7, 1979.

By direction of the Board.

George A. Lest,

Associate Executive Secretary, National Labor Relations Board.

BILLING CODE 7545-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-335]

Florida Power & Light Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 32 to Facility Operating License No. DPR-67 issued to Florida Power & Light Company (the licensee), which revised the license and its appended Technical Specifications for operation of St. Lucie Plant, Unit No. 1 (the facility), located in St. Lucie County, Florida. The amendment is effective as of its date of issuance.

This amendment revises the Technical Specifications to incorporate changes resulting from Cycle 3 reload fuel, and deletes a license requirement for neutron shielding which has been satisfactorily completed.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see (1) the applications for amendment dated November 9, 1978 and February 22, 1979, as supplemented April 30 and May 1, 10, 18, 22 and 23, 1979, (2) Amendment No. 32 to License No. DPR-67, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Indian River Junior College Library, 3209 Virginia Avenue, Ft. Pierce, Florida. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland this 27th day of May 1979.

For the Nuclear Regulatory Commission.

Robert W. Reid,

Chief, Operating Reactors Branch No. 4, Division of Operating Reactors.

[FR Doc. 79-18472 Filed 6-13-79; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-219]

Jersey Central Power & Light Co.; Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 35 to Provisional Operating License No. DPR-16, issued to Jersey Central Power & Light Company (the licensee), which revised the Technical Specifications for operation of the Oyster Creek Nuclear Generating Station (the facility) located in Ocean County, New Jersey. The amendment is effective as of its date of issuance.

The amendment allows operation with one recirculation loop out of service using the more restrictive Maximum Average Planar Linear Heat Generation Rate (MAPLHGR) limits (originally authorized by Amendment No. 30, dated March 14, 1978) with values extended to encompass higher exposure fuel. In separate actions relating to this facility, the Commission is: (1) Amending License No. DPR-16 to extend the applicability of the minimum water level safety limit to all modes of operation, and add a new safety limit in Section 2.1.F to require that two recirculation loops remain open during all modes of operation except with the reactor vessel head removed; and (2) Authorizing resumption of operation after a May 2, 1979, transient event involving license safety limits.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated May 24, 1979, and the licensee's submittals dated April 30, May 15 and 17, 1979, (2) Amendment No. 35 to License No. DPR-16, and (3) the Commission's related Safety Evaluation. All of these items and the Commission's separate actions described above are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Ocean County Library, Brick Township Branch, 401 Chambers Bridge Road, Brick Town, New Jersey 08723. A copy of items (2) and (3) in addition to the separate actions, may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission,

Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 30th day May, 1979.

For the Nuclear Regulatory Commission.

Dennis L. Ziemann,

Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[FR Doc. 79-18073 Filed 6-13-79; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-219]

Jersey Central Power & Light Co.; Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 36 to Provisional Operating License No. DPR-16, issued to Jersey Central Power & Light Company (the licensee), which revised the Technical Specifications for operation of the Oyster Creek Nuclear Generating Station (the facility) located in Ocean County, New Jersey. The amendment is effective as of its date of issuance.

The amendment modifies Section 2.1.D to extend the applicability of the minimum water level safety limit to all modes of operation, and add a new safety limit in Section 2.1.F to require that two recirculation loops remain open during all modes of operation except with the reactor vessel head removed. In separate actions relating to this facility, the Commission is: (1) Amending License No. DPR-16 to allow operation with the more restrictive Maximum Average Planar Linear Heat Generation Rate limits authorized by Amendment No. 30, dated March 14, 1978, extended to encompass higher exposure fuel in the reactor; and (2) Authorizing resumption of operation after a May 2, 1979, transient event involving license safety limits.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated May 10, 1979, (2) Amendment No. 36 to License No. DPR-16, and (3) the Commission's related Safety Evaluation. All of these items and the Commission's separate actions described above are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Ocean County Library, Brick Township Branch, 401 Chambers Bridge Road, Brick Town, New Jersey 08723. A copy of items (2) and (3) in addition to the separate actions may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 30th day of May 1979.

For the Nuclear Regulatory Commission.

Dennis L. Ziemann,

Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

BILLING CODE 7590-01-M

NATIONAL TRANSPORTATION SAFETY BOARD

[N-AR 79-24]

Accident Report, Safety Recommendations and Responses; Availability

Highway Accident Report

Overturn of Ross Ambulance Service Ambulance, State Route 116, Littleton, N.H., August 22, 1978 (NTSB-HAR-79-4).—The National Transportation Safety Board on June 8 released its formal report on the investigation of this accident. The accident occurred about 3:30 p.m. when an ambulance, transporting a cardiac patient to a hospital and traveling at a calculated speed of 90 to 95 mph, failed to negotiate a curve on Route 116 east of Littleton and rolled over. Two persons in the ambulance were killed and the driver was injured. The patient had died before the accident.

The Safety Board determined that the probable cause of this accident was loss of control of the ambulance, which had oversteer characteristics, by an unskilled driver at a high rate of speed. Contributing to the cause of the accident was the driver's lack of training in the operation of the ambulance at high speeds. The Board attributed the oversteer characteristic of the ambulance to a modification which had changed it from an all-purpose vehicle by a process which distributed a majority of an additional 1,530 pounds to the vehicle's rear axle.

During the investigation of this accident, the Safety Board last February 1 recommended that the National Highway Traffic Safety Administration require behind-the-wheel training in high-speed driving (H-79-1). NHTSA responded on April 2, stating that its emergency vehicle operator's course expressely omits training in high-speed driving techniques and that the agency must continue to emphasize "the importance of adhering to speed limits instead of tacitly approving disrespect for these laws by training the student to exceed them." (See 44 FR 24568, April 26, 1979.)

At the conclusion of the investigation, the Safety Board recommended that the National Committee on Uniform Traffic Laws and Ordinances, together with the American Bar Association, consider writing more specific criteria into the Uniform Vehicle Code provision for emergency vehicles exceeding posted speed limits. Included would be a medical determination of patient condition; operation of the vehicle by a certified ambulance driver; conditions of vehicle, traffic, roadway, and weather; and possible emergency speeds no more than 10 mph above posted limits. The Board also urged NHTSA and General Services Administration actions to improve emergency vehicle crashworthiness and retain original vehicle handling characteristics when modifications are made. (See 44 FR 30179, May 24, 1979, for recommendations H-79-27 through 30.)

Safety Recommendation Letters

Aviation

A-79-60.—During the last 5 years, the Safety Board issued seven safety recommendations (A-74-62 through 64 and A-77-5 through 8) to the Federal Aviation Administration regarding procedures involving the medical certification of airmen. These recommendations resulted from Board review of FAA medical records of airmen involved in aircraft accidents and the discovery of irregularities in those records. The Board has been concerned with the frequency of these irregularities; not only were they errors in the medical examination as performed by the Aviation Medical Examiner (AME) but also they were not detected by the reviewing authority, the Civil Aeromedical Institute.

During recent Safety Board investigations of both general aviation and air carrier accidents, the Board's review of the Airmen Medical Records revealed that discrepancies—demonstrating nonadherence to 14 CFR Part 67 and lack of quality control by AME's and by the Civil Aero-medical Institute—contine to persist despite revised computerized procedures. Because of the Board's concern regarding the continuing irregularities associated with airman medical certification, and because the Civil Aeromedical Institute's review of the medical certification process has not detected such irregularities, the Safety Board on June 5 recommended that the FAA:

Develop improved procedures to enhance the quality control function of the Civil Aeromedical Institute with respect to its capabilities for detecting physical disabilities in airmen and performance deficiencies of Aviation Medical Examiners. (Class II, Priority Action) (A–79–40)

A–79–42 and 43.—As the basis for issuing another recommendation letter to the FAA on June 8, the Safety Board cited three accidents, surrounded by different circumstances but all having one element in common with respect to air traffic control (ATC) operational control. The accidents cited were these:

On June 21, 1978, North Central Airlines Flight 57, a DC–9–30, and N51MW, a Cessna Citation, almost collided on runway 13 at LaGuardia Airport, Flushing, N.Y. North Central 57 was cleared by the tower ground controller to taxi on the runway and N51MW was cleared by the tower local controller for takeoff on the same runway.

On February 15, 1979, Delta Air Lines Flight 349, a Boeing 727–200, and Flying Tiger Lines Flight 74, a Boeing 747–100, almost collided on runway 9 right at O'Hare International Airport, Chicago, Ill. Delta 349 was cleared by the ground controller to cross the runway at the runway 14 right parallel taxiway intersection while Flying Tiger 74 was landing on runway 9 right after receiving a landing clearance from the local controller. Flying Tiger 74 was substantially damaged when the pilot veered off the runway.

On February 24, 1979, a Federal Express, Falcon Fan Jet and a Great Western Beechcraft Model 18 collided on runway 9 at Memphis International Airport, Memphis, Tenn. The Beechcraft had landed on runway 36R and the flight was cleared by the ground controller to taxi across runway 9. The Falcon Jet had been cleared to land on runway 9. The planes collided as the Beechcraft taxied across the runway. Both aircraft were damaged, but on one was injured.

In each case one airplane was controlled by the ground controller and the other airplane was controlled by the local controller. In two the these cases, the ground controller and local controller failed to effect the required coordination. In the third case no oral coordination was required; a local facility directive allowed the ground controller to clear aircraft across and active runway when the airport surface detection equipment and Brite radar displays were operating, and radar observations by the ground controller revealed that no traffic conflict existed. In all three of these mishaps, ATC had authorized the pilot to taxi on or across an active runway. In two of them, the reported visibility at the airport was more than adequate to enable the ground controller to maintain visual surveillance of his traffic, although hours of darkeness prevailed. In the other occurrence, reported visibility was ½ to 1 mile in daylight conditions.

Under the circumstances, each ground controller had the ability to maintain surveillance of those aircraft involved. However, inadequate visual serveillance of ground traffic movement appears to be a factor in two of the three mishaps.

Other findings of these investigations revealed that the pilots' visual surveillance while taxiing on the airport surfaces may have been lax. Like the controller, the pilot has responsibility to maintain visual surveillance outside the cockpit.

Although the Board is not able to identify specific changes in ATC procedures or equipment to resolve the problems evident in the Chicago and Memphis accidents, the seriousness and complexity of the problem warrant a safety study to examine all aspects of the runway incursion problem and to identify the corrective action needed. Accordingly, the Safety Board recommends that FAA:

Conduct a directed safety study, on a priority basis, to examine the runway incursion problem and to formulate recommended remedial action to reduce the likelihood of such hazardous conflicts. (A–79–42)

Alert all controller/pilot personnel that runway incursion mishaps represent a serious safety problem which requires their immediate attention. Special emphasis should be placed on the need for both groups to maintain greater visual surveillance in those taxi operations involving any runway crossing. (A–79–43)

Both recommendations are designated "Class II," priority action requested.

A–79–44.—The Safety Board has studied statistically its data files of 17,312 accidents which occurred from 1972 to 1976 and involved light, single-engine, fixed-wing aircraft (single-engine aircraft). As shown in the Board's soon-to-be released special study "Single-Engine, Fixed-Wing General Aviation Accidents, 1972–1976," single-engine aircraft accounted for approximately 72 percent of all general aviation flying hours from 1972 to 1976, about 81 percent of the accidents, 76 percent of the fatal accidents, and 69 percent of the fatalities. Clearly, single-engine aircraft accidents are the most significant segment of general aviation in terms of activity and loss.

Contingency table analyses were used to ascertain the role of the aircraft, the pilot, and the environment in single-engine aircraft accidents. All single-engine aircraft makes and models with more than 500 active aircraft in 1976 were included in the study, excluding those aircraft specifically designed and produced for aerial application flying. This resulted in the inclusion of 33 aircraft makes and models in the study.

Based on the results of this study, the Safety Board on June 5 recommended that FAA:

Generate, through a stratified sampling of general aviation pilots, the date, duration, aircraft make and model, the geographical location of the flight, and the flight time in IFR, high density altitude, and wind conditions, all on a per flight basis; the data collected should include the pilot's total time, time in each type aircraft flown, age, occupation, certificate, and medical waivers. (Class II, Priority Action) (A–79–44)

A–79–45 and 46.—On June 4 the Safety Board by recommendation letter confirmed and amplified the data given during a telephone recommendation on June 2 when the Board's Director, Bureau of Technology, contacted FAA's Associate Administrator for Aviation Standards. The Board recommended urgent actions regarding further inspection of DC–10 aircraft as a result of the then most recent findings of the Board's investigation of the American Airlines DC–10, N110AA, accident on May 25 at Chicago's O'Hare International Airport.

While complying with FAA's initial Airworthiness Directive requiring inspection of the engine pylon mounting structure of DC–10's, American found two of their aircraft, N106AA and N119AA, with damage to the pylon aft bulkhead (the structural element containing the spherical bearing which carries the aft attachment of the pylon to a mating clevis on the wing structure). This fitting provides the major reaction to vertical and side loads imposed on the pylon. The aft bulkhead fitting has a continuous flange on the forward side to which the main pylon structure is attached. The damage observed on both N106AA and N119AA was a crack in the center of the horizontal upper flange

directly beneath the attachment bearing. The crack on N106AA was reportedly 2 inches long and the crack on N119AA was reportedly 5 inches long. Investigation disclosed that apparently the crack in N106AA was caused by physical impact which likely occurred when the pylon was installed during previous maintenance. American had begun a program last fall to comply with Douglas Aircraft Co. Service Bulletins 54–48 and 54–50 when the aircraft were undergoing periodic checks at their maintenance facility in Tulsa, Okla. This maintenance was performed on N106AA on December 7, 1978, and on N119AA on March 19, 1979.

Compliance with these Service Bulletins requires that the pylon be lowered from the wing structure for installation of new bearings in the forward and aft bulkhead fittings. American Airline's procedures for removing and reinstalling the pylon consisted of lowering and raising the pylon with the engine still attached, by supporting the entire assembly by a forklift placed under the engine. Board personnal who observed this procedure noted that the forklift operator had limited control in the precise placement of the aft bulkhead fitting into the wing-mounted clevis during reinstallation of the pylon. Vertical misalignment of a fraction of an inch can result in the pylon aft bulkhead upper horizontal flange assembly striking the forward ear of the wing-mounted clevis, causing the flange to crack. The Board believes that this occurred on both N106AA and N119AA. The installation geometry of the pylon aft bulkhead and the lower wing structure is such that an inspector cannot observe the cracked area easily. Thus, any damage which has occurred as a result of the installation procedure is likely to be undetected.

While investigation of the accident involving N110AA is continuing, preliminary evidence indicates that the forward flange on the No. 1 pylon aft bulkhead fitting had failed completely. Metallurgical examination disclosed that there was a preexisting crack about 10 inches long in the same area where cracks were evident on the other two aircraft. N110AA had been subjected to the engine removal and reinstallation procedure on March 30 and had accrued 430 flight hours since that time.

Although the Douglas Service Bulletin specifies removal of the engine before removal and reinstallation of the pylon to wing attachment fittings, the Safety Board is aware that several operators are using the same procedure as American Airlines. The Safety Board is particularly concerned that other aircraft in the DC–10 fleet may have been damaged and that additional aircraft will be damaged as a result of actions which are presently being undertaken to correct deficiencies uncovered during the latest required inspections. The Safety Board, therefore, believes that urgent actions are required to prevent such damage from resulting in an accident and recommends that FAA:

Issue a telegraphic Airworthiness Directive to require an immediate inspection of all DC–10 aircraft in which an engine pylon assembly has been removed and reinstalled for damage to the wing-mounted pylon aft bulkhead, including its forward flange and the attaching spar web and fasteners. Require removal of any sealant which may hide a crack in the flange area and employ eddy-current or other approved techniques to ensure detection of such damage. (A–79–45)

Issue a Maintenance Alert Bulletin directing FAA Maintenance Inspectors to contact their assigned carriers and advise them to immediately discontinue the practice of lowering and raising the pylon with the engine still attached. Carriers should adhere to the procedure recommended by the Douglas Aircraft Company Service Bulletin which include removing the engine from the pylon before removing the pylon from the wing. (A–79–46)

Highway

H–79–33 through 35.—Three more "Class I, Urgent Action" recommendations were issued by the Safety Board last week—these, on June 7 after investigating a series of multiple-vehicle collisions which occurred on Interstate 75 near Charleston, Tenn., early last November. The collisions occurred under reduced visibility conditions primarily due to fog.

On November 5 at 8:45 a.m., the first of the series of collisions occurred. State police reported 61 vehicles were involved; three were tractor-semitrailer units. An estimated 15 other vehicles were involved but left the scene before being recorded by investigating personnel. That morning, the ambient temperature was 45° F, the air was calm, and it was clear and sunny. A local resident reported that the fog began to form at about 8 a.m. By 8:45 a.m. the fog had intensified and visibility was effectively reduced to zero. The fog covered a 2-mile section of I–75 immediately south of the Hiwassee River. Other sections of I–75 were clear and visibility was good.

Just before the first accident, a Tennessee Highway Patrol trooper was patrolling northbound on I–75 in the vicinity of milemarker 28. As the trooper entered the fog area, he heard the sounds of the first accident in the southbound lane. Crossing to the site of the collision, he heard sounds of other collisions occurring in both the northbound and southbound lanes. He immediately radioed for assistance and recommended closing I–75. He set flares and administered first aid. There were 16 accidents in all, 12 in the southbound lanes and 4 in the northbound lane. The first accident occurred at about 8:45 a.m. and the last at 9:30 a.m. I–75 was closed to southbound traffic at 9:15 and closed to northbound traffic sometime later. All traffic was detoured to State Route 11 which had clear visibility. When the fog cleared at 2:20 p.m., I–75 was reopened. No one was killed in this series of accidents, but 46 persons were injured.

On Sunday, April 15, 1979, at 7:45 a.m., another fog-related accident occurred at the same location. Eighteen vehicles were involved, four in the northbound lanes and 14 in the southbound lanes. Three persons were killed and 14 persons were injured. This accident is still being investigated.

I–75 in the area is a four-lane, divided, limited-access, asphalt-surfaced highway. Pavement markings were in good condition and roadway delineators were spaced at intervals of 200 feet on the right side of the road. The speed limit was posted at 55 mph with a minimum speed limit of 40 mph. Permanent fog warning signs were posted at milemarker 28 northbound and at milemarker 42 southbound. Both signs read "Extreme Dense Fog Area Next 5 Miles." At milemarker 29 northbound and 41 southbound additional warning signs were posted which read "Fog Area Next 4 Miles."

Four previous multiple-vehicle accidents in reduced visibility conditions have occurred at this location, two in 1974, one in 1976, and one in 1977. All four accidents happened between 7:20 a.m. and 11 a.m. on a Friday or Saturday.

In view of these findings, the Safety Board recommends that the Tennessee State Department of Safety:

Develop and implement a standing adverse weather and road condition plan that will include (1) a procedure for alerting public safety officials and the driving public of fog conditions through hazardous driving advisories on radio and television, (2) a procedure for the strategic and timely deployment of patrol units to affected areas, (3) criteria for the rapid closing of affected sections of highway and the rerouting of traffic, (4) mutual assistance compacts with local government entities for emergency aid, and (5) methods for the safe evacuation of vehicles trapped on affected sections of the highway. (H–79–33)

Determine the feasibility of installing an available fog detection and warning system at the Interstate 75 crossing of the Hiwassee River near Charleston, Tenn. (H–79–34)

Until such time as an automatic fog detection and warning device is installed, provide more frequent patrols on the affected section of Interstate 75 when fog is forecast so that the earliest practical warning may be available. (H–79–35)

Marine

M–69–56 through 58.—Last December 29 the outbound Liberian bulk carrier M/V WORLD NOBILITY and the inbound Liberian ore/bulk/oil carrier S/S PENNSYLVANIA GETTY collided at the mouth of the Chesapeake Bay about 15 nmi east of Norfolk, Va. The bow of the PENNSYLVANIA GETTY penetrated the No. 1 cargo hold on the forward port side of the WORLD NOBILITY. No deaths or injuries resulted from the accident; however, the vessels sustained an estimated $3 million damage.

Maneuvering a vessel in coastal waters requires the continuous collection, coordination, and evaluation of information. Vessel speed, course, position, and proximity to other vessels or obstructions are the critical information elements that a master must obtain to safely navigate his vessel. The Safety Board's analysis of this accident determined that although both vessels were adequately equipped to obtain the necessary information, neither vessel's navigation watch was sufficiently manned to fully use such data. This accident illustrates the need for mandatory regulations or standards that require specific manning levels for vessel navigation watches for various conditions regarding vessel location, traffic density, personnel qualifications, equipment limitations, and visibility. Accordingly, the Safety Board on June 8 recommended that the U.S. Coast Guard:

Develop navigation watchkeeping standards which quantify the minimum manning level needed for large oceangoing vessels to safely navigate within U.S. ports and their approaches, and amend the Navigation Safety Regulations (33 CFR Part 164) to incorporate these standards. (M–79–56)

Study the feasibility of relocating the Chesapeake Bay pilotage area so that vessels are not forced to transit areas of converging traffic without pilots on board. (M–79–57)

Reevaluate the proposed level of vessel traffic service in the Chesapeake Bay, and determine if an active, manned system is more appropriate because of the increased traffic density and the transit of vessels transporting liquefied natural gas and other hazardous cargoes. (M–79–58)

Each of the above recommendations is designated "Class II, Priority Action." The Safety Board's formal report on the investigation of this accident is now being processed for distribution and copies will be available in the near future.

Responses to Safety Recommendations

Aviation

A–72–171, 173, 174, 175, 176, 180, 181, and 186.—The Federal Aviation Administration on May 29 advised the Safety Board of actions taken with respect to these recommendations, issued in conjunction with the Board's 1972 special study, "Air Taxi Safety."

Recommendation A–72–171 asked FAA to expedite redrafting of 14 CFR Part 135 in its entirety, recognizing that commuter air carrier operators are separate entities from the smaller air taxi charter operators. FAA reports that Regulatory Review Program, "Air Taxi Operators and Commercial Operators," Amendments 121–147, 127–35 and Review of Part 135, effective December 1, 1978, issued last September 26 (copy attached to FAA's letter). FAA notes that the introductory material contained in pages 46742 through 46744 of this document explains rationale for regulatory actions affecting commuter air carrier operators and on-demand air taxi operators.

With reference to A–72–173, which recommended expediting proposed programs to assure the financial ability of each commuter air carrier and air taxi operator holding interline agreements to conduct safe operation, FAA says that proposed § 135.37, "Periodic Financial Status Review," was withdrawn since the more than 80 commenters on this proposal were almost unanimously opposed. FAA has general surveillance and investigative authority under the Federal Aviation Act and may secure access to any records (including financial records) of an operator when necessary to carry out its safety responsibilities. FAA determines that this specific rule is not required to insure safe air taxi and commuter operations.

Recommendation A–72–174 called for amendment to Part 135 to include qualification requirements applicable to the Director of Operations, Chief Pilot, Director of Maintenance, and Chief Inspector in all commuter air carrier operations. FAA notes that § 135.37 specifies the requirements for Director of Operations, Chief Pilot, and Director of Maintenance, and § 135.39 lists qualification requirements for management personnel. FAA does not believe that a requirement for Chief Inspector in all operations is necessary or would be productive because of the extreme variation in size and complexity of operations conducted under Part 135. As a basic requirement, Director of Maintenance assures a supervisory level of responsibility for maintenance. The FAA district office approves the maintenance system since they are familiar with the scope of the certificate holders' operations. Before approval, an evaluation is made to determine if safe operations can be conducted. FAA says that this system provides for necessary flexibility within each certificate holder's maintenance organization while assuring an equivalent level of safety.

Concerning A–72–175, calling for amendment of Part 135 to provide that a qualified individual be delegated by each commuter air carrier to act in the capacity of safety officer and to monitor all safety aspects of the overall flight and maintenance operations, FAA says that a separate position of safety officer was not proposed. FAA believes that the requirements for management personnel (§ 137.37), their qualifications, (§ 135.39), and their duties and responsibilities as specified in the manual required by § 135.23 preclude a specific requirement for a safety officer.

Recommendation A–72–176 asked FAA to amend Part 135 to require that the pilot-in-command in air taxi commuter air carrier operations hold a current airline transport pilot rating. FAA notes that § 135.243 specifies that no certificate holder may use a person, nor may any person serve, as pilot-in-command in passenger-carrying operations of a turbojet airplane having a passenger seating configuration, excluding any pilot seat, of 10 seats or more, or a multiengine airplane being operated by a commuter air carrier, unless that person holds an airline transport pilot certificate with appropriate category and class ratings and, if required, an appropriate type rating for that airplane.

Amendment of §§ 135.75 and 135.99 to clarify operating conditions and limitations for instrument flight rules (IFR) and visual flight rules (VFR) over-the-top carrying passengers was recommended by A–72–180. FAA says that § 135.181 contains performance requirements for aircraft operated over-the-top or in IFR conditions. FAA deleted § 135.75, Exception to second in command requirements: Limited IFR conditions; § 135.103, Exception to second in command requirements: IFR operations, is now applicable. FAA renumbered § 135.99, VFR over-the-top carrying passengers: operating limitations, as § 135.211. No change in content was made.

In answer to A–72–181, recommending amendment of § 135.143 to include a minimum equipment list to include procedures for continuing flight with inoperative equipment beyond terminal point, FAA states that § 135.179, Inoperable instruments and equipment for multiengine aircraft, contains the requirements for the use of an approved minimum equipment list.

Recommendation A–72–186 called for establishment of a standard program of utilizing manufacturers' recommended overhaul and inspection times on aircraft components, and powerplants and propellers. FAA states that Subpart J, Maintenance, Preventive Maintenance, and Alterations, provides for levels of inspection and maintenance requirements which consider aircraft complexity and seating capacity. Manufactuers' recommendations, as specifically applicable, are an integral part of this system.

Marine

M–78–63 through 68.—The U.S. Coast Guard on May 22 responded to recommendations issued last September 22 following investigation of the sinking of the M/V CHESTER A. POLING near Cape Ann, Mass., on January 10, 1977. (See 43 FR 47017, October 12, 1978.)

In response to M–78–63, which asked Coast Guard to require that a loading manual indicating proper cargo and ballast loading arrangements and procedures be prepared for each coastal tankship, Coast Guard agrees that loading information should be required on many coastal tankships, but not necessarily all vessels. The 1968 load line regulations required new ships engaged in both coastwise and international voyages to have loading information as a prerequisite to certification. The 1979 tankship regulations required all vessels 300 feet in length or longer, construction of which began after September 5, 1977, to have loading information. According to Coast Guard, some vessels under 300 feet and some existing vessels over 300 feet may require loading information. Tankships (excluding T–2 tankers) longer than 300 feet built before 1977 and holding domestic load line certificates have not been required to obtain loading manuals. Coast Guard will examine these vessels individually to determine the need for loading information.

Recommendation M–78–64 asked Coast Guard to study the feasibility of providing estimated hull stress information based on loading condition, sea state, and ship speed and relative heading in graphical form in coastal tankship loading manuals. Coast Guard notes that the feasibility of calculating hull stress with the mentioned parameters has been established, and indicates that the information cannot be reduced to a form suitable for inclusion in a loading manual. The problem is that loading methods deal with well defined measurable values while hull stress analysis deals with value ranges that are not readily measurable. Adding complexity to loading manuals will reduce their use and reliability. Also according to Coast Guard, due to the number and complexity of variables involved, meaningful hull stress information cannot be presented in a simplified loading manual. Coast Guard states, "Any addition to the current loading manual would not have prevented or mitigated the POLING casualty or one similar to it."

Concerning M–78–65, which recommended requiring that exposure suits be provided for each crewmember on vessels that routinely operate in areas of cold air or sea temperatures, Coast Guard reports publication of a notice of proposed rulemaking on June 8, 1978, dealing with exposure suits on Great Lakes vessels. Similar requirements are being contemplated for vessels in all services which routinely operate in areas of cold air and sea temperatures. The fractionalized approach is due to attempts by the Intergovenrmental Maritime Consultative Organization (IMCO) to adopt an international standard. Coast Guard is advancing many hypothermia protection concepts at IMCO. Totally enclosed lifeboats for all new ocean-going merchant vessels is one example. Coast Guard says it will develop unilateral requirements for U.S. vessels should IMCO fail to adopt the Coast Guard proposal.

Coast Guard concurs with recommendation M–78–66 which called for at least one inflatable liferaft to be stowed near each accomodation and working space on coastal tankships. Coast Guard reports that a regulatory project has been instituted to include coastal tankships under the existing regulations dealing with liferaft placement for widely separated accommodation and/or working spaces found in 46 CFR 33.05.

With reference to recommendation M–78–67, which asked Coast Guard to develop an effective method to insure that each merchant seaman is instructed and trained in the proper use of helicopter-borne rescue baskets, Coast Guard states that it has neither the funds, personnel, or authority to effectively train each merchant seaman. Coast Guard is accomplishing the following:

1. The new edition of "Manual for Lifeboatmen, Able Seamen, and Qualified Members of the Engine Department" will discuss helicopter evacuation and instructions on the use of rescue baskets. After publication in 1979, examination questions will be developed.
2. A standard hoist briefing message will be included in the Coast Guard addendum to the National SAR Manual.
3. Publish information on rescue equipment use in the Merchant Ship Search and Rescue Manual.
4. Publish information on use of rescue equipment in the AMVER Bulletin.
5. Review and suggest changes in the helicopter evacuation posters provided to the fishing fleet by the National Marine Fishers Service.
6. Initiate action to place a helicopter hoisting placard on the bridge of all inspected vessels 100 gross tons or over.

In answer to M–78–68, which recommended installation of a placard of simple user instructions suitable for emergency situations on each Coast Guard helicopter-borne rescue basket, Coast Guard reports development of a pictorial display for attachment to helicopter rescue baskets. Instruction will also be included in the Aviation Life Support Systems Manual.

M–79–51.—Letter dated May 9 from the International Association of Drilling Contractors informs the Safety Board that this recommendation has been forwarded to the Association's Offshore Committee for discussion at the Committee's next meeting, scheduled for mid-June. The recommendation asked the Association to recommend that its members use private meteorological services which provide the special information needed when engaged in weather-sensitive operations and was developed as a result of the sinking of the self-elevating mobile offshore drilling unit OCEAN EXPRESS in the Gulf of Mexico, April 14, 1978. (See 44 FR 24657, April 26, 1979.)

M–79–54.—Letter of May 24 from the Office of the Chief of Naval Operations, Department of the Navy, responds to a recommendation issued following investigation of the February 22, 1978, collision of U.S. Navy submarine tender L. Y. SPEAR and Liberian tanker ZEPHYROS in the lower Mississippi River. The recommendation asked the U.S. Navy to review and revise as necessary appropriate U.S. Navy directives and doctrine applicable to navigation on restricted waterways to ensure that Commanding Officers of vessels are provide adequate information and guidance regarding safe speeds and command relationships with

commerical pilots. (See 44 FR 27511, May 10, 1979.)

Navy notes that the Internation Regulations for Preventing Collisions at Sea, 1972, and, in the case, the Pilot Rules for Western Rivers, set forth explicit maneuvering rules for ships transiting the Mississippi River and that the situations described in this recommendation are adequately covered by these publications. Also, each Commanding Officer receives an extensive review of shiphandling techniques and Rules of the Road prior to assuming command. Navy notes that the accident was the result of a combination of factors including speed, large rudder angle orders, and effect of river current and states that the relationship of the Commanding Officer and the pilot is addressed in Navy Regulations, 1973, paragraph 0754, and is quite clear:

> A pilot is merely an advisor to the Commanding Officer. His presence onboard shall not relieve the Commanding Officer or any of his subordinates from their responsibility for the proper performance of the duties with which they may be charged concerning the navigation and handling of the ship.

Navy states, "The rules of safe navigation cannot overcome errors in shiphandling judgment. In this case, the relationship between the Commanding Officer and the pilot appeared to be less than optimal. It is doubtful that additional directives would have prevented this accident. Since there is longstanding guidance available which covers the safety recommendation in detail, additional action, other than that taken in the course of the U.S. Navy investigations, is not deemed necessary."

Railroad

R–78–54 through 56.—The Federal Railroad Administration on May 22 responded to the Safety Board's March 29 letter which provided comments on FRA's initial response of February 16 (44 FR 15818, March 15, 1979.) The recommendations resulted from investigation of the February 24, 1978, autotrain derailment on the Seaboard Coast Line Railroad track at Florence, S.C.

Recommendation R–78–56 asked FRA to revise 49 CFR 230.213, Axles, to establish specifications for manufacturing and testing locomotive axles to insure discovery of internal defects before being placed in service. Noting FRA's comments that the low failure rate of locomotive axles in 1977 suggests that present requirements of § 230.213 are adequate, the Safety Board pointed out that in 1978 FRA received seven reports of locomotive axle failure and in 1975 ten accidents were attributed to broken or bent axles; no differential is shown regarding car axles or locomotive axles. The Board said that these data aside, the laboratory analysis of the subject failed axle disclosed two types of voids and substandard conditions in yield strength and tempered steel. The Board believes that this analysis indicates that § 230.213 should be revised to establish minimum requirements of tensile strength and chemical elements, as well as stringent inspection and testing procedures to detect internal flaws.

In response to the Board's request for reconsideration of recommendation R–78–54, FRA notes that in 1977 there were approximately 160,000 axles in service and these account for only 1.2 percent (2 out of 163) of the accidents attributed to defective mechanical and electrical locomotive equipment. FRA says that because of the low failure frequency of the locomotive axles, no revision of § 230.213 is necessary to include a requirement for the manufacturing and testing procedures of axles. Further, FRA notes current industry requirements for locomotive axles are outlined in 23 pages of the industry manual covering the physical and chemical requirements and specific inspection procedures, including the use of both magna-glow and ultrasonic detection equipment when the axles are accepted.

With respect to R–78–55, which concerned testing of in-service locomotive axles, the Board feels that possibly the intent of this recommendation, as it applies to "in service," has been misunderstood. By "in-service" the Board refers to those occasions when axle assemblies are removed from the locomotive for such purposes as wheel turning and wheel or traction motor changeouts. It does not denote a condition of axle inspection wherein the assemblies are in place under the locomotive. The Board concurs with FRA's belief that ultrasonic testing is more reliable than magnetic particle testing. Thus, the Board perceives an irregularity in inspection requirements which mandate ultrasonic inspection of a newly manufactured axle, yet only require magnetic particle inspection of a reconditioned axle that has been exposed to stresses associated with heat, impact, and torque for thousands of miles.

In answer to the Board's comments, FRA notes that there are approximately 32,000 locomotives including MU equipment with 160,000 axles in service; an estimated one out of every four axles (40,000) is removed from service each year. FRA says that inspection of these axles, using specialized ultrasonic equipment requiring highly skilled professionals to interpret the results at the various repair facilities where work is perfomed, would be very burdensome; it takes a specialist in nondestructive testing to determine the presence of critical flaws in axles. Many axles have inclusions, most of which are not detrimental to the safe use of the axle, according to FRA. The costs per inspection would be about $50 per inspection for the 40,000 axles removed annually or $2 million. FRA believes that the expense for conducting such extensive tests in view of the extremely low failure rate appears to be unwarranted.

To clarify the intent of recommendation R–78–56, which concerned automatic detection of locomotive truck failure, the Board said it wanted to develop a method to reveal conditions such as a derailed wheel, excessive heat, or fractured components such as wheels, axles, hangers, or truck side frames while the train is en route. This recommendation stems from the fact that in the subject accident, the second locomotive unit was derailed for 17.5 miles without this condition being detected by train and engine crewmembers. FRA's response states that in view of the extremely low accident rate directly attributed to defective mechanical and electrical locomotive equipment, research and development of automatic devices for the detection of locomotive unit truck or component defects are not considered necessary.

R–78–58 and 59.—Letter of May 18 from the Secretary, U.S. Department of Transportation, responds to recommendations issued following investigation of the derailment of an Atlanta & Saint Andrews Bay Railway Company freight train at Youngstown, Fla., February 28, 1978. (See 43 FR 59557, December 21, 1978.)

In answer to recommendation R–78–58, which asked that DOT require that top and bottom shelf couplers be installed on all DOT 105 tank cars as soon as possible, the Secretary reports that FRA agrees that a retrofit program should be required so as to have appropriate Type-E top and bottom shelf couplers and Type-F top shelf couplers installed on all DOT Specification 105 tank cars at an early date. However, FRA feels that this requirement should be only part of a total effort that would result in DOT Specification 105 tank cars being equipped with steel jacket heads, and all new pressure tank cars having better structural strength.

increased puncture resistance and better thermal protection. A notice of proposed rulemaking is being developed covering these safety measures.

Recommendation R-78-59 asked DOT to expedite research to determine the safest position of hazardous materials tank cars and others in freight trains as contained in recommendation R-78-33 and promptly issue regulations for adequate braking and placement of such cars in freight trains. The Secretary reports that FRA is currently utilizing the Train Operations Simulator (TOS) model to analyze train makeup and train handling procedures. This mathematical computer model was initially developed by the Association of American Railroads under FRA sponsorship, and a copy was sent to the DOT Transportation Systems Center in Cambridge, Mass., to aid in the analysis of the placement and braking of cars and locomotive units in a train consist.

The Secretary further reports that in February 1979, FRA's Office of Safety compiled data on two train derailments involving hazardous materials tank cars. One incident involved the derailment of a Louisville and Nashville freight train at High Cliff, Tenn., December 13, 1978, when a tank car containing sulfuric acid derailed and leaked its contents. The other incident occurred at Pensacola, Fla., November 9, 1977, and involved the release of anydrous ammonia gas. Data on these two accidents was coded for input into the TOS, and the results are now being analyzed.

Additionally, the Secretary notes that the safe operation of a train is a conglomerate of different factors, e.g., the makeup of the train, track conditions, the curvature of the track, the ruling grade, train brake characteristics and other variables. "Scientific research is not sufficiently precise to translate railroad operational variables into quantitative methodology," the Secretary stated.

The Secretary also commented:

> It is conceivable that, through a process of shifting locomotive units and various car types in a train consist, repeated model, laboratory, and field testing could determine the optimal placement of hazardous materials cars for braking and overall train handling. However, such research would require extensive testing and commitment of funds and would take several years to complete. After completing this research and testing period, the FRA would have to develop a detailed cost-benefit analysis before it could promulgate new regulations for adequate braking and placement of hazardous materials cars in freight trains.

Consequently, FRA believes that it is not practicable or cost-effective to launch an expedited research program in this area. In these circumstances, FRA cannot promptly promulgate new regulations for adequate braking and placement of hazardous materials cars in freight trains.

Note.—Single copies of the Safety Board's accident reports are available without charge, as long as limited supplies last. Copies of the recommendations letter issued by the Board, response letters and related correspondence are also available free of charge. All requests for copies must be in writing, identified by report or recommendation number. Address inquiries to: Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594.

Multiple copies of accident reports may be purchased by mail from the National Technical Information Service, U.S. Department of Commerce, Springfield, Va. 22151.

(Secs. 304(a)(2) and 307 of the Independence Safety Board Act of 1974 (Pub. L. 93-633, 88 Stat. 2169, 2172 (49 U.S.C. 1903, 1906)))

OFFICE OF MANAGEMENT AND BUDGET

Office of Federal Procurement Policy

Final Uniform Rules of Procedure for Boards of Contract Appeals Under the Contract Disputes Act of 1978

May 31, 1979.

AGENCY: Office of Federal Procurement Policy (OFPP), Office of Management and Budget.

ACTION: Notice of Final Uniform Rules of Procedure issued as guidelines for adoption by Boards of Contract Appeals.

SUMMARY: On November 1, 1978, the President signed into law Pub. L. 95-563, the Contracts Disputes Act of 1978. That Act, among other things, required the Office of Federal Procurement Policy to issue guidelines for the procedures of the agency Boards of Contract Appeals by March 1, 1979.

To achieve maximum uniformity for Government contract appeal practice, agency Boards of Contract Appeals are expected to adopt the Uniform Rules of Procedure except where minor variances are justified due to the individual Board's size or nature of its docket.

Proposed Uniform Rules of Procedure were published for comment in the January 25, 1979, Federal Register. Interim final Uniform Rules of Procedure, effective March 1, 1979, were published in the Federal Register of March 7, 1979, for additional comment. The additional comment period was considered necessary because of the significance of some of the changes made to then existing Rules. The interim final Rules were to become effective on June 1, 1979, unless changed.

This is to provide notice that the Uniform Rules of Procedure published March 7, 1979, together with the changes provided below, are now final guidelines for adoption by agency Boards of Contract Appeals.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas Williamson, Associate Administrator for Acquisition Law (202) 395-3455.

James B. Cumis,
Acting Administrator.

Changes to Final Uniform Rules of Procedure

Rule 4 is changed to read as follows:

4. *Preparation, Content, Organization, Forwarding, and Status of Appeal File.* (a) Duties of Contracting Officer—Within 30 days of receipt of an appeal, or notice that an appeal has been filed, the contracting officer shall assemble and transmit to the Board (through the) an appeal file consisting of all documents pertinent to the appeal, including:

(1) The decision from which the appeal is taken;

(2) The contract including specifications and pertinent amendments, plans, and drawings;

(3) All correspondence between the parties relevant to the appeal, including the letter or letters of claim in response to which the decision was issued;

(4) Transcripts of any testimony taken during the course of proceedings, and affidavits or statements of any witnesses on the matter in dispute made prior to the filing of the notice of appeal with the Board; and

(5) Any additional information considered relevant to the appeal.

Within the same time above specified the ( ) shall furnish the appellant a copy of each document he transmits to the Board, except those in subparagraph (a)(2) above. As to the latter, a list furnished appellant indicating specific contractual documents transmitted will suffice.

(b) Duties of the Appellant—Within 30 days after receipt of a copy of the appeal file assembled by the contracting officer, the appellant shall transmit to the Board any documents not contained therein which he considers relevant to the appeal, and furnish two copies of

such documents to the government trial attorney.

(c) Organization of Appeal File—Documents in the appeal file may be originals or legible facsimiles or authenticated copies, and shall be arranged in chronological order where practicable, numbered sequentially, tabbed, and indexed to identify the contents of the file.

(d) Lengthy Documents—Upon request by either party, the Board may waive the requirement to furnish to the other party copies of bulky, lengthy, or out-of-size documents in the appeal file when inclusion would be burdensome. At the time a party files with the Board a document as to which such a waiver has been granted he shall notify the other party that the document or a copy is available for inspection at the offices of the Board or of the party filing same.

(e) Status of Documents in Appeal File—Documents contained in the appeal file are considered, without further action by the parties, as part of the record upon which the Board will render its decision. However, a party may object, for reasons stated, to consideration of a particular document or documents reasonably in advance of hearing or, if there is no hearing, of settling the record. If such objection is made the Board shall remove the document or documents from the appeal file and permit the party offering the document to move its admission as evidence in accordance with Rules 13 and 20.

(f) Notwithstanding the foregoing the filing of the Rule 4 (a) and (b) documents may be dispensed with by the Board either upon request of the appellant in his notice of appeal or thereafter upon stipulation of the parties.

In Rule 12.1(c) change "20 days" to "60 days."

Change Rule 12.2(a) to read as follows:

"12.2(a) In cases proceeding under the SMALL CLAIMS (EXPEDITED) procedure, the following time periods shall apply: (1) Within ten days from the Government's first receipt from either the appellant or the Board of a copy of the appellant's notice of election of the SMALL CLAIMS (EXPEDITED) procedure, the Government shall send the Board a copy of the contract, the contracting officer's final decision, and the appellant's claim letter or letters, if any; remaining documents required under Rule 4 shall be submitted in accordance with times specified in that rule unless the Board otherwise directs;

(2) Within 15 days after the Board has acknowledged receipt of appellant's notice of election, the assigned administrative judge shall take the following actions, if feasible, in an informal meeting or a telephone conference with both parties: (i) Identify and simplify the issues; (ii) establish a simplified procedure appropriate to the particular appeal involved; (iii) determine whether the appellant wants a hearing, and if so, fix a time and place therefor; (iv) require the Government to furnish all the additional documents relevant to the appeal, and (v) establish an expedited schedule for resolution of the appeal."

Change Rule 12.3(a) to read as follows:

"12.3(a) In cases proceeding under the ACCELERATED procedure, the parties are encouraged, to the extent possible consistent with adequate presentation of their factual and legal positions, to waive pleadings, discovery, and briefs. The Board, in its discretion, may shorten time periods prescribed elsewhere in these Rules, including Rule 4, as necessary to enable the Board to decide the appeal within 180 days after the Board has received the appellant's notice of election of the ACCELERATED procedure, and may reserve 30 days for preparation of the decision."

Change the first phrase of the first sentence of Rule 15 to read as follows:

"After an appeal has been docketed and complaint filed with the Board . . ."

Change the last sentence of Rule 15 to read as follows:

"Any discovery engaged in under this Rule shall be subject to the provisions of Rule 14(a) with respect to general policy and protective orders, and of Rule 33 with respect to sanctions."

Change Rule 21(f)(2) to read as follows:

A subpoena requiring the attendance of a witness at a deposition or hearing may be served at any place. A subpoena may be served by a United States marshal or deputy marshal, or by any other person who is not a party and not less than 18 years of age. Service of a subpoena upon a person named therein shall be made by personally delivering a copy to that person and tendering the fees for one day's attendance and the mileage provided by 28 U.S.C. 1821 or other applicable law; however, where the subpoena is issued on behalf of the Government, money payments need not be tendered in advance of attendance.

Insert the following in the second sentence of Rule 28 after the word "decision":

"(except those required for good cause to be held confidential and not cited as precedents)"

Change Rule 31 to read as follows:

"Whenever a record discloses the failure of either party to file documents required by these rules, respond to notices or correspondence from the Board, comply with orders of the Board, or otherwise indicates an intention not to continue the prosecution or defense of an appeal, the Board may, in the case of a default by the appellant, issue an order to show cause why the appeal should not be dismissed or, in the case of a default by the Government, issue an order to show cause why the Board should not act thereon pursuant to Rule 33. If good cause is not shown, the Board may take appropriate action."

BILLING CODE 3110-01-M

Contract Disputes; Final Uniform Rules of Procedure and Related Procurement Regulations; Final Approval of Text To Be Adopted; Proposed Text of Contract Disputes Clause

May 29, 1979.

AGENCY: Office of Federal Procurement Policy, Office of Management and Budget.

ACTION: Final text of uniform rules of procedure and related procurement regulations to be adopted; comments requested on text of contract disputes clause.

SUMMARY: On November 1, 1978, the President signed into law Public Law 95–563, the Contract Disputes Act of 1978. That Act, among other things, required certain changes to clauses and procurement regulations of the procuring agencies by March 1, 1979. To assure uniformity of language in the resulting changes, a suggested text of provisions to implement that Act was published at 44 FR 5219, January 25, 1979 for comment. After consideration of comments received and resulting changes to the suggested text, a set of interim final rules was published March 7, 1979. This set of interim final rules contains language to be used by the affected agencies when amending their regulations. This language was to become final June 1, 1979, unless changed before that time. This document gives notice that the interim final rule language is effective June 1, 1979, with the exception of the contract disputes clause which remains an interim clause. Comment is now invited on the new disputes clause set forth below.

DATES: Effective date of text which agencies are directed to adopt is June 1, 1979. Comments on the proposed

disputes clause should be received on or before August 1, 1979.

ADDRESS: Comments are to be submitted to the Office of Federal Procurement Policy, OMB, 726 Jackson Place, N.W., Room 9025, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas F. Williamson, Associate Administrator for Acquisition Law, (202) 395–3455.

James D. Currie,
Acting Administrator.

SUPPLEMENTARY INFORMATION: On November 1, 1978, the President signed into law Public Law 95–563, the Contract Disputes Act of 1978. That Act, among other things, required changes to clauses and procurement regulations of the procuring agencies by March 1, 1979. To assure uniformity of language in the resulting changes, a suggested text of proposed regulations and clause to be adopted by the affected agencies was published for comment January 25, 1979 (44 FR 5219). Suggested language of interim final regulations and clause, effective March 1, 1979, was published (for additional comments) March 7, 1979 (44 FR 12519). The language of the interim final regulations which the agencies are directed to adopt was to become final June 1, 1979, unless changed before that time. The language incorporated the changes required by Public Law 95–563 and reflect many of the comments received on the proposed text published January 25, 1979 (44 FR 5219).

This document provides notice that approval of the language which the agencies are directed to use in amending their regulations is effective as of June 1, 1979 except for the disputes clause which remains an interim clause.

Comment is now invited on a new Disputes Clause set forth below. The purposes of the changes reflected in the new Disputes Clause are to: (1) more clearly reflect the intent of the Contract Disputes Act with regard to the Payment of Interest, (2) change the time for certification of a claim exceeding $50,000, and (3) change the extent of a contractor's obligation to continue work pending resolution of a dispute arising in connection with a contract. The intent of the Disputes clause proposed here is to give the contractor the right to stop work under some circumstances pending resolution of a contract dispute.

It is proposed that the following text be used by the affected agencies in amending the Defense Acquisition Regulation and the Federal Procurement Regulations (32 CFR 7–103–12 and 41 CFR 1–7.102–12):

Proposed Disputes Clause

1. Section 7–103–12 of the Defense Acquisition Regulation and Section 1–7.102–12 of the Federal Procurement Regulations are amended to provide as follows:

The contracting officer shall insert the following clause in all contracts unless exempted by the head of the agency under 41 U.S.C. 603(c):

Disputes

(a) Failure of the parties after a reasonable time to reach an agreement on a request for the payment of money or adjustment of contract terms shall constitute a dispute that is subject to the Contract Disputes Act of 1978 (41 U.S.C. 601, *et. seq.*). If a dispute arises relating to the contract, the contractor shall submit a claim in writing to the contracting Officer who shall issue a written decision on the dispute in the manner specified in DAR 1–314 (FPR 1–1318).

(b) In the case of claims for payment exceeding $50,000, or with any amendment causing the total request in dispute to exceed $50,000, the contractor shall certify, before settlement or decision of the contracting officer on the claim, as follows:

I certify that the claim is made in good faith, that the supporting data are accurate and complete to the best of my knowledge and belief, and that the amount requested accurately reflects the contract adjustment for which the contractor believes the Government is liable.

(Contractor's Name)

(Title)

(c) The Government shall pay the contractor interect

(1) On the amount found due and unpaid on claims submitted under this clause;

(2) At the rates fixed by the Secretary of the Treasury, under the Renegotiation Act, Public Law 92–41;

(3) From the date the contracting officer receives the claim, until the Government makes payment.

(d) The decision of the Contracting Officer shall be final and conclusive and not subject to review by any forum, tribunal, or Government agency unless an appeal or action is timely commenced within the times specified by the Contract Disputes Act of 1978.

(e) The contractor shall comply with any decision of the contracting officer and proceed diligently with performace of this contract pending final resolution of any request for relief, claim, appeal, or action related to this contract, except where there has been a material breach of the contract by the Government; *provided,* however, that in any event the contractor shall proceed diligently with the performance of the contract where the head of the agency has made a written determination that continuation of work under the contract is essential to the National Defense or the Public Health and Safety.

[End of Clause]

PRESIDENT'S COMMISSION ON PENSION POLICY

Report of Staff Contacts

The President's Commission on Pension Policy has directed its staff to maintain and publish for the public a listing of contacts of a substantive nature made with individuals, organizations and groups interested in the activities of the Commission.

The following is the staff report of such contacts for the month of May.

Government Research Center-Municipal Finance Officers Association.
New York State University, Institute on Aging.
New York Bar Association.
City University of New York.
National Tax Association.
Andrus Gerontology Center, University of Southern California.
Stanford Research Institute.
Southwest Pension Conference.
Connecticut General.
Mathematica Policy Research, Inc.
Employee Benefit Research Institute.
Milwaukee County Board of Supervisors.
National Council of Senior Citizens.
Pennsylvania State Retirement System.
National Association of Counties.
Delwood Food, Inc.
National Governors' Association.
National Conference of State Legislatures.
Protect our Pensions Committee.
Edward H. Friend & Company Library.
Arthur Andersen Library.
Educational Conference of Health, Welfare & Pension Plans, Inc.
Institutional Investors.
ERISA Industry Committee.
Assocation of Private Pension & Welfare Plans.
Southern Pension Conference.
Interdepartmental Task Force on Women.
Randy Barber.
Harry Lamon.
Winklevoss Associates.
Staff of the United States Senate and the U.S. House of Representatives.
OMB and White House Staff.
Staff of the Social Security Administration.
Staff of the U.S. Department of Labor.

Signed at Washington, D.C. this 8th day of June 1979.

Thomas C. Woodruff,
Executive Director.

BILLING CODE 6820-69-M

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Loan Area No. 1613, Amdt. No. 2]

Arkansas; Declaration of Disaster Loan Area

The above numbered Declaration (See 44 FR 23397) and Amendment #1 (See 44 FR 24967) are amended in accordance with the President's Declaration of April 11, 1979; to include Nevada and Jackson Counties in the State of Arkansas, and to make disaster relief loan assistance available as a result of severe storms and tornadoes beginning about April 8, 1979.

The Small Business Administration will accept applications for disaster relief loans from disaster victims in the above named counties and adjacent counties within the State of Arkansas. All other information remains the same; i.e., the termination date for filing applications for physical damage is close of business on June 11, 1979, and for economic injury until close of business January 11, 1980.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008)

Dated: April 30, 1979.

A. Vernon Weaver,

Administrator.

BILLING CODE 8025-01-M

Privacy Act of 1974; Proposed Revision to System of Records

AGENCY: Small Business Administration (SBA).

ACTION: Notice of Proposed Addition to System of Records.

SUMMARY: It is intended that the system of records entitled Automated Personnel History—SBA 030 (OMB System #32-45-0008) will be amended to include five additional items of information. These data apply only to temporary disaster employees. The intended result is increased efficiency of the Agency's ability to staff disaster offices.

DATES: Comments must be received on or before July 16, 1979.

FOR FURTHER INFORMATION, CONTACT: Charlene Alexander, Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416 (202) 653-6608.

SUPPLEMENTARY INFORMATION: The new information to be collected includes: Disaster type and identification, disaster experience, performance rating and home telephone number.

This information will facilitate the hiring of the best possible people for working within the disaster program. The home phone number is needed to contact the individual when his/her services are desired.

This system of records was last published in its entirety on October 4, 1978 (43 FR 45968).

Accordingly, SBA proposes to amend SBA System of Records SBA 030, Automated Personnel History, September 23, 1977, 42 FR 48790, so that the paragraph describing the categories of records continued in the system will read as follows:

SBA 030

SYSTEM NAME:

Automated Personnel History

* * * * *

CATEGORIES OF RECORDS IN THE SYSTEM:

Current status of all SBA employees including all data pertinent to that status. This system includes name, Social Security number, grade and salary title, organization, education, veterans preference, competitive level, date of birth, handicap code, health benefits, etc. For disaster employees, this system additionally includes disaster type and identification, disaster experience, performance rating, and home telephone number. This system includes all personnel actions affecting active SBA employees since May 1972, and also those of separated employees since that date.

* * * * *

Dated: June 6, 1979.

William H. Mauk, Jr.,

Acting Administrator.

[FR Doc. 79-18017 Filed 6-13-79; 8:45 am]

BILLING CODE 8025-01-M

[Proposed License No. 07/07-0081]

Siouxland Small Business Investment Co.; Application for a License To Operate as a Small Business Investment Company

Notice is hereby given that an application has been filed with the Small Business Administration pursuant to § 107.102 of the regulations governing small business investment companies (13 CFR 107.102 (1979)), under the name of Siouxland Small Business Investment Company, 220 Badgerow Building, Sioux City, Iowa 51101, for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958, as amended (the Act), and the Rules and Regulations promulgated thereunder.

The proposed officers and directors are as follows:

Harold W. McArthur, 206 Helen Street, Sioux City, Iowa 51106, Chairman of the Board, Director.

Francis J. Palmersheim, 227 Wedgewood Drive, So. Sioux City, Nebraska, 68776, President, Director.

Ken Jones, 301 Park, Yankton, South Dakota 57078, First Vice President, Director.

Morey J. Wheeler, 3716 Nebraska, Sioux City, Iowa 51105, Second Vice President, Director.

George T. Qualley, 220 Badgerow Bldg., Sioux City, Iowa 51105, Secretary, Director.

Don Wohlenberg, 1309 Oakwood Drive, Yankton, South Dakota 57078, Treasurer, Director.

Edward Bird, 413 E. 33rd Street, So. Sioux City, Nebraska 68776, Director.

Horst G. Blume, 809 Badgerow Bldg., Sioux City, Iowa 51101, Director.

Allen W. Bronson, 215 Lindewood, Sioux City, Iowa 51101, Director.

Charles D. Busskohl, 6905 Morningside, Sioux City, Iowa 51106, Director.

Densil M. Christiansen, 206 So. 5th Street, Pender, Nebraska 68047, Director.

James E. Dryden, 228 Broadmoor Drive, So. Sioux City, Nebraska, 68776, Director.

Leo R. Eriksen, 1203 First Avenue, So. Sioux City, Nebraska 68776, Director.

Edroy C. Flom, 2700 S. Martha, Sioux City, Iowa 51106, Director.

Derald Gellhaus, 502 James Place, Yankton, South Dakota 57078, Director.

Henry G. Heusinkveld, Boyden, Iowa 51234, Director.

Kelton Houts, 1729 S. Patterson, Sioux City, Iowa 51106, Director.

Jerod M. Knowles, 2510 "G" Street, So. Sioux City, Nebraska, 68776, Director.
Ronald D. Rapp, 2720 "G" Street, So. Sioux City, Nebraska 68776, Director.
Raymond F. Lynch, 312 Argonne, Sioux City, Iowa 51104, Director.
Ray V. Mitchell, 33 Ridgeview Road, Sioux City, Iowa 51104, Director.
Robert G. Prenger, 508 Covered Wagon Circle, So. Sioux City, Nebraska 68776, Director.
Leonard Stoller, Spirit Lake, Iowa 51360, Director.
Conrad D. VanZee, Rock Valley, Iowa 51247, Director.
Ione C. Vogel, 401 Catalina, Vermillion, South Dakota 57069, Director.

Each of the above individuals will own 4 percent of the Applicant's stock. There will be only one class of stock authorized; one million shares of common. Initially only $75,000 will be raised through the above shareholders. In addition it is anticipated that up to 20 organizer investors may purchase shares up to $5,000 per organizer, with a maximum of $100,000. The third stage of the capital acquisition program of the Applicant will be to offer 200,000 shares to the public, at $10 per share, with a maximum offering of $2.0 million. In addition, the offering would provide that in the event fewer than 40,000 shares were sold, for an aggregate investment by the public of $400,000, that the offering would be declared unsuccessful and that all funds would be returned to such investors, with interest. This offering will be registered with the Securities and Exchange Commission as a joint registration under the Securities Act of 1933 and the Investment Company Act of 1940.

Applicant proposes to conduct its operations principally in the states of Iowa, Nebraska and South Dakota in the area known as "Siouxland".

Applicant intends to follow a diversified investment policy.

Matters involved in SBA's consideration of the application include the general business reputation and character of shareholders and management, and the probability of successful operation of the new company in accordance with the Act and Regulations.

Notice is further given that any person may, not later than June 29, 1979, submit to SBA, in writing, comments on the proposed licensing of this company. Any such communications should be addressed to: Associate Administrator for Finance and Investment, Small Business Administration, 1441 "L" Street, N.W., Washington, D.C. 20416.

A copy of this notice shall be published by the Applicant in a newspaper of general circulation in Sioux City, Iowa.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Dated: June 8, 1979.

Peter F. McNeish,

Deputy Associate Administrator for Finance and Investment.

BILLING CODE 8025-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

Temporary Control of New York Harbor Vessel Traffic

Notice is hereby given concerning a change to the Captain of the Port, New York Order 1–79 issued effective 0001, 1 April 1979. That Order was published pursuant to the authority contained in Section 2 of the Port and Tanker Safety Act of 1978, (33 USC 1221, et seq.) and will remain in effect until the current strike which has curtailed New York Harbor tug boat operations is settled. Paragraph 2 of the section entitled "Directions Ordered" lists restrictions on controlled vessel movements on vessels operating within the Port of New York. The purpose of this change is to reduce the restrictions on vessels operating in the vicinity of Hell Gate.

In consideration of the foregoing, notice is given that paragraph 2 of the section of Captain of the Port, New York Order 1–79 entitled Directions Ordered is amended as follows:

Captain of the Port, New York, Order No. 1–79

1. By revising paragraph (2)(f)(iii), Directions Ordered, to read as follows:

Directions Ordered

2. The following restrictions on controlled vessel movements will apply to all vessels operating within the Port of New York upon implementation of this plan:

f. The Captain of the Port will permit vessel traffic within confined channels and basins only under favorable conditions of wind, visibility, vessel size and controllability, obstructions and other vessels, both moored and underway. In this regard:

(iii) No controlled vessel 400′ or greater, and/or with a draft of 27′ or greater may transit Hell Gate.

No controlled vessel less than 400′ and with draft less than 27′ may transit Hell Gate unless it transits within 30 minutes of slack water.

No barge greater than 300′ LOA may transit Hell Gate unless that barge has two tugs made up to it. In addition the barge must have a draft less than 27′. This transit must be conducted within 30 minutes of slack water. Empty tank barges may transit Hell Gate in any condition of tide and current provided the barge has the tug assistance required by this order.

Tank vessels that have discharged cargo at Bronx, NY terminals may be permitted to proceed in ballast through Hell Gate.

(Pub. L. 95–474 (33 USC 1223); 49 CFR 1.46(n)(4) (49 CFR 10063, 2/16/79); 33 CFR 160.35(b))

Dated: May 24, 1979.

James L. Fleishell,

Captain, U.S. Coast Guard, Captain of the Port, New York, N.Y.

BILLING CODE 4910-14-M

Federal Aviation Administration

[Summary Notice No. PE–79–7B]

Petitions for Exemption; Summary of Petitions Received and Dispositions of Petitions Issued: Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Correction.

SUMMARY: On May 31, 1979, the FAA published a notice summarizing petitions for exemption filed with the FAA (44 FR 31340). That notice incorrectly stated that Frontier Airlines, Inc. had petitioned for an exemption to operate B–737 aircraft with 115 passenger seats with 6 seats blocked. This notice corrects that error.

DATES: Comments on petitions received must identify the petition docket number involved and must be received on or before: June 20, 1979.

ADDRESSES: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC–24), Petition Docket No. 18867, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION: The petition, any comments received and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC–24), Room 916, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426–3644.

SUPPLEMENTARY INFORMATION: Summary Notice No. PE–79–7 (44 FR 31340; May 31, 1979) inadvertently and incorrectly stated that Frontier Airlines, Inc. had petitioned for an exemption from 14 CFR 121.391 to permit operation of B–737 aircraft with 115 passenger seats using two flight attendants and blocking 6 seats in certain situations. The Frontier Airlines, Inc. petition was for operation of B–737 aircraft with 106 seats rather than 115.

The Correction

Accordingly, the Description of the Relief Sought in the Frontier Airlines, Inc. petition is hereby corrected to read: "To permit operation of B–737 aircraft with 106 passenger seats using two flight attendants and blocking 6 seats in certain situations."

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, D.C., on June 8, 1979.

Carl B. Schellenberg,

Assistant Chief Counsel, Regulations and Enforcement Division.

BILLING CODE 4910-13-M

[Summary Notice No. PE–79–8]

Petitions for Exemption; Summary of Petitions Received and Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemptions received and of dispositions of petitions issued.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I) and of dispositions of certain petitions previously received. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Publication of this notice and any information it contains or omits is not intended to affect the legal status of any petition or its final dispositions.

DATE: Comments on petitions received must identify the petition docket number involved and must be received on or before: July 5, 1979.

ADDRESSES: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC–24), Petition Docket No. ———, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION: The petition, any comments received and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC–24), Room 916, FAA Headquarters Building (FOB 10A), 800 Indepdendence Avenue, SW., Washington, D.C. 20591; telephone (202) 426–3644.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, D.C., on June 8, 1979.

Carl B. Schellenberg,

Assistant Chief Counsel, Regulations and Enforcement Division.

Petitions for Exemptions

Docket No.	Petitioner	Regulations affected	Description of relief sought
19239	Henson Aviation	14 CFR 121.503(d) and (e)	To allow their pilots to exceed the flight time limitations of 100 hours monthly and 1,000 hours annually.
19240	Rufus T. Rundlett	14 CFR 121.383(c)	To allow him to serve as pilot in command in air carrier operations after he has reached his 60th birthday.
19245	Newton L. Edwards	14 CFR 121.383(c)	To permit him to continue to serve as pilot in air carrier operations after reaching his 60th birthday on May 19, 1979.
19247	Air Indiana, Inc	14 CFR 12.437(a)	To permit the use of pilot Michael A. Chase as pilot in command of Air Indiana all-cargo aircraft without his holding an Airline Transport Pilot Certificate. Mr. Chase is presently 8 months from reaching the required age limit of 23.
19248	Trans World Airlines	14 CFR §§ 121.409(b)(2) and 121.441(a)(2)(i).	To permit pilot training in those maneuvers which best complement the TWA needs and satisfy the second-in-command pilot proficiency check each 24 calendar months.
19179	Air Line Pilots Assn.	14 CFR §§ 61.39(a)(1) and (b)	To permit Messrs. O. W. Porter, E. E. Harned, Jr., and H. S. Hart to take their flight test for an airline transport pilot certificate although there has been a time lapse of over 24 months since they have completed their written examinations. *Granted 6/1/79*
11144	American Airlines	14 CFR 121.99 and 121.351(a)	To extend the June 30, 1979, termination date of Exemption No. 1332, as amended, to permit continued operations over specified routes without maintaining two-way radio communications between each aircraft and the dispatch office along the routes. *Granted 6/4/79.*

BILLING CODE 4910-13-M

Materials Transportation Bureau

Grants and Denials of Applications for Exemptions

AGENCY: Materials Transportation Bureau, DOT.

ACTION: Notice of Grants and Denials of Applications for Exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given of the exemptions granted April 1979. The modes of transportation involved are identified by a number in the "Nature of Exemption Thereof" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo-vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft. Application numbers prefixed by the letters EE represent applications for Emergency Exemptions.

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
		RENEWALS		
1662-X	DOT-E 1662	Greer Hydraulics, Inc., Los Angeles, Calif.	49 CFR 173.302(a)(1), 175.3	To ship a nonflammable gas in a hydraulic accumulator. (Modes 1, 2, 3, 4.)
2708-X	DOT-E 2708	Union Carbide Corp., Tarrytown, N.Y.; Gardner Cryogenics, Bethlehem, Pa.	49 CFR 173.315(a), 173.316	To ship a flammable liquefied compressed gas in a non-DOT specification cargo tank. (Mode 1.)
2767-X	DOT-E 2767	Raytheon Co., Andover, Mass.	49 CFR 173.302(a)(1), 175.3	To ship certain nonflammable compressed gas in a non-DOT specification pressure vessel. (Modes 1, 2, 3, 4.)
2767-P	DOT-E 2767	Mitsubishi International Corp., New York, N.Y.	49 CFR 173.302(a)(1), 175.3	To become a party to Exemption 2767. (See Application No. 2767-P). (Modes 1, 2, 3, 4.)
3548-X	DOT-E 3548	U.S. Department of Energy, Washington, D.C.	49 CFR 173.77, 173.85(a)	To ship certain Class A explosives in special composite bag/drum/wooden box packaging. (Modes 1, 2.)
4242-X	DOT-E 4242	U.S. Department of Defense, Washington, D.C.	49 CFR 173.87, 173.134	To ship certain pyrotoric mixture in a non-DOT specification aluminum pressure vessel. (Mode 1.)
4338-X	DOT-E 4338	Stauffer Chemical Co., Westport, Conn.	49 CFR 173.245a, 173.247	To ship corrosive liquids in DOT Specification 3AA2015 cylinders and DOT Specification 51 portable tanks. (Modes 1, 2, 3.)
4497-P	DOT-E 4497	Red Ball Supply Inc., Oklahoma City, Okla.	49 CFR 172.101, 173.315(a)	To become a party to Exemption 4497. (See Application No. 4497-P). (Mode 1.)
4945-X	DOT-E 4945	Gravner Limited, Slough, England	49 CFR 173.304	To ship a nonflammable, nonliquefied compressed gas in foreign-made non-DOT specification steel cylinders. (Modes 1, 2.)
5117-X	DOT-E 5117	U.S. Environmental Protection Agency, Washington, D.C.	49 CFR 173.346, 173.356, 173.366, 175.3, 175.30.	To ship certain Class B poisons in small glass vials overpacked in fiberboard boxes. (Modes 1, 2, 4, 5.)
5767-X	DOT-E 5767	Amchem Products, Inc., Ambler, Pa.	49 CFR 173.264, 173.245, 173.293, 173.272, 173.258.	To ship certain corrosive materials in a non-DOT specification steel portable tank, polyethylene lined. (Modes 1, 2.)
6466-X	DOT-E 6466	Monsanto Co., St. Louis, Mo	49 CFR 173.86(a)(1), 173.87	To ship a Class A explosive in DOT Specification 12H fiberboard boxes. (Mode 1.)
6497-X	DOT-E 6497	FMC Corp., Philadelphia, Pa.	49 CFR 173.365, 174.63(c)	To ship Class B poison solids in DOT Specification 56 metal portable tanks with certain exceptions. (Modes 1, 2.)
6531-X	DOT-E 6531	Tavoc, Inc., Chatsworth, Calif.	49 CFR 173.302(a)(1), 175.3	To manufacture, mark and sell non-DOT specification pressure vessels for shipment of nonflammable compressed gases. (Modes 1, 2, 4, 5.)
6557-X	DOT-E 6557	General Fire Extinguisher Corp., Northbrook, Ill.	49 CFR 173.3, 178.36-4(c), 178.37-4(c), 178.50-4(c).	To ship certain nonflammable compressed gases in cylinders complying with DOT Specification 3A, 3AA or 4B except for deviation from inspector's report. (Modes 1, 2, 3, 4, 5.)
6766-X	DOT-E 6766	DuBois Chemicals, Cincinnati, Ohio.	49 CFR 173.256	To ship a corrosive liquid in DOT Specification MC-311 and MC-312 cargo tanks. (Mode 1.)
6834-X	DOT-E 6834	FMC Corp., Philadelphia, Pa.	49 CFR 173.245(a)(4)	To ship phosphoric acid in DOT Specification 5 drums. (Mode 1.)
6932-X	DOT-E 6932	Ugine Kuhlmann, Paris, France	49 CFR 173.264(b)(4)	To ship anhydrous hydrofluoric acid in a non-DOT specification portable tank. (Modes 1, 3.)
7005-X	DOT-E 7005	Bignier Schmidt Laurent, Paris, France; Eurotainer Co., Paris, France; LOWACO, S.A., Geneva, Switzerland; Compagnie des Containers Reservoirs, Neuilly-sur-Seine, France; Transcontainer Leasing S.A., Geneva, Switzerland; Societe Anonyme Pour L'Industrie Chimique, Mulhouse, Cedex, France.	49 CFR 90.05-35; 49 CFR Part 173.	To ship certain flammable, corrosive, Class B poisons and combustible liquids and CPM-A materials in non-DOT specification portable tanks. (Modes 1, 2, 3.)
7024-P	DOT-E 7024	Cone Mills Corp., Greensboro, N.C.	49 CFR 173.249(a)(7)	To become a party to Exemption 7024. (See Application No. 7024-P). (Mode 1.)
7042-X	DOT-E 7042	Walter Kidde and Co., Belleville, N.J.	49 CFR 173.302(a)(1), 173.304(a)(1), (d)(3), 173.336(a)(2), 173.337(a)(1), 175.3.	To manufacture, mark and sell non-DOT specification aluminum cylinders for shipment of compressed gases and other hazardous materials. (Modes 1, 2, 3, 4.)
7239-X	DOT-E 7239	Atlas Powder Co., Dallas, Tex.	49 CFR 173.182(c)	To ship certain oxidizing materials in a collapsible rubber container. (Mode 1.)
7268-X	DOT-E 7268	Union Carbide Corp., Tarrytown, N.Y.	49 CFR 173.304(a)(1)	To ship a nonflammable compressed gas mixture containing ethylene oxide in a crosslinkable DOT Specification 39 cylinder. (Modes 1, 2, 3.)
7423-X	DOT-E 7423	Dow Chemical Co., Freeport, Tex.; Reade Manufacturing Co., Inc., Lakehurst, N.J.	49 CFR 173.154, 173.220(a)(2), 178.76(g)(5).	To ship certain flammable solids in a DOT Specification 56 aluminum portable tank. (Modes 1, 2, 3.)
7423-P	DOT-E 7423	The Metal Selling Corp., Putnam, Conn.	49 CFR 173.154, 173.220(a)(2)	To become a party to Exemption 7423. (See Application No. 7423-P).
7451-X	DOT-E 7451	Union Carbide Corp., Tarrytown, N.Y.	49 CFR 173.304, 173.315	To ship liquid argon in a non-DOT specification portable tank. (Modes 1, 3.)
7560-X	DOT-E 7560	Commercial Lovelace Motor Freight, Inc., Columbus, Ohio; Pacific Intermountain Express Co., Walnut Creek, Calif.; Gordons Transports, Inc., Memphis, Tenn.	49 CFR 173.841(e)	To transport Class B poisons, contained in a specially designed reusable overpack, in the same vehicle with foodstuff, feed or any other edible material. (Mode 1.)

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
		RENEWALS—Continued		
7695-X	DOT-E 7695	General Dynamics, Fort Worth, Tex.	49 CFR 173.87, 173.92, 173.101, 173.102, 173.113, 173.3, 176.83, 177.848.	To ship partially dis-assembled aircraft with explosive components installed.
7720-X	DOT-E 7720	Mitsui O.S.K. Lines, Limited, and Sumitomo Shoji America, Inc., San Francisco, Calif.	49 CFR 173.119	To ship certain flammable liquid in non-DOT specification stainless steel portable tanks. (Modes 1, 2, 3.)
7824-X	DOT-E 7824	Petrolite Corp., St. Louis, Mo.	49 CFR 173.119	To ship certain flammable liquids in a marine portable tank where a DOT Specification 57 tank is permitted. (Modes 1, 3.)
7824-P	DOT-E 7824	Champion Chemicals, Inc., Houston, Tex.	49 CFR 173.119	To become a party to Exemption 7824. (See Application No. 7824-P). (Modes 1, 3.)
7848-X	DOT-E 7848	Southern Oxygen Supply Co., Atlanta, Ga.	49 CFR 173.315(a)	To ship liquefied, nonflammable gases in a non-DOT specification cargo tank designed and constructed in accordance with section VIII of the ASME Code. (Mode 1.)
7872-X	DOT-E 7872	Magna Corp., Houston, Tex.	49 CFR 173.122(a)(6)	To ship acrolein, inhibited in an insulated DOT Specification 51 portable tank. (Modes 1, 2, 3.)
8074-X	DOT-E 8074	Hugonnet, S.A., Paris, France	49 CFR Part 173	To ship certain flammable liquids, corrosive liquids, Poison B liquids, combustible liquids, and ORM-A materials in non-DOT specification ISO portable tanks. (Modes 1, 2, 3.)
8047-P	DOT-E 8047	Compagnie des Containers Reservoirs, Neuilly-sur-Seine Cedex, France; Eurotainer, Paris, France; Transcontainer Leasing, S.A., Geneva, Switzerland.	49 CFR Part 173	To become a party to Exemption 8047. (See Application No. 8047-P). (Modes 1, 2, 3.)
		NEW EXEMPTIONS		
8015-N	DOT-E 8015	Deguesa Central Transport Dept., Frankfurt, Germany.	49 CFR 173.266, 173.263, 173.352.	To ship certain oxidizers, corrosives and Class B poisonous materials in a non-DOT specification portable tanks. (Modes 1, 2, 3.)
8048-N	DOT-E 8048	Amoco Production Co., Tulsa, Okla.	49 CFR 172.101, 173.302(a)	To ship uninsulated natural gas in stainless steel, non-DOT specification cylinders. (Mode 1.)
8059-N	DOT-E 8059	Acurex Aerotherm, Mountain View, Calif.	49 CFR 173.302(a)(1), 175.3	To manufacture, mark and sell non-DOT specification filament-wound reinforced plastic aluminum lined cylinders for shipment of certain nonflammable compressed gases. (Modes 1, 2, 3, 4, 5.)
8086-N	DOT-E 8086	Boeing Aerospace Co., Seattle, Wash.	49 CFR 173.119	To ship certain flammable liquid in a non-DOT specification welded aluminum tank inside a wooden container. (Mode 1.)
8087-N	DOT-E 8087	Union Carbide Corp., Bound Brook, N.J.	49 CFR 173.154	To ship a water reactive solid in DOT Specification 56 portable tanks. (Mode 1.)
8108-N	DOT-E 8108	Fauvet-Girel, Paris, France	49 CFR 90.05-35; 49 CFR Part 173.	To ship certain hazardous materials in non-DOT specification intermodal portable tanks. (Modes 1, 2, 3.)
8109-P	DOT-E 8109	Lowsco, S.A., Geneva, Switzerland.	49 CFR 90.05-35; 49 CFR Part 173.	To become a party to Exemption 8109. (See Application No. 8109-P). (Modes 1, 2, 3.)
8132-N	DOT-E 8132	Rockwell International, Richland, Wash.	49 CFR 173.363, 173.365	To make a one-time shipment of a Class B poison solid in a non-DOT specification wooden box. (Mode 1.)
8163-N	DOT-E 8163	Fauvet-Girel, Paris, France	49 CFR Part 173	To ship certain flammable, corrosive, Class B poison and combustible liquids in non-DOT specification portable tanks. (Modes 1, 2, 3.)
8163-P	DOT-E 8163	Transports Internationaux Containers S.A., Paris, France.	49 CFR Part 173	To become a party to Exemption 8163. (See Application No. 8163-P). (Modes 1, 2, 3.)
8174-N	DOT-E 8174	Baltimore Airways, Inc., Glen Burnie, Md.	49 CFR 172.101, 172.204(c)(3), 173.27, 175.30(a)(7), 173.320(b).	To transport certain Class A, B, and C explosives in cargo-only aircraft. (Mode 4.)
8180-N	DOT-E 8180	Saracco Tank and Manufacturing Corp., San Francisco, Calif.	49 CFR 173.136(a)(3), 173.247(a)(7).	To manufacture, mark and sell non-DOT specification steel drums for shipment of corrosive materials and flammable liquids. (Modes 1, 2.)
		EMERGENCY EXEMPTIONS APPLICATIONS RECEIVED AND GRANTED		
EE8169-N	DOT-E 8169	Shell Oil Co., Houston, Tex.	49 CFR 173.358(a)(12), (14)	To transport an organic phosphate compound, liquid in DOT Specification tank motor vehicles and drums. (Mode 1.)

Denials

7705-X—Request by Varian Associates, Inc., Palo Alto, Calif.—To use heat sealed glass ampoule in a polyvinylchloride plastic outside container for analytical standards, denied April 16, 1979.

8100-N—Request by Ball Brothers, Inc., Anchorage, Alaska—To transport propane in DOT Specification 51 portable tanks aboard cargo-only aircraft C-82, denied April 5, 1979.

8122-N—Request by IBM Corporation, Princeton, N.J.—To ship hydrochloric acid mixture in non-DOT specification fiberglass reinforced plastic portable tanks by motor vehicle, denied April 16, 1979.

8131-N—Request by National Aeronautics and Space Administration, Washington, D.C.—To transport oxygen in a non-DOT specification welded pressure vessel described as a portable secondary oxygen life-support system, denied April 16, 1979.

Withdrawals

6525-P—Request by Zimmer Welding Supplies & Service Inc., Brooklyn, N.Y.—To become a party to Exemption 6525 for shipment of certain compressed gases in DOT Specification 3A or 3AA cylinders, withdrawn April 25, 1979.

J. R. Geotke,

Chief, Exemptions Branch, Office of Hazardous Materials Regulation, Materials Transportion Bureau.

BILLING CODE 4910-60-M

National Highway Traffic Safety Administration

Calendar of Meetings Open to the Public

Below is a list of NHTSA-sponsored meetings which are planned over the next 2 years and in which public interest or participation is expected. The list, which will be revised and republished periodically, is for planning. Meeting dates and places, particularly those scheduled for the second year, are subject to change.

June to July 1979

Public Meeting on National Driver Register Study (City location and dates below)

Purpose: The National Driver Register (NRD) functions as a central point for the exchange of information between States concerning the driving records of persons who apply for drivers' licenses. A State participates by sending the NRD a record of each license revocation or suspension, and by querying the NRD before it issues a license to an applicant. In this way, the States can avoid issuing licenses to persons whose recent driving records contains violations that should keep them off the road.

As the States have moved toward faster licensing procedures, the NRD's reliance on the mails has often made its use inconvenient. To examine this problem, and the overall question of the effectiveness of the NRD, Congress has directed the Department of Transportation to study the NRD and to report the results of this study by December 31, 1979.

The study will cover: (1) Information to be placed in the register; (2) the accessibility of such information (including privacy safeguards); (3) the necessary computer electronic equipment; (4) means of keeping information current; and (5) whether an NRD system can effectively operate on a State voluntary participation basis.

In order to solicit the views of States and local officials and other interested individuals, NHTSA will hold public meetings at the following times and places:

Monday, June 18, 1979, Sheraton Sand-Key Hotel, 1160 Gulf Blvd., Clearwater Beach, Florida, 1:00–4:00 p.m.

Tuesday, June 26, 1979, Brandywine Hilton Inn, Delaware Room, I-95 & Naamans Road, Claymont, Delaware (Wilmington), 1:00–4:00 p.m.

Friday, July 20, 1979, Del Webb's Towne House, 100 East Clarendan Avenue, Phoenix, Arizona, 9:00–12:00 noon.

Coordinator: Clay J. Hall, Traffic Safety Programs (NTS–11), 202–426–9561.

June 19–21, 1979

National Highway Safety Advisory Committee Meeting, Washington, D.C

Purpose: Progress reports of the Committee's task forces will be heard. Reports and recommendations for the Secretary, Department of Transportation, may be prepared.

Coordinator: Robert Doherty, Executive Secretariat (NOA–10), 202–426–2872.

June 1979

Child Passenger Protection Workshops (City locations and dates below)

Purpose: To assist interested organizations to inform parents of the importance of using restraint systems when their children are riding in automobiles. Meeting are scheduled as follows: June 21–22, Seattle; June 25–26, Berkley, CA.

Coordinator: Elaine Winestein, Traffic Safety Programs (NTS–14), 202–426–2180.

June to September 1979

Occupant Protection Workshops for State Officials (City locations and dates below)

Purpose: The NHTSA manual on safety belt usage prepared to assist States to develop comprehensive Safety Belt Usage programs will be introduced to appropriate State officials. Schedule: June 20–22, Albany, New York; June 25–28 Kansas City, Missouri; August—Baltimore; September 5–7, Denver; September 19–20, Seattle.

Coordinator: James L. Nichols, Office of Traffic Safety Programs (NTS–14), 202–426–2180

June to December 1979

NHTSA-Public-Industry Technical Meetings, EPA Environmental Laboratory Facility, Ann Arbor, Michigan.

Purpose: Technical, interpretative or procedural questions from the public and industry regarding NHTSA's bumper, vehicle safety and consumer information program will be answered. Questions may relate to the research and development, rulemaking, or enforcement (including defects) phases of these activities. Schedule: June 20; August 15; October 17; December 19.

Coordinator: Wm. H. Marsh, Executive Secretariat (NOA–10), 202–426–2872.

August 1979

Evaluation of Feasibility of a Single Beam Headlighting System; Final Contractor Briefing, Trans Point Building, Washington, D.C.

Purpose: To report results of a research study designed to determine the parameters of beam patterns for improved low beam headlamps.

Coordinator: Michael Perel, Research and Development (NRD–41), 202–755–8753.

August or September 1979

Results of Computer Analysis of Vehicle Side Structure, Washington, D.C.

Purpose: Research results from validation and application of the WRECKER program used in analyzing vehicle side structures will be presented. WRECKER is a computer program to do finite element analysis of automobile structures under crash loadings. The word is a nickname, not an acronym.

Coordinator: William T. Hollowell, Research and Development (NRD–12), 202–426–2992.

September 10–11, 1979

Public Meeting on Heavy Duty Truck Safety, Washington, D.C.

Purpose: To solicit comments and suggestions from the drivers, owners, manufacturers, as well as interested individuals and organizations on the adequacy of NHTSA's Five Year Rulemaking Plan as related to heavy duty truck safety.

Coordinator: Anees A. Adil, Rulemaking (NRM–11), 202–426–2715.

September 27–28, 1979

National Highway Safety Advisory Committee Meeting—Orientation for New Members, Cliffside Motor Inn, Harpers Ferry, West Virginia.

Purpose: Orientation session for newly appointed members of the Committee.

Coordinator: Robert Doherty, Executive Secretariat (NOA–10), 202–426–2872.

October 16–17, 1979

Biomechanics Advisory Committee Meeting, DOT Headquarters Building, Washington, D.C.

Purpose: This Committee reviews NHTSA's procedures, programs and projects requiring the use of live and deceased humans for research in order to validate the need for such use, to minimize the risk of injury to volunteers, and to assure the rights and dignity of the subjects.

Coordinator: Kathy Hasse, Executive Secretariat (NOA–10), 202–426–2872.

October 23–25, 1979

National Highway Safety Advisory Committee, DOT Headquarters Building, Washington, D.C.

Purpose: Progress reports of the Committee's task forces will be heard. Reports and recommendations for the Secretary of Transportation, may be prepared.

Coordinator: Robert Doherty, Executive Secretariat (NOA–11), 202–426–2872.

October 31–November 2, 1979

International Conference on Automotive Fuel Economy Research, Washington, D.C. (Sheraton-International Hotel, Arlington, Virginia).

Purpose: Automotive fuel economy research and technology will be exchanged.

Coordinator: James C. Shively, Research and Development (NRD–10) 202–426–1551

November 1979

Symposium on Side Impact Protection, Washington, D.C.

Purpose: To provide a public forum for the exchange of information on side impact protection and to inform the public, press, and industry of the status of the NHTSA rulemaking activities in upgrading side impact protection.

Coordinator: August Burgett, Rulemaking (NRM–12), 202–426–2802 or James Hackney, Research and Development (NRD–12), 202–426–4861.

November of December 1979

International Symposium on Automobile Ratings, Washington, D.C.

Purpose: To exchange information on the "state-of-the-art" of automobile ratings. The symposium will provide a forum for an in-depth examination of the various methods used to rate crashworthiness, damageability and ease of diagnosis and repair. Experienced technical experts, rating groups, insurance and auto industry representatives and consumer representatives will present their views on current and proposed ways used to rate automobiles.

Two-thirds of the time will be devoted to technical presentations, reviewing current and proposed methods of rating automobiles. One-third will be dedicated to developing requirements for the ratings.

Coordinator: Jack Gillis, Rulemaking (NRM–30), 202–426–1740.

November or December 1979

Public Hearing on Proposed Light Truck Average Fuel Economy Standard for Model Years' 1982–1984, Washington, D.C.

Purpose: Public comments on the proposed fuel economy standard for light trucks and vans for model years' 1982–1984 will be received.

Coordinator: Frank Turpin, Rulemaking (NRM–21), 202–472–6902.

December 3–5, 197

National Conference on Child Passenger Protection, Sheraton International Convention Center, Reston, Virginia.

Purpose: Specialists in the field of highway safety and child development will meet to exchange information on ways to increase the use of child restraints designed for motor vehicles.

Coordinator: Elaine Winestein, Traffice Safety Programs (NTS–14), 202–426–2180.

January 1980

Motorcycle Accident Factors Research, DOT Headquarters Building, Washington, D.C.

Purpose: Results of a research study to determine the causes of motorcycle accidents, the causes of injuries, the severity of the injuries and effective methods of reducing accidents, deaths, and injuries will be reported.

Coordinator: Nicholas G. Tsongos, Research and Development (NRD–32), 202–426–4820.

April 1980

Symposium on Vehicle Agressivity and Compatibility, Washington D.C.

Purpose: Research on vehicle aggressivity and improved compatibility will be presented. Techniques for testing compliance with vehicle compatibility requirements will be discussed.

Coordinator: James R. Hackney, Research and Development (NRD–12), 202–426–4862

November 1980

Symposium on Motor Vehicle Fuel Economy Research: Contractors' Coordination Meeting, Washington, D.C.

Purpose: Progress reports on the contracts which have been funded through the Automotive Fuel Economy Research Program will be given. How individual tasks fit into the research and rulemaking program and the thrust of the Automotive Fuel Economy Program will be explained.

Coordinator: Charles Gauthier, Research and Development (NRD–31), 202–426–2957.

Persons desiring additional information on a particular meeting may write or phone the coordinator indicated above.

Address for Meeting Coordinators: The Office of Rulemaking; The Executive Secretariat; The Office of Traffic Safety Programs, are located at: DOT Headquarters Building, National Highway Traffic Safety Administration, 400 Seventh Street, S.W., Washington, D.C. 20590.

The Office of Research and Development is located at: Trans Point Building, National Highway Traffic Safety Administration, 2100 Second Street, S.W., Washington, D.C. 20590.

Issued in Washington, D.C., on June 6, 1979.

Wm. H. March,
Executive Secretary.

INTERSTATE COMMERCE COMMISSION

[Notice No. 95]

Assignment of Hearings

June 11, 1979

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains

prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation of postponements of hearings in which they are interested.

MC–82841 (Sub-229F), Hunt Transportation, Inc., now assigned for hearing on July 12, 1979 (2 days), at Dallas, TX, in a hearing room to be later designated.

FD–29021F, Consolidated Rail Corporation (Conrail)—Discontinuance of Passenger trains Nos. 453–456 Between Vaparaiso, IN, And Chicago, IL, now assigned for hearing on June 25, 1979 3 days), at Chicago, IL, and will be held in Room No. 1944C, Everett McKinley Dirksen Bldg., 219 S. Dearborn St.

MC–2900 (Sub-342F), Ryder Truck Lines, Inc., now assigned for continued hearing on July 11, 1979 (3 days), at Birmingham, AL, in a hearing room to be later designated.

MC–107678 (Sub-69F), Hill & Hill Truck Line, Inc., now assigned for hearing on July 17, 1979 (9 days), at Denver, CO, is canceled and reassigned to July 17, 1979 (9 days), at Houston, TX, in a hearing room to be later designated.

MC–C–10166, North American Van Lines, Inc., Molloy Bros. Trucking, Inc. Aero Mayflower Transit Company, Inc., Dahill Moving & Storage Co., Inc. Paramount Moving & Storage Co., and Red Ball Van Lines, Inc.—Investigation And Revocation of Certificates, now assigned for hearing on June 26, 1979 at the Offices of the Interstate Commerce Commission, Washington, DC.

MC–115162 (Sub-424F), Poole Truck Line, MC–115311 (Sub-293F), J & M Transportation Co. Inc., now assigned for continued hearing on July 9, 1979 (3 days), at New Orleans, LA, and will be held at the Monteleone Hotel, 214 Royal Street.

MC–107678 (Sub-69F), Hill & Hill Truck Line, Inc., now assigned for hearing on July 17, 1979 (9 days), at Houston, TX, and will be held at Whitehall Hotel, 1700 Smith Street.

MC–123407 (Sub-478F), Sawyer Transport, Inc., now assigned for hearing on June 25, 1979 (5 days), at Denver, CO, and will be held in Division 2, Court of Appeals, U.S. Court House, 1929 Stout Street.

MC–128270 (Sub-33F), Redichs Interstate Inc., now assigned for hearing on June 25, 1979 (5 days), at Denver, CO, and will be held in Division 2, Court of Appeals, U.S. Court House, 1929 Stout Street.

MC–114457 (Sub-434F), Dart Transit Company, now assigned for hearing on June 20, 1979 (1 day), at Denver, CO, and will be held in Division 2, Court of Appeals, U.S. Court House, 1929 Stout Street.

MC–111545 (Sub-255F), Home Transportation Company, Inc., now assigned for continued hearing on July 17, 1979 (4 days), at Reno, NV, and will be held in Room 211, Bureau of Mines, University of Reno, Navada Campus, 1905 Evans, Ave.

MC–140247 (Sub-2F), Allstate Charter Lines, Inc., now assigned for hearing on July 23, 1979 (2 days), at San Francisco, CA, and will be held in Room 510, 5th Floor, 211 Main Street.

FF–514F, Southern Pacific Marine Transport, now assigned for hearing on July 25, 1979 (3 days), at San Francisco, CA, in Room 510, 5th Floor, 211 Main Street.

MC–115826 (Sub-361F), W. J. Digby, Inc., now assigned for hearing on June 21, 1979 (2 days), at Denver, CO, and will be held in Division 2, Court of Appeals, U.S. Court House, 1929 Stout Street.

MC–107678 (Sub-69F), Hill & Hill Truck Line Inc., now assigned for hearing on June 17, 1979 (9 days), at Houston, TX, and will be held in the White Hall Hotel, 1700 Smith Street.

MC–107295 (Sub-896F), Pre-Fab Transit Company, now assigned for hearing on July 16, 1979 (2 days), at Billings, MO, and will be held in Room No. 3033 Federal Bldg., 316 N. 26th Street.

MC–115931 (Sub-69F), Bee Line Transportation, Inc., now assigned for hearing on July 18, 1979, (3 days), at Billings, MO, and will be held in Room No. 3033 Federal Bldg., 316 N. 26th Street.

[Finance Docket No. 29021F]

Consolidated Rail Corp. (Conrail)—Discontinuance of Passenger Trains Nos. 453–456 Between Valparaiso, IN, and Chicago, IL

AGENCY: Interstate Commerce Commission, Office of Policy and Analysis, Energy and Environment Branch.

ACTION: Notice of availability of draft environmental impact statement dealing with action contemplated in the above-entitled proceeding.

SUMMARY: On June 15, 1979 the Energy and Environment Branch will serve on the public and the Environmental Protection Agency (EPA) a copy of the draft environmental impact statement prepared in the above-entitled proceeding. Copies of this document will be available at the Washington headquarters and Chicago field office of the Interstate Commerce Commission. This notice is intended as a supplement to that which will be published by EPA (approximately one week later), if upon review it finds the subject statement to be acceptable for filing. It is hoped that this early notice will afford interested parties additional time to review the document before hearings on the matter, which are scheduled to commence in Chicago on June 25, 1979.

FOR FURTHER INFORMATION CONTACT:

Steve Botts (Washington, D.C. office) Telephone: 202–275–7917, or
Duty Officer (Chicago office) Telephone: 312–353–6125.

BILLING CODE 7035-01-M

Motor Carrier Board Transfer Proceedings

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under Section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include request for oral hearing, must be filed with the Commission within 30—days after the date of this publication. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protestes must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synoposes form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

No. MC–FC–78171 filed May 29, 1979. By decision of June 7, 1979, the Motor Carrier Board approved the transfer to Furnal Truck Line, Inc., 503 1st Ave., North, Altoona, IA 50009 of operating rights held by Ray Burris Truck Line, Inc. (same address) in permits Nos. MC 142805 and MC 142805 Sub 1, issued March 10, 1978, and March 6, 1979,

authorizing dry soybean meal, from Redfield, IA, and points in Polk County, IA, to portions of MO, NE, and MN, under contract with Cargill, Inc., and A. E. Staley Manufacturing Company; soybean meal, from points in Polk County, IA, to Freeport, Rockford, Dixon, Mendota, Bushnell, Monmouth, Beardstown and Rock Island, IL, under contract with A. E. Staley; and defluorinated phostate from Rock Island, IL, to Baxter, IA, under contract with Gooch Feed Mill Corporation. Transferee holds no authority from the Commission, but owns transferor. Representative: James M. Hodge, 1980 Financial Center, Des Moines, IA 50309.

H. G. Homme, Jr.,
Secretary.

BILLING CODE 7035-01-M

[Notice No. 98]

Motor Carrier Temporary Authority Applications

June 8, 1979.

The following are notices of filing of applications for temporary authority under Section 210(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the Federal Register publication no later than the 15th calendar day after the dae the notice of the filing of the application is published in the Federal Register. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "SUB" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Republication: Previously published March 8, 1979 in Federal Register. Purpose of republication is to show origin and destination points.

MC 140489 (Sub-18TA), filed January 29, 1979. Applicant: ROBERTS TRUCKING CO., INC., U.S. Highway South, P.O. Drawer G, Poteau, OK 74953. Representative: Prentiss Shelley (same as applicant). Contract carrier: irregular routes. (1) *Materials, equipment and supplies* used in the manufacture of clothing, bedspreads, curtains, draperies and similar soft goods, (2) *clothing, bedspreads, curtains, draperies and similar soft goods,* (except commodities in bulk, in tank vehicles) between points in the United States (except Alaska and Hawaii). Restricted to traffic destined to or shipped from the facilities of the Kellwood Company. Supporting shipper(s): Kellwood Company, 200 Sears Road, Perry, Georgia 31069. Send protests to: William H. Land, Jr., District Supervisor, 3106 Federal Office Building, 700 West Capitol, Little Rock, AR 72201.

By the Commission.
H. G. Homme, Jr.,
Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 28799 (Sub-Nos. 7 and 8)]

Los Angeles & Salt Lake City Railroad Co. and Union Pacific Railroad Co.—Trackage Rights Over Southern Pacific Transportation Co. in Orange County and in Los Angeles/Long Beach Harbor, Calif.

Los Angeles and Salt Lake city Railroad Company (LASL) and Union Pacific Railroad Company (UP), 1416 Dodge Street, Omaha, NE, represented by Peter W. Hohenhaus and Mark A. Kalafut, of the same address, hereby give notice that on May 16, 1979, they filed with the Interstate Commerce Commission at Washington, D.C. two applications under 49 U.S.C. 11343, in Finance Docket No. 28799 (Sub-No. 7) and Finance Docket No. 28799 (Sub-No. 8), seeking approval of trackage rights over lines of Southern Pacific Transportation Company (SPT) described in detail below. LASL and UP seek these trackage rights as protective conditions in the event the Commission approves the application in Finance Docket No. 28799 (Sub-No. 1), St. Louis Southwestern Railway Company—Purchase (Portion)— William M. Gibbons, Trustee of the Property of Chicago, Rock Island and Pacific Railroad Company, Debtor. Notice of that application, as well as the directly related application, was published in the Federal Register on January 26, 1979, at 44 FR 5563 (1979).

Specifically UP and LA&SL propose to acquire trackage rights over the following portions of SPT's lines in the Orange County, CA area: (1) the Puente Branch between Bartolo, CA (at SPT's junction with UP's mainline) and Studebaker, CA, a distance of 7.3 miles; (2) the Santa Ana Branch between Studebaker, CA and approximately milepost 513, a distance of 15.4 miles (including operating rights over all trackage in Anaheim, CA, linking SPT's Santa Ana Branch with UP's Anaheim Branch), and the Tustin Branch from the junction with the Santa Ana Branch at South Anaheim to approximately milepost 513, a distance of 1.1 miles; and (3) the La Habra Branch from the junction with the Puente Branch at Los Nietos, CA to SPT's junction with UP's Anaheim Branch at Colima, CA a distance of 4.3 miles.

Applicants also seek bridge rights over segments of the following SPT branches to the Los Angeles/Long Beach Harbor area: Puenta, Santa Ana, La Habra and Wilmington. The requested trackage rights begin at the junction of UP's trackage near Redondo junction, continuing westward to an area referred to as Amoco (at approximately milepost 485.7), then southward on SPT's Wilmington Branch through an area referred to as Slauson Junction (at approximately milepost 487.5). The requested track continues southward on the Wilmington Branch to Dominguez Junction (at milepost 498.5). At this point, SPT's San Pedro Branch parallels the Wilmington Branch for approximately 1⅛ miles to the point of the Dolores Yard around Dominguez Street (at approximately milepost 498). It would appear either of these two tracks may be used for movements between Dominguez Junction and the crossover, returning through movements to the San Pedro Branch. The proposed rights continue southward on the San Pedreo Branch to a point referred to as the Thenard Tower (at approximately milepost 501.3) then eastward around the north leg of a wye to SPT's Long Beach Branch continuing to a point east of the UP Mead Yard (at approximately

SPT's milespost 503). The trackage rights over SPT's Puente Branch have an eastern terminus at Bartolo, connection at Los Nietos with SPT's La Habra Branch (at milepost 496.5), continuing to a connection with the Wilmington Branch at Slausson Junction (milepost 487.7).

These two applications will be consolidated for disposition with the applications in Finance Docket No. 28799 (Sub-Nos. 1–6). The latter matters are the subject of an oral hearing presently being conducted by Administrative Law Judge Peter A. Fitzpatrick. Future procedural matters in Finance Docket No. 28799 (Sub-Nos. 7 and 8) should be directed to Judge Fitzpatrick.

The Commission is accepting these applications for consideration, although they are deficient in several ways. LASL and UP, by decision served June 14, 1979, have been advised of the specific deficiencies and given 30 days to complete the application.

Persons may participate formally in the proceedings by submitting written comments regarding the applications. Such submissions shall include the designation both for these proceedings (F.D. No. 28799 (Sub-Nos. 7 and 8)) and F.D. 28799 (Sub-No. 1). The original and two copies shall be filed with the Secretary, Interstate Commerce Commission, Washington, D.C. 10423, not later than July 30, 1979 (45 days after the date the filing of the applications are published in the **Federal Register**. Written comments shall include the following: the person's position, e.g., party protestant or party in support, regarding the proposed transaction; and specific reasons why approval would or would not be in the public interest. Additionally, interested persons who do not intend to participate formally in the proceedings but who desire to comment thereon, may file statements and information as they may desire, subject to the same filing and service requirements. Persons submitting written comments to the Commission shall, at the same time, serve copies of such written comments upon the applicant, the Secretary of Transportation, and the Attorney General.

Dated: June 11, 1979.

By the Commission. Chairman O'Neal, Vice Chairman Brown, Commissioners Stafford, Gresham, Calpp and Christian. Commissioner Christian not participating.

H. G. Homme, Jr.,

Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION.

Notice of Change in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its closed meeting held at 2:30 p.m. on Monday, June 11, 1979, the Corporation's Board of Directors determined, on motion of Chairman Irvine H. Sprague, seconded by Director John G. Heimann (Comptroller of the Currency), concurred in by Director William M. Isaac (Appointive), that Corporation business required its addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of a resolution revising certain delegations of authority with respect to liquidation activities.

The Board further determined, by the same majority vote, that no earlier notice of the change in the subject matter of the meeting was practicable; that the public interest did not require consideration of the matter in a meeting open to public observation; and that the matter was eligible for consideration in a closed meeting by authority of subsection (c)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2)).

Dated: June 11, 1979.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

OVERSEAS PRIVATE INVESTMENT CORPORATION: (Meeting of the Board of Directors).

TIME AND DATE: Meeting of the OPIC Board of Directors, Tuesday June 19, 1979, at 9 a.m. (closed session); 10:30 a.m. (open session).

PLACE: Offices of the Corporation, Seventh Floor Board Room, 1129 20th Street NW., Washington, D.C.

STATUS: The first part of the meeting from 9 a.m. to 10:30 a.m. will be closed to the public. The open portion of the meeting will start at 10:30 a.m.

MATTERS TO BE CONSIDERED: (Closed to the public 9 a.m to 10:30 a.m.).

1. Resumption of OPIC in Western Hemisphere Country.
2. Exception to Country List Requirement.
3. Finance project in Latin American Country.
4. Finance project in Sub-Sahara African Country.
5. Finance project in Central American Country.
6. Insurance project in Sub-Sahara African Country.
7. Insurance project in East Asia Country.
8. Claims Report.
9. Information Reports.

FURTHER MATTERS TO BE CONSIDERED: (Open to the Public 10:30 a.m.)

1. Approval of minutes of the previous Board meeting.
2. Confirmation of scheduled regular Board meetings.
3. Personnel matters.
4. Determination of countries qualifying as Eligible Developing Countries.
5. Inter-American Development Bank proposal for Multilateral Insurance Program for Latin America.
6. International Development Cooperation Administration.
7. Information Reports.

CONTACT PERSON FOR INFORMATION: Information with regard to this meeting may be obtained from the Secretary of the Corporation at (202) 632-1820.

Elizabeth A. Burton,

Corporate Secretary.

June 12, 1979.

SECURITIES AND EXCHANGE COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 44 FR 33236, June 8, 1979.

STATUS: Closed meeting.

PLACE: Room 825, 500 North Capitol Street, Washington, D.C.

DATE PREVIOUSLY ANNOUNCED: Monday, June 4, 1979.

CHANGES IN MEETING: Additional item.

The following additional item will be considered at a closed meeting scheduled for Wednesday, June 13, 1979, after the 10 a.m. open meeting:

Litigation matter.

Commissioners Loomis, Evans, and Pollack determined that Commission business required the above change and that no earlier notice thereof was possible.

At times changes in Commission priorities require alterations in the scheduling or meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Mike Rogan at (202) 755-1606.

June 11, 1979.

SECURITIES AND EXCHANGE COMMISSION.

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of June 18, 1979, in Room 825, 500 North Capitol Street, Washington, D.C.

An open meeting will be held on Tuesday, June 19, 1979, at 10 a.m. Closed meetings will be held on Tuesday, June 19, 1979, immediately following the 10 a.m. open meeting, and on Thursday, June 21, 1979, at 9:30 a.m.

The Commissioners, their legal assistants, the Secretary of the Commission, and recording secretaries will attend the closed meetings. Certain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meetings may be considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4) (8) (9)(A) and (10) and 17 CFR 200.402(a) (8) (9)(i) and (10).

Commissioners Loomis, Evans, and Pollack determined to hold the aforesaid meetings in closed session.

The subject matter of the open meeting scheduled for Tuesday, June 19, 1979, at 10 a.m., will be:

1. Consideration of whether to (1) rescind, as obsolete, Rule 17e-1 under the Investment Company Act of 1940, which permits affiliated brokers to receive commissions on over-the-counter transactions greater than the statutory maximum, if the commissions paid do not exceed the fixed commission rates for similar securities on specified stock exchanges, and (2) adopt proposed Rule 17e-2 under the Investment Company Act (redesignated as new Rule 17e-1), which would allow investment company directors to establish procedures which are reasonably designed to provide that the commission received by an affiliated broker in a stock exchange transaction is reasonable and fair

compared to the commissions received by other brokers in comparable transactions. For further information, please contact Mark B. Goldfus at (202) 755–0230.

2. Consideration of Municipal Securities Rulemaking Board proposed rule G–34 concerning product advertising of municipal securities. The proposed rule would (i) prohibit a municpal securities broker or dealer from publishing or causing to be published an advertisement concerning municipal securities that such professional knows or has reason to know is false and misleading, and (ii) require that all advertisements concerning municipal securities be approved in writing by appropriate supervisory personnel prior to first use, and that a separate record be maintained of such advertisements. For further information, please contact Marcia L. MacHarg at (202) 755–7128.

3. Consideration of whether to resubmit to Congress proposed legislation which would (1) amend the Securities Act of 1933 and Trust Indenture Act of 1939 to delete the exemptions for certain industrial development bonds, (2) make certain conforming amendments to the Securities Exchange Act of 1934, and (3) eliminate the "separate security" rubric currently established by Rule 131 under the Securities Act and Rule 3b–5 under the Securities Exchange Act. For further information, please contact Jennifer A. Sullivan at (202) 376–3584.

4. Consideration of whether to authorize the acquisition of two New Mexico public utility companies under Sections 9(a)(2) and 10 of the Public Utility Holding Company Act of 1935 by Estacado, Inc., a New Mexico corporation, and deny a request for hearing concerning said acquisition. For further information, please contact Grant G. Guthrie at (202) 523–5150.

5. Consideration of whether to issue a release about the use of arbitration clauses in broker-dealer customer agreements. For further information, please contact Justin Klein at (202) 523–3952.

The subject matter of the closed meeting scheduled for Tuesday, June 19, 1979, immediately following the 10 a.m. open meeting, will be:

Formal orders of investigation.
Access to investigate files by Federal, State, or Self-Regulatory Authorities.
Settlement of injunctive actions.
Freedom of Information Act appeals.
Insitution of injunctive actions.
Institution of administrative proceeding of an enforcement nature.
Personnel security matters.
Opinion.

The subject matter of the closed meeting scheduled for Thursday, June 21, 1979, at 8:30 a.m., will be:

Formal order of investigation.
Institution of administrative proceedings of an enforcement nature.

At times changes in commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Beverly Rubman (202) 755–1103.

June 11, 1979.

Part II

Environmental Protection Agency

Proposed Consolidated Permit Regulations

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Parts 122, 123, 124]

[FRL 1225-1]

Consolidated Permit Regulations: RCRA Hazardous Waste; SDWA Underground Injection Control; CAA Prevention of Significant Deterioration; CWA National Pollutant Discharge Elimination System; and Section 404 Dredge or Fill Programs

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: This rule establishes consolidated permit program requirements governing the Hazardous Waste Management program under the Resource Conservation and Recovery Act (RCRA), the Underground Injection Control (UIC) permit program under the Safe Drinking Water Act (SDWA), the National Pollutant Discharge Elimination System (NPDES) under the Clean Water Act (CWA), and the Prevention of Significant Deterioration (PSD) program under the Clean Air Act, for three primary purposes:

(1) To consolidate program requirements for the RCRA and SDWA programs with those already established for the NPDES program.

(2) To establish, for the first time, requirements for State programs under the RCRA, UIC and Section 404 programs.

(3) To consolidate permit issuance procedures for EPA-issued Prevention of Significant Deterioration permits under the Clean Air Act with those for the RCRA, UIC, NPDES and State 404 programs.

DATES: Comments must be received by September 12, 1979.

Public hearings to discuss and to receive comments on the proposed Consolidated Permit regulations, the proposed Underground Injection Control regulations (proposed at 44 FR 23738, April 20, 1979) under the Safe Drinking Water Act, and on the Consolidated Permit Application Forms, will be held in four cities, over three days in each city. The meetings are scheduled for the following places:

July 16, 17 *, 18, 1979, Dallas, Texas.
July 23, 24 *, 25, 1979, Washington, DC.
July 26 *, 27, 28, 1979, Chicago, Illinois.
July 30, 31 *, August 1, 1979, Seattle, Washington.

ADDRESSES: Interested persons may participate in this proposed rulemaking by submitting comments to Edward A. Kramer (A-2) Permits Division (EN-336), Office of Water Enforcement, Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460. Due to the length and complexity of the regulations, all comments should be organized by page and section number. Because a number of program offices will be involved in the review of comments received, EPA requests that *four* copies of comments be submitted. A copy of all comments received will be available for review during normal business hours at the Environmental Protection Agency, Public Information Reference Unit, Room 2922, 401 M Street, SW, Washington, DC 20460.

Four public hearings have been scheduled at the following locations:

July 16, 17 *, 18, 1979, Northpark, Inn, 9300 North Central Expressway, Dallas, Texas.

July 23, 24 *, 25, 1979, HEW Auditorium, 330 Independence Avenue, S.W., Washington, DC.

July 26 *, 27, 28, 1979, Water Tower Hyatt, 800 North Michigan Avenue, Chicago, Illinois.

July 30, 31 *, August 1, 1979, EPA—Region X, 1200 6th Avenue, Seattle, Washington.

The format for each of the hearings will be the same. Each day in a series will be devoted to a separate subject: Day 1 will cover the proposed Part 146 UIC technical regulations, Day 2 and Day 3 will cover the proposed consolidated regulations, the application form, and proposed changes to the NPDES permit program regulations on application requirements. The evening session will cover all subjects. Following registration there will be a short presentation by EPA officials concerning the topic of that day's hearings, an opportunity for anyone in the audience to make a statement, and a question and answer session.

A court reporter will be present at each of the public hearings. Official transcripts will be available at cost.

Anyone requesting an evening session or wishing to make an oral statement at the Consolidated Permit Regulations and Application Form hearings should notify in writing, specifying the hearing and the city in which they are interested: Ms. Judith Shaffer, Permits Division (EN-336), U.S. Environmental Protection Agency, 401 M Street, SW, Washington, D.C. 20460.

Anyone wishing to make an oral statement at the hearings on the UIC regulations should notify in writing, specifying the hearing and the city in which they wish to make the statement: Ms. Sharon Gascon, Office of Drinking Water (WH-550), U.S. Environmental Protection Agency, 401 M Street, SW, Washington, D.C. 20460.

Pamphlets describing the proposed regulations and their impact on the various programs are available from the Environmental Protection Agency, Public Information Center (PM-215), 401 M St., SW, Washington, DC 20460. Please order by title and code.

SUPPLEMENTARY INFORMATION:

Background

The proposed rules integrate program descriptions, State program requirements and procedures for decision-making for four EPA regulatory programs: (1) the Hazardous Waste Management Program established under the Resource Conservation and Recovery Act (RCRA), (2) the Underground Injection Control (UIC) Program established under the Safe Drinking Water Act (SDWA), and (3) the National Pollutant Discharge Elimination System (NPDES) and 404 (Dredge or Fill) program established under the Clean Water Act (CWA). Also consolidated are permit issuance procedures for EPA-issued Prevention of Significant deterioration (PSD) permits under the clean Air Act. (CAA).

These proposed regulations are an important element of an Agency-wide effort to consolidate and make uniform procedures and requirements applicable to EPA and State-administered programs.

Work began in the early Fall of 1978 to consolidate permit program regulations for one existing program—the National Pollutant Discharge Elimination System (NPDES) under the Clean Water Act, and two new programs—the Hazardous Waste Management program under the Resource Conservation and Recovery Act (RCRA) and the Underground

* Day and evening sessions.

Injection Control (UIC) program under the Safe Drinking Water Act. State program requirements under the section 404 Dredge or Fill program of the Clean Water Act were also included. In October of 1978, the Administrator established a Permits Consolidation Task Force to examine the benefits, costs and possible extent and range of permit consolidation that could be undertaken by EPA. The Task Force completed its examination and concluded in its Report to the Administrator that consolidation of permit activities could result in significant benefits for the environment, the regulated public and EPA. One of the Task Force recommendations to the Administrator was the continuation of development of consolidated permit program regulations, particularly procedural regulations, for the RCRA hazardous waste management, UIC, NPDES and 404 programs. The Task Force also recommended that procedures for issuance of Air PSD permits should be the same as those for the four above programs, where procedural requirements are shared.

These proposed regulations are the first step in EPA's effort to consolidate permit programs. The proposal focuses on consistency and unification, to the extent possible, between RCRA, UIC, and NPDES program definitions and descriptions, State program requirements and permit issuance procedures. The proposed regulations also consolidate State program requirements under section 404 of CWA (permits for discharges of dredged or fill material), and EPA permit issuance procedures for Air PSD program.

Draft consolidated application forms are published with these proposed regulations, so as to enable a more complete review of EPA's Permits Consolidated efforts. The Agency also intends to move in the direction of issuing a single consolidated permit for a facility that requires multiple EPA permits, which would cover all EPA permit requirements for the facility.

As the first expression of this process, the Agency has developed a single form for applying for permits under the Consolidated Permit regulations. This form appears as a notice for public comment in a separate part of today's Federal Register. The Consolidated Application form consists of a single part to collect general information from all applicants, followed by separate program-specific parts which collect information needed to issue permits under each program. Today's notice includes the general information part and parts for hazardous waste permits under RCRA and for certain water discharges under NPDES. The parts for the other permit programs will be developed in the near future, and will be incorporated into the consolidated application form when they are ready.

A set of NPDES regulations is also being proposed today as part of the Consolidated Application form package. These proposed NPDES regulations, which are closely tied to the proposed application form, are numbered to correspond with the Consolidated Permit regulations and the two should be read together. The preamble to the proposed conforming regulations contains a detailed discussion of the new NPDES application form requirements and their place in the entire NPDES permitting process.

Although nothing in these regulations would require States to undertake a reorganization of environmental permitting functions, EPA encourages States to begin or continue efforts toward "one-stop" permitting, or other forms of permit program consolidation.

The Agency anticipates a number of benefits to the environment, the regulated community, the general public and its own institutional efficiency in the Permits Consolidation effort:

• *Environmental Benefits:* Consolidation of procedures, regulations and permit review functions should result in more comprehensive management and control of wastes or residuals, and elimination of gaps in managing these wastes.

• *Regulatory Burden Reduction:* The use of uniform procedures and program requirements among EPA permit programs should result in more consistent and predictable requirements for the regulated community, and should reduce the costs of complying with multiple program requirements. The use of common program regulations, and future use of a single application form for EPA-issued permits should reduce the paperwork and increase efficiency in processing permits.

• *Institutional Benefits:* The Agency has already experienced greater coordination, sharing of information, and resolution of inconsistencies and overlaps among the various programs during the development of these proposed regulations. By October, 1979, the Agency will be establishing centralized permit-writing units in the Regions.

• *Public Participation Benefits:* Procedures and opportunities for public participation in permit program decisions and in State program approvals will became more uniform and predictable under these regulations. This should facilitate public involvement in the implementation of the RCRA, UIC, NPDES and 404 programs.

• *Resource Benefits:* EPA expects that consolidation of permit programs should result in some reduction in overall Agency permitting resource needs over the next few years, measured against what the expanding scope of EPA permit programs would otherwise require, particularly as implementation of the RCRA and UIC programs begins and the consolidated application form is utilized. If States adopt similar approaches, resource benefits could also be felt at the State level.

Organization of Proposed Regulations

The proposed regulations will revise 40 CFR 122, 123 and 124, presently used for NPDES program regulations. These Parts of the Code of Federal Regulations are being used because they already provide the skeleton for organizing permit regulations, namely:

Part 122—Program Descriptions.

Part 123—State Program Requirements.

Part 124—Procedures for Decision-making.

To structure the proposed regulations in an understandable format, parts 122, 123 and 124 have been organized into Subparts. Subpart A of each Part applies to each permit program included in that Part. Subsequent Subparts set forth program-specific requirements for the individual programs.

Although the Agency has attempted to unify and consolidate these proposed regulations, statutory and programmatic considerations preclude complete uniformity. Thus, to review the regulations for a particular program, one must read both the general subpart plus the applicable specific subpart.

In adopting the proposed format, the Agency considered various alternative formats for combining requirements for the covered programs. The Agency solicits comments on the proposed format and any alternative approaches.

The Agency recognizes that these regulations are long and complicated. However, if each program were to publish separate regulations, they would be approximately 40 percent larger in total. This savings has resulted from the formulation of generally applicable requirements for all programs.

Summary of Proposed Regulations

Proposed Part 122—Establishes program definitions and basic program requirements for the RCRA, UIC, NPDES and 404 programs. Part 122 also provides certain requirements for State programs.

to the extent Part 123 explicitly references Part 122 requirements. This Part spells out in detail who must apply for a permit; what terms, conditions and schedules of compliance must be incorporated into permits; when and how monitoring and reporting of permit compliance must be performed; when permits may be revised or reissued; and other requirements.

Proposed Part 123—Establishes the requirements for State programs. Each of the programs described in Part 122 may be administered by any State, in lieu of EPA, that has received the approval of the Administrator. In addition of the hazardous waste, UIC and NPDES programs, Part 123 governs State section 404 permit programs for discharges of dredged or fill material. After receiving the approval of the Administrator a State may issue section 404 permits, in lieu of the United States Army Corps of Engineers, in so called "Phase II and III" waters (sometimes referred to as traditionally non-navigable waters). In addition, Part 123 contains the procedures for State program approval, revision and withdrawal.

Proposed Part 124—Establishes the procedures to be followed in making permit decisions under the RCRA hazardous waste, UIC, PSD and NPDES permit programs, including procedures to enable public participation in permit decisions, consultation with State and Federal agencies, procedures for consolidated review and issuance of two or more permits to the same facility or activity, and mechanisms for appeal from permit decisions. Most requirements in Part 124 are only applicable where EPA is the permit-issuing authority. Part 123 requires States to comply with some of the Part 124 provisions, such as the public participation aspects of permit issuance.

Relationships Between Programs

The programs covered in these regulations overlap one another in two different ways. The first type of overlap occurs where different activities associated with a single source require permits under two or more of the programs covered by these regulations. For example, a facility may store hazardous waste in surface facilities, inject some of its waste into the ground, and have a discharge of other waste into surface waters. The basic reason for proposing these consolidated regulations is to assure that permit decisions are consistent, and that the procedures for permit issuance are efficient and coherent.

The second type of overlap occurs where the same activity is regulated under two or more of the statutes authorizing these regulations. For example, disposal of hazardous waste by well injection must have a permit under section 3005(a) of RCRA, a permit under section 1421(b) of SDWA and, if located in a State with an approved NPDES program, a permit under section 402(b)(1)(D) of the CWA. The following is a discussion of the approaches the Agency is proposing in this second area:

UIC/NPDES—Under section 402(b)(1)(D) of the CWA approved State NPDES programs are required to "control the disposal of pollutants into wells." The UIC program, likewise, requires States to establish programs for controlling well injections. EPA believes that these two requirements are complementary and that a single permit issued by a State to a well injector can satisfy the requirements of both acts.

Although EPA has required NPDES States to demonstrate the legal authority to issue permits for well disposal, it has never specified how States should exercise this authority. No technical requirements have been established under the NPDES program for well disposal; States are merely required to exercise their authority "to protect the public health and welfare and to prevent the pollution of ground and surface waters." EPA believes that the legal authority possessed by NPDES States can serve as the nucleus for development of State UIC programs. Therefore, in many instances, these States will be able to develop UIC programs without any further action by their State legislatures. Once a State develops regulations and other program components in accordance with UIC regulations under Part 146 (proposed at 44 FR 2378 (April 20, 1979)), and receives the approval of the Administrator under Part 123, a State-issued permit for well injection should satisfy both CWA and SDWA requirements.

UIC/RCRA—The UIC program imposes requirements on all well injection, while the hazardous waste program under RCRA imposes requirements on treatment, storage and disposal of hazardous waste. When materials which are hazardous wastes for purposes of the RCRA program are injected into a well, that well falls within the definition of a Hazardous Waste Management Facility (HWM) facility and, consequently, is subject to regulation under both programs.

To avoid any possible duplication and inconsistency in regulation, EPA proposes to regulate hazardous waste injection wells under the UIC program because it is specifically oriented toward underground injection as a technique of disposal. EPA believes that the degree of environmental protection afforded by the UIC regulations meets the requirements of RCRA. EPA has taken several actions to assure that hazardous waste is adequately covered under the UIC program. In cases where a site has both an injection well and surface facilites that treat, store or dispose of hazardous wastes, the surface facilities will be subject to a hazardous waste management program permit. The appropriate RCRA requirements will be applied through that mechanism. In cases where a well receives wastes accompanied by a manifest, the UIC controls will apply exclusively. Those controls, however, will incorporate the RCRA requirements for notification, manifest, recordkeeping and reporting.

However, any pits, ponds, lagoons, storage tanks or other surface facilities associated with an injection well that are used to treat of store hazardous waste are still required to obtain a RCRA permit. For further discussion of this approach, see the preamble to Subpart B of Part 122 of these regulations.

Another particular concern of the Agency was that the imposition of controls over hazardous waste under RCRA might make underground disposal of such waste more economically attractive in States that were not yet listed as requiring a UIC program. Under the UIC program, State program requirements are only triggered once a State has been listed by EPA. EPA has therefore decided to implement UIC controls over well injections on the same schedule as the RCRA hazardous waste program. All the remaining unlisted States will be listed by May of 1980 as needing a UIC program.

The UIC Program also proposes to ban all Class IV wells (i.e., wells owned or operated by generators of hazardous wastes or by hazardous waste management facilities that inject into or above underground sources of drinking water). Since the operators of these wells are subject to RCRA requirements, they will have to notify EPA under section 3010 of RCRA. The initial inventory of Class IV wells will be developed through the notification process under RCRA.

NPDES/RCRA—Publicly owned treatment works(POTW) which receive wastes defined as hazardous under the RCRA program are also point sources subject to the NPDES permit program of secion 402 of the CWA. This creates the possibility of duplicative regulation of

the same activity. In an effort to avoid this result, EPA is proposing a "permit by rule" under the RCRA program for publicly owned treatment works (POTW) which receives hazardous wastes and are regulated by the NPDES program. Under this proposal, POTW's would be "deemed to have a permit" for purposes of RCRA if the facility has an NPDES permit and if it adheres to the notification requirements of section 3010 of RCRA, as well as the manifest, recordkeeping and reporting requirements of 40 CFR Part 250 under sections 3001–3004 of RCRA. EPA believes that this approach accomplishes the protective goals of RCRA in a way which eliminates much of the administrative burden which parallel regulation would cause. For further discussion of this approach, see the preamble to Subpart B of Part 122.

Applicability of NEPA to the Consolidated Permit Programs

With the exception of EPA-issued permits for new sources, none of the permitting requirements under these regulations is subject to requirements of the National Environmental Policy Act (NEPA), 43 U.S.C. section 4332(2)(E). NPDES permits, other than for new sources as defined in section 306 of CWA, are removed from NEPA by the terms of section 511(c) of CWA. That section expressly exempts from NEPA requirements all actions taken by the Administrator pursuant to CWA, except issuance of permits to new sources and construction grants for publicly owned treatment works. PSD permits under the CAA are similarly exempted by statute from NEPA. See Energy Supply and Environmental Coordination Act of 1974, section 4(c)(1), 15 U.S.C. 793(c)(1).

EPA permits for hazardous waste facilities under RCRA are also not subject to the formal requirements of NEPA. The courts have recognized that Federal regulatory action taken by an agency with recognized environmental expertise, when circumscribed by extensive procedures, including public participation for evaluation environmental issues, constitutes the functional equivalent of NEPA's requirements. See *Portland Cement Assoc.* v. *Ruckelshaus*, 486 F.2d 375 (D.C. Cir. 1973), cert. den., 417 U.S. 921 (1974); *Maryland* v. *Train*, 415 F. Supp. 116, 122 (D. MD. 1976). EPA has determined that the procedures regarding EPA's issuance of RCRA permits clearly satisfy that standard.

The Agency also anticipates that the functional equivalence principle will apply to EPA-issued UIC permits, and that such permits are similarly exempt from formal NEPA requirements.

Finally, NEPA requirements do not apply to State-issued permits. *Chesapeake Bay Foundation, Inc.* v. *United States*, 453 F. Supp. 122 (E.D. Va. 1978).

The Agency believes that the proposed regulations will have a positive environmental impact by providing more comprehensive environmental review of facilities which require EPA permits under the NPDES, PSD, RCRA or UIC permit programs, particularly where two or more of these permits may be required for the same facility or activity. We believe that the possible transfer of various programs to State responsibility will not affect the stringency of program administration. The State programs must meet Federal Standards in order to receive Federal approval, and they will be subject to Federal oversight. While transfer of aspects of the 404 program to the States will eliminate the NEPA requirement for some 404 permits, it is unclear whether this transfer will lead to narrowed environmental review of the subject activities, since States are free to adopt a more stringent approach to regulation and many States have their own EIS-type requirements.

Previous Publication of Regulations for RCRA, UIC, and NPDES Programs

Portions of these proposed regulations have appeared previously in the Federal Register in either proposed or final form. Comments on any prior proposal will *not* automatically be considered part of the record of this proposal. Commenters should resubmit such comments as comments on this proposal if they want to make sure that EPA will consider them.

RCRA Program: Under the RCRA program, Guidelines for State Hazardous Waste Programs were proposed as Part IV of the February 1, 1978, Federal Register (43 FR 4366). These consolidated regulations contain changes which reflect comments on the February 1978, proposed guidelines. Because the consolidated regulations may surface issues on which the public has not had a chance to comment, the consolidated regulations are a reproposal of the RCRA Section 3006 guidelines.

UIC Program: Regulations for the UIC program were originally proposed on August 31, 1976, as 40 CFR Part 146. In response to numerous public comments, EPA has made significant changes in the regulations and has reproposed them for further public comment. (See 44 FR 23738 (April 20, 1979)). Many elements of the UIC program are now being proposed for inclusion in Parts 122, 123 and 124, while the technical criteria and standards by which the Director of an EPA or State-administered UIC program makes decisions continue to remain in Part 146.

NPDES Program: Subparts D of the proposed Parts 122 and 123, and Subparts D, E and F of proposed Part 124 are virtually identical to each of the contents of the NPDES Parts 122–124 which were recently promulgated. These NPDES regulations were made final after a comment period of 90 days during which over 500 comments were received. The comments were fully considered by the Agency, and the final NPDES regulations now occupy Parts 122–124. The consolidated permit program regulations, when finally promulgated, will incorporate and take the place of the final NPDES regulations in Parts 122–124. There are some minor changes to the Final NPDES regulations which occurred in the process of generalizing requirements for all programs in Subpart A. In addition, there are several new provisions applicable to the NPDES program, such as procedures for the withdrawal of State programs under Part 123, and new permit modification and confidentiality of information provisions under Part 122. These changes are highlighted in this preamble discussion.

Technical Requirements for RCRA, UIC, and NPDES Programs

Technical requirements and criteria which apply to decision-making under these three programs have been developed separately from Parts 122–124. These regulations set the standards for the actual contents of permits under the three programs and provide some of the technical bases for determining the adequacy of State programs and individual permit decisions.

RCRA Program: For the RCRA permit program, Parts 122–124 should be read, where appropriate, in conjunction with technical standards proposed under 40 CFR Part 250 on December 18, 1978, (43 FR 58946–58028) under sections 3001, 3002 and 3004 of RCRA prescribing (1) criteria for identifying and listing hazardous wastes, identification methods, and a hazardous waste list, (2) standards for generators of such waste for recordkeeping, labeling, containerizing and using a manifest, and (3) performance standards for hazardous waste management facilities including human health and environmental protection levels and design and operating standards as well as recordkeeping, monitoring, reporting,

contingency plans and training and financial responsibility requirements. These proposals together with those under section 3003, (April 28, 1978, FR 18506–18512), section 3005 (40 CRF Parts 122 and 124), section 3006 (40 CFR Part 123), section 3008 (August 4, 1978, FR 34738–34747), and section 3010 (July 11, 1978, FR 29908–29916) of RCRA and that of the Department of Transportation (May 25, 1978, FR 22828–22834) under the Hazardous Materials Transportation Act constitute the hazardous waste regulatory program under subtitle C of RCRA.

UIC Program: Technical criteria and standards for Underground Injection Control Programs under the SDWA were proposed as 40 CFR Part 146, on April 20, 1979 (44 FR 23738).

NPDES Program: NPDES criteria for decision-making will be located in 40 CFR Part 125, which was recently promulgated. In addition, effluent guidelines used in setting permit effluent limitations are located in 40 CFR Subchapter N.

404 Program: Interim final guidelines detailing the environmental concerns to be considered in evaluation of section 404 Permit applications (i.e., the section 404(b)(1) guidelines are set forth in 40 CFR Part 230; however revised guidelines will soon be proposed to amend Part 230. Procedures under section 404(c) for use of EPA's authority to prohibit or restrict disposal sites are detailed in 40 CFR Part 231 and regulations covering activities under section 208(b)(4) of CWA will be in 40 CFR Part 130.

Part 122

What does this Part do?

Subpart A of Part 122 provides both general and program-specific definitions for the EPA administration of RCRA hazardous waste, SDWA underground injection control, and CWA NPDES programs. In addition, all Subparts of Part 122 describe basic program elements for the three programs, including application requirements, standard permit conditions, permittee monitoring and reporting requirements and other requirements. Both the general Subpart (A) and the appropriate individual Subpart (B-D) must be consulted for a full description of any program.

Certain of these requirements are made applicable, as indicated in Part 123, to State programs which operate in lieu of EPA programs after receiving EPA approval. In the case of section 404, State programs operate in lieu of the Corps of Engineers program in so-called "Phase II and III" waters.

Subpart A

The major elements of Part 122, Subpart A are:

Program definitions (§ 122.3). Definitions for the RCRA, UIC, NPDES and 404 programs are set forth in § 122.3. Definitions applicable to all programs appear under "General Definitions," and those applicable only to a particular permit program are set forth separately.

Wherever possible, common definitions have been provided for the four programs. In some cases, where different definitions must be employed due to the differing statutofy requirements, differences between definitions for two or more programs are highlighted. For instance, the definitions of "State" and "person" under the three Acts are necessarilydifferent and are highlighted in § 122.3(a).

Both the RCRAand UIC programs propose to use a similar definition of "underground sources of drinking water" or "underground drinking water source" (USDW). Any aquifer or its portion qualifies as an USDW if:

(1) It is currently in use as a source of drinking water;

(2) It produces water with fewer than 10,000 mg.1 of total dissolved solids (TDS); or

(3) It is designated as an USDW by the Administrator or State (as appropriate).

Under the UIC program, however, flexibility is granted in the application of the definition to recognize those situations where the aquifer or its portion may technically meet the definition but in fact has no real potential to serve as a drinking water source. Therefore, in those instances where the aquifer or its portion does not currently and will not in the future serve as a source of drinking water, it need not be designated if:

(i) It is mineral, oil or geothermal energy producing;

(ii) It is situated at a depth or location which makes recovery of water for drinking water purposes economically or technologically impractical; or

(iii) It is so contaminated that it would be economically or technologically impractical to render the water fit for human consumption.

To balance the flexibility provided, the UIC program will require the designations of USDW's to be made after public hearing and subject to approval by the Administrator.

The RCRA program does not propose a similar degree of flexibility in the application of the definition. It is the Agency's judgment that where hazardous wastes are concerned, a stricter level of protection is prudent. Since little discretion is available, the HWM program also does not propose to require public hearings or review by the Administrator.

Both the NPDES and section 404 programs employ the concepts of best management practices (BMP's) and general permits. Because of the differences in the regulatory programs, differing definitions are applicable to these concepts (no definition of "general permit" is given for purposes of NPDES although EPA is considering formulating one). The public is invited to comment on whether it is appropriate to develop unified definitions for these concepts.

Signatories to permit program forms (§ 122.5). These regulations require that permit applications, except those for Class II wells under the UIC program, must be signed by a principal executive officer of at least the level of vice-president or equivalent official for partnerships or public facilities. Permit applications for Class II wells, reports required under Part 122, and certain requests for information forms may be signed by a duly authorized representative. Applications for permits for Class II wells under the Underground Injection Control program are distinguished from other applications due to the large numbers of small and physically dispersed Class II wells associated with oil and gas operations involving the injection of fluids. All signatories for permit program forms must represent that they have made sufficient inquiries to certify the truth of any statements made in the forms.

Duration of Permits; Continuation of Expiring Permits; Transferability of Permits (§ 122.6). This section establishes requirements for the duration of RCRA, UIC, 404 and NPDES permits, the continuation of expiring EPA-issued permits, and requirements that must be met by permittees who transfer ownership of their facilities.

NPDES and section 404 permits are required under the Clean Water Act to have fixed terms not to exceed five years. Neither RCRA nor the SDWA establish specific permit terms for hazardous waste or underground injection control permits. Section 122.6 proposes that RCRA and UIC permits may be issued with terms up to the life of the permitted facility. A lifetime permit was selected for these facilities so as to enable them to obtain more favorable financing, to avoid continuous facility siting problems and to save paperwork burdens on EPA or State permit writers. NPDES and 404 permits

will continue to be issued for terms that do not exceed five years. However, to insure a regular review of permits particularly where a RCRA, UIC, or 404 permit is issued to a facility or activity that requires an NPDES permit, review of each permit issued for a given facility or activity is required each time another permit for the same facility is modified, reissued or terminated. This review will thus coincide with the NPDES reissuance cycle and will be conducted for purposes of considering whether modification or revocation and reissuance of any other permit(s) is warranted. These proposed periodic reviews are mandatory on both EPA and approved States.

After reviewing a permit, a decision whether or not to modify the permit will be made by the EPA Regional Administrator or the State Director. Reasons for modifying a permit would include new information about human health or environmental risks, changes in the national standards, and changes in the type or volume of hazardous waste(s), injected fluids or pollutants. Facility siting will not be considered at the time of permit modification unless new information or standards indicate a threat to human health or the environment exists which was unknown at the time of permit issuance or unless new data has been developed since the time the permit was granted.

Regardless of whether another permit expires or is modified or terminated, review of single UIC or RCRA permits for a given facility is required in any event at least every five years and upon public request where information is submitted which indicates that grounds for permit modification exist.

The Agency solicits public comment on this approach to ensure comprehensive, regular review of permits. In particular, the Agency solicits comment on an alternative that was considered and rejected during the development of these regulations. Under this alternative, where multiple permits are required for a single activity or facility, all permits would be set to expire at the same time. Where only a single permit under any program is required, it would be subject to review and reissuance at the time that an additional permit under another program is required in the future. This option would assure that a comprehensive review of the permit(s) from the standpoint of all programs is accomplished concurrently and on a regular basis. It would insure regular review of multiple permit and public participation during the issuance/reissuance process because of the built-in expiration and reissuance of permits. In addition, this option would enable continuing EPA review of State-issued permits for the same facility or activity, if the requirement were made applicable to States.

Review and Modification or Revocation and Reissuance of Permits. Section 122.5 covers both modification and revocation and reissuance of permits. These are alternative means of accomplishing very similar results. Either action can be chosen by the State Director or the Regional Administrator as a means of changing the terms of a permit, if cause exists under § 122.9(e). In general, however, the Director would choose to revoke an existing permit and reissue a new permit when permit terms and conditions are to be extensively changed, or where the remaining term of the existing permit is short and it would be to the advantage of the permittee to obtain a new permit with a longer term. This latter situation will involve primarily the shorter term NPDES and 404 permits, since most, if not all, UIC and RCRA permits will be set for the life of the facility. Additional program-specific provisions for modification of NPDES permits are contained in Subpart D. Most modifications under this section require compliance with §§ 124.5 and 124.7, which require the issuance of a draft permit for permit modifications, thus initiating the public review process under Part 124. Such modifications are processed in the same manner as permits, except that public comment is sought only on the proposed modifications. However, certain minor modifications under § 122.9(g) do not require compliance with § 124.5, unless the modifications would render the permit less stringent or unless contested by the permittee. These minor modifications take effect immediately when issued, and do not require the preparation of a draft permit or public notice and comment. In addition, Section 404 permit modifications will be processed according to procedures set forth in Part 123, Subpart E.

Termination of permits. Section 122.10 specifies conditions under which permits will be terminated for cause by the permitting authority. While revocation and reissuance is a mechanism for changing permit terms and conditions in light of changed conditions, termination is essentially an enforcement mechanism. The term "termination", as it is used in Part 122, includes permit suspension or revocation under section 3008 of RCRA. Procedures for termination of RCRA permits are provided in 40 CFR Part 22 (proposed 43 FR 34738 (August 4, 1978)).

Conditions applicable to all permits (§ 122.11). Section 122.11 specifies general conditions applicable to all permits under the RCRA, UIC, NPDES and 404 programs. Additional specific conditions are also included in Subparts B–D, unique to the individual permit programs.

Schedules of Compliance. Section 122.12 specifies requirements for schedules of compliance leading to expeditious compliance with program requirements. For NPDES permits, these schedules of compliance lead the permittee to compliance with the CWA's statutory treatment deadline requirements, as well as other program requirements. For permits under the RCRA, UIC and 404 programs, schedules of compliance will be used to set timetables for expeditious compliance with program requirements. These schedules are required, under proposed § 122.12(a), to set interim compliance dates where the total schedules exceed nine months. Permittees are required to provide written notice to the Director of the permittee's compliance or noncompliance with interim or final requirements. For most EPA-issued permits this notice must be provided within 14 days of each interim or final date. However, UIC permits issued by EPA will require such notice within 30 days. This variation in the notice requirements for UIC permits results from an effort to make the UIC program requirements in these proposed regulations consistent with those that were proposed as Part 146 on April 20, 1979 (44 FR 23738). However, EPA requests comments on the most appropriate time for providing such notice, and whether the notice requirements for all programs should be the same.

In addition, proposed § 122.12 allows approved State programs to choose different intervals for interim compliance dates, and up to 30 days for providing written notice following an interim or final compliance date. Comments on this approach are also solicited.

Section 122.12 also provides for two alternate schedules of compliance in cases where an EPA permittee may choose to terminate operations rather than meet permit requirements. One schedule reflects the dates for the proposed termination of operations, and the other reflects dates for compliance with all permit requirements. Very specific requirements for these alternate schedules are proposed for NPDES permits issued by EPA, because NPDES permits are subject to statutory deadline requirements under the CWA. However,

because the UIC and RCRA programs are expected to encounter situations in which alternate schedules will be necessary to assist both the Regional Administrator and the permittee in making the decision to terminate operations or meet compliance, alternate schedule provisions are also provided for these programs. Comments are solicited on the use of alternate schedules for the UIC and RCRA programs.

Recording and Reporting of Monitoring Results. Section 122.14 establishes general requirements applicable to all permittees for the recording and reporting of monitoring results to the permitting authority.

Noncompliance Reporting (§ 122.15). This section outlines the general requirements for noncompliance reporting that must be met by both EPA Regional offices and approved States. Reports are required on a quarterly basis for major permits under the three programs, and on an annual basis for minor permits. Additional or more specific reporting requirements are provided in Subparts B–D.

Confidentiality of Information (§ 122.16). This section provides for claims of confidentiality by persons submitting information to EPA under these regulations. Such claims will be processed in accordance with the procedures set out in 40 CFR Part 2. Paragraph (b) describes forms, documents and other materials will not be given confidential treatment.

Relationship of Subpart A to the Final NPDES Regulations, Part 122

Certain elements of the NPDES program have been modified slightly in Subpart A of Part 122, as a result of the consolidation with the RCRA and UIC programs. Among these changes are the following:

Review and Modification or Revocation and Reissuance of Permits (§ 122.9)

Under these proposed Consolidated regulations, NPDES permits must be reviewed to determine whether cause exists for modification or revocation and reissuance every time that another permit for the same facility or activity is modified, revoked and reissued, or terminated, and when information is presented to the Director indicating that cause exists for action under § 122.9(e). The final NPDES regulations did not require this kind of review by the Director. (See § 122.31 of the NPDES regulations.)

Conditions Applicable to all Permits (§ 122.11)

The standard conditions spelled out in § 122.11 of these proposed consolidated regulations are very similar to those contained in § 122.14 of the final NPDES regulations; however, in certain cases the language has been adjusted to better reflect all programs. Additional conditions in § 122.68 uniquely applicable to NPDES permits are identical to their counterparts in the final NPDES regulations, § 122.14.

Confidentiality of Information (§ 122.16)

The confidentiality of information section is an expansion of provisions contained in § 124.131 of the final NPDES regulations (Public Access to Information), and incorporates references to the procedures of 40 CFR Part 2, for processing claims for confidential treatment.

Subpart B

Subpart B of Part 122 sets forth specific requirements for Hazardous Waste Management Programs to supplement the general requirements of Subpart A. This section will discuss those specific requirements after a brief description of EPA's overall efforts to implement Subtitle C of RCRA.

Subtitle C of RCRA creates a "cradle-to-grave" control system for the management of hazardous waste including appropriate monitoring, recordkeeping and reporting. Section 3001 requires EPA to define criteria and methods for identifying and listing hazardous wastes. Wastes which are identified or listed as hazardous by these means are then included in the management control system established under sections 3002 through 3006 and 3010. Those wastes which are not identified or listed will be governed by the requirements of Subtitle D of RCRA for the management of municipal solid waste.

Section 3002 requires EPA to define the standards applicable to hazardous waste generators. Section 3002 also requires establishment of a manifest system to track hazardous wastes from their generation to their ultimate disposition in a permitted treatment, storage or disposal facility.

Section 3003 requires EPA to define standards applicable to transporters of hazardous wastes to insure proper management of hazardous wastes during transportation. The Agency is exploring opportunities for integrating this program with proposed and existing Department of Transportation regulations on the transportation of hazardous materials.

Section 3004 requires EPA to develop performance standards for the location, design, construction and operation of hazardous waste treatment, storage and disposal facilities. Facilities, whether on or off the site of hazardous waste generation are covered by these standards and are required to obtain permits. Section 3004 standards comprise the criteria against which applications for permits will be evaluated.

Section 3005 requirements, as proposed in Part 124 of these regulations establish the procedures for obtaining a permit to construct and/or operate a hazardous waste treatment, storage or disposal facility.

Section 3006 requires EPA to issue guidelines for State programs and procedures by which States may seek authorization to carry out the hazardous waste program in lieu of the EPA-administered program. Regulations to implement section 3006 are proposed in Part 123.

Section 3010 regulations establish procedures by which any person generating or transporting hazardous waste, or owning or operating a facility for storage, treatment, and/or disposal of hazardous waste, must notify EPA of this activity within 90 days of promulgation of regulations defining a hazardous waste (section 3001). Section 3010 provides that no hazardous waste subject to Subtitle C regulation may be transported, treated, stored or disposed, unless this notification is timely given to EPA.

Table I appearing below cross references the numbered sections of RCRA to the Subpart designations to be used in the regulations:

Table I

Solid Waste Disposal Act (as amended) Subtitle C Numbering System

40 CFR Part 250, Subpart A (proposed at 43 FR 58946–58968 (Dec. 18, 1978))—Section 3001 Standards for Criteria, Identification, and Listing of Hazardous Wastes.
40 CFR Part 250, Subpart B (proposed at 43 FR 58960–58961 (Dec. 18, 1978))—Section 3002 Standards Applicable to Generators.
40 CFR Part 250, Subpart C—(proposed at 43 FR 18506–18512 (April 28, 1978))—Section 3003 Standards Applicable to Transporters.
40 CFR Part 250, Subpart D (proposed at 43 FR 58962–59028 (Dec. 18, 1978))—Section 3004 Standards for Owners and Operators of Treatment, Storage and Disposal Facilities.
40 CFR Part 122 and 124 Subparts A and B—Section 3005 Permits for Treatment, Storage and Disposal of Hazardous Waste.

40 CFR Part 123 Subparts A and B—Section 3006 Guidelines for Authorized State Programs.
40 CFR Part 250, Subpart G—(proposed at 43 FR 29908–29916 (July 11, 1978)—Section 3010 Preliminary Notification of Hazardous Waste Activities.

Application for a permit (§ 122.23)

The information requirements for a RCRA Hazardous Waste Management Facility permit will be divided into two parts (A and B). This approach is being taken in order to expedite and simplify the permit issuing process so that existing facilities may comply with the statutory requirement for attaining "interim" status [section 3005(e) of RCRA]. Additional discussion on this approach is included later in this Preamble. Section 122.23 of these regulations specifies the information that will be required in each part of the application and is discussed briefly here.

The Agency is now preparing the necessary forms that will be needed, as part of the effort to consolidate the application forms for the RCRA, NPDES and UIC programs. These forms appear as a notice for public comment elsewhere in today's **Federal Register**.

Part A of the application requirements is reflected in two sections (Forms 1 and 3) of the consolidated application form. These information requirements include: submission of a U.S. Geological Survey topographical map of the general area where the facility is located; a description of the hazardous waste handled and a brief description of how it will be handled; the annual quantity of each hazardous waste handled; and copies of all available drawings and specifications for the facility.

Part B of the application requires submission of detailed data concerning the geology, hydrology and engineering aspects of the HWM facility. A master plan including a detailed facility map also must be submitted. In addition, detailed information concerning such factors as financial responsibility, employee training, contingency plans, operation plans and closure plans, and plans for air and water monitoring must be submitted in enough detail to allow the permitting authority to determine if the RCRA section 3004 standards are met.

A separate application form will not be developed for Part B as part of the Consolidated Application form due to the detailed nature of the information required. In supplying Form B information, applicants must comply with the information requirements of this Subpart.

Existing facilities must submit Part A within 180 days of the date of promulgation of the regulations under section 3001 of RCRA (40 CFR Part 250, Subpart A). This requirement will be satisfied by submitting Form 1 and Form 3 of the Consolidated Application forms. This information will be used to determine the priority for requesting the submission of Part B for final determination of the permit application. For new facilities, both Part A and B application requirements must be submitted together, at least 180 days before physical construction is scheduled to start.

Permitting Requirements—General

With some exceptions (discussed later), any person who owns or operates or proposes to own or operate a facility for the treatment, storage or disposal of hazardous wastes as identified or listed in proposed 40 CFR 250, Subpart A, must obtain a RCRA hazardous waste management facility ("HWM facility") permit. Owners/operators of existing HWM facilities must meet this requirement by submitting Part A of the application requirements within 180 days of promulgation of 40 CFR Part 250, Subpart A and by submitting Part B and the remainder of the required information upon request of the permitting authority. Owners/operators of new HWM facilities must submit both parts of the information requirements no later than 180 days before the scheduled physical construction date for the facility for which the permit is sought. Part A will provide the Director with general information on the various HWM facilities in his/her area. Part B will furnish more detailed data necessary to bring the permitting effort to a conclusion.

EPA is today proposing this two-part application process with separate filing dates for existing facilities for the following reasons: First, the ready information which Part A (Forms 1 and 3 of the Consolidated Application Forms) will supply (See § 122.23(c)) will enable the State Director or the Regional Administrator to establish a system of priority review for HWM permits. He or she can review Part A forms to determine which facilities warrant prompt attention under 40 CFR Part 250, Subpart D (Standards for Owners and Operators of Hazardous Waste Treatment, Storage and Disposal Facilities) and can then require an earlier submission of Part B of these applicants. Hence, permits could be issued earlier to the facilities which are in greatest need of regulation. Because EPA expects that approximately 30,000 existing facility permits will have to be issued, it foresees a 5 year period for issuing all permits. Given this span of time, EPA believes this attempt to issue permits on a priority basis to be the most effective and efficient use of limited resources.

Second, the immediate submission of Part A which should not entail lengthy preparation on the part of owners and operators, will satisfy the "permit application" requirement for obtaining interim status under section 3005(e) of RCRA. Third, a later submission of Part B assures that the detailed information upon which permit decisions will be based is complete and current.

The owner/operator of an existing HWM facility is required to submit Part B of the permit application on the date established by the Director. The Director must give the owner/operator at least six months notice of the date for submission of Part B (§ 122.23(a)(2)). Submitting Part B on time will assure that a facility with interim status maintains interim status during permit review; conversely, failure to submit Part B on time will result in loss of interim status. Part B of the permit application, which must be signed by a appropriate official (§ 122.5), will not be considered to be submitted until all of the required information is supplied, except that the Director may waive submission of certain information upon request as authorized in § 122.23(d)(7).

With respect to determining which permit applications will receive priority review and action, the Director shall consider several factors. These factors include the amount and nature of the hazardous waste handled by the facility, the apparent adequacy of the facility's design and operation, and the environmental sensitivity of the geographic area in which the facility to be permitted is located.

A permit application for a new HWM facility must be submitted at least 180 days before the date on which physical construction is expected to begin (§ 122.25(b)). Actual time for processing of applications and for issuing of permits will vary depending on the degree of complexity and extent of public participation involved. Since physical construction of a new facility cannot begin until a final permit has been issued, the burden is on the applicant to submit an application far enough in advance of the physical construction date to enable the Director to satisfy all of the review requirements of the regulations and not jeopardize the planned construction dates. Within 30 days of receipt of an application, the

Director must determine whether the application is complete.

Establishing Permit Terms and Conditions

EPA is proposing to allow "minor" modifications to existing permits issued under RCRA that may be appropriate under limited circumstances, as stated in § 122.24, at the discretion of the Director. This limited modification shall only be granted if: (1) the Director has determined that a particular HWM facility is capable of handling the type or volume of waste proposed in the modification without violating any other terms and conditions of the section 3004 standards of RCRA, and (2) the HWM facility can demonstrate that it will receive these proposed wastes in a manner that cannot be anticipated through contract provisions or by other means available at the time of initial permit issuance.

The Director shall issue public notice in accordance with § 124.11 prior to or at the time of approving any minor modification. By requiring a public notice to be issued and the requirement that all applicable section 3004 standards be met, EPA believes that human health and the environment will be adequately protected while, at the same time, any unnecessary paperwork required of permit applicants will be reduced. Comments on this approach are solicited.

Permitting Requirements—Special Categories

These proposed regulations would not impose the detailed permit requirements of Subpart B upon several categories of HWM facilities, where EPA is the permit-issuing authority. Two classes of facilities, health care facilities and experimental facilities, would be required to obtain a "special permit" in lieu of the regular permit described above. Three other classes of facilities, special waste facilities, publicly owned treatment works accepting wastes under a manifest or other delivery document, and barges or other vessels accepting waste under a manifest or delivery document for ocean disposal, would be regulated under a "permit by rule" mechanism. Finally, injection wells which dispose of hazardous wastes and certain solid waste management facilities which accept small amounts of hazardous wastes would not fall under the permitting requirements of these regulations. States approved by EPA to administer hazardous waste programs are also authorized, but *not* required, to regulate such facilities in the same manner as EPA.

Special Permits—Health Care Facilities (§ 122.25(a))

Certain departments of hospitals and veterinary hospitals routinely produce wastes which fall under the broad definition of "hazardous waste" as set forth in proposed 40 CFR Part 250, Subpart A. These facilities when storing or otherwise treating such waste on their premises will be considered as HWM facilities. In most cases, however, health care facilities are closely regulated by existing State laws. EPA has concluded that detailed permitting requirements under RCRA are unnecessary for health care facilities which are complying with State law.

Specifically, these regulations require health care facilities which are operating under and complying with a comprehensive and enforced State law to submit only an abbreviated application. The application would describe the type of facility and would provide certain operational information, including certification that the facility is operating under a State license. If the application satisfies the requirements of this Subpart, EPA would issue a special permit. Because State law would be adequately controlling the treatment and storage of hazardous waste by the facility, the permit would impose no additional express controls.

Special Permits—Experimental Facilities (§ 122.25(b))

EPA is also proposing to issue special permits for "experimental facilities", i.e., facilities which are or would be engaged in technology advancing activities which are intended to improve the state-of-the-art for hazardous waste treatment, storage or disposal. As with health care facilities, the applications which owners/operators of experimental facilities should submit should be easy to prepare and limited in informational requirements. EPA is proposing the special permit mechanism for experimental facilities for two reasons. First, EPA seeks to encourage inquiry into new and innovative ways to handle hazardous wastes. Relieving some of the administrative prerequisites to operating such a facility may facilitate that end. Secondly, and equally important is the distinct possibility that the Part 250, Subpart D standards, which are designed primarily for typical containment facilities, might not apply functionally to facilities implementing a new technology for hazardous waste management. It would not be sensible to force an innovative facility to comply with informational or other requirements not suited to its design.

Of course, these facilities will be required to comply with all of the applicable standards of Part 250, Subpart D. Additionally, the regulations limit the term of such permits to one year (with an additional one year extension under certain conditions) and establish requirements for submission of full-evaluation reports.

Permit by Rule—Special Waste Facilities (§ 122.25(a))

Proposed 40 CFR Part 250, § 250.46, creates a special category for owners and operators of facilities which treat, store or dispose of "special wastes." Special wastes are hazardous portions of certain large volume wastes on which the Agency has limited information. These large volume wastes are cement kiln dust, utility waste (fly ash, bottom ash, and scrubber sludge) phosphate rock mining waste, beneficiation and processing waste, uranium mining wastes, other mining waste, and gas and oil drilling muds and oil production brines. In Part 250, Subpart D, EPA is proposing to exempt these facilities from compliance with generally applicable requirements in favor of certain special standards (40 CFR 250.46–1 through 6). EPA intends to propose comprehensive standards for these facilities when sufficient information on which to base a regulatory program becomes available.

Because the generally applicable performance standards do not apply to special waste facilities, EPA has determined that imposing the full permitting burden on members of this class serves no useful purpose. Consequently, in its place EPA is proposing to require only a "permit by rule." A permit by rule would simply mean that the owner or operator of a special waste facility would be deemed to have a permit, without having to submit any application for it, if the facility complied with the special waste facility standards of 40 CFR 250.46. After data is available to the Agency, this regulatory approach would be modified as appropriate.

Permit by Rule—Publicly Owned Treatment Works and Ocean Disposal Vessels (§ 122.26 (b) and (c))

EPA is also proposing to use the permit by rule mechanisms for two other HWM facilities, publicly owned treatment works which accept hazardous wastes under a hazardous waste manifest or other delivery document, and barges or other vessels which receive hazardous wastes under a manifest or delivery document for purposes of ocean disposal.

Similar to the situation of the special waste facilities, use of the permit by rule mechanism should save owners and operators of these types of HWM facilities from paperwork burdens which accompany the task of preparing and submitting permit applications.

EPA is eliminating the affirmative requirement to secure a permit for these facilities because they are currently regulated under other EPA water pollution control programs. Publicly Owned Treatment Works (POTW's) fall under the National Pollutant Discharge Elimination System (NPDES) permit system of the Clean Water Act and ocean dumping vessels come under the permit system of the Marine Protection, Research, and Sanctuaries Act. These ongoing programs should provide a degree of environmental protection equivalent to that of Part 250. In recognition of this fact, Part 250, Subpart D, specifically exempts both of these types of HWM facilities from its requirements (40 CFR 250.40(e), 43 FR 58996 (Dec. 18, 1978)).

Thus, a POTW or ocean disposal vessel would be deemed to have a permit if it operates in accordance with the NPDES and Ocean Dumping permits and if the owner or operator complies with the notification, manifest, recordkeeping and reporting requirements.

Underground Injection Wells Permitting

These regulations propose to relieve the activity of injecting hazardous waste into underground injection wells from RCRA permitting requirements. As in the case of POTW's and ocean disposal vessels, injection wells are technologically dissimilar to more conventional HWM facilities and, therefore, many performance standards of Part 250, Subpart D, are functionally inapplicable. Also, as in the case of POTW's and ocean disposal vessels, underground injection wells fall under an alternate Federal regulatory program. Consequently, Part 250, Subpart D, has been made specifically inapplicable to underground injection wells (40 CFR 250.46(e)).

The alternate regulatory program is the underground injection control (UIC) program of Title C of the Safe Drinking Water Act, which is proposed for public comment in these regulations and in 40 CFR Part 146 (proposed at 44 FR 23738 (April 20, 1979)). The UIC program requires that all hazardous waste injection wells comply with its minimum standards. Injection wells, including those injecting hazardous wastes, are exclusively regulated by those minimum standards. Thus, in an instance where one site contains surface facilities which treat, store or dispose of hazardous wastes, as well as a hazardous waste injection well, the surface facilities will be required to comply with the requirements of the RCRA program only and the injection well will be required to comply solely with the requirements of the UIC program.

But, in order to assure that these parallel regulatory efforts work together, the UIC program has included in 40 CFR 146.09 a subset of standards from the RCRA program regarding notification, reporting, recordkeeping and the manifest system. Injection wells which inject hazardous wastes, as a general matter, must comply with these RCRA-originated standards to assure that the informational system of that program successfully tracks all hazardous wastes.

In instances where the RCRA informational system requirements have already been met, for example, when the wastes received by the well are supplied by an on-site surface facility which has already complied with these requirements under the RCRA program, the well operator need not comply with the requirements a second time. Wastes received by such wells would not be "accompanied by a minifest or other delivery document" as stipulated in § 146.09.

The permit by rule mechanism is not needed because compliance with the notification, recordkeeping, reporting and manifest requirements of Part 250, Subpart D is provided in the UIC regulations themselves. The Agency has done so in 40 CFR 146.09; the permit by rule, thus, has become operationally unnecessary.

The Agency is well aware that section 3005(a) of RCRA asserts a broad permitting requirement for all HWM facilities. Despite this language, EPA is making a concerted effort to streamline its procedures and does not want to impose non-beneficial and duplicative regulations which seemingly do not further the goals of the statute. The Agency solicits comments on the adequacy of environmental protection which these alternate regulatory programs offer, on the appropriateness of establishing "special permits", "permits by rule", or the alternate mechanism to cover UIC wells, and on the legal and practical implications of the entire effort.

Solid Waste Disposal Facilities Which Receive Small Amounts of Hazardous Wastes

These regulations also exempt from RCRA permitting requirements certain solid waste disposal facilities which receive hazardous wastes in small quantities. These facilities are those which receive wastes exclusively from persons subject to 40 CFR 250.20 (proposed at 43 FR 58978, Dec. 18, 1978). Persons under § 250.20 are those who produce and dispose of no more than 100 kilograms (approximately 220 pounds) of hazardous waste in any one month; any retailer disposing of hazardous waste (other than waste oil); and certain farmers who dispose of pesticides and follow specified operating procedures.

40 CFR 250.40(c)(5) exempts these facilities from meeting any of the section 3004 standards for HWM facilities because they will be regulated as solid waste disposal facilities under Subtitle D of RCRA. Moreover, the relatively small amounts of hazardous wastes which these facilities would receive would not change their overall character as solid waste disposal facilities; nor would these facilities in any way provide an insufficient level of protection to human health and the environment (see preamble to 40 CFR Subpart D, 43 FR 58965). Thus, in the definitional section (§ 122.3(t)) of Subpart A of this Part, EPA is proposing to remove this class of facility from the scope of the term "hazardous waste management facility."

Interim Status (§ 122.23)

Section 3005(e) of RCRA provides a mechanism for existing facilities to continue receiving hazardous wastes prior to obtaining a permit under these regulations. That mechanism is "interim status." Under the terms of section 3005(e), a facility with interim status "shall be treated as having been issued a permit until such time as final administrative disposition of such application is made, unless the Administrator or other plaintiff proves that final administrative disposition of such application has not been made because of the failure of the applicant to furnish information reasonably required or requested in order to process the application." To qualify for interim status, a facility must have complied with the notification requirements of section 3010 of RCRA, and must have submitted Part A of the permit application. Moreover, during the interim status period, facilities must comply with a limited set of operating procedures (see 40 CFR 250.40(c)). EPA interprets Congressional intent, in providing interim status, as a means for allowing the continued receipt and handling of hazardous wastes by HWM facilities during the "start-up" period of

the RCRA program. Therefore, existing facilities which are participating in the program would not be subject to the general prohibition against treating, storing or disposing of hazardous wastes in the absence of a permit.

Because these regulations do not require site-specific permits for three classes of facilities (special waste facilities, certain POTW's, and ocean dumping vessels) these three classes of facilities need not submit a Part A application (Forms 1 and 3 of the Consolidated Application Forms) to qualify for interim status. EPA is proposing this approach because it would be contradictory for the agency to ease a requirement to avoid regulatory overlap on the one hand, and, then, to simply reinstitute the requirement for another reason. Consequently, for these classes of facilities, EPA intends to consider the submission of notification under section 3010 as satisfying the "permit application requirement" of section 3005(e). Section 3010 notifications supply the same information, although in lesser detail, as do Part A applications. More importantly, however, allowing interim status to these facilities is in keeping with the intentions of Congress.

These regulations also adjust the scope of coverage of section 3005(e) interim status. The statute specifically extends interim status, upon satisfaction of the prerequisites, to all HWM facilities in existence on the date of enactment of RCRA. EPA is extending the option to obtain interim status to HWM facilities in existence on the date of promulgation of regulations under section 3001 of RCRA. Again, EPA believes that this adjustment implements the intent of the legislation. Congress intended that the flow of wastes would not be interrupted during the start-up of the Federal progam. Indeed, the continued availability of disposal sites to take ever-increasing amounts of hazardous wastes can be termed realistically as a public health necessity. If EPA were to disallow the continued receipt of hazardous wastes by post-enactment facilities for all or a portion of the anticipated five years it will take to fully implement the permitting program, it could seriously disrupt ongoing hazardous waste control efforts. To do so would contradict the entire premise of the statute.

Moreover, it would be inequitable to interrupt operations of HWM facilities for which all possible steps to comply with new regulatory requirements have been taken.

EPA specifically requests comment on this implementation of section 3005(e).

Major Facilities (§ 122.3(b))

One of the primary administrative tasks which EPA will undertake once these regulations come into effect is the systematic review of permit applications received by approved States and of draft hazardous waste permits prepared by approved States. EPA will undertake this effort to assure routine compliance with these regulations and Part 250. However, it became apparent early during preparation of these regulations that this review function could overwhelm the Agency—approximately 30,000 RCRA permits will be issued under these provisions in the next five years. Consequently, recognizing administrative limitations on its review function, EPA does not intend to review permit applications and draft permits for facilities subject to a State program which are small, non-complex, and non-controversial. Instead, it intends to review these documents as they relate to "major" facilities. EPA will consider a facility to be "major" if it handles, or would handle, more than 5,000 metric tons of hazardous wastes per year. Permits for major facilities must be accompanied by fact sheets containing relevant information on the facility; permits for non-major facilities must be accompanied by a less detailed "statement of basis." (See §§ 124.8 through 124.9.)

EPA considers the use of a tonnage cutoff figure to establish the "major" character of a facility to be the most telling and straightforward way of reliably and simply accomplishing the objective. EPA considered other means of doing this, but found them less preferable. For example, EPA considered basing this determination on an analysis of the relative hazard of wastes received by each facility. As was discussed in the preamble to EPA's regulations defining "hazardous waste", (Part 250, Subpart A), the Agency was unsuccessful in this effort.

EPA requests comments from the public on the use of a volume criterion to distinguish major and non-major facilities. Moreover, EPA request comment on the selection of 5,000 metric tons per year as the criterion. EPA believes that use of this figure should result in review of facilities which truly warrant close attention. As EPA's data indicates that the median HWM facility handles about 1,100 metric tons of hazardous waste annually, EPA anticipates that, under this criterion, it would review approximately 10 percent of permit applications and draft permits processed by States.

EPA, however, recognizes that its information on the relative sizes of HWM facilities is incomplete. Because the utility of the 5,000 metric ton criterion is largely dependent upon the actual capacities of existing HWM facilities, the Agency intends to continue investigating its appropriateness. Information from the regulated community and other interested persons in this regard is solicited.

Other Environmental Factors

During the development of these regulations, the Agency recognized that certain "secondary" environmental impacts from factors including roadway traffic to and from facilities, access routes to facilities, noise, dust, odor, aesthetics, etc., were not amendable to control through the RCRA section 3004 standards nor by these regulations. Thus, these regulations do not address these general environmental issues. The Agency did consider the following options before deciding not to propose regulations in this area:

1. Require that an Environmental Impact Statement (EIS) be prepared. EPA has determined that the permitting process under section 3005 is not subject to the EIS requirement of section 102(2)(c) of the National Environmental Policy Act. A legal memorandum on this point has been prepared and will be made available upon request. The permitting process as specified in Part 124 of these regulations fully allows and encourages involvement of the public in section 3005 decision making. The Agency also has determined that the regulation of secondary environmental impacts is outside the scope of authority granted to the Agency by RCRA: States and local authorities can more suitably regulate these impacts.

2. Require applicants for permits to analyze the impact of the environmental factors outline above, and to submit a "Supplementary Environmental Analysis" (SEA) with the application for a permit. The SEA would be a part of the application, would be made public, and would be addressed during the permit application review process.

3. Same as Option 2, except EPA in granting permits to facilities would insert conditions in such permits based on the impact analyses of the SEA.

4. Require applicants for permits to certify that all State and local laws and ordinances regarding the environmental factors outlined above will be complied with.

Comments on these options, or suggestions for other options or approaches to this issue are solicitied.

Emergency Authorization (§ 122.26)

These regulations also provide the Director with emergency authority to respond appropriately to immediate hazards to the environment or to human health. They provide that, in such event, the Director may issue a temporary authorization to a permitted facility, not to exceed 90 days, to accept hazardous wastes not covered by a permit. The authorization may be oral or written. If oral authorization is given, it must be followed within five days with a written order. Emergency authorization can be rescinded at any time. EPA has included this proposed emergency authorization because it believes that the Director should have broad discretion to respond in a measured and effective way to emergency situations. The Agency requests comments on the propriety and scope on this emergency authority.

Subpart C—The UIC Program

Congress has authorized EPA in sections 1421–1424 of the Safe Drinking Water Act to establish by regulation: (1) minimum requirements for effective State UIC programs; and (2) a procedural mechanism whereby States may obtain EPA approval to operate all or part of such programs. Were States do not obtain EPA approval, EPA is empowered to establish and operate programs for those States.

As a result of the consolidation of the NPDES and RCRA programs with the UIC program, EPA examined the overlaps inherent in the three programs' statutory authority as described above. As a result, the Agency has decided to regulate injection wells primarily under the UIC program. Comments are solicited on the propriety of the Agency's assigning primary jurisdiction over underground injection control to the UIC program.

In addition, any well that injects hazardous waste could be regulated under RCRA. In those cases, also the Agency has chosen to regulate such wells under the UIC program and to apply certain RCRA requirements (e.g., closing of the manifest cycle) through the UIC regulations.

At one point in developing these regulations, EPA contemplated subjecting only wells that injected into, through or above underground sources of drinking water to these regulations. However, even wells which do not inject into, through or above underground sources of drinking water may cause fluid to move underground in such a fashion as to contaminate such sources. The Agency decided that the proper approach would be initially to bring all wells into the regulatory system so that every injection activity could be publicly known. Each well may then be classified properly, (see discussion below) resulting in requirements that the well injection practice be regulated or banned entirely or, where appropriate, not controlled at all.

Comments are solicited on the above approach. In addition, the Agency seeks data on off-shore injection operations and information on special problems that control of off-shore injection wells may pose, if any.

Listing of States

The UIC program becomes operative in a State only after the State has been listed by EPA under section 1422 of SDWA as needing a UIC program, and either the State obtains EPA approval of its program or EPA establishes a program for that State. State program requirements and approval procedures are set forth in Part 123.

On September 25, 1978, EPA listed 22 States as needing a UIC program: Arizona, Arkansas, California, Colorado, Florida, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Michigan, Mississippi, New Mexico, New York, Ohio, Oklahoma, Pennsylvania, Texas, Utah, West Virginia and Wyoming. See 43 FR 43420 (September 25, 1978). Since that time, Maryland has petitioned to be listed.

The Agency had initially intended to focus its efforts on these listed States and to phase in other States gradually. The purpose was to focus Agency resources and grant funds upon areas which appeared to have the most urgent need for such programs. However, as a result of its consolidation efforts, the Agency became aware of potentially different timetables for the listing of States under the UIC program and the establishment of RCRA programs in those States. States are expected to begin operating approved hazardous waste programs in mid-1980. This raises the possibility that some disposers of hazardous waste will seek to avoid RCRA requirements by injecting hazardous waste underground in unlisted States. To ensure consistency of coverage, the Agency has decided to list the remaining unlisted States in two stages by May of 1980.

Designation of Underground Drinking Water Sources (§ 122.33)

As part of developing its UIC program, the State must designate those aquifers which are to be protected as underground drinking water sources and those which are not. The criteria for designation are contained in Part 146, and are explained in detail in the Preamble discussion on Subpart A of this Part.

Section 122.33 specifies procedures for State designation of aquifers. All aquifers will automatically be designated as underground drinking water sources unless specifically excluded. Any exclusion must define the excluded area in geographic terms, rather than by name, to ensure that injectors have adequate notice as to whether or not they will be injecting above, into or through a designated underground drinking water source.

Classes of wells (§ 122.34)

The injection wells covered by the UIC regulations are divided into the following five classes:

(a) Class I includes industrial and municipal disposal wells and nuclear storage and disposal wells that inject below all underground sources of drinking water in the area.

(b) Class II includes all injection wells associated with oil and gas storage and production.

(c) Class III includes all special process injection wells, for example, those involved in the solution mining of minerals, *in situ* gasification of oil, shale, coal etc., and the recovery of geothermal energy.

(d) Class IV includes wells used by generators of hazardous wastes or hazardous waste management facilities to inject into or above underground sources of drinking water.

(e) Class V includes all other injection wells.

Due to basic differences in function and/or environmental effects of the above classes of wells, they are treated differently in many respects, as explained below.

Once a State UIC program is effective, all new Class I, II and III injection wells must obtain a permit to begin operation. All existing wells in these three Classes (except existing enhanced recovery and hydrocarbon storage wells) must also obtain permits within five years of the effective date of the program according to priority schedule to be established by the permitting authority.

Existing wells requiring a permit must be authorized by rule until the permit is applied for and processed. Such rules must apply the appropriate monitoring, reporting and abandonment requirements set forth in 40 CFR 146. Existing enhanced recovery and hydrocarbon storage wells may be authorized by rule for the life of the facility. These rules are to apply essentially the same requirements as permits under Class II. However, while

each permit is to establish a specific compliance schedule, rules are to set forth a general timetable for the attainment of applicable requirements.

To obtain a permit, owners or operators of wells must submit applications to the Director in accordance with the requirements of Subpart C of Part 122. Because most of the information relied upon by the Director to write a permit is in many cases already contained in State Files, only a few basic items of information must be contained in an application to a Director of a State-administered UIC program unless the Director requests further information (either because State files are incomplete or because the Director wishes to update the information). In the case of EPA-administered programs, the application must contain all the information which the Director needs to write the permit. Part 146 (proposed at 44 FR 23738 (April 20, 1979)) sets forth the information which a Director must consider when writing a permit.

A well may be covered by an area rather than an individual permit. To qualify for an area permit, the wells must be:

(1) Under the control of a single person;

(2) Of the same type (e.g., Frasch process, enhanced recovery, or salt water disposal);

(3) Within a single well field, project or site;

(4) Injecting into the same zone or aquifer; and

(5) Covered by the same application for a permit.

The requirements which apply to an individually permitted well apply equally to a well authorized by an area permit. However, under an area permit, new wells may be authorized administratively as long as they are under the control of the person holding the area permit, are essentially of the same construction and are intended for the same purposes as existing wells.

EPA requests comment on the advisability of the use of area permits. In particular, comment is solicited on whether the conditions (e.g., the use of "well field") have been properly framed to provide the intended relief from environmentally unproductive administrative burdens.

Section 122.42 contains two additional requirements of the UIC program. First, the permittee must notify the Director of his or her intention to cease operation and follow the Director's prescribed procedures for abandoning the well. Second, the permittee must maintain fiscal responsibility in some form to close, plug and abandon the well in a manner which does not endanger underground drinking water sources.

Temporary Authorization

The Agency has identified two types of situations where it may be necessary to authorize underground injection temporarily before permit-issuance procedures may be carried out.

The first situation is where an imminent hazard to human health or the environment may occur unless immediate injection is authorized. One example might be a spill or leak which would result in significant releases of hazardous wastes to the environment. While the Agency cannot predict all of the situations where this may occur, it has concluded that a temporary authorization should be available under the circumstances defined in these proposed regulations.

The other situation is where oil and gas production would be delayed, resulting in loss of such natural resources, unless reinjection of brine if immediately authorized. Temporary authorization in this situation is consistent with sections 1421(b)(2) and 1422(c), which provide that the UIC program may not interfere with oil and gas production except as necessary to protect underground sources of drinking water. The Agency proposes to allow temporary authorization in the above situation, provided that timely application for a permit could not have been made, and that the injection will not cause fluid movement to underground sources of drinking water.

Comments are solicited on both types of temporary authorizations. Are they well defined? Should certain criteria be added or deleted? Should temporary authorization be added for other situations?

Class IV wells

Class IV wells are expected to involve the injection of hazardous waste into or above underground drinking water sources, a practice which is inherently unsafe. Unlike the case of deep disposal wells, it is not possible to prevent endangerment of underground drinking water sources by establishing construction and operation requirements. EPA proposes, therefore, that existing class IV wells will be inventoried and closed, and that injection into new class IV wells will be prohibited.

Existing class IV wells are proposed to be authorized by rule until the time of their closure.

Comments are solicited on the Agency's proposed approach to class IV wells.

Class V wells

There are many types of class V wells, and Agency studies indicate the existence of perhaps a 250,000–500,000 such wells in the United States. The Agency is not presently in a position to determine which wells are safe or unsafe, and whether some of these wells should be either regulated or phased out. As a result, Directors of UIC programs will be required to inventory class V wells within their States, provide EPA with assessments of the impact of these wells, and recommend possible means of regulating them. If necessary, EPA will then amend these regulations to cover class V wells in a manner which will prevent endangerment of underground drinking water sources. In the meanwhile, immediate action will be required to address those wells that pose a significant risk to human health.

Class V wells will be authorized by rule pending amendment of these regulations to regulate such wells.

Comments are solicited on the need to regulate particular types of class V wells and how to do so. In particular, EPA solicits comments on whether special procedures for regulating class V wells should be provided.

Subpart D—Specific Requirements Applicable to the NPDES Program

Subpart D of Part 122 contains requirements which are identical to the final NDPES regulation, Part 122, as well as certain application requirements from final NPDES Part 124.

Part 123

What does this Part do?

This Part establishes the requirements for State NPDES, UIC, RCRA, (hazardous waste) and section 404 (discharges of dredged or fill material) programs and the process for approval, revision and withdrawal of State programs. While State programs are established and operated under State law, approved CWA, RCRA, or SDWA State programs implement Federal law. A permit issued by a State under State law after the program has been approved satisfies the Federal permit requirement.

Part 123 is divided into a general subpart (Subpart A) and program specific subparts (Subparts B–E). The requirements of Subpart A are generally applicable to all four of the State Programs covered by this Part. The other Subparts provide requirements

additional to those of Subpart A. Since EPA does not issue section 404 permits (these are issued by the Corps of Engineers in the absence of an approved State program), Part 122 does not contain a Subpart E. Part 123 Subpart E, therefore, contains the additional permit processing requirements applicable to State 404 programs.

Subpart A

Purpose and scope (§ 123.1). This section notes that Part 123 is related to, among others, Parts 122 and 124. However, only those sections of Parts 122 and 124 which are adopted by reference in Part 123 are applicable to State programs. Part 123 lists all the requirements applicable to State programs. In addition, applicable portions of Part 122 may, in turn, adopt requirements derived from other Parts of this Chapter.

The approach of the statutes authorizing the programs covered by this Part is that the Federal government should set minimum standards, with any State being given the freedom to impose any more stringent approach it deems appropriate. The only exception to this is in the hazardous waste program where Congress determined that the need for consistency between the States outweighs any one State's interest in hazardous waste regulation. This exception has been narrowly construed and is discussed further in the preamble discussion of Subpart B.

State programs are developed and implemented under State law. While this Part sets minimum requirements for State programs, it generally does not require that State authorities be worded or structured the same as the applicable Federal authorities. Nonetheless, the Agency encourages States to incorporate by reference, to the extent allowable under State law, Federal requirements, especially those which are technical in nature.

Elements of a program submission (§ 123.3). This section lists the contents of a complete State application for program approval. Each of the elements must be received by EPA before the formal statutory review starts. Each of the laws authorizing the State programs covered by this Part limits the time for EPA review of a State application for authorization. Therefore, it is necessary that EPA have complete information, organized in a particular way, about the State program before formal review commences. States are encouraged to consult with EPA in developing the submission.

Attorney General's Statement (§ 123.5). In understanding the requirements of State law, EPA gives great weight to the interpretations made by the State's Attorney General. Indeed, the Attorney General's Statement is necessary for EPA to adequately judge the legal basis for the State programs. EPA will develop a model Attorney General's Statement format for each of the programs.

Memorandum of Agreement with Regional Administrator (§ 123.6). The Memorandum of Agreement (MOA) between EPA and a State defines the basic working relationship between the agencies, thereby avoiding confusion and legal uncertainty which might otherwise exist.

The MOA may not be used as a substitute for adequate legal authority. While it may be appropriate for a State to give, in the MOA, its assurance that it will abide by certain requirements, the authority to do so must be present in State law.

Relationship Between Memorandum of Agreement and State/EPA Agreement

The State/EPA Agreement is an overall management tool which provides a way for the Regional Administrator and the State to coordinate and, to the maximum extent feasible, integrate program administered by EPA and the State, emphasizing problem-solving approaches to specific environmental problems. The State/EPA Agreement reflects important decisions on Environmental priorities, administrative problems, timing, responsibilities and allocation of resources. In FY 1980, the State/EPA Agreement is to cover programs under the Clean Water Act, Safe Drinking Water Act and Resource Conservation and Recovery Act. Other environmental programs will be added to the process in following years.

The Memorandum of Agreement, is a document signed by the Administrator and the State which formally sets forth the relationship between EPA and State in the administration of an approved State permit program and details specific procedures that must be followed by both parties in the development, issuance, review and enforcement of permits. The Memorandum of Agreement is one of the means by which EPA assures that State issued permits are consistent with the requirements of the appropriate Act and implementing regulations. Because of this, any proposed change to an MOA must be reviewed and agreed to the Administrator to assure it is consistent with the requirements of this Part.

The Memorandum of Agreement and the State/EPA Agreement should be consistent. This should not present a problem since they generally address different areas of the State/EPA relationship. The State/EPA Agreement should include the MOA. However, it may not override it in the instance of any inconsistency. If the State/EPA Agreement indicates that a change is needed in the MOA, the proposed change must be reviewed and agreed to by the Administrator.

Operational Requirements (§ 123.8). This section sets out, by cross referencing applicable sections of Parts 122 and 124, certain operational aspects of State permit programs. To demonstrate compliance with these sections, States do not need authorities identical to EPA's. Compliance may be shown by any set of authorities which enable the State Director to meet these requirements or requirements which are more stringent. Where these regulations require that certain activities be covered by permit, a State authority to regulate the activity by rule will not be approved.

Compliance evaluation programs (§ 123.9). States must have a systematic program for evaluating compliance with permit conditions and other program requirements. These programs must have the ability to evaluate reports submitted by permittees, to conduct inspection and to investigate evidence of violations submitted by the public.

Enforcement authority (§ 123.10). This section proposes that States should have an array of enforcement tools available. These must include a procedure for immediately responding to emergency situations endangering public health, injunctive relief, civil penalties and criminal fines. Each of these remedies is available to EPA where it is administering the program and States must have equivalent authorities.

The requirements for the programs vary slightly because each of the Federal acts have different provisions for EPA enforcement. For example, establishing the degree of criminal intent of the violator is a necessary element of any criminal prosecution. This section provides that the degree of criminal intent which the State must establish shall be no greater than that in the appropriate Act for EPA prosecution.

Likewise, the penalty amounts recoverable by the State shall be at least the same as those recoverable by EPA. See Table II.

Table II

Sanction	Maximum penalty amount			Intent		
	RCRA	UIC	NPDES/404	RCRA	UIC	NPDES/404
Civil penalty	$25,000	$5,000	$10,000	None	None	None.
Criminal fine	25,000—doubled for second offense.	10,000	25,000—doubled for second offense.	Knowingly	Willfully	Negligently.
Criminal fine for false reporting/tampering.	25,000	10,000	10,000	Knowingly	Willfully	Negligently.

EPA proposed to require States to have the maximum penalty amounts at least the same as those listed in Table I. States are encouraged to comment on this requirement. In particular, EPA is interested in finding out which States have existing programs which are unable to meet these requirements, what enforcement remedies are available to those States and what other legislative changes, if any, must be made by those States to meet the requirements of this Part.

The State need not always adopt the same terminology on degree of criminal intent. For example, if the burden of proof for establishing "criminal negligence" in State court is equivalent to that for establishing "negligence" in a criminal proceeding in Federal court, such State authority satisfies the requirements of this section.

Each of the three Acts implemented by these regulations provide citizens with the right to initiate legal action in Federal court to enforce permit requirements. This right exists even when a permit program is administered by a State after approval by EPA. The three Acts also provide citizens with the right to intervene in enforcement actions brought by EPA. However, EPA has concluded that requiring States to allow citizens to intervene in State enforcement actions is neither necessary to foster public involvement in permit enforcement nor required by law. Accordingly, these regulations do not provide that States must provide for citizen intervention in enforcement actions brought by States in State courts. Although there is some possibility than an inadequate State effort could thwart effective citizen involvement in enforcement of State issued permits, EPA believes that the opportunity for citizens to being enforcement actions in Federal courts makes that risk minimal. Comment on this point is invited. For further information on citizen involvement in enforcement, see the preamble to the recently promulgated NPDES permit program regulations (44 FR 32854).

Approval process (§ 123.12). The process for approving State programs was not stated in Subpart A because of the differences which exist between the statutes involved. Therefore, these are set out in the individual program subparts.

Withdrawal (§§ 123.14 and 123.15). These sections set forth the proposed criteria and process for withdrawal of State programs including the requirements for voluntary relinquishment of Federal program responsibility by a State. The criteria set out in § 123.14 are an elaboration of the criteria set out in each of the applicable Federal statutes.

It should be noted that program withdrawal is an extreme remedy which is likely to be employed only where all other efforts to insure that a State program complies with this Part have failed.

§ 123.15(a) sets out the basic process for voluntary relinquishment of Federal program responsibility by a State. It provides for a 180-day advance notice by the State accompanied by a plan for the orderly transfer of necessary information. It further provides for 30 days advance public notice of the transfer. These provisions may be modified by agreement.

§ 123.15(b) sets out a formal hearing process for withdrawing State programs (other than UIC programs, which are covered in Subpart C). This process may be initiated by the Administrator on his or her own motion or in response to a formal petition from any interested person. In order to avoid the need for the Agency to develop a new set of formal hearing procedures, this paragraph adopts by reference certain provisions from the regulations of Part 22 of this Chapter. (Part 22 regulations were proposed on August 4, 1978, 43 FR 34730, and will be promulgated shortly in essentially the form proposed. All citations are to the proposed version.)

Relationship of Subpart A to the Final NPDES Regulations

Certain elements of the NPDES program have been modified or added to in Subpart A, as a result of consolidation with the other programs. Comments are welcome on these changes or additions. For example, the criteria and process for withdrawal of State programs, including NPDES and section 404 programs, are new to these regulations. In addition, the proposed requirement that States have at least the same penalty amounts as EPA is a change from the existing requirement.

Subpart B

Subpart B of Part 123 establishes additional substantive and procedural requirements for State hazardous waste management programs under section 3006(a) of RCRA. This Subpart controls both "Authorization" and "Interim Authorization" of State programs under sections 3006 (b) and (c) of RCRA, respectively. Proposed Guidelines for State Hazardous Waste Programs were published as Part IV of the February 1, 1978 Federal Register (43 FR 4366). They are reproposed here.

EPA's response to several recurring substantial comments, received concerning the February 1, 1978, proposal, and discussions of certain program decisions, are set forth below.

Under section 3009 of RCRA, States may not impose any requirements less stringent than those under Subtitle C of RCRA. However, some latitude will be allowed in the degree of stringency of the State's criteria and standards during the interim authorization period. When "full" authorization (hereafter called "authorization") is approved under section 3006(b), the State's standards and criteria must be no less stringent than those promulgated by EPA under sections 3001–3005 of RCRA. See Table I.

For example, as a condition for such authorization, EPA expects such State programs to control at least the same universe of hazardous wastes as the Federal program. This may be accomplished most easily by adopting EPA's criteria and listings under section 3001 of RCRA, although such an adoption is not a requirement for authorization. See proposed 40 CFR Part 250, Subpart A, as referenced in Table I.

The State program also must control at least the same universe of generators and transporters and contain standards that are at least as stringent as those of the Federal program under sections 3002 and 3003 of RCRA, including recordkeeping, labeling, use of appropriate containers, reporting and management of a waste tracking (manifest) system using the Federal manifest format. See proposed 40 CFR Part 250, Subparts B and C, as referenced in Table I.

Finally, the State program must control at least the same universe of treatment, storage and disposal facilities and must not compromise the human health and environmental standards under section 3004 of RCRA. The adequacy of the State's general facility standards treatment, storage and disposal facility standards and special waste standards will be evaluated against those issued by EPA under section 3004 in order to determine if the State program is equivalent to the Federal program. See proposed 40 CFR Part 250, Subpart D, as referenced in Table I.

In addition, a State's past performance in responding to situations involving hazardous waste which may present an endangerment to health or the environment will be considered by EPA in deciding whether to approve State hazardous waste programs.

Comments or suggestions on the evaluation of the equivalence of State programs are solicited. One option under consideration is to require States to adopt the Part 250 regulations.

Another alternative requirement for authorization of a State hazardous waste program would be to require States to issue all hazardous waste permits under their jurisdiction within a set time frame, such as three or four years. EPA estimates that complete permit issuance without such a requirement will probably take at least seven years. On the other hand, State resources are limited, and the imposition of such a requirement could deter some States from seeking approval of their programs. Comments are solicited on this problem, and on alternative approaches.

Concurrent enforcement authority is provided EPA under § 3008(a)(2) of RCRA in States with either type of authorization. EPA can use this enforcement authority and will not hesitate, under appropriate circumstances, to enforce directly against any facility or activity violating the Federal standards.

Manifests. To satisfy the operational requirements specified in § 123.30, a State need not have an operating system for controlling manifests during the period of interim authorization. However, a State must have adequate legislative authority and should be capable of commencing routine operation of the manifest system, reporting, and recordkeeping immediately after full authorization. It is important for the regulated community to note that although the manifest system control is not a requirement for interim authorization, manifests must nevertheless be prepared and used in a State with interim authorization. In conjunction with the management of the information reported through the manifest system, the Agency is developing an Automated Data Processing (ADP) system which will be made available to the States. Use of the ADP system by the States is optional.

Free Movement of Hazardous Wastes. A decision by the United States Supreme Court (*City of Philadelphia* v. *New Jersey*, No. 77–404, June 23, 1978), invalidated New Jersey's ban on the importation of wastes for disposal on the grounds that it imposed an undue restraint on interstate commerce. Based on this decision, it is reasonable to assume that other present and future interstate waste importation bans would likewise be struck. The Agency, therefore, has chosen to propose a provision in these regulations which would deny authorization to any State with such a ban.

Furthermore, States should note that section 112 of the Hazardous Materials Transportation Act (HMTA) of 1974 (Pub. L. 93–633) prohibits a State (or its political subdivisions) from imposing requirements which are inconsistent with the Federal Department of Transportation (DOT) regulations. In addition, HMTA authorizes DOT to preempt any State requirement if such requirement places an unreasonable burden on commerce. DOT, however, can only preempt State regulations for which DOT has existing authority and standards. State regulations are not preempted if they afford an equal or greater level of protection to the public and do not unreasonably burden commerce. If preemption occurs, *only the standard* that places a burden on commerce would be preempted, *not the entire program.*

Partial Authorization. Approximately three-quarters of the comments received on partial authorization provision, which were included in the February 1, 1978 proposal, were opposed to partial authorization on the grounds that it would be burdensome and confusing to the regulated community. EPA understands these concerns and has decided not to include the "partial authorization" provision in this proposed rule. The Agency intends to enter into cooperative agreements with States to allow States to participate fully in the program as administered by EPA until such time as the State becomes eligible for authorization. Similar arrangements with several States have worked well for the NPDES program.

Interim Authorization. Section 3006(c) of RCRA (as recently amended by Pub. L. 95–609) provides for a "interim authorization" of State programs for up to two years "beginning on the date six months after the [*actual*] date of promulgation of regulations under sections 3002 through 3005." [Emphasis added.] This interim authorization could be granted to States with a hazardous waste program *substantially equivalent* to the Federal program existing "pursuant to State law before the date ninety days after the [*actual*] date of promulgation of regulations" under sections 3002 through 3005 [Emphasis added]. The recent amendment to RCRA (Pub. L. 95–609) allows the cutoff dates for the existence of State legislation and the onset of the interim authorization period to be related to the promulgation of the bulk of EPA's other Subtitle C regulations. Consequently, the phasing of the application for and initiation of interim authorization is now based on the actual promulgation date of regulations under section 3001 of RCRA, since EPA intends to use this section as the "trigger" for the Federal program. States are encouraged to begin evaluation of their legislation and regulations and to assess the adequacy of their programs. However, EPA will not be able to formally act on applications until after the promulgation of section 3001 regulations (40 CFR 250, Subpart A), due to the lack of a reference point against which EPA can judge a program. In granting interim authorization, EPA will require the State to prepare an "authorization plan" which will describe the additions or modifications to the State programs, including changes needed in State legal authority and a time schedule to achieve changes, so as to enable the State to become eligible for authorization.

The intent of RCRA as expressed in the legislative history of RCRA, was to allow States to develop and implement hazardous waste programs equivalent (not necessarily identical) to the Federal program, thus utilizing the police power of the States rather than creating another Federal bureaucracy to implement RCRA. (House Report No. 94–1491, September 9, 1976, p. 30.) State primacy is a common theme running through the legislative history. (Op. cit., pp. 5, 6, 24 and 29.) Interim authorization was specifically established under section 3006(c) in order to facilitate State assumption of the program. The requirement for interim authorization of "substantially equivalent" State programs was used "* * * (1) so that existing progress in the area of State hazardous waste law does not come to

an abrupt halt, as has been the situation with the passage of other environmental laws, and (2) to give such States that have begun developing or implementing a hazardous waste program sufficient time to bring such program into conformity with the Federal minimum standards." (Op. cit., p. 29). However, Congress neither defined what a "substantially equivalent" State program was, nor gave further directives as to how EPA was to set such "Federal minimum standards" without disrupting the progress of existing hazardous waste programs.

EPA's proposed approach to this problem (see § 123.12) is as follows: In order to implement RCRA's legislative intent of not disrupting the progress of existing programs, EPA's proposed *minimum* Federal standards for determining "substantial equivalence" (and therefore suitability for interim authorization) would require the States to implement (i.e., regulate and enforce) controls over at least either on-site or off-site disposal of hazardous wastes. (See § 123.32). Note that this is a *minimum* requirement and that during the two-year period States *must implement all* statutory and regulatory hazardous waste management authorities they possess. (For example, States with interim authorization which have the necessary authorities in existence to implement a manifest system and/or control of treatment and/or storage facilities *must do so.* See § 123.34(a)(2)).

Since it is clear that Congress intended this interim period to provide a "grace" period to the States to develop a program suitable for authorization of a full program, the major difference between "equivalent" (section 3006(b)) and "substantially equivalent" (section 3006(c)) State hazardous waste management programs is that the latter program would reflect some of the limitations of existing statutory authority at the State level. Similarly, the degree of stringency of a given regulation may, during this interim period, be less than Federal standards. This temporary relazation from strict "equivalence" to "substantial equivalence" and the corresponding latitude in degree of stringency for the interim period, EPA believes to be consistent with the intent of Congress to facilitate the entry by the maximum number of States into the interim hazardous waste management program, and ultimately, into a full program.

In the wake of such incidents as Love Canal, public pressure for State primacy is increasing. Many States are increasing their commitment of resources and developing programs; at this time, it appears to be more prudent for EPA to be as flexible as possible in order to build on existing State programs, than to hamper their development. The proposed approach should result in a greater degree of protection of public health and the environment than if EPA had to conduct the hazardous waste program in a large number of States.

Before reaching this conclusion, the Agency gave special consideration to two alternatives as requirements for interim authorization. The first was to require States to have authority to control either the on-site or off-site disposal of hazardous waste, while the second was to require authority for broader control. Analysis of current State legislative authority indicates that the first alternative would allow significantly greater State participation in the hazardous waste programs than would the second. Furthermore, it is expected that it will be easier for a State with interim authorization to upgrade its program than it would be for an unauthorized State to take over a full program. On the other hand, there could be a significant risk to public health and the environment in requiring States to control disposal but not treatment or storage. However, it is likely that the degree of protection of public health and the environment which States could offer by carrying out programs controlling disposal while building the other elements would exceed the degree of protection which EPA could offer in attempting to implement a large number of full programs in unauthorized States with limited resources.

Although EPA recognizes that control of treatment and storage facilities, full control of all disposal facilities, and other elements necessary for authorization of a full program (such as implementation of the manifest tracking system) are essential in a full comprehensive program of hazardous waste management, the vast majority of the environmental damage has resulted from improper disposal. EPA also recognizes that the proposed approach does involve some risk that direct control of certain portions of the complete hazardous waste management program could be deferred for as much as two years (the maximum duration of the interim authorization period). For example, according to data based on *national* averages, 80 percent of the quantity of hazardous wastes generated is disposed on-site. These on-site disposal facilites amount for about 90 percent of the total number of disposal facilities in the nation. Current information available to EPA on the status of State legislation and regulations in the 30 States which generate most of the hazardous wastes, indicates that as many as three of these States lack statutory or regulatory authority to control on-site disposal and as many as seven States lack statutory or regulatory authority to control treatment and/or storage. Similar problems might be encountered in the remaining smaller States.

The risk of non-regulation, however, is tempered by several factors. During the first six months after promulgation of section 3001 regulations, EPA will be reviewing proposed State programs as well as conferring "interim status" under section 3005(e) to *all* HWM facilities (see previous discussion of "interim status" under the RCRA portion of the Part 122 preamble). Receipt of the information necessary to confer "interim status" to facilities under section 3005(e) will provide EPA the basis for making an assessment of which facilities may be actual or potential violators of Federal standards under the section 3004 regulations (which call for an extensive set of requirements to be met. (see the interim status facility standards of 40 FR 250.40(c) proposed December 18, 1978, at 43 FR 58996). EPA is empowered by section 3008(a) of RCRA to take direct enforcement action against all hazardous waste management facilities or activities on a case-be-case basis regardless of the type of State authorization conferred. In especially egregious circumstances, EPA also can enforce under the imminent hazard provisions of section 7003 of RCRA. Finally, although direct State oversight of the manifest system is not a requirement for interim authorization, EPA can use its enforcement powers to follow up on noncompliance with national manifest requirements. (See previous discusion of "manifests" under RCRA portion of Part 123 in this Preamble).

Based on current information, it is expected that very few States will be in a position to undertake the full hazardous waste program when the Subtitle C regulations are promulgated. Additionally, some of those States which already have, or which will have, some type of hazardous waste programs when the regulations are promulgated would prefer to control the program from the beginning, rather than assuming a program that has been initiated by or operated concurrently with EPA. The proposed approach will minimize the disruption and uncertainty caused by changing administration of the program.

Comments are requested on the possible alternatives for EPA regulation of activities that are not regulated by the State during the interim authorization period. EPA recognizes the potential problems with this arrangement. This concept resembles that of "Partial Authorization", which EPA rejected for the reasons described above. The new concept also has drawbacks. First, the regulated community has strenuously contended that a single entity should carry out the entire program in a given State, arguing that a sharing of responsibility would result in confusion and duplication of effort for the agencies, and greatly increased complexity for regulated firms. Second, the availability of this arrangement could encourage some States capable of qualifying for authorization, to take over only selected program elements. Third, the delineation of responsibilities between the Region and the State would undoubtedly be a lengthy and difficult process. Finally, the existence of this arrangement could remove some of the incentive for strenuous State efforts toward authorization. However, this alternative would assure more comprehensive control of all hazardous waste facilities during the interim authorization period.

Comments are also requested on the alternatives of requiring control of all disposal, or additional elements of the requirements for full authorization under RCRA, and the impact this would have on State participation.

Federal Role After Program Approval. Many comments were received concerning the Federal role after a State has been authorized as outlined in the February 1, 1978 proposal. EPA has primary responsibility under RCRA for protecting public health and the environment and is charged with developing a consistent and effective national program to meet this responsibility. Thus, in authorizing State programs EPA's prime concern is to ensure that the State program is at least as effective in controlling at least the same universe of hazardous wastes as does the Federal program. The purpose of EPA's oversight activities, subsequent to authorization of a State program, is to ensure that State programs are being operated in accordance with these regulations.

Federal oversight of State programs is conducted in a number of ways. The Agency has encountered much interest and comment from States and others on three specific aspects: reporting, review of permits, and facility inspections.

With regard to reporting, the Agency has chosen to reduce the number and complexity of the reports required in these regulations. Quarterly reports that will be required are: a list of major facilities out of compliance, and a summary of international shipments of wastes. For States with Interim Authorization a semi-annual report on progress toward attaining authorization will be required. Finally, an annual report, including a list of permit actions completed and summary information on wastes managed (quantities, types, method of management) is also required. It should be recognized that EPA has a responsibility to develop and maintain a national data base on the generation and management of hazardous wastes. It may be necessary to negotiate additional reporting requirements in the Memorandum of Agreement in particular cases, such as in a State with an unproven program. The Memorandum of Agreement is a more flexible document than these regulations, and can be changed to accommodate expected changes in the need for nationally significant information.

Concerning review of permits, the Agency could not possibly review all permits issued by a State, nor is such a review necessary or desirable. Therefore, EPA will only review a sufficient number of permit applications and draft permits to assure that the State permit program is being operated in a sound manner consistent with the requirements of these regulations. Accordingly, these regulations require that authorized States forward to EPA copies of permit applications, and draft permits for major facilities only. (The definition for "major" facilities is discussed earlier in the preamble). Normally, the number of draft permits or permit applications reviewed by EPA should amount to about 10 percent of the total number of permits processed. In some cases, where a history of sound program administration by a State exists; EPA may agree to reduce this level of review even further. In others, for example, where a State program is new and inexperienced, the Regional Administrator may choose to review some minor permits as well. In either case, such agreements should be contained in the Memorandum of Agreement.

These regulations in § 123.38 specify the bases on which EPA will comment on permit applications and draft permits. Reasons for each comment will be given as well as recommendations for actions to be taken by the State Director to address each comment. The State Director is also provided with the opportunity to respond to EPA's comments.

In regard to EPA's conducting inspections of facilities, § 123.27 specifies the provisions which will be included in the Memorandum of Agreement, normally including notification before EPA conducts inspections, and opportunity for States to investigate situations where EPA has reason to believe that violations may be occurring.

Comments are solicited on the practicality and impact of these and other oversight procedures.

National Enforcement Information System. EPA is aware of the need to centralize reported information concerning hazardous wastes by both the Agency and authorized States. It is necessary for enforcement compliance monitoring purposes to have a single system which contains all this information. Therefore, EPA is considering requiring, as a condition of authorization, that each State applying for such authorization either (1) agree to insert its reporting data directly into EPA's national ADP system (discussed earlier in the preamble under *Manifests*) or (2) allow EPA to so input the data for the State. The National ADP system is being designed so that any such State may use this system for its own purpose. Comments are solicited on the advantages and disadvantages of such a requirement.

Subpart C

Subpart C sets forth additional requirements for State programs as well as the procedures EPA will use in taking the required approval, disapproval or partial approval actions on UIC programs under sections 1422(b) and (c) of SDWA.

Elements of an Approvable State UIC program. In order to obtain EPA approval for primacy, a State must demonstrate the ability, adequate legal authority and resources to implement the following program elements:

- Designate underground sources of drinking water within the State;
- Develop and maintain an inventory of injection wells;
- Issue permits or rules that incorporate requirements of Part 146;
- Issue permits which include conditions that incorporate UIC requirements for monitoring, recordkeeping and reporting by the permittee;
- Conduct a program of enforcement, inspection and surveillance of injection well facilities.

EPA-approval. The Administrator is to approve, disapprove or partially

approve State participation in the UIC program within 90 days of the receipt of a complete State application by the State. Prior to ruling on the application, EPA must also provide the opportunity for public comment and hearings.

A State need not develop a regulatory program for a type of injection well that does not exist in that State. In such case, however, the States must show it has adequate legal authority to initiate a control program should such wells seek to operate in the State in the future. Comments are solicited on this approach. EPA is particularly concerned whether States could develop a control program quickly enough to issue proper regulations where a new type of well injection operation commences in a State.

Unlike the other programs covered by this Part, EPA may in its discretion, approve a State UIC program in part. In the case of partial approval, the Agency's intention is to approve only a complete program by type of well. In other words, EPA would authorize a State to regulate, for example, Frasch process mines or hydrocarbon storage wells if it had the necessary legal authority and were prepared to carry out the full range of regulatory requirements applicable to such wells. However, the Agency does not intend to approve a portion of a State program if the program provides only for partial regulation, i.e., it provided for State issuance of permits to Frasch process wells but left enforcement up to EPA. The Agency believes that this approach is sensible from an administrative point of view and is least confusing to the regulated community and public. Comments are solicited on the advisability of this approach.

Finally, it should be noted that the 1977 amendments to the Safe Drinking Water Act have clarified State authority over Federal facilities within its boundaries (sections 1477(a) and 1422(b)(1)(D) of SDWA). Nonetheless, management of wells on Indian lands remains an EPA responsibility unless the State has adequate authority to implement the program (SDWA section 1477(c)).

In cases where the State is developing an application for primacy, EPA intends to promulgate the UIC program for which it is responsible (i.e., on Indian lands) at the same time as the approved State program becomes effective. In cases where a State program is disapproved, EPA will promulgate a UIC program within 90 days from disapproval in whole or in part. If a State informs EPA that the State does not intend to adopt a UIC program, EPA will promulgate the whole UIC program for the State within one year (270 days plus 90 days approval process) of the effective date of these regulations or of 40 CFR Part 148 (proposed at 44 FR 23738 (April 20, 1979)), whichever is later.

Oversight—EPA has a statutory duty to oversee State UIC Programs. To enable EPA to carry out this responsibility, Part 123 requires States to provide to the Agency the following:

- Access to State files and documents;
- Annual reports;
- Quarterly reports on the compliance status of major wells;
- A mid-course review after the first year of program operation to assess the requirement to perform corrective action in the area of review. The State analysis will be used by EPA to assess the associated costs and environmental benefits, and may result in appropriate changes in the requirement.

In addition, under SDWA the Agency is given the authority to enforce against program violations if the State fails to enforce adequately.

Procedures for the withdrawal of approval from a State program provide the State with the opportunity to present its case that withdrawal is not warranted. If the Administrator has cause to believe that a State is not in compliance with the SDWA or these regulations, he must give the State 30 days of notice to demonstrate its compliance. If not satisfied, the Administrator must convene a public hearing not less than 60 days after notice of the hearing. If, after the hearing, the Administrator concludes that the State is not in compliance, he must notify the State of the particulars. The State then has 90 days to give up the program or come into compliance. This process for withdrawal is different from the withdrawal process for the other programs covered by Part 123 because of the difference in the statutes involved.

Subpart D

This Subpart sets forth requirements which are unique to the NPDES which supplement the Subpart A requirements. For a further discussion of the NPDES requirements see the preamble to those regulations.

Subpart E

The first 14 sections (§§ 123.9–123.104) of this Subpart were promulgated in Part 123 of the NDPES regulations and, like Subpart D, are discussed in the preable to those regulations. The only exceptions are § 123.98, transmission of information to EPA, which has been changed and § 123.99, which is now contained, in changed form, in § 123.110. The remaining sections (§§ 123.105–123.112) are being proposed for the first time and were to be promulgated as Part 126 until the decision was made to incorporate it into these consolidated regulations. There will be no Part 126.

Although the final NDPES regulations specify that State section 404 programs must designate one agency to be responsible for issuing permits (§ 123.4(b)(1)), the Agency is reconsidering this position and invites further comment on this requirement (§ 123.95(a)). In particular, the Agency would like to receive comments on whether such a requirement would interfere with State efforts to coordinate and consolidate their own permit programs.

The following are major provisions of Subpart E:

Application procedures § 123.105. The specific information required of all applicants is discussed, as well as general application procedures. Public notice must be published for all permit applications, except when a draft permit must be prepared, and all permit denials. Since, in most instances, EPA and the public will review only permit applications, detailed application information is required.

Draft permits. Section 123.98(c) provides that the State section 404 programs may circulate permit applications for public and EPA review and comment, in most instances. However, in some cases the State will be required to reach a tentative determination and formulate a draft permit (where the tentative determination is to issue a permit) for public and EPA review and comment. (It should be noted that all the other programs covered by these proposed consolidated regulations are required to formulate draft permits in all cases.)

Draft State 404 permits are required for:

(1) Discharges which may affect the waters of another State;

(2) Major discharges;

(3) Discharges into critical areas such as National Parks and Wildlife refuges;

(4) General permits; and

(5) Discharges containing toxic pollutants in toxic amounts and hazardous substances in reportable quantities.

Comments are solicited on this list (which is also the list of activities for which EPA will not waive its right to review State permits). In particular, EPA would appreciate comments on the following issues:

(1) What discharges should be considered "major"? In this regard EPA is considering acreage limitations which might vary in different parts of the country. Other discharges may be considered major based on different criteria.

(2) Should the list of critical areas be expanded to include others?

(3) Are the criteria that toxic pollutants be present in *toxic amounts* and hazardous substances in *reportable quantities* proper? EPA believes that a cut-off is necessary since many discharges which contain trace quantities of these substances are not of concern. In addition, the criteria must be clearly defined and workable. On this basis, EPA rejected formulations of this language which were couched in terms of "significant" of "substantial" since these may not be readily meaningful in the context of a particular discharge.

Waivers. EPA solicits comments on the extent to which the Agency should continue to receive permit applications and permits from a State for those discharges the Agency has waived review.

General permits. Procedures for public notice of proposed general permits, review of proposed permits, issuance and enforcement are included in § 123.108.

Coordination procedures. The State Director must assure coordination of permit with appropriate Federal and Federal-State water-related planning and review processes, as required by section 404(h)(1)(H) of CWA. Requirements for implementing such coordination are in § 123.110.

Review procedures. All permit applications or draft permits are subject to review by EPA and the public (although under § 123.92 EPA may waive such review in many cases). During the review process, the Regional Administrator provides opportunity for comment by the Corps of Engineers, the Fish and Wildlife Service and the National Marine Fisheries Service, as well as from other interested Federal agencies, and these must be considered in his or her review.

Waters Subject to State Regulation

Under section 404(g)(1) of CWA, the Corps of Engineers will, in all cases, retain jurisdiction over dispsal of dredged or fill material into those waters of the United States, together with their adjacent wetlands, that are subject to the ebb and flow of the tide and/or are presently used, or may be susceptible to use for interstate transport or foreign commerce. A State may apply for a section 404 authority to regulate all other waters within the State. As a prerequisite for program approval (§ 123.93) an agreement is required between the State and the Corps of Engineers, which sets forth a description of those waters over which the Corps of Engineers will retain jurisdiction, and those waters over which the State will have jurisdiction.

Major Issues

(1) An earlier formulation of these regulations provided for preparation by the States of a draft and proposed permit prior to Federal review. Several reviewers expressed concern that processing procedures, and in particular, the processing schedule for permits, were unnecessarily lengthy and complex. EPA's specific concerns (based on comments received) included:

(a) The three-stage process would substantially extend the time required to process applications. The 1977 amendments to the CWA, together with its legislative history, establish a strong sense of Congressional insistence on the elimination of unnecessary delay in section 404 permit processing.

(b) Due to the nature of activities regulated under section 404, EPA believes that public participation and right to comment will usually be adequate if the permit application is circulated rather than a draft permit.

The proposed regulation has been redrafted to eliminate the "draft permit" and the "proposed permit" stages in most instances, except as described above, and thus to provide for public and agency review input during a single continuous period that normally will not exceed 90 days from receipt of the permit application. Safeguards were added to ensure that permit applications are complete. To ensure that there is adequate basis for review of specific projects provision was made for the Regional Administrator to require submission of additional information, including a draft or proposed permit where appropriate. EPA believes that this process more nearly accords with the overall Congressional emphasis on timely processing of section 404 permit applications, and is consistent with meaningful review. However, this approach differs from the other programs under this part, which require preparation of a draft permit in all cases as a basis for public comment. Comments on this issue are solicited.

(2) By far the most controversial issue raised in the review of this proposed regulation was the interpretation of section 404(f)(1)(A) of the Clean Water Act, as treated in § 123.107 of the proposal. Section 404(f)(1)(A) provides that discharges of dredge or fill material in connection with certain activities enumerated in section 404(f)(1)(A) through (F) are not subject to regulation under the 404 program, with the caveat in section 404(f)(2) that any discharge of such material incidental to any activity having as its purpose to bring an area of navigable waters into a use to which it was not previously subject, where the flow or circulation of navigable water may be impaired or the reach of such waters may be reduced, will require a 404 permit.

The background and legislative history of section 404(f)(1)(A) is exceedingly complex and has led to several schools of thought on what the section really means. At one extreme, proponents of a liberal interpretation argue that section 404(f)(1)(A) exempts all, or virtually all, discharges of dredged or fill material associated in any way with agricultural, silvicultural, and ranching activities, except where such activities are recaptured by section 404(f)(2). Under this view, neither the word "normal" nor the specific activities listed significantly limit the scope of the exemption. A more moderate view is that the word "normal" is intended to signify that the exempted farming, silvicultural, and ranching activities must be established and ongoing, and that the exemption only extends to the particular activities named in the statute or other activities of similar character. At the other extreme, proponents of a conservative interpretation take the view that section 404(f)(1)(A) refers to activites which do *not* involve discharges (either because no earth is moved, there is no point source, or no waters of the United States are involved), and that such activities are not merely exempt (e.g., still subject to (f)(2), but rather are excluded entirely from regulation under section 404. Under this view, activities which are not excluded will always need a permit. There are several variations of these interpretations which incorporate components of both the exclusion and exemption approaches and construe the listed activites in various ways. The interpretation of section 404(f) is exceptionally complex, especially since no one view is consistent with both the literal language of the statute and all the often ambiguous and conflicting legislative history.

These regulations follow a middle ground. Section 123.107 specifies that any discharge "that may result from" the named activities "is not prohibited by or otherwise subject to regulation," except when recaptured by the provisions of section 404(f)(2). The proposed

regulation defers to the language of the statute, which when taken literally, clearly contemplates that discharges of dredge or fill material may occur in conjunction with the activities listed in (f)(1)(A). The practical effect of this language is to assure that such activities are not subject to the permit requirement, whether or not any actual discharge or dredge or fill material is associated with them. Consistent with section 404(f)(2), however, the regulation precludes any such exemption where an activitiy involves the discharge of materials containing any section 307(a) toxic substance; or, any discharge incidental to an activity which converts waters of the Untied States to new uses, where flow or circulation may impaired or the reach of the waters reduced.

The proposed regulations interpret the exemption in 404(f)(1)(A) as applicable only to the activities *named* in the statute and other activities of essentially the same character as those named. This interpretation derives from the "such as" language of (f)(1)(A), which in EPA's view, precludes the extension of the exemption for "normal farming, silvicultural, and ranching activities" to activities that are unlike those named. Support for this position is seen in paragraphs (C) and (D) of subsection (f), which provide for specific farming and silvicultural exemptions in addition to those in (f)(1)(A). If (f)(1)(A) intended an across-the-board exemption for agricultural, silvicultural, or ranching practices, there would have been no need for the additional specific exemptions of (f)(1) (D) and (E).

Part 124—Procedures for Decision-making

What Does This Part Do?

Proposed Part 124 establishes the procedures EPA will use in issuing RCRA, UIC, PSD and NPDES permits either separately or in combination with each other. It sets the framework for receiving permit applications, writing draft permits, soliciting public comment on them, and issuing the final permit. Where NPDES permits are concerned, this Part also contains the procedures for conducting evidentiary hearings. These include both procedures for the traditional evidentiary hearing (Subpart E) and special procedures for "initial licensing" (Subpart F). (As discussed below, EPA believes that evidentiary hearings are not required for issuance or modification of RCRA, UIC and PSD permits.) Some of the requirements of this Part are made applicable by Part 123 to States with approved permit programs.

In addition, this Part includes procedures for issuing permits implementing the "prevention of significant deterioration" (PSD) provisions of the Clean Air Act. These procedures are very similar to those presently contained in 40 CFR 52.21(r). No parallel requirements have been included in Parts 122 and 123 because the established mechanisms for approving State programs under the Clean Air Act are somewhat different from those for approving other permit programs. Consolidating the procedures is the aspect of consolidation with most immediate benefit to those affected; EPA will explore the possibility of more comprehensive consolidation in the future.

Subpart A

Basic Permit Issuance Procedures

Under the permitting procedures established by the Part, permits must first be applied for in accordance with permit application requirements set forth in Part 122, (or 40 CFR 52.21 in the case of PSD permits). After receipt of a complete application a draft permit will be prepared under § 124.6. This permit must be accompanied by a "fact sheet," for "major" permits, explaining the basis for the draft permit in some detail under § 124.9. A "statement of basis" must be prepared for all other permits under § 124.8. Because there are practical limits to EPA's ability to explain each of the permits it issues in comprehensive detail, the discussion in the fact sheet or statement of basis should be proportional to the importance of the issues involved and the degree of controversy surrounding them. Modifications to permits and processed as draft permits in accordance with § 124.6, under the requirements of § 124.5 and § 124.7, except or minor modifications as described under § 122.9(g).

Under § 124.10, an "administrative record" must be assembled, containing appropriate supporting documents. When the draft permit has been formulated and public notice is issued under § 124.11, §§ 124.12 and 124.13 provide for a comment period and, in suitable cases, a public hearing. This process will provide a forum for any interested persons to bring forward any comments or questions they may have about the draft permit or its supporting materials. After the comment period has closed, EPA will prepare and issue the final permit under § 124.17. It will be accompanied by a response to all the significant comments received under § 124.19. This response to comments plus any additional supporting material will constitute a final administrative record for the final permit under § 124.20. When the final permit has been issued, there will be an opportunity under § 124.21 for discretionary review of RCRA, UIC and PSD permits by the Administrator. In the case of NPDES permits, there will also be an opportunity for an evidentiary hearing and opportunity for appeal to the Administrator following the evidentiary hearing under Subpart E or F.

A few of the provisions of Part 124, particularly those affording basic public participation in permit issuance, are applicable to State programs (except for State PSD programs). States must prepare a draft permit, provide public notice and opportunity for a hearing and allow the public 30 days to comment on the draft permit before final permit issuance. A statement of basis or fact sheet (for major permits) is also required.

Hearing Requirements for RCRA, UIC, PSD and NPDES Programs

The procedures for issuing RCRA, UIC and PSD permits are relatively more simple than those for NPDES permits both because the programs are newer and because the underlying statutes are not as detailed as the applicable provisions of the Clean Water Act. The major difference between the procedures for these three programs and those for the NPDES program is that no provision for the traditional form of evidentiary hearing is made for RCRA, UIC or PSD permits, while a full evidentiary hearing (under Subpart E or F) is required for NPDES permits.

Three Courts of Appeals have held that the Clean Water Act requires an evidentiary hearing before NPDES permits can be issued. However, these decisions rested largely on specific interpretations of the language of the Clean Water Act, and EPA does not believe that the other three statutes contain analogous provisions. To the extent the decisions expressed a broader concern for reasoned and documented decision-making, EPA shares that concern and believes there are alternative and preferable ways of satisfying it.

Unlike the Clean Water Act, the Resource Conservation and Recovery Act does not explicitly require any "hearing" at all before issuing permits. Section 3008(b) of RCRA provides what EPA interprets to be an adjudicatory hearing for permit revocation, but neither this section nor any other

provides any procedures for permit issuance.*

Similarly, there is no requirement in section 1422 of the Safe Drinking Water Act that any hearing is a prerequisite to EPA issuance of a UIC permit. Where Congress intends that a hearing must precede issuance of a permit, the intention is manifest in the language of the Act, as in the requirement for a hearing on the record for State permitting under section 1421(c)(2) (temporary permits) and section 1424 (interim permits). Additionally, since section 1421(b)(1) of SDWA authorizes State regulation of underground injection by rule as well as by permit, Congress could not have intended for informal rulemaking procedures to apply to the former, but trial-type procedures to apply to the latter.

Section 165 of the Clean Air Act does require a hearing before PSD permits are issued, but the text of the statute makes clear that a formal adjudicatory hearing was not intended. See 165(a)(2). No person who commented in the extensive rulemaking leading up to promulgation of EPA's current PSD regulations alleged that the statute required a formal hearing.

When the statute does not require any hearing at all, the traditional rule of thumb is that evidentiary procedures are not required even for licensing. EPA takes the silence of these statutes on necessary EPA permitting procedures (or the explicit rejection of adjudicatory hearings, in the case of PSD), as an invitation to the agency to develop permitting procedures that are expeditious and informal and still satisfy the requirements of due process and sound administrative procedure. Accordingly, EPA has developed the procedures in these proposed regulations which are described below. These should be enough to allow a thorough ventilating of the facts and policy choices at issue in any permit proceeding.

Coordination of One Permit Program With Another

A major purpose of these regulations is to provide as much coordination as feasible between the permit programs covered. To some extent, this should be accomplished simply by the parallel structure of these regulations in general, and of the common procedures in Part 124 in particular. In addition, these regulations provide several specific mechanisms for closer integration of permit decisions.

Under § 124.4, facilities or activities which will need a permit under more than one of the programs covered will be able to delay filing the applications due first in order to consolidate them with the application due last, by providing EPA with written notice of intent to delay the filing date. Part A applications under the RCRA program are excluded from this provision because the submission of a Part A RCRA application triggers interim status under section 3005 of RCRA, and interim status is only available for a limited period. PSD applications are also excluded from this provision. Because EPA is currently allocating increment on a first-come, first-served, basis (43 FR 26401, June 19, 1978), postponement of a source's application date could cause delay in processing later applications from other sources. This provision could also present an opportunity for abuse by applicants seeking unfairly to reserve increment in the future and to escape the requirements imposed for construction of a source that would affect certain non-attainment areas after July 1, 1979. Such an applicant could attempt to unfairly reserve increment and escape the July 1 deadline by claiming that since its full application had properly been postponed under this section, it should be treated as having been filed earlier. EPA specifically solicits comments on this exclusion of the PSD program. EPA solicits comments on this general approach, and whether there are certain other categories of permit applications that should not be delayed for purposes of consolidation.

The regulations provide explicitly for joint issuance of draft permits for a facility or activity which requires permits under more than one statute, joint comment periods, and joint hearings. Where EPA is issuing all the permits, it may elect to choose this consolidated route at any time. Where responsibility is divided between EPA and a State, the regulations encourage such joint proceedings by mutual agreement. EPA solicits comments on this approach, and whether there are certain other categories of permit applications that should not be delayed for purposes of consolidation.
